This bulletin for the two academic years beginning September 1, 1997, contains University regulations and information about the programs and courses offered by the College of Arts and Sciences, School of Education and Social Policy, Robert R. McCormick School of Engineering and Applied Science, Medill School of Journalism, School of Music, School of Speech, and other undergraduate programs. Northwestern University reserves the right to change without notice any statement in this bulletin concerning, but not limited to, rules, policies, tuition, fees, curricula, and courses.

**NOTE:** Before the end of spring quarter, students planning to graduate in June or August 1999 must file an application for a degree in arts and sciences, education and social policy, journalism, music, or speech at the Registrar’s Office. Others must file at the appropriate school office. Students completing requirements in December or March should file an application for a degree one year in advance.
## Academic Calendar

### Academic Year 1998–99

#### Fall Quarter

**September 1998**
- 1 Tuesday  Tuition due
- 14 Monday  New Student Week begins
- 17 Thursday  Registration for fall quarter begins
- 18 Friday  Registration for fall quarter ends
- 22 Tuesday  Classes for fall quarter begin 8 a.m.
- 28 Monday  Last day for late registration, adding any course, or changing a section (no refund or bill reduction made on any change of registration after this date)

**October 1998**
- 30 Friday  Last day for dropping any course (no tuition adjustment after Monday, September 28)
- Last day to withdraw without academic review
- No refund on tuition for students withdrawing from the University after today

#### Winter Quarter

**January 1999**
- 4 Monday  Tuition due
- Classes for winter quarter begin 8 a.m.
- Registration for winter quarter
- Last day for late registration, adding any course, or changing a section (no refund or bill reduction made on any change of registration after this date)

The University

T he M ission of Northwestern University
The mission of Northwestern University is to establish and enhance excellence in its academic and professional programs. This includes superior undergraduate education for a highly selective student body in a comprehensive range of academic and professional fields. At the graduate level, Northwestern’s role encompasses offerings in the major academic and professional fields, closely related to research, creative activities, and clinical services. The research program at Northwestern is a major component of University efforts, assuring institutional leadership in scientific discovery, intellectual inquiry, and creative performance. The character of this research shapes all areas of University endeavor, especially graduate education as well as undergraduate studies.

In its effort to fulfill its unique potential for combining the best features of world-class research institutions with the advantages of smaller, teaching-oriented schools, Northwestern seeks to maintain the highest standards of teaching excellence in all divisions of the University. Teaching is given significant weight in faculty personnel decisions, and special programs have been instituted to strengthen and reward the teaching skills of faculty members.

Through teaching and research, the University also serves society. Northwestern continues its commitment to diversity in its student body. Further, it is the role of the University to participate vigorously in discussions of important public policy issues and to engage in selective, cooperative ventures with government and private organizations external to the University.

The Goals of Undergraduate Education
Consistent with its dedication to excellence, Northwestern provides both an educational and an extracurricular environment that enables its undergraduate students to become accomplished individuals and informed and responsible citizens. To the students in all its undergraduate schools, Northwestern offers liberal learning and professional education to help them gain the depth of knowledge that will empower them to become leaders in their professions and their communities. Furthermore, Northwestern fosters in its students a broad understanding of the world in which we live as well as excellence in the competencies that transcend any particular field of study: writing and oral communication, analytical and creative thinking and expression, quantitative and qualitative methods of inquiry.

Northwestern expects its graduates, by their experiences in the classroom and in their lives on campus, to have developed the attributes of an educated person: responsibility, both personal and social; critical ability; scientific, technological, and aesthetic awareness; reflectiveness; creativity; and commitment to learning as a lifelong process.

Undergraduate education at Northwestern strongly reflects the University’s commitment to excellence in teaching and scholarship and its conviction that at a great university students also will learn from each other, both within the classroom and beyond it. The goal each year is to enroll a class of talented young men and women who not only will take full advantage of the University’s resources and location but also will challenge the faculty and each other to keep the enterprise of learning a rich and vital activity. The hallmarks of education at Northwestern, throughout its undergraduate schools, are its dedication to liberal learning and its insistence that students have the opportunity to work with teachers who are active and distinguished scholars.

Although the University shares with other institutions an investment in the traditional components of undergraduate education—particularly the intellectual range of general education requirements and the advanced work of departmental majors—it also prides itself on making unusual academic opportunities available. At Northwestern, students regularly study with senior faculty members, whose scholarship often crosses the boundaries of a single discipline. Students also are encouraged to pursue independent study and research within their fields.
of specialization. Through its commitment to a variety of innovative and often interdisciplinary programs and a renewed emphasis on international studies, Northwestern provides its students with the knowledge and skills that allow them to become leaders in their chosen careers as well as thoughtful and sensitive global citizens with a commitment to learning as a lifetime experience.

To attain these goals, Northwestern recruits students of demonstrated academic achievement from diverse social, ethnic, and economic backgrounds. Diversity is taken very seriously on campus. Northwestern is committed to a classroom and living environment in which students learn to understand and respect the rights and beliefs of others. Northwestern also ensures that students will actively participate in molding their own undergraduate experience. One of Northwestern’s strongest traditions is the energetic involvement of its undergraduates in campus life, a tradition that often leads them beyond the campus itself as they explore the rich cultural, political, and intellectual life of Chicago. In both its academic and extracurricular programs, Northwestern encourages its students to develop a sense of responsibility, to obtain a broad understanding of the world in which they live, and to cultivate those abilities—of critical inquiry, creativity, and reflectiveness—that characterize an educated person. The University places particular value on the ability of its undergraduates to communicate effectively, to interpret the developments in science and technology that shape our changing world, and to use the techniques of quantitative analysis that are necessary to effective professional and social life. Northwestern believes that knowledge—of ourselves as well as others—provides the foundation of personal as well as professional growth. Armed with the knowledge and habits of mind they acquire at Northwestern, graduates are prepared to formulate ambitious goals and make intelligent choices for themselves and their society.

An Overview of Northwestern

Northwestern University was established in 1851 by nine members of the Methodist faith: a physician, three attorneys, two businessmen, and three clergymen. The founders’ immediate goal was to create an institution of “the highest order of excellence” to serve the people of the original Northwest Territory (Ohio, Indiana, Illinois, Michigan, Wisconsin, and part of Minnesota). On the date of its founding, Northwestern had no faculty, students, campus, or buildings and only $9.92 in the treasury.

In 1853, as a site for the new University, the founders purchased a 379-acre tract of farmland along Lake Michigan 12 miles north of Chicago—then a thriving frontier city. The town that grew up around Northwestern was named Evanston to honor one of the University’s most prominent founders, John Evans. A well-known physician and researcher, who taught at Rush Medical College in Chicago, Evans established the first Indiana mental hospital and organized the Illinois Medical Society. Evans also became a successful real estate speculator and railroad builder and served as governor of the Colorado Territory, where he helped to found the University of Denver. Evans was a continuous contributor of his time, energy, and money to Northwestern, serving as chairman of the board from the founding of the University in 1851 until his death in 1897.

Having completed its first building in the fall of 1855, Northwestern’s College of Liberal Arts opened its doors with two faculty members and ten male students. A pioneer in the education of women, Northwestern first enrolled female students in 1869. With the 1873 merger of Northwestern and the Evanston College for Ladies, Frances E. Willard became the first dean of women. By 1900, Northwestern was composed of not only a liberal arts college but also six undergraduate and graduate professional schools, including the schools of law, medicine, and dentistry, with 2,700 students, 680 acres in Evanston plus properties in Chicago, and an annual budget of more than $200,000. Thus, by the year of Evans’s death, Northwestern had made considerable progress toward the founders’ initial goal of creating a genuine “university.”

With the establishment of the Graduate School in 1910, Northwestern, like Johns Hopkins and other major institutions, adopted the German university model of providing graduate as well as undergraduate instruction and stressing research along with teaching. Today, Northwestern is a major private research university with 12 academic divisions located on two lakefront campuses in Evanston and Chicago, 2,044 full-time faculty and 13,618 full-time students, approximately 7,570 of whom are undergraduates.
on the Evanston campus, and an annual budget exceeding $803 million.

Education at Northwestern since its founding has been based on the liberal arts as administered through the University’s oldest school, now called the College of Arts and Sciences. In addition to completing the requirements for a major field of specialization, all undergraduates must participate in a program of general education, which has recently been restructured and reaffirmed. The main academic linkages between the divisions of the University are the basic departments in the College of Arts and Sciences and the research centers, which foster interdisciplinary study across department and school lines.

While the liberal arts are its foundation, Northwestern is known also for its strong professional programs. Its undergraduate schools offer excellent programs in the visual and performing arts, journalism, engineering, and education. In addition, interdisciplinary and cross-school programs such as the American Studies, Mathematical Methods in the Social Sciences, Integrated Science, Integrated Arts, Music Theatre, and Undergraduate Leadership programs provide unique opportunities for undergraduates to enjoy a broad and rich educational experience. Other significant opportunities offered by the University include the five-year cooperative engineering education program and the seven-year Honors Program in Medical Education.

Northwestern is a member of the Association of American Universities—the 29 private and 31 public universities that constitute the nation’s most distinguished educational institutions as defined by the quality and scope of their research and graduate programs. Recent assessments of the quality of faculty research and doctoral programs include the comprehensive rankings of basic disciplines conducted by the National Research Council (1993). According to this assessment, Northwestern has one program in the top 5 and one in the top 10 nationally, plus one doctoral program in the top 5, five more in the top 10, four more in the top 15, two more in the top 20, and seven more in the top 25 nationally. Over the past decade Northwestern’s J. L. Kellogg Graduate School of Management has been consistently ranked among the nation’s top six graduate business schools in surveys conducted by Business Week and by U.S. News & World Report.

In American universities, faculty prominence is based primarily on research, which is highly integrated with graduate education because graduate training is, to a large degree, apprenticeship in research. However, a factor that distinguishes Northwestern from other major research universities is that all faculty members not only perform research but also teach, the majority at the undergraduate as well as the graduate level. Even full professors, the most senior faculty, teach undergraduate courses, with approximately 90 percent doing so each year. No university of comparable size has a research faculty that provides such a range of academic programs and such direct access through instruction.

In support of the faculty’s commitment to innovative instruction, the University recently completed installing a fiber-optic network that connects all academic and administrative buildings and residence halls. Classroom experiments with the new technology involved more than a thousand students during the first quarter the network was operating. Now, from their own room or a microcomputer lab, all students may enhance their learning by participating in campus-based electronic discussion groups and by exploring the array of electronic resources available through the Internet. These innovative approaches to learning are energized by the presence at the University of a leading center on the cognitive sciences, with a primary goal of enhancing the quality of education by applying theories of learning to the design of educational software.

Northwestern strives to offer high-quality education while adhering to a program of careful financial management. In overall quality, U.S. News & World Report recently ranked Northwestern ninth among national universities. The fiscal health of the University is reflected in the major building and renovation projects undertaken in the past 10 years and the transformation of the Evanston campus on the shores of Lake Michigan into one of the most attractive university campuses in the nation.

In recent years, the cumulative rate of freshmen graduating from Northwestern has increased:

Schools and Divisions

The undergraduate schools offer the programs and courses of instruction described in the respective sections of this catalog. Undergraduate study may lead to the bachelor's degree as a final academic goal or to advanced work toward a graduate or professional degree.

Evanston Campus

The schools and other institutional divisions, in order of establishment, are as follows:

- The College of Arts and Sciences (1851) offers the degree of bachelor of arts. Through University College, the College of Arts and Sciences also offers the degrees of bachelor of philosophy and bachelor of science in general studies and two certificates in arts and sciences.
- The School of Speech (1878), with departments of communication sciences and disorders, communication studies, performance studies, radio/television/film, and theater, offers the bachelor of science in speech degree. Through University College, the School of Speech offers the bachelor of philosophy in communication. The school also offers the degree of master of science in communication.
- The School of Music (1895) offers students the degrees of bachelor of music and bachelor of arts in music. In its graduate division, the School of Music offers the degrees of doctor of music and master of music and a certificate in performance.
- The J. L. Kellogg Graduate School of Management (1908) offers the master of management degree. It provides students with the opportunity to study business, health services, manufacturing, public and nonprofit, real estate, and transportation management. In addition to the full-time program, Kellogg also offers a part-time evening degree program (Managers' Program) on Northwestern's Chicago campus and the weekend Executive Master's Program on the Evanston campus.
- The Robert R. McCormick School of Engineering and Applied Science of the Technological Institute (1909) offers the bachelor of science degree in applied mathematics, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, electrical engineering, engineering science, environmental engineering, industrial engineering, manufacturing engineering, materials science and engineering, mechanical engineering, and medical engineering (for students enrolled in the Honors Program in Medical Education). All departments offer advanced study for graduate students. The McCormick School also offers master's degrees in engineering management, manufacturing engineering, and project management and, jointly with the Kellogg School, the master of management in manufacturing.
- The Graduate School (1910) controls all advanced programs leading to the degrees of doctor of philosophy, master of arts, master of fine arts, and master of science. The Graduate School bulletin, describing master's and doctoral programs in all schools and departments, is available on request.
- The Summer Session (1920) provides summer programs for undergraduate, graduate, and visiting students.
- The Medill School of Journalism (1921) offers the degree of bachelor of science in journalism as well as master's degrees in journalism and integrated marketing communications.
- The School of Education and Social Policy (1926) offers the degrees of bachelor of science in education and social policy, master of science in education and social policy, master of arts in learning sciences, and master of science in marital and family therapy.

Chicago Campus

Schools and institutional divisions on the Chicago campus, in order of establishment, are as follows:

- The Medical School (1859) offers the degrees of doctor of medicine, bachelor of science in medicine, master of public health, and master of physical therapy. High school graduates accepted for the Honors Program in Medical Education can receive the M.D. degree from the Medical School seven years after they enter the College of Arts and
because such research often alters theory and practice within a given academic discipline and results in the development of new curricular programs.

Students also are involved directly with the centers through lectures or other special events and, in some cases, through research projects. The University's centers and programs include the following:

• Program of African Studies
• Center for Biotechnology
• Center for Catalysis and Surface Science
• Center for Circadian Biology and Medicine
• Institute for Health Services Research and Policy Studies
• Center for International and Comparative Studies
• Law and Social Science Program
• Institute for the Learning Sciences
• Materials Research Center
• Center for Mathematical Studies in Economics and Management Science
• Institute for Neuroscience
• Institute for Policy Research
• Center for Reproductive Science
• Science and Technology Center for Superconductivity
• Traffic Institute
• Transportation Center

For detailed information about these centers, see the Graduate School bulletin.

**Libraries**

Undergraduates at Northwestern have access to a wealth of library resources and services. With more than 3.8 million volumes in the University Library system, the Galter Health Sciences Library, and the Law Library, Northwestern offers its students the 10th largest library collection among private universities in the United States. Undergraduates are encouraged to explore the full range of resources available to them and to develop their skills as information seekers.

Northwestern undergraduates have full access to interlibrary loan services and to materials from libraries worldwide. Through the Infopass program, students can gain admittance to other collections in the Chicago area, including those of the Newberry Library, the Field Museum of Natural History Library, the Art Institute of Chicago Library, and other academic and private libraries.
The University Library consists of the main library, which houses the University’s major collections in the humanities and social sciences, as well as several specialized research collections; the adjoining Charles Deering Library, which houses fine arts and other specialized collections; the Seeley G. Mudd Library for Science and Engineering; the Geology Library; the Mathematics Library; and the Joseph Schaffner Library, which supports the research needs of students on the Chicago campus.

The University Library offers many electronic research and textual resources, both within the library and on the campus network. NUcat, the online catalog of the Northwestern University Library and of the United Library of the Garrett Evangelical and Seabury Western Seminaries, provides bibliographic, location, and circulation status information for materials from these libraries. NUcat and many other resources and services are available on the World Wide Web at <http://www.library.nwu.edu>.

Main Library (Evanston Campus)
The main library building houses collections in three research towers: north for the social sciences, east for history and Africana, and south for the humanities.

The main library’s General Information Center and Reference Department, both located on level 1, offer students research assistance and support. The General Information Center, which serves as a gateway to the library, has staff to answer questions and state-of-the-art workstations to access information electronically. The Reference Department offers in-depth research assistance and consultation and instructional services. A 60,000 volume reference collection and many research databases make the Reference Department an important resource.

Also located on level 1 are the Circulation Department, the Current Periodicals Reading Room, the New Book Alcove, the Interlibrary Loan Department, and the Government Publications Department, featuring an extensive collection of federal, state, and international documents. The Government Publications Department is a depository for official documents of the United States, the United Nations, the state of Illinois, and the European Union, as well as selected publications of other international agencies and state and local governments.

On the lower level of the library is the Newspaper Microtext Reading Room, which contains extensive collections of newspapers in print and microform versions and of periodicals and primary research materials in microform. Also on the lower level is the Transportation Library, one of three major collections of its kind in the United States. It specializes in transportation socioeconomics and law enforcement.

The M arjorie Iglow M itchell M ultimedia Center, Forum Room and Video Theater (for special programs and video presentations), Core Collection, Reserve Book Room, a microcomputer lab, and a student lounge occupy level 2. The M ultimedia Center features a videotape collection of classic films, documentaries, and performing arts titles, as well as a multimedia development lab with high-end M acintosh and Pentium workstations for multimedia and Internet projects. The noncirculating Core Collection holds 50,000 books in all disciplines, ensuring easy access and permanent availability of works essential to undergraduates.

Two special units are located on Level 5. The Curriculum Collection houses elementary and secondary teaching materials, courses of study, and children’s literature. The M elville J. Herskovits Library of African Studies (popularly called Africana) is known internationally for its comprehensive collection of materials on every aspect of Africa.

Charles Deering Library (Evanston Campus)
The Charles Deering Library, attached to the main library, houses the Art Collection, University Archives, Charles Deering M cCormick Library of Special Collections, and Mu sic Library and Listening Center. The holdings of Special Collections include 20th-Century Collections, underground press publications, women’s movement literature, and numerous rare books, manuscripts, limited editions, and fine bindings.

The Mu sic Library meets the practical and research needs of students and faculty at Northwestern’s School of Mu sic. This library contains scores, journals, books, and nearly 50,000 sound recordings, which can be heard in the Listening Center.
Computing

Seeley G. Mudd Library for Science and Engineering, Geology Library, and Mathematics Library (Evanston Campus)
The Seeley G. Mudd Library for Science and Engineering houses books and journals in applied mathematics, astronomy, biological sciences, chemistry, engineering, and physics. Two smaller departmental libraries also serve the Evanston campus: the Geology Library in Locy Hall and the Mathematics Library in the Lunt Building.

Joseph Schaffner Library (Chicago Campus)
The Joseph Schaffner Library (Wieboldt Hall, second floor), largely an electronic library, serves University College (the University’s evening degree and continuing education program), the evening Managers’ Program of the J. L. Kellogg Graduate School of Management, and the Medill School of Journalism graduate programs.

Other Libraries
The Galter Health Sciences Library, which serves the Medical and Dental Schools, and the Law Library, which serves the School of Law, are located on the Chicago campus and are open to all Northwestern students. The collections of these libraries are listed in NUcat, the library’s on-line catalog. Materials can be checked out directly or can be sent to Evanston through interlibrary loan.

Also open to all Northwestern students are the outstanding collections on religion held in the United Library of Garrett-Evangelical and Seabury Western Theological Seminaries, located on the Evanston campus. The United Library’s holdings are listed in NUcat.

Computing

Computer Study
Students interested in majoring in computing are referred to the Computing and Information Systems Program in the College of Arts and Sciences and the Departments of Computer Science and of Electrical and Computer Engineering in the McCormick School of Engineering and Applied Science.

Information Technology
At Northwestern, computers are used in a wide variety of applications designed to enhance the education of students both inside and outside the classroom. The need to understand computer applications cuts across disciplines. Students in the arts, humanities, journalism, and law have as much to gain from computer use as do those in the physical and social sciences, engineering, medicine, and business.

Northwestern’s Information Technology (IT) division is the principal campus unit charged with managing and coordinating computing facilities and services for students, faculty, and staff.

Buildings on the Evanston and Chicago campuses are connected through high-speed networks to the Internet, allowing access to a wealth of information at other universities and organizations worldwide. All sleeping rooms in University residence halls are connected to the University’s network, giving students with network services accounts (see below) convenient access to electronic mail, to the card catalog and other resources of the University’s libraries, as well as to NUInfo <http://nuinfo.nwu.edu>, the campus electronic bulletin board and calendar.

Through IT’s Academic Technologies, students can access a variety of resources in a networked environment, including computer lab/classrooms with Windows and Macintosh units and a UNIX workstation lab/classroom. In addition, students may use specialized computer labs available in the six undergraduate schools.

Students may apply for a network services account through IT’s Technology Support Services. At the beginning of each academic year, Technology Support Services offers new students orientation sessions that introduce the various network services available, teach students how to connect their computers to the campus network, and provide an overview of electronic resources.

The Information Center, located in the Vogelback Building on the Evanston campus, is the primary information resource on computing and networking at Northwestern. The center provides walk-in and phone consultation on University-supported hardware, software, operating systems, and computing facilities. To speak to a consultant, students should call 847/467-ITSS.

A walk-in help desk is available on the Chicago campus at Abbott Hall.
Student Services

Student Affairs
The Office of the Vice President for Student Affairs is responsible for many programs and services available to Northwestern students. Students are encouraged to take advantage of these opportunities and services, which are designed to help them establish and meet personal, academic, and career goals; assist them in acquiring skills to confront problems and issues in their lives; and provide them with essential services as part of a residential community.

In recognition of students as members of the Northwestern University community, the University has adopted a statement on student rights and responsibilities (see the Student Handbook for the complete statement).

African American Student Affairs
The services and activities of African American Student Affairs include advice, support, and referral on personal, academic, and career issues; curricular group advising; tutoring in math, the sciences, economics, and writing; New Student Week activities, lectures, receptions, the annual Black History Month observance; and the spring blues, gospel, and jazz revue, A Musical Evening with Our Elders.

The African American Student Affairs building is home to a number of student organizations and provides office and meeting space for students as well as staff. The programs of this office are designed to promote academic achievement, provide cultural and social outlets, and give voice to the needs and concerns of the African American student community.

Career Development Center
The Career Development Center offers counseling, advising, and testing to help students choose a career, plan graduate or professional study, and enhance study skills. The center's career resource library has books and other printed materials as well as video and audiotapes and other media on careers, financial aid for graduate education, and study skills. The collection also includes self-assessment inventories, college catalogs on microfiche, and graduate and professional school directories.

Individual and group career counseling is available to help students discuss career possibilities, declare a major, explore options for graduate school, and improve their ability to make decisions. Through use of assessment inventories and software applications, counselors assist students in identifying factors to consider as they search for a career.

Advising, workshops, and printed materials are available to students seeking to enhance their study skills or time management techniques.

Northwestern is a national test center for the GRE, GMAT, LSAT, and MCAT. The Career Development Center has information about the dates and locations, calendars, bulletins, and registration forms for these tests.

Counseling and Psychological Services Center
The Counseling and Psychological Services Center (CAPS) is the University's primary counseling resource. The CAPS counselors, social workers, psychologists, and psychiatrists offer students a variety of academic and personal services, including individual and group counseling. When students have problems, talking with an experienced counselor often can provide great relief. Students may talk with a counselor confidentially about specific problems such as managing stress and difficult relationships or about nonspecific feelings of anxiety or loneliness.

CAPS offers group counseling on eating behavior, self-esteem, sexual identity, shyness, grief, diabetes, and parental divorce. Groups and topics can be added in response to student interests or needs.

While there is a limit of 12 individual CAPS counseling sessions, this office can refer students who will benefit from additional help to other appropriate and affordable counseling facilities. Students who participate in group counseling are still eligible for 12 individual sessions.

Counseling is available to full-time students (those registered for at least three courses). Crisis intervention and consultation, assessment, and referral resources are available to part-time students.

Health Service
All students are required to have hospitalization insurance coverage. For information about the program offered through the University, consult the Health Service insurance office.

The University maintains a comprehensive health service, including a pharmacy, laboratory, radiology suite, health education program, and six-bed infirmary for students at Searle Hall. Students registered
for at least three courses are entitled to full privileges of this service. Students registered for fewer than three courses may have the same privileges by purchasing an optional program within one week after registration. The Health Service has forms for the optional program; the fee may be paid by check.

Full-time students must comply with state of Illinois and Northwestern University health, immunization, and insurance requirements, which are described in Health Service and insurance office letters sent to them after they are accepted to the University. They must return the completed medical and insurance forms sent with the letters at least six weeks before registration. If they fail to comply, they will be subject to late fees and their registration will be withheld until they meet these requirements.

Former Northwestern students who have been absent from the campus for two or more years must meet the same requirements as new students. Students continuing into a new program must notify the Health Service to reactivate and update their medical records. See the Health Service brochure for more information.

Norris University Center
Norris University Center is the community center of the University. It provides programs and services that enhance the quality of campus life for students, faculty, parents, staff, alumni, and guests. The Norris Center Program Board sponsors a variety of activities that promote social, cultural, and educational interaction outside the classroom. Norris Center works to develop a campus environment that enables students to become accomplished and informed individuals, sensitive to the needs of a pluralistic society.

Additionally, Norris Center provides amenities and conveniences that enrich the quality of daily campus life for the University community. These include the campus bookstore, a food court, an ice cream parlor, a coffeehouse, meeting rooms, personal banking machines, a box office, a convenience store, and more than 25 student organization offices. Special services include student check cashing, game room, outdoor recreation equipment rental, sound and sight equipment rental, leisure library, and an interactive information kiosk. Through the Dittmar Memorial Art Gallery and the craft studio, Norris demonstrates the importance of the visual arts to the campus environment.

Organizations and Activities
The Campus Activities Office at Norris Center provides leadership development and advice to student groups, many of which are headquartered at Norris. Students brought together by common interests, projects, or cultural heritage may petition for recognition as a student organization. Student organizations are recognized by the University chaplain, University departments, the Office of the Vice President for Student Affairs, or the Associated Student Government, which also is liaison for students, student organizations, and the University administration. Other representative organizations include the Interfraternity Council; Panhellenic Association; Residence Halls Association; For Members Only; Black Greek Council; Asian American Advisory Board; Bisexual, Gay, and Lesbian Alliance; Casa Hispana; and Women’s Coalition.

Programs and services to the campus are provided by such groups as the Activities and Organizations Board, Arts Alliance, Dance Marathon, Northwestern Volunteer Network, Legal Aid, Student Blood Services, and Wildcat Council. Other organizations, particularly in the areas of cultural/ethnic affiliation and performing arts, complement academic interests and are open to all students. Music, dance, and theater groups as well as a daily newspaper, yearbook, radio station, and literary magazines provide outlets for a variety of talents. The Campus Activities Office also offers minicourses for fun and leisure learning.

Information Desk
The information desk at Norris provides the University with a central location for inquiries regarding general campus and event information. The desk has access to NUInfo, a computerized campuswide information system. Visitors are welcome to call or drop by when on campus to ask about University services and special events.

Northwestern University Student Employment Program
The Northwestern University Student Employment Program (NUSEP) offers students information to assist them in finding part-time jobs, full-time summer employment, and academic-year internships.

Placement Center
The Placement Center offers a broad array of services, programs, and resources to assist students in
developing and implementing career plans. It works closely with the Career Development Center and NUSEP to provide students with comprehensive career planning and employment services.

The Placement Center, which is located in Scott Hall, provides the following services exclusively to enrolled Northwestern students. Some services also are available to alumni.

- **Candidate referral**: All students registered at the Placement Center have their electronic resumes listed in the Placement Center's candidate database. Candidate referral electronically links qualified individuals with bona fide employers with immediate professional openings. Candidate referral is appropriate for all graduating students seeking full-time employment; it serves employers in all fields nationwide.

- **Campus interviews**: Each year hundreds of organizations from business, industry, government, and education send representatives to campus to interview graduating students for postgraduation employment. Campus interviews attract large employers with recurring employment needs. The interviews normally begin in October and continue through April of each academic year.

- **Job listings**: The Placement Center annually receives and posts thousands of job openings. Job vacancies are entered into the center's database, which students may review.

- **Credential and dossier services**: Graduates interested in teaching, educational administration, research, or social service occupations are encouraged to establish a professional credential file that includes written recommendations. This file is used to support employment applications.

- **Career information**: The Placement Center has employer files, literature, and videotapes; occupational and salary information; and general reference materials on careers and employment. State-of-the-art computer programs at Hardy Lounge also assist students in researching occupations, employers, and career options.

- **Workshops and presentations**: Workshops on developing a resume, finding a job, and interviewing are offered regularly throughout the year. Dozens of employers schedule preinterview presentations in the fall and winter to give students information about their employment opportunities. In addition, the Placement Center provides special topic programs and several special events each year, including Career Expo, a campuswide job fair held each January.

- **Individual consultation**: Students may schedule individual appointments with a placement consultant who is assigned to an academic major. Individual consultation is provided on planning a career, preparing a resume, interviewing, and job search strategies.

To meet the needs of individuals seeking careers in journalism or music, specific school-based placement services also are available. The Medill School of Journalism Placement Office seeks job opportunities in journalism and invites recruiters to campus from the media, advertising, and publishing to interview graduating seniors and alumni. The School of Music placement services are available for graduating music students and alumni. The office assists job seekers registered there in preparing and maintaining a credential file and notifies them of vacancies for music teachers and performers.

**Residence Halls and Food Services**

Students at Northwestern have a variety of living facilities available to them. Smaller residences accommodate as few as 27 students; larger units house more than 600. Most rooms are doubles, but residences also contain single, triple, quadruple, and suite arrangements. A student may select a coeducational residence or one where all members are of the same sex. Some of the houses are older, ivy-covered residences; others are modern, recently built halls. Each building has its own character and spirit and its own distinct advantages.

Approximately 4,100 undergraduate students live in the University's residences; about 1,000 students have chosen to live in fraternity and sorority houses; and the approximately 2,500 remaining undergraduates commute from home or live off campus.

Individual students with diverse backgrounds and various interests come together in University residences. Each residence is free to set its own norms of behavior within the general guidelines of the law and University policy. Students adopt constitutions and elect residence officers. Living in a residence makes a student a member of its government, with the rights, privileges, and responsibilities of membership.
Residence activities are planned by the officers and developed by the residents to provide social, academic, and cultural experiences. These programs are financially supported through nonmandatory social fees determined by the residents.

Students take their meals at any of the six dining facilities located in the larger residence halls. Breakfast, lunch, and dinner on Monday through Saturday and brunch on Sunday are available for a total of 19 meals each week. Residents may sign a contract for a minimum of 13 meals per week, selecting whichever 13 meals meet their individual needs and schedules. They also have the option of a 16-meal or 19-meal contract.

Complete information about Northwestern's residences, including rental rates, is mailed to applicants after they have been admitted to the University and paid the required tuition deposit.

Student Affairs Office
The Office of Student Affairs in Scott Hall is a general source of information and referral for students with personal and academic problems or concerns. This office also coordinates orientation programs for new students, plans student programs, and produces publications for parents of undergraduates.

In addition, the Office of Student Affairs implements educational programs on the prevention of sexual harassment and assault. Students who believe they have been victims of sexual harassment may file a complaint with the assistant vice president for student affairs, who coordinates the University disciplinary process, including the University Hearing and Appeals System and the Sexual Assault Hearing and Appeals System.

University Chaplain
The Office of the University Chaplain is available to meet the religious concerns and needs of members of the University community. Several religious groups, including major Protestant denominations, the Roman Catholic church, and the Jewish community, sponsor ministries to the University's students and faculty. Although these campus ministries are independent of Northwestern University, the Chaplain's Office serves as the University's liaison with all religious groups represented there, and it facilitates and coordinates their activities. Information about campus religious organizations is published in "Religious Life at Northwestern University," available from the Chaplain's Office. The Chaplain's Office also recognizes student religious organizations on behalf of the University.

The Alice S. Millar Chapel and Religious Center, which includes Parkes Hall and the Jeanne Vail Meditation Chapel, has facilities for religious programs and services such as lectures, study groups, discussions on faith and life, weddings, baptisms, and other special events. The facilities are available to religious groups of all faiths and to other University and community groups by arrangement through the Chaplain's Office. The University chaplain and other campus religious counselors can meet with individuals and groups as counselors, teachers, or resource persons.

Services for Students with Disabilities
The Office of Services for Students with Disabilities provides services and referrals for Northwestern students with disabilities. Students with disabilities should contact the office for assistance and guidance in meeting their academic obligations.

It is Northwestern University policy to ensure that no qualified student with a disability is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination in any University program or activity. In response to a request made by a qualified student with a documented disability, the University will arrange, at no cost to the student, for the provision of educational auxiliary aids, including sign language interpreters, real-time captioners, note takers, readers, and tutors, determined by the University to be necessary to afford such student with the opportunity for full participation in University programs.

Northwestern University's programs and activities are accessible for full participation to all its students, including those with mobility problems and with difficulties such as learning disabilities or auditory, visual, or other special problems.

A brochure, "Services for Students with Disabilities," describing various support services for students with disabilities is available in University admission offices and in the Office of Services for Students with Disabilities. The brochure includes maps of the Evanston and Chicago campuses indicating building access and parking locations.
International Office
Foreign students, visiting scholars, faculty, and staff will find assistance for themselves and their families at the International Office. The main focus of the office is immigration and visa-related matters. The office provides specific instruction on the rights and responsibilities of each visa category, including the proper forms for arrival, travel, sending for families, and work permission. In addition, it serves as an information center to help visitors locate the services and activities available both on campus and in the larger community.

A volunteer organization, the Community Council for International Students, works with the office to provide international visitors such services as a resale shop, English tutoring, the International-American Women’s Group, and a play group for children. All international visitors are encouraged to ask for information at the International Office.

Women’s Center
The Women’s Center is an advocacy program serving the Northwestern community. The center is also a gathering place for women staff, faculty, and students who seek support in their academic, professional, and personal lives. The center’s staff includes community activists, counselors, and educators. The primary mission of the center is to address issues of sexual harassment and sexual assault. The center also offers a variety of services, including advocacy; individual, group, and couples counseling for sexual violence, childhood sexual abuse, and relationship violence; educational programming related to other women’s issues (e.g., body image, self-esteem, women and anger); and referral and resource information.

Fitness and Recreation
All students at Northwestern are strongly encouraged to participate in recreational and fitness activities, including intramural, club, informal, and instructional sport and fitness programs.

Intramural competition is conducted in a variety of individual and team sports. League play and tournaments are provided for men and women, both separately and “co-recreationally.” Competition is organized for individuals and teams, by independent groups, living units, fraternities, sororities, and University departments and organizations.

Sport clubs offer competitive and noncompetitive sports experiences. Extramural competition, with outside institutions and sports groups, is available in baseball, basketball, crew, cycling, equestrian events, fencing, ice hockey, lacrosse, rugby, running, sailing, ski racing, soccer, synchronized swimming, tennis, Ultimate Frisbee, volleyball, and water polo. Noncompetitive, special interest clubs include aikido, karate, tae kwon do, jujitsu, and wado kai. Clubs are student directed.

Drop-in recreation periods are scheduled throughout the day and evening at Blomquist Recreation Center, Patten Gymnasium, and the Henry Crown Sports Pavilion/Norris Aquatics Center. Included are facilities for aerobics, badminton, basketball, fitness activities, floor hockey, jogging, racquetball, squash, swimming, tennis, volleyball, and weight training.

Noncredit instructional sports classes are offered in more than 30 areas. Students can register for sports and fitness classes by visiting the fitness and recreation registration office in the sports pavilion. Courses for each quarter are listed in the Programs and Services guide.

The Sailing Center offers instructional and informal sailing programs for beginning and novice sailors. The fleet consists of 420 class and laser sailboats as well as Windsurfers.

The Vandy Christie Tennis Center also offers instructional and informal tennis programs on 15 outdoor courts.

University Police
The University Police Department is responsible for crime prevention, law enforcement, parking control, special events, and emergency management on both the Evanston and Chicago campuses. University police officers are on duty 24 hours a day, seven days a week. They are graduates of a police academy with full police authority; most have bachelor’s degrees.

The police division on the Evanston campus provides a number of services, including a crime prevention program, speaking engagements, unlocking of vehicles, residence hall security checks, sale of bicycle locks (at cost), and loan of battery jumper cables. Emergency phones on campus, marked by blue lights, operate when an individual lifts the receiver or pushes the button.
Additional information about campus crime and crime prevention programs is available by requesting a copy of “Campus Safety: A Shared Responsibility” from the University Police Department, 1819 Hinman Avenue, Evanston, Illinois 60208-1320.

Motor Vehicles
Regulations governing the possession, operation, and parking of motor vehicles on the Evanston campus are described in the parking regulations handout available at the Parking Office, 1819 Hinman Avenue. Under most circumstances, freshmen and sophomores may not have motor vehicles while living on campus. A lottery distributes a limited number of parking permits for juniors living on campus. Exceptions to these rules may be granted only by the Parking Committee.

Parking permits are required in campus lots from 7:30 a.m. to 5 p.m., Monday through Friday (official holidays excluded), except in lots that are designated in the regulations as 24-hour enforced. Students who live off campus in the area bounded by Davis and Central Streets, Sherman Avenue, and Lake Michigan may not purchase parking permits.

Personal Losses
The University is not responsible for the loss of or damage to personal property belonging to students in any building owned by the University, whether the loss or damage occurs by theft, fire, or an unknown cause.
Undergraduate Education

Admission

General Requirements for Admission
Northwestern University historically has sought a student body of high ability and diversity representing a cross section of American society.

It is the policy of Northwestern University not to discriminate against any individual on the basis of race, color, religion, national origin, sex, sexual orientation, marital status, age, disability, or veteran status in matters of admissions, employment, housing, or services or in the educational programs or activities it operates, in accordance with civil rights legislation and University commitment.

Any alleged violations of this policy or questions regarding the law with respect to nondiscrimination should be directed to Director of Equal Employment Opportunity, Affirmative Action, and Disability Services, 720 University Place, Evanston, Illinois 60208-1147, phone 847/491-7458; Office of the Provost, Rebecca Crown Center, Evanston, Illinois 60208-1101, phone 847/491-5117.

Candidates for admission should demonstrate a level of performance in curricular and extracurricular areas that indicates they will be able to compete successfully in a competitive academic environment. In the selection of students, careful attention is given to the ability of each candidate as evidenced by academic record and the results of entrance tests as well as by character and personality. The University attempts to select students who are committed to scholarship and who have shown a willingness to become involved in their expressed interest areas. In determining whether to accept a candidate, the University considers the following:

• Secondary school record
• College record (required for transfer candidates)
• Recommendations from school officials and other persons who have information pertinent to the candidate's probable success at Northwestern
• Results of required or recommended tests (the Scholastic Assessment Test [SAT I] of the College Entrance Examination Board or American College Test [ACT], required of all candidates; three Scholastic Assessment Tests [SAT IIs], required of candidates for certain special programs and of all home schooled applicants [see table on page 16] and recommended for other candidates)
• Music audition (required for School of Music candidates)
• The candidate's statements on the application and other evidence of special skills, such as writing, art, music, mathematics, and science, or of special accomplishments in extracurricular areas of interest
• Any other information received by the University that bears on the candidate's readiness for study at Northwestern

SAT IIs

Recommended for Regular Programs
• College of Arts and Sciences, School of Education and Social Policy, Medill School of Journalism, School of Music, and School of Speech: Writing and two others of student's choice
• McCormick School of Engineering and Applied Science: Writing, Mathematics I or IIC, and Chemistry or Physics

Required for Special Programs and Home Schooled Applicants
• Honors Program in Medical Education: Writing, Mathematics IIC, and Chemistry
• Integrated Science Program: Mathematics IIC, Chemistry or Physics, and another science unless Writing is required for another application
• Home schooled applicants: Writing, Mathematics IIC, and a third test of their choice

Required Subjects
A broad academic experience in high school is the best preparation for admission to Northwestern. Whatever fields of study students follow, the best foundation consists of reading, writing, and mathematics. The value of thorough training in
fundamental subjects cannot be overemphasized.

In considering the academic record of a candidate for admission to Northwestern, the Office of Undergraduate Admission notes the subjects studied and the grades received. The student's record should include a minimum of 16 units. (A unit represents a course studied for one year.)

The subject recommendations in the following list represent the minimum requirements for entrance to the University. Allowances are made to permit students to pursue special areas of academic interest.

**Required Units**
The College of Arts and Sciences, Medill School of Journalism, and Schools of Education and Social Policy, Music, and Speech require 16 units drawn from the following academic areas. The required academic areas with recommended units are

- English: 4 units
- Foreign language: 2 to 4 units
- Mathematics: 3 to 4 units
- Laboratory science: 2 to 3 units
- History, social studies: 2 to 4 units
- Electives: 1 to 3 units in the academic areas listed above

Students preparing for college are strongly recommended to take four years of work in English with as much emphasis on composition as the curriculum allows. Two units of the same foreign language should be offered. Three or four years of the same language are strongly recommended.

The McCormick School of Engineering and Applied Science requires a sound secondary school education as described above, with strong preparation in mathematics and science. Specifically recommended are

- Mathematics: 3½ to 4 units (the minimum requirements for mathematics include algebra [2 units], plane geometry [1 unit], and trigonometry [½ unit])
- Science: 2 units (credit in both chemistry and physics is recommended)

Credit in other subjects should bring the total to 16 units or more, which include 4 units of English and work in social studies and foreign languages.

**Admission Notification**
Northwestern offers freshman candidates a choice of two notification plans, Early Decision and Regular Decision. Early Decision is a binding admission commitment. Candidates accepted to Northwestern under Early Decision must withdraw all other university applications. Unlike other selective schools, Northwestern does not normally defer Early Decision applicants into its Regular Decision pool.

The accompanying table outlines these plans, the notification plans for transfer students, and the financial aid application procedure, including deadlines and the forms available through the College Scholarship Service.

**Admission Procedure**
To be considered for admission to Northwestern, candidates must complete the following three steps:

- File a completed application form. This may be obtained from the Office of Undergraduate Admission, Northwestern University, 1801 Hinman Avenue, P.O. Box 3060, Evanston, Illinois 60204-3060. A form may also be requested via the World Wide Web at <http://www.ugadm.nwu.edu/ROFM_CGI/request.html>. Applications for admission may be submitted before candidates take the standardized tests required for college admission.
- Arrange with the officials of their high school to complete and forward the Secondary School Report to the Office of Undergraduate Admission. All candidates should have their records through the sixth semester sent to Northwestern as early in the senior year as possible. Regular Decision candidates should have seventh semester grades sent as soon as they are available.
- Take standardized tests. The official results of the SAT I or the ACT are required for all students applying for admission to Northwestern as freshmen. In addition, all the special programs require each matriculant to present three SAT IIs as specified in the accompanying table. SAT IIs are recommended for all candidates. Home schooled applicants are also required to submit three SAT II results.

**Advanced Placement**
In nearly all areas, Northwestern awards credit for Advanced Placement Examination scores of 4 and 5;

Northwestern mails decision letter as soon as possible after the application deadline; reply within three weeks.

\(^1\) Required for Integrated Science Program, Honors Program in Medical Education, and home schooled applicants. Scores from previous academic years are acceptable.

\(^2\) Foreign transfer students for fall quarter should apply by May 1.
Admission Procedure

To be considered for admission, transfer students must complete the following steps:

- File a completed application form available from the Office of Undergraduate Admission, Northwestern University, 1801 Hinman Avenue, P.O. Box 3060, Evanston, Illinois 60204-3060. A form may also be requested via the World Wide Web at <http://www.ugadm.nwu.edu/ROFM_CGI/request.html>.
- Arrange with the officials of the high school to forward the complete high school report to the Office of Undergraduate Admission.
- Submit the results of the Scholastic Assessment Test (SAT I) or the American College Test (ACT).
- Arrange with the registrar of each college previously attended to forward transcripts of record to the Office of Undergraduate Admission.
- Request a statement of good academic and social standing from the dean of students at the college from which the student is transferring.
- Present a music audition (in person or a taped recording) if applying for admission to the School of Music (audition guidelines will be furnished on request).
- Submit application for admission before the deadline of June 1 (for admission in the fall quarter), November 1 (winter), February 1 (spring), May 1 (summer).

Evaluation of Credits

Before matriculation, transfer candidates who are accepted by Northwestern will receive a preliminary evaluation of the credits they have earned to date, assuming all pertinent transcripts have been received. An official evaluation of credits earned will be made by the Registrar’s Office when the admitted student matriculates.

Foreign Students

In addition to meeting all regular admission requirements, foreign students are required to present evidence of their ability to speak, read, and write the English language and to meet the financial obligations associated with their study at Northwestern University. Students for whom English is a second language must present the results of the Test of English as a Foreign Language (TOEFL). Foreign students must have achieved outstanding school
records to be considered for admission. Foreign transfer candidates may apply for fall quarter admission only and must submit their completed application by May 1.

Returning Adult Students
Adults who interrupt their education following high school or during college and, after several years, decide to complete their undergraduate education are considered by the Office of Undergraduate Admission as “returning adult students.” Ordinarily, returning adult students have been out of high school for seven years or more. Depending on the amount of college credit previously earned, returning adult students apply as freshman or transfer candidates.

When admitted to Northwestern, returning adult students may begin studies on a full-time or half-time basis. A full-time program includes three or four academic courses per quarter; a half-time program includes no fewer than two courses per quarter. See also Returning Students in the Financial Regulations section.

Evening Students
Adult students who wish to pursue a degree or certificate program through evening or Saturday study or who wish to enroll in courses for personal enrichment, preparation for graduate study, or professional mobility may enroll in University College, Northwestern’s continuing education division. Courses are offered on the Chicago and Evanston campuses on a semester basis.

University College has an open enrollment policy, which allows adults with a college degree, some college credit if they left their previous school in good standing, or a high school diploma but no prior college work to enroll in courses to establish an academic record. After the semester in which students complete a fourth course, one of which must be a course in writing, their academic record is reviewed and, if they have done well, they are invited to matriculate into an evening degree or certificate program or to continue enrolling in courses as a student-at-large.

Students may transfer to University College up to 90 semester hours of credit, of which 60 hours may be from community colleges.

Special Students
Properly qualified persons who demonstrate a need for certain courses required for their academic or professional advancement may apply to the University as special nondegree-seeking students. Applicants must present official transcripts of previous study and show evidence of successful academic achievement. Persons who do not meet these requirements should not apply.

Enrollment as a special student does not constitute admission to any degree program at the University, and credits earned as a special student may not be counted toward a degree at Northwestern. (Exception: Special students who subsequently become eligible to matriculate in University College may apply these credits toward a degree.) Special students are granted academic credit for course work satisfactorily completed, and these credits may be transferred to another institution.

Special students are admitted with the understanding that they may register only after students working toward Northwestern degrees have registered. Some classes will be closed, and some schools or departments may not accept nondegree students. However, these restrictions do not apply to the Summer Session.

Special students are not permitted to enroll in C99 or D99 Independent Study courses.

All tuition and fees for special students are charged at the undergraduate rate. Complete instructions and application forms may be obtained from the Office of Special Students, 162 Walter Annenberg Hall, Northwestern University, Evanston, Illinois 60208-2650.

Auditors
Auditors, who are charged a special tuition rate, are persons who enroll in a course to observe or listen only. They are not permitted to engage in class discussion, submit written or oral assignments, or take examinations, and they do not receive academic credit.

Only students who qualify as special students or are taking University College classes are permitted to audit classes. Special students must consult with the Office of Special Students; University College students must consult an adviser or the University College bulletin. Formal auditor status and registration are not normally available to regularly enrolled Northwestern students in daytime courses.
Financial Aid

The University awards financial aid on the basis of need as determined by the financial circumstances of the family. Aid may be a loan, part-time employment, a grant, or a combination of these. Recipients may accept all or any part of the aid offered. The amount of an award is confidential between the University and the family of the student. For entering freshmen, financial aid is generally renewable for up to 12 quarters of enrollment, even if they are not offered financial aid for those quarters. For transfer students, the maximum number of quarters of assistance depends on the number of quarters of transfer credit accepted, as determined by the Registrar's Office (i.e., a student who transfers with 3 quarters of acceptable credit is eligible for 9 quarters of assistance). The amount of financial aid may change based upon the family's financial circumstances. Students must reapply each year and maintain the requirements established by the Financial Aid Committee of the University.

During the 1996–97 academic year, undergraduate students at Northwestern received more than $41 million in grant assistance: $31.1 million from Northwestern, $6.5 million from federal and state governments, and $4 million from outside sources. The average Northwestern grant for the 3,434 students receiving aid at Northwestern was $9,071. In addition, $13.7 million in loan assistance and 3,000 campus jobs were available.

Assistance that is not need-based is provided by the Reserve Officers Training Corps (see Military Studies) and from other sources discussed in the Northwestern publication “Invest in Your Future: Affording a Northwestern Education,” distributed by the Office of Undergraduate Admission (see Where to Write).

Who Should Apply

Any undergraduate students who believe they cannot afford the full cost of a Northwestern education may apply for financial aid.

Students graduating from community colleges and transfer students from four-year colleges may apply for financial assistance. However, since funding is limited, full funding may not be available for the first year of study. Transfer students must obtain transfer financial aid application materials and financial aid transcript requests from the Office of Undergraduate Admission.

Application Procedure

Applicants request consideration for financial aid when submitting an application for admission. The Financial Aid Committee cannot make a decision until the University has admitted the applicant. Candidates should do the following:

• Complete and submit the application for admission, which provides a place to request financial aid
• File the Free Application for Federal Student Aid (FAFSA) and the Financial Aid Profile of the College Scholarship Service (CSS) and request that copies of both reports be sent to Northwestern (the forms are available at local high schools)
• File the applications as soon as the need for assistance is realized by the family, but not later than the dates indicated in the table titled Application and Testing Deadlines: Notification Plans (page 16).

Satisfactory Academic Progress

To comply with federal regulations, students at Northwestern University are considered to be maintaining “satisfactory academic progress” for the disbursement of federal student assistance funds if they complete an average of nine units of academic credit per year and complete their educational programs within 18 quarters of enrollment. Federal regulations also state: "If a student does not have a C average or equivalent or the required academic standing at the end of the second academic year, he or she may not receive further aid from the federal financial aid programs." These policies are supplemented by the qualitative requirements established by the undergraduate schools (see each school’s section in this catalog).

If students fail to maintain satisfactory academic progress as defined above, they may be awarded assistance for one additional payment period to reestablish "satisfactory" standing. Students who successfully complete a minimum full-time course load during this period will be considered again to be making satisfactory academic progress. Students who fail to successfully complete a minimum full-time course load during this period will remain ineligible for any additional assistance during subsequent quarters, unless they, while ineligible, successfully complete a minimum full-time course load for one payment period at Northwestern. Students may also submit within two weeks of their notification of ineligibility a written appeal to the Office of Financial Aid.

During the 1996–97 academic year, undergraduate students at Northwestern received more than $41 million in grant assistance: $31.1 million from Northwestern, $6.5 million from federal and state governments, and $4 million from outside sources. The average Northwestern grant for the 3,434 students receiving aid at Northwestern was $9,071. In addition, $13.7 million in loan assistance and 3,000 campus jobs were available.

Assistance that is not need-based is provided by the Reserve Officers Training Corps (see Military Studies) and from other sources discussed in the Northwestern publication “Invest in Your Future: Affording a Northwestern Education,” distributed by the Office of Undergraduate Admission (see Where to Write).
Financial Regulations

Financial Aid presenting evidence of unusual circumstances. The appeal is then reviewed to determine if an exception to this policy is justified.

The above procedure will be followed except when students (1) are academically dismissed from the University according to the academic policies of their particular school and program or (2) have been in attendance at Northwestern for 12 quarters or the equivalent (unless the course of study normally requires more than 12 quarters of enrollment). As to the first case, students will be eligible for federal financial assistance during the first quarter of full-time study on returning to Northwestern in order to reestablish satisfactory academic progress. On successful completion of a minimum full-time course load with a 2.0 grade point average, they will again be considered to be making satisfactory academic progress and will be eligible for federal and institutional financial assistance in subsequent quarters. As to the second case, students are ineligible for financial assistance from University funds beyond the 12th quarter, even if they are maintaining satisfactory academic progress. However, students admitted to the five-year BA/BMus, BS/BAMus, and BS/BMus programs will be eligible for University funds for up to 15 quarters of enrollment. The Committee on Financial Aid to Students may decide to continue aid when unusual circumstances exist and students demonstrate academic promise.

Financial Regulations

University Enrollment Requirement

The University Enrollment Requirement policy applies only to undergraduates in bachelor’s degree programs. It does not apply to graduate students or special students. This requirement must be completed in addition to the degree requirements established by the various school faculties.

All students, except those enrolled in accelerated programs designed to be completed in fewer than four years, are expected to be enrolled for full-time study for 12 regular academic-year quarters. This 12-quarter requirement is referred to as the University Enrollment Requirement (UER). Note that the degree requirements set by the various school faculties are separate from the UER. Although some students may be able to complete their academic degree requirements, as established by the faculty, in fewer than 12 academic-year quarters, such students must still fulfill the 12-quarter UER. Students who, due to circumstances beyond their control, are unable to complete the bachelor’s degree requirements in 12 quarters may petition to the University Enrollment Committee for a 13th or final quarter at no additional tuition charge.

For purposes of the UER, full-time study is determined by the payment of full-time tuition. Students who withdraw and receive a partial refund will receive a prorated credit toward the UER based on the tuition paid. The normal full-time course load is three or four courses per quarter.

Students may, with approval of their school, take more than four courses per quarter without additional charge. These excess courses may be applied toward fulfillment of degree requirements of the various schools so long as they are not used to accelerate graduation. However, for students who desire to apply the excess courses toward the UER, there will be an excess course charge for each course of 25 percent of the full-time quarter’s tuition in effect at the time of graduation. Such acceleration must be approved by the dean of the student’s school. Students wishing to apply excess courses toward the UER must indicate their desire to do so when applying for the degree. Any excess course charges will appear on the bill for the last quarter of enrollment. Financial aid recipients will not receive additional grant assistance to cover excess course charges; however, they may apply for additional loan assistance.

Normally, the UER will be fulfilled by three quarters of full-time study during each of four academic years. In addition, credits from one or a combination of the following sources may be applied toward the UER.

Each course credit fulfills one-fourth of a quarter of the UER. That is, four course credits are required to reduce the UER by one quarter. Students who enter as freshmen with 10 or more course credits will reduce their UER by one quarter. Regardless of the amount of credit earned outside the University, the minimum UER for all entering students as freshmen is nine quarters, which may include approved study abroad.

The approved sources of credit are

- Advanced placement credit through the College Board
- Placement credit awarded by Northwestern University
• Approved foreign study during the academic year
• Approved credit from another college or university, subject to restriction. Students entering with four or more courses from another institution may not apply any additional credit from another institution toward the UER, except for approved foreign study. Students entering with fewer than four courses from another institution may apply a maximum of four courses toward the UER, including those taken before matriculation. Any courses from another institution must be completed before the student achieves senior standing. Courses beyond the maximum may be applied toward academic requirements but not toward the UER.
• Summer Session at Northwestern. All students may apply four Summer Session courses toward the UER. Although four courses are normally required to reduce the UER by a quarter, a three-course Northwestern Summer Session load may be used to reduce the UER by one quarter. All three courses must be taken the same summer and this exception may be used only once.

Returning Students
Students who withdraw from the University and wish to return must submit a Returning Student Application form to the Registrar’s Office six weeks before the desired date of reentry. Students who want credit for course work taken at another institution must submit an official transcript to the Registrar’s Office. The Registrar’s Office will determine the extent to which credit earned away from Northwestern may reduce the four-year UER. Students who wish to apply more than four courses taken at another institution toward the UER must petition the University Enrollment Committee.

Transfer Students
Students who transfer to Northwestern from another institution will be informed of the extent to which their previous work reduces their 12-quarter UER. A transfer student is one who enrolled for a minimum of one year as a degree-seeking student at another institution. All transfer students have a six-quarter minimum UER. Transfer students who enter the University with four or more credits will not be allowed any further credit toward the UER for courses taken at other institutions. All transfer students, regardless of the amount of credit previously earned, must complete nine full-time quarters at Northwestern before becoming eligible for a quarter at no tuition charge.

Special and Part-Time Students
Special and part-time students are subject to the tuition rates shown under Undergraduate Tuition: Exceptions. Students must be approved for part-time study by the Office of Undergraduate Admission, the University Enrollment Committee, or the associate dean of their school. The Registrar’s Office determines the extent to which the UER will be satisfied by part-time study.

Financial Aid Recipients
Students who elect to accelerate their education by taking course overloads while receiving grant assistance from the University will not receive additional grant assistance to pay for the cost of acceleration. The University may provide such students additional loan assistance.

Summer Session Students
The tuition policies of the Northwestern Summer Session are independent of the University’s tuition policies for the normal academic year. Enrollment in the Summer Session may reduce the 12-quarter requirement, subject to the restrictions previously cited.

Cooperative Engineering Students
Students enrolled in the Murphy Cooperative Engineering Education Program will be charged tuition consistent with that of their entering class for the quarters they are enrolled in classes.

Tuition and Fees
The cost of education at Northwestern is only partly covered by tuition charges. The balance is met by the income from invested funds and by the gifts of alumni and other supporters of the University.

Tuition and fees for 1997–98 are listed below. Rates are subject to change without notice, and increases should be expected in subsequent years. For tuition purposes, the term course refers to course credit. Some course offerings carry more than one course credit.
Undergraduate Tuition
All undergraduate students in degree programs must fulfill the University Enrollment Requirement (see the previous two pages).
Tuition: each quarter $6,384

Undergraduate Tuition: Exceptions
These rates apply only to special students, part-time students, and other students not subject to the University Enrollment Requirement.
Full-time: each quarter $6,384
   Full-time registration is three or four courses.
Excess courses: each course $2,272
   Excess courses are more than four courses.
Part-time:
   One course, each quarter $2,272
   Two courses, each quarter $4,544
Auditor’s fee:
   Each course audited, each quarter $1,763
Performance study:
   P01 Private Instruction $1,136
   P02 Private Instruction $2,272
   Students who pay full tuition and take only three credit courses may take P01 or P02 at no additional charge.

Service Fees
Student Hospitalization Plan $564
   Required for all students unless they have equivalent hospitalization coverage.
Study abroad enrollment fee $1,500
Tuition deposit fee $200
   Required for each new undergraduate student; applied on the first tuition bill and not refundable.
Application fee (not refundable) $55
Returned check service fee $35
Replacement WildCARD fee $20
Transcript fee $3
Makeup laboratory time, breakage fee varies

Other Fees
Late registration fee $25
If fee is billed $30
   For registering at other than the scheduled times.
Retroactive registration fee $200
If fee is billed $225
   For registering for a term after the last day of classes for that term.
Housing deposit fee $200
Late payment penalty fee $100
   For late payment of bills.
Associated Student Government $22
   Activity fee, each quarter.
Dependent Hospitalization Plan $1,744
   For each dependent.
Field trip fee varies
   For courses in which field trips are required to earn credit.

Bills and Payments
The Office of Student Accounts issues student bills at Northwestern. A due date is shown on each University bill. Payment must be received by the due date. Due dates cannot be extended because bills are not received.

Installment Payment Plan
The University provides a tuition and fee installment payment plan, 9PAY, which offers the benefit of dividing the educational costs for the academic year into nine monthly payments. For information, contact the Office of Student Accounts, Northwestern University, 619 Clark Street, Evanston, Illinois 60208-1132, phone 847/491-5224, fax 847/467-2451.

Withdrawal from the University: Refunds
Students who withdraw from the University must immediately file a withdrawal form, available at the Registrar’s Office, Rebecca Crown Center. The completed form, bearing the required signatures, must be filed at the Registrar’s Office.
The Office of Student Accounts considers the date the completed form is received at the Registrar’s Office as the effective date in making financial adjustments.
   Tuition deposits are not refundable under any circumstances. Tuition is refunded in full if the student withdraws on or before the seventh day of classes. After that the following policy applies:
   • Between the eighth day of classes and the third Friday after classes begin, three-fourths of the tuition is refunded.
• Between the third Friday and the sixth Friday after classes begin, one-half of the tuition is refunded.
• After the sixth Friday of classes, no refunds are given.

Residence and meal contracts are signed for the full school year. Students who leave a residence before the end of the year are liable for the entire year's rent or for charges to the date another student takes the vacated space in University housing. Meal charges are assessed until the end of the week in which withdrawal is effected. Adjustments may be made at the discretion of the Housing Office for students who for financial reasons must make other room and board arrangements than those for which they first contracted.

First-time attendees of the University who receive Title IV assistance are subject to pro rata refunds. If a first-time attendee withdraws from the University within the 60 percent point in the quarter, the refund (of tuition, refundable fees, and other institutional charges) will be calculated based on a percentage derived from the number of weeks remaining in the quarter divided by the number of weeks in the quarter, rounded down to the nearest 10 percent, less any unpaid charges. No refunds will be offered after the 60 percent point in the quarter. Students may request samples of the applications of these refund policies from the Office of Student Accounts or the Office of Financial Aid.

Change of Registration
No refund or bill reduction is made on any course dropped after the fifth day of classes in the quarter.

Financial Obligations
Students whose University bills are overdue may not be given an academic transcript until all financial obligations are paid in full. Students whose accounts are overdue must pay a late payment penalty fee of $100. The director of student accounts may cancel or prevent the registration of a student whose bills are past due.

Each student is liable for any costs associated with the collection of his or her past due account, including but not limited to collection agency costs, court costs, and legal fees.

Academic Regulations
Registration for All Students
• Instructions for registration are contained in the Class Schedule issued each quarter. Failure to read the Class Schedule does not excuse students from compliance with the information and regulations stated therein.
• The dates of registration for each quarter are announced in advance, and students not registered at the time specified are subject to a fee for late registration. This fee is not intended as a penalty but is assessed to cover in part the cost of registration at other than the scheduled time. Inconvenience, illness, and other personal reasons for registering late are not accepted as reasons for waiving the fee.

Late registration is permitted only through the fifth full day (Saturday is not a full day) of classes in any quarter during the regular academic year and through the fourth full day in the Summer Session.
• Credit is not given for work in a course in which a student is not properly registered.
• Any course duplicated for credit increases the required number of credits to graduate by an equal amount. Both the original and the duplicated course entries remain on the student’s permanent record and are used to calculate the cumulative grade point average.
• Credit is not given for a course that is a prerequisite for a more advanced course if that prerequisite is taken after the more advanced course has been completed. Waiver of prerequisites for admission to courses may be obtained from the instructor concerned or the chair of the department in which the course is offered.
• Undergraduate students may not enroll in fewer than three quarter-courses except by permission of the dean of their school. Permission is given only in extraordinary circumstances.
• In the College of Arts and Sciences and Medill School of Journalism, undergraduate students may not enroll for more than four quarter-courses except by permission of the dean’s office. This regulation applies to total credit for courses taken in other institutions in addition to credit obtained in residence at Northwestern. Additional tuition may be charged for excess registration (see University Enrollment Requirement under Financial Regulations).
Changes of Registration

Changes in registration in fall, winter, and spring quarters are subject to the following provisions:

- In no case may a course be added after the fifth day of classes. No course may be dropped after the sixth Friday of classes.
- Undergraduate students may change registrations from grade to the pass/no credit (P/N) option or vice versa through the third Friday of the quarter. Check regulations of the individual schools for specific information on the P/N option.
- To make any change of registration, students must pick up a Change of Registration form at the Registrar’s Office and obtain the signature of the adviser if required by their school.
- To add a course, students must obtain a signature from the instructor or department representative for each course added. The completed form must be returned to the location indicated in the Class Schedule.
- To drop a course in the first seven days of class, students must obtain a signature from the instructor or department representative for each course dropped. After the seventh day of class, students do not need an instructor’s or department representative’s signature, but they are required to complete a drop form at all times. The completed form must be returned to the location indicated in the Class Schedule.
- Changes in ungraded sections (laboratory or discussion) are made in the departments and do not require notification of the registrar.
- Students who receive permission to drop a course after the first five days of class must return a properly signed Change of Registration form to the Registrar’s Office.
- If students drop a course by the sixth Friday of a quarter, the course does not appear on the permanent academic record and no grade is recorded provided a Change of Registration form has been properly filed. Failure to file this form within the time allowed is regarded as a course dropped without permission. A course dropped without permission is regarded as a failure and is recorded with a grade of F.

See also Withdrawal from the University: Refunds and Change of Registration under Financial Regulations.

Identification Cards

The University identification card (WildCARD) identifies registered students and should be carried at all times. The WildCARD is the property of the University and is not transferable; its privileges may be canceled at any time the card is misused. Students are required to surrender their WildCARD to University officials upon request.

The student’s ID number is encoded on the card and indicates whether the student is currently registered and if the card is valid. The card identifies the holder for admission to the library during hours of limited access and is needed at all times to borrow books. If a student carries a meal plan, the WildCARD admits the student to residence hall dining facilities. It also identifies the holder at the Health Service, Norris University Center, student functions and elections, and University athletic events.

Lost or stolen cards should be reported to the WildCARD office, where replacement cards are issued. For the cost of replacing an ID card, see Service Fees under Tuition and Fees earlier in this section of the catalog.

Registration in University College

University College, on both the Chicago and the Evanston campuses, operates on the semester system. Students enrolled in an undergraduate school may take courses in University College only with the approval of the office of the dean of their school and only when the courses are not given on the quarter system during the day or when there are clear cases of conflict. Such work is counted as a regular part of a student’s registration.

Students enrolled in undergraduate schools are not guaranteed a place in University College courses. To register for University College courses, students must

- Pick up a Dual Registration form from the Registrar’s Office in Evanston
- Secure approval from the office of the dean of their school
- Turn in the form at the Registrar’s Office in Evanston before the first meeting of the class

Fall semester courses are included as part of fall quarter registration; spring semester courses are included as part of spring quarter registration.

To drop a University College course, students must pick up a Dual Registration form from the
Registrar’s Office, secure approval from the office of their dean, and return the form to the Registrar’s Office.

**Interschool Transfers**
Undergraduate students who wish to transfer from one school or college of the University to another within the University must have an interschool transfer approved by the dean’s office of each school. A return to the original school must be approved in the same way. Approval of an interschool transfer is usually contingent on satisfactory performance in the original school. Consult the Class Schedule for appropriate dates to process an application for interschool transfer.

**Cancellation of Registration**
Students who complete advance registration for a quarter and later decide not to attend classes that quarter must notify the Registrar’s Office in writing before the first day of classes of the quarter to avoid being charged the applicable tuition and fees.

**Withdrawal from the University**
Students who wish to withdraw from the University after registering for classes in any quarter must file a withdrawal form available at the Registrar’s Office. The withdrawal takes effect the day the completed form, bearing the required signatures, is received at the Registrar’s Office. Students who have taken the final exam may not withdraw and must take the grade they earned. See also Withdrawal from the University: Refunds under Financial Regulations.

**Readmission to the University**
Undergraduate and graduate students who have not registered for one or more quarters of an academic year must file at the Registrar’s Office an application to reenter no later than six weeks before the first day of registration of the quarter in which they plan to return.

Students are not required to file the application to reenter under the following circumstances:
- If they have registered during the spring quarter and intend to return in the fall
- If they have registered in the spring quarter and intend to return during the Summer Session of the same year
- If they are students in the Graduate School who have attended the preceding Summer Session and intend to register during the next Summer Session and have not registered during the academic year

Students must obtain advance approval from the dean of their school if they wish to transfer credit for work taken elsewhere during an absence from Northwestern. An official, signed, and sealed transcript of that work must be furnished to the Registrar’s Office before the end of the next quarter in residence at Northwestern University, or credit for such work is not allowed.

If students interrupt a program of study for an extended period of time and if degree requirements are changed during this period, the new requirements normally must be met. Any modification of the requirements is made by the appropriate administrative officers of the school in which the student is registered.

**Residence Requirement**
The last 23 quarter-courses of the total required for the bachelor’s degree must be taken while students are enrolled as undergraduates at Northwestern University. The last three quarters must be completed while students are enrolled in the school or college of the University that is to grant the degree. (Degree requirements are listed by school in this catalog.) This residence requirement is in addition to the University Enrollment Requirement.

To enable qualified undergraduate students to study abroad during their junior year, the residence requirement may be waived. For complete information, including definition of what constitutes qualification, interested students should consult the assistant or associate dean of their school or the Office of Study Abroad.

CAS students desiring to study abroad and students from other schools who wish to participate in one of Northwestern’s affiliated programs should consult the Office of Study Abroad. Students participating in an affiliated program retain their enrollment at Northwestern during their study abroad and need not petition for waiver of the residency requirement.

**Work at Other Institutions**
After enrolling at Northwestern, students who want to study at other accredited institutions and transfer credit for that work to Northwestern must obtain advance approval of their proposed study. Forms for obtaining such approval are available in the
Registrar's Office. The McCormick School Records Office has forms available for engineering students, and the Medill Office of Student Records and Services has forms available for journalism students. Students in the College of Arts and Sciences should secure the appropriate CAS forms (and a copy of the regulations governing study away from Northwestern) in the CAS Office of Studies. Students also should check the regulations for the University Enrollment Requirement.

If students take course work elsewhere during an absence from Northwestern (or during the summer), an official transcript of that work must be on file in the Registrar’s Office before the end of the next quarter in residence at Northwestern, or credit for such work is not allowed.

Students may not register concurrently at Northwestern University and at another institution and receive transfer credit for work taken at the other institution unless permission is granted in advance by the office of the dean of their school. This applies to evening courses as well as to regular courses in residence.

Application for a Degree
Undergraduates must file a degree application one calendar year before anticipated graduation. Students in the College of Arts and Sciences, Medill School of Journalism, and Schools of Education and Social Policy, Music, and Speech must file their applications with the Registrar’s Office. McCormick School of Engineering and Applied Science students must file with the McCormick School Records Office.

Classification of Students
Students are classified as follows:
• Senior: students who have completed at least 33 quarter-courses
• Junior: students who have completed at least 22 but fewer than 33 quarter-courses (engineering co-op students are considered seniors when they have completed 32 quarter-courses and juniors when they have completed 40 quarter-courses)
• Sophomore: students who have completed at least 11 but fewer than 22 quarter-courses
• Freshman: students who have completed fewer than 11 quarter-courses
• Graduate student: students who have a bachelor’s degree or its equivalent and have been admitted to a graduate program
• Special student: students who are not working toward a degree at Northwestern University but are working for credit
• Auditor: students who attend classes and listen to lectures, are not eligible to participate in class discussions or exercises, and do not receive credit (must have approval of the school and instructor concerned)

All the above except auditors may be either full-time or part-time:
• Full-time: students enrolled in at least three quarter-courses or the equivalent
• Part-time: students enrolled in fewer than three quarter-courses or the equivalent

Grading Policies
The following grading system is used in computing the grade point average:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A–</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B–</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C–</td>
<td>1.7</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
<tr>
<td>X</td>
<td>0</td>
</tr>
<tr>
<td>Y</td>
<td>0</td>
</tr>
</tbody>
</table>

The following notations are ignored in computing the grade point average:
• P Pass with credit
• N No grade, no credit
• K In progress
• S Satisfactory: noncredit course
• U Unsatisfactory: noncredit course
• W Dropped course with permission
• V Auditor

At the end of a quarter a grade of X or Y will be given only if the instructor believes the student has a reasonable chance of passing the course by taking an examination or turning in the required work or both.
Academic Regulations

Requests for transcripts initiated by persons or agencies other than the student or appropriate educational agencies will not be filled until written authorization has been secured from the student. When these requests can be anticipated, students can avoid delay by providing such authorization in advance.

Allow one week for a transcript to be issued at any time except between quarters, when three weeks is necessary.

Class Attendance and Absence
Students are expected to attend all sessions of the courses for which they are registered. Excessive absence is cause for failure in the course. Some courses require attendance at the first class meeting; students may be dropped for nonattendance (see the Class Schedule).

Grade Reports
At the end of each quarter, a copy of each undergraduate student’s grades is sent to the parent or guardian at the home address, except as noted below. Notices of deficiencies in scholarship may be reported to a student before the end of a quarter, but the University does not assume the responsibility of issuing such warnings.

The University will supply grade reports to parents of undergraduates unless the registrar receives written instructions from the parents indicating that the student is not a dependent and was not claimed as an exemption on the previous year’s income tax return.

Transcripts
Students who have satisfied all financial obligations to the University are entitled to an official transcript of their academic record, which they may order from the Registrar’s Office. A fee is charged for all transcripts (see Service Fees under Tuition and Fees).

Except for internal educational uses, Northwestern University issues official transcripts only upon written authorization of the student concerned. Because of the confidential nature of a student’s record, telephone requests for transcripts will not be accepted. Written requests should be submitted to the Registrar’s Office.

Requests for transcripts initiated by persons or agencies other than the student or appropriate educational agencies will not be filled until written authorization has been secured from the student. When these requests can be anticipated, students can avoid delay by providing such authorization in advance.

Allow one week for a transcript to be issued at any time except between quarters, when three weeks is necessary.

Access to Student Records
Under the Family Educational Rights and Privacy Act (FERPA), all students have certain rights with regard to their educational records. A copy of Northwestern University’s student records policy is available via NUInfo at <http://www.nwu.edu/registrar/ferpa>.

FERPA grants students the right to:
- Inspect and review their educational records at Northwestern University
- Request an amendment of their records to ensure that they are not inaccurate, misleading, or otherwise in violation of their privacy or other rights
- Consent to disclosure of personally identifiable information contained in their educational records
- File a complaint with the U.S. Department of Education concerning alleged failures by Northwestern University to comply with FERPA requirements

Academic Integrity
Academic integrity at Northwestern is based on a respect for individual achievement that lies at the heart of academic culture. Every faculty member and student, both graduate and undergraduate, belongs to a community of scholars where academic integrity is a fundamental commitment.

Students enrolled at Northwestern are expected to adhere to the University’s standards of academic integrity. Questions about the acceptability of specific behavior should be addressed to the appropriate faculty member or school dean. The following is a nonexhaustive list of types of behavior that violate the standards of academic integrity:
- Cheating: using unauthorized notes, study aids, or information on an examination; altering a graded work after it has been returned, then submitting
the work for regrading; allowing another person to do one's work and submitting that work under one's own name; submitting identical or similar papers for credit in more than one course without prior permission from the course instructors
• Plagiarism: submitting material that in part or whole is not entirely one's own work without attributing those same portions to their correct source (material discussing the use and acknowledgment of sources is available in the Office of the Provost)
• Fabrication: falsifying or inventing any information, data, or citation; presenting data that were not gathered in accordance with standard guidelines defining the appropriate methods for collecting or generating data and failing to include an accurate account of the method by which the data were gathered or collected
• Obtaining an unfair advantage: stealing, reproducing, circulating, or otherwise gaining access to examination materials prior to the time authorized by the instructor; stealing, destroying, defacing, or concealing library materials with the purpose of depriving others of their use; unauthorized collaborating on an academic assignment; retaining, possessing, using, or circulating previously given examination materials, where those materials clearly indicate that they are to be returned to the instructor at the conclusion of the examination; intentionally obstructing or interfering with another student's academic work; otherwise undertaking activity with the purpose of creating or obtaining an unfair academic advantage over other students' academic work
• Aiding and abetting dishonesty: providing material, information, or other assistance to another person with knowledge that such aid could be used in any of the violations stated above; providing false information in connection with any inquiry regarding academic integrity
• Falsification of records and official documents: altering documents affecting academic records; forging signatures of authorization or falsifying information on an official academic document, grade report, letter of permission, petition, drop/add form, ID card, or any other official University document
• Unauthorized access to computerized academic or administrative records or systems: viewing or altering computer records; modifying computer programs or systems; releasing or dispensing information gained via unauthorized access; interfering with the use or availability of computer systems or information

It is the responsibility of every member of the academic community to be familiar with the specific policies of his or her own school. Students who violate these policies are subject to penalties, including course failure and exclusion from the University. Students charged with academic dishonesty may not change their registration in a course in which the charge is pending or in which a finding of academic dishonesty has been made. Information on procedures that will be followed in cases of alleged dishonesty can be obtained from the dean's office of each school. A complete statement of the University's principles regarding academic integrity can be obtained from the Office of the Provost.

The student-faculty Undergraduate Academic Conduct Committee works to maintain a high level of academic integrity at Northwestern; on the request of the provost, that committee also hears appeals from students regarding school decisions concerning academic dishonesty. Such appeals must be in writing and include a detailed statement setting forth the grounds for the appeal. Appeals to the provost are limited to alleged errors in procedures, interpretation of regulations, or the question of whether a finding or sanction appears manifestly contrary to the evidence. The provost will receive appeals only after a sanction has been specified for the alleged violation; an appeal to the provost may concern the finding and/or the proposed sanction.

Regular Examinations
Regular course examinations are held during the last week of each quarter. Summer Session examinations are held at the times indicated in the quarterly Class Schedule. Students are responsible for determining the time and location of each examination. Early examinations are not permitted. Permission to be absent from the final examination is given by the instructor and the dean only for cause beyond the student's control. Normally such permission must be secured in advance of the date of the examination. Any deficiency must be made up before the end of
the next quarter in which the student is in residence in any school of Northwestern University, or credit is forfeited. In no case may such a grade be made up after a lapse of one year.

**Makeup Examinations**
All undergraduate students in residence in any school of Northwestern University must make up grades of X (absent) and Y (incomplete) before the end of the next quarter or credit is forfeited. Students not in residence may apply for a makeup examination. All such grades, however, must be made up within one year after the course was taken or credit is forfeited. Permission to take a makeup examination to remove a grade of X must have the written approval of the instructor and the dean. Makeup examinations are conducted by the departments concerned, early in each quarter. An application for a makeup examination must be filed several weeks in advance at the office of the school in which the course is offered. See the Class Schedule for exact dates the applications are due.

**Academic Standing**
The decision concerning the academic standing of a student is the responsibility of the faculty of the school in which the student is registered.

Academic probation constitutes notice of unsatisfactory academic performance; it is a warning that minimum standards for graduation are not being met. Unless a student demonstrates significant scholastic improvement during the period of probation and thereby indicates ability to fulfill degree requirements within a reasonable period of time, the student may be dismissed from the University. A student will be notified in writing no later than the middle of a term that, because of unsatisfactory work in a previous term or terms, he or she will be excluded in the event of unsatisfactory work during the term for which the notice is issued.

**Academic Probation**
The following are ordinarily placed on academic probation:
- Students who, in any quarter or Summer Session, have received final grades below C in two or more courses
- Sophomores, juniors, or seniors who have a cumulative academic record below a C average on all work attempted at Northwestern University
- Students who fail in two consecutive quarters to complete at least three quarter-courses or the equivalent in each of the two quarters or have failed at the end of the sixth quarter of residence to earn credit for an average of three quarter-courses for each quarter of residence by reason of dropped courses, failure, or uncompleted courses
- Students who have failed to maintain a C average in the major or a professional field of study; the faculty of each school may impose such additional conditions of academic probation as they may deem appropriate

**Removal from Academic Probation**
Students on academic probation are ordinarily removed from probation if the deficiencies that resulted in probation have been remedied during the next succeeding quarter in residence. Students are rarely removed from probation on the basis of a program consisting of fewer than four courses graded on a basis other than the pass/no credit option.

If students on probation who receive grades of X or Y are not dismissed, probation continues until they have completed all courses or until the end of the next quarter in residence, when the students' records are again subject to scrutiny.

In no case are students removed from probation at the end of a quarter in which they have failed any course.

**Academic Dismissal**
The following is a nonexclusive list of categories of students who may be dismissed for academic deficiencies (in every case the decision is determined in part by the student's cumulative academic record):
- Students on academic probation whose academic records have not improved significantly during the period of probation (which will not exceed two consecutive quarters)
- Students not on academic probation who fail in half the work in any quarter or Summer Session
- Students who demonstrate flagrant neglect of academic work at any time
- Students who do not make satisfactory progress toward completion of degree requirements

As a matter of general policy, the probation period for a freshman may be extended to the third quarter of residence if such extension appears to be in the best interests of the student and the University. Such consideration is not granted to a freshman
whose record clearly discloses lack of aptitude or flagrant neglect of work.

**Disciplinary Dismissal**
Students suspended from Northwestern by the University Hearing and Appeals Board may not receive credit for academic work at any other institution during the period of suspension.

**Honors and Prizes**

**Academic Honors**
Degrees with honors are awarded to the top 16 percent of the graduating class of each undergraduate school, as determined by grades in all work at Northwestern University. Students in the highest 3 percent of the class are awarded degrees summa cum laude; those in the next 5 percent, magna cum laude; and those in the next 8 percent, cum laude.

Departmental honors may be granted to graduating seniors who have done outstanding work in a department in connection with a research project or an integrative type of work. Students are nominated for these honors by their departments. The faculty of the school concerned makes the final awards.

**Prizes**
Prizes established through gifts and endowments are awarded to undergraduate students at Northwestern. Some are all-University prizes, and others are available only to students registered in the school, department, or program that administers the awards.

**Honorary Organizations**
Students who qualify by reason of superior scholarship or outstanding achievement are eligible for membership in certain honorary societies. New members of the following organizations are announced in the annual commencement program.

- Arts and Sciences: Phi Beta Kappa
- Engineering: Eta Kappa Nu, Kappa Theta Epsilon, Omega Chi Epsilon, Tau Beta Pi
- Journalism: Kappa Tau Alpha
- Music: Pi Kappa Lambda

Other honorary organizations in various fields include Alpha Kappa Delta, Alpha Lambda Delta, Deru, Mortar Board, Norleggama, Orchesis, Phi Delta Kappa, Phi Eta Sigma, Pi Mu Epsilon, Sextant, and Shi-Ai. Additional professional and technical societies represented at Northwestern are identified in the Student Handbook.

**Academic Options**
For more detailed information about the following programs, see other sections of this catalog.

**Accelerated Degree Programs**

**Honors Program in Medical Education**
The Honors Program in Medical Education (HPM E) is designed for highly talented high school seniors who should be able to qualify for advanced placement in chemistry, mathematics, and one of the humanities on the basis of superior achievement in high school. Each year 60 freshmen are admitted to the seven-year program and to the College of Arts and Sciences, McCormick School of Engineering and Applied Science, or School of Speech. Only candidates applying directly from high school are considered.

The first three years of the program are spent on the Evanston campus in the College of Arts and Sciences, McCormick School, or School of Speech and the last four years at the Medical School on the Chicago campus. HPM E students must complete 36 courses that meet the requirements for HPM E students in one of the three preceding undergraduate schools. They also are responsible for a University Enrollment Requirement of nine full-time quarters. Only courses taken at Northwestern or approved study abroad may be used to satisfy this Enrollment Requirement.

During the first two years in the College of Arts and Sciences, students take required courses in chemistry, physics, and the biological sciences. In addition, they take elective courses in the humanities, social sciences, and arts. The third year is usually devoted to advanced course work in the student’s area of concentration or major. This may be done as a senior concentration in a department or program, by studying abroad in a Northwestern-affiliated program, or by completing the requirements for a BA degree in the College of Arts and Sciences. Students may also take an additional undergraduate year at Northwestern or elsewhere.

Students in the McCormick School spend three years pursuing an in-depth education in mathematics, the sciences, and engineering while taking core courses in biomedical engineering. To supplement their technical courses, students also take courses in humanities and the social sciences.
Speech students spend three years in the Department of Communication Sciences and Disorders, studying the anatomy and physiology of hearing, speech, and the central nervous system as it relates to cognition and memory. They have opportunities to learn how people of all ages hear, speak, and learn—both normally and in the presence of disabling conditions. The students also take courses in chemistry, physics, the biological sciences, the social sciences, and the humanities.

After completing the first three years, HPME students move to the Chicago campus as members of the Medical School first-year class, which includes students who have completed the traditional four years of premedical education. After successfully completing their first year at the Medical School, CAS students who have not received a BA degree qualify for a bachelor of science in medicine and Speech students qualify for a bachelor of science in speech. After the second year of medical school, McCormick students qualify for a bachelor of science in medical engineering. At the end of seven years, all HPME students qualify for the doctor of medicine degree from the Medical School.

Students who wish to be considered candidates for the HPME must complete and return before the December 1 deadline the card enclosed in the undergraduate application for admission that reports their test scores and requests an HPME application. If the request is approved, the student is sent and must complete the special HPME application in addition to the regular application for admission to the College of Arts and Sciences, McCormick School, or School of Speech by the appropriate deadlines (see the Application and Testing Deadlines table on page 16).

**Integrated Science Program**
Northwestern University offers a highly selective undergraduate program of integrated science studies within the College of Arts and Sciences. The Integrated Science Program (ISP) is designed for students with superior high school records and strong motivation in science and mathematics. Its special curriculum provides a thorough and rigorous background in the major scientific disciplines and mathematics. ISP can lead to a bachelor's degree in three years or, after a fourth year at Northwestern, to a double major or an advanced degree.

Enrollment in ISP is limited to assure small class sizes. Selection is made on the basis of scholastic record, test scores, and recommendations. Background requirements are a year of calculus, a year of chemistry, and a year of physics. Students who wish to be considered for ISP should request the special ISP application and brochure in addition to the regular application from the Office of Undergraduate Admission. See Integrated Science Program in the College of Arts and Sciences section of this catalog.

**Four-Year Master’s Programs**
Exceptional undergraduates at Northwestern University may be able to earn both a bachelor’s degree and a master’s degree in less than the usual period of time. The combined degree programs—BA/MA, BS/M A, BA/M S, BS/M S—enable students who commit themselves early in a discipline to accelerate their study toward advanced degrees at Northwestern or elsewhere.

Combined degree programs are special in their intellectual demands. Except in the McCormick School, students receive a double count of nine credits—that is, nine credits are applied toward both the bachelor’s and master’s degrees.

The following departments and programs in the College of Arts and Sciences and the School of Speech have combined degree programs approved by the Graduate School:

- Anthropology
- Art history
- Chemistry
- Classics
- Communication studies
- Economics
- French and Italian
- Geological sciences
• Hispanic studies
• Linguistics
• Mathematics
• Political science
• Sociology
• Statistics

The approved departmental programs vary, but they share a common goal: the selection and training of exceptional students. The programs also share several underlying premises. First, each department invites students to participate in the program. Students do not select themselves, though they may, of course, inquire about their eligibility. Second, selection by a department is a recommendation to the Graduate School for admission. Students are officially admitted to the Graduate School only after their credentials have been thoroughly reviewed and approved by the dean of the Graduate School.

For these reasons, students should be aware of guidelines used by the dean of the Graduate School and other guidelines affecting the operation of the program:

• No particular grade point average, however high, automatically entitles a student to participate in a combined degree program.
• Only one academic year—three quarters or two semesters or less—of transfer credit from another institution may be applied as credit toward the bachelor’s portion of the combined degree, including credit for a junior year abroad. Any participating department may, if it desires, impose a more restrictive standard.
• A combined degree program requires a minimum of 12 full quarters of work. The master’s portion must be completed during the final three contiguous quarters of registration, beginning with the fall quarter. In schools or departments of the University that operate on a four-quarter system, that is, that offer a full program during the Summer Session staffed by the regular faculty, one Summer Session only may be counted toward fulfillment of the 12-quarter requirement. In schools of the University that do not operate on a four-quarter system, cases of one summer of credit will be considered on an ad hoc basis by petitioning the dean of the Graduate School.

• All requirements, both undergraduate and graduate, must be met by the conclusion of the fourth academic year. The bachelor’s and master’s degrees are awarded simultaneously.
• Both degrees will appear on a single transcript, as will the results of all work completed for both degrees.
• Continuation of graduate work at Northwestern by those who complete a combined degree program must receive separate approval by the department and the dean of the Graduate School.

Accelerated Master’s Program in Education and Social Policy
Students who exhibit exceptional ability as Northwestern undergraduates and wish to become certified in elementary or secondary education as part of a master’s degree may apply during the fall quarter of the senior year to the Master of Science in Education and Social Policy Program with the intention of completing the degree and certification requirements at an accelerated pace. See the Accelerated Master of Science in Education and Social Policy Program in the School of Education and Social Policy section of this catalog.

Accelerated Master’s Program in Journalism
Students who exhibit exceptional ability in undergraduate work in the Medill School of Journalism may apply to that school’s graduate division for early admission to the graduate editorial program. This program allows students to qualify for bachelor of science in journalism and master of science in journalism degrees in 12 to 14 quarters of full-time study. Students apply for this program during their junior year; however, interested students are encouraged to begin planning for this option early in their undergraduate career. Information and admissions materials are available from the Medill Office of Graduate Admissions and Financial Aid. See Accelerated Master’s Program in the Medill School section of this catalog.

Combined Bachelor’s Programs

Combined Liberal Arts and Engineering Program
Qualified students may undertake a program to earn both a bachelor of arts in a liberal arts discipline from the College of Arts and Sciences and a bachelor of science in an engineering field from the McCormick School. Students in this BA/BS program, which takes four or five years, must complete all
requirements of both schools. To do the necessary planning, interested students should consult with the CAS Office of Studies and the Undergraduate Engineering Office at the McCormick School as soon as possible after enrolling at Northwestern. See Five-Year BA/BS in the McCormick School section of this catalog.

Combined Liberal Arts and Music Program
Students accepted into the combined College of Arts and Sciences-School of Music program may simultaneously earn a bachelor of arts degree from CAS and a bachelor of music degree from the School of Music. They must complete all CAS degree requirements, including at least 30 CAS courses, as well as all School of Music bachelor of music degree requirements, including at least 30 music courses. Fulfilling both music and CAS requirements usually takes five years of full-time study, and a University Enrollment Requirement of 15 quarters is obligatory (see Financial Regulations).

Participants in this combined program must be accepted by both the School of Music and CAS. The entrance requirements and structure of the program are currently undergoing revision; interested students should consult with the associate dean for undergraduate studies in CAS and the director of admissions in the School of Music for up-to-date information.

Combined Music and Engineering Program
Students accepted into the combined McCormick School of Engineering and Applied Science-School of Music program may simultaneously earn a bachelor of science degree from the McCormick School and a bachelor of music or bachelor of arts in music degree from the School of Music. They must complete all McCormick School degree requirements, including at least 36 McCormick courses, as well as all School of Music degree requirements, including at least 32 music courses. Fulfilling both music and engineering requirements usually takes five years of full-time study, and a University Enrollment Requirement of 15 quarters is obligatory (see Financial Regulations).

Participants in this combined program must be accepted by both the School of Music and the McCormick School. The entrance requirements and structure of the program are currently undergoing revision; interested students should consult with the Undergraduate Engineering Office in the McCormick School and the director of admissions in the School of Music for up-to-date information.

Interdisciplinary Study

Mathematical Methods in the Social Sciences Program
The Program in Mathematical Methods in the Social Sciences (MMSS) in the College of Arts and Sciences enables students to combine the study of social sciences with training in formal analytical methods. The program is intended for students with high mathematical aptitude and strong interest in social problems and issues, including their policy and research implications.

Admission to the MMSS is very selective; it is limited to entering freshmen and students beginning their sophomore year who have earned superior academic records and demonstrated strong aptitude in mathematics. Prerequisite for admission consideration is a full-year course in calculus. See Mathematical Methods in the Social Sciences in the College of Arts and Sciences section of this catalog.

Integrated Science Program
See Accelerated Degree Programs.

Interschool Programs
Students in any undergraduate school may enroll in the Undergraduate Leadership Program. All undergraduates may enroll in the International Studies Program as an adjunct major. Students in the College of Arts and Sciences and Schools of Music and Speech also are eligible for the Integrated Arts Program, and the Music Theatre Program is open to School of Music voice majors and School of Speech theater majors. (See Other Undergraduate Programs.)

Undergraduates in other schools may enroll in College of Arts and Sciences minor programs. (See Minors under Special Opportunities in the CAS section of this catalog.)

Center for the Writing Arts
Northwestern’s Center for the Writing Arts sponsors a number of programs as well as a series of courses designed to highlight the University’s commitment to excellence in writing. Many of the courses are taught by visiting professional writers. (See Other Undergraduate Programs.)
McCormick School Honors Programs

Honors Program in Undergraduate Research
The Honors Program in Undergraduate Research in the McCormick School provides an unusual opportunity for prospective freshmen with superior motivation and scholastic credentials to be admitted to work with an engineering faculty mentor/adviser in a challenging research project, beginning in the first year and continuing throughout the undergraduate years.

Students may request the names and current research interests of participating faculty, enabling them to apply to a project of their choice. With the participation of a faculty sponsor, students will be selected for the program based on their high school records; SAT I or ACT, SAT II, and Advanced Placement test scores; and, usually, an interview. Interested students may request an application and additional information from the McCormick School Undergraduate Engineering Office. (See Honors Program in Undergraduate Research in the McCormick School section of this catalog.)

Honors Program in Engineering and Education
The Honors Program in Engineering and Education is designed for students who have a strong interest in education and training as well as in science, mathematics, and engineering. Students join the program in the belief that a more technical background will give them an advantage in the research and development of educational software or in the understanding and enhancement of human learning in the classroom or workplace.

The program provides undergraduate engineering students possessing strong academic credentials and some advanced placement the opportunity to complete in five years an MA in learning sciences and a BS in engineering. Students also gain industrial and/or research experience related to their area of specialty.

High school students may apply to this program when they apply to the University. McCormick students may apply to the program during their junior year. All applications are reviewed by a committee of faculty and co-op engineering employers, who provide the industrial experience for participants.

Honors Program in Engineering and Journalism
The Honors Program in Engineering and Journalism is intended to prepare exceptional students for communications careers emphasizing engineering, science, and technology. This joint program with the Medill School of Journalism involves completing a BS in engineering and an MS in journalism. Although the program normally requires five years of study, unusually capable students may be able to shorten the time through use of advanced placement credits and accelerated scheduling. To be considered for the program, applicants to Northwestern complete a special questionnaire that is evaluated by a Medill faculty panel. (See Honors Program in Engineering and Journalism in the McCormick School section of this catalog.)

Honors Program in Engineering and Management
Honors students are eligible to participate in a joint program of the McCormick School and the J. L. Kellogg Graduate School of Management. High school students with superior scholastic credentials and strong motivation for study beyond the bachelor's degree may be admitted to an undergraduate engineering program at the McCormick School and also granted deferred admission to the Kellogg School.

Interested students should request an application and additional information from the McCormick School Undergraduate Engineering Office. (See Honors Program in Engineering and Management in the McCormick School section of this catalog.)

CAS Honors Programs
The Honors Program in Medical Education, the Integrated Science Program, and the Program in Mathematical Methods in the Social Sciences are described above. Several CAS majors, e.g., American studies and the Honors in English program, are special-admission majors; see the College of Arts and Sciences section of this catalog.

CAS Scholars Program
Students who demonstrate exceptional promise for independent work in any field, discipline, or area represented in the College of Arts and Sciences may be asked to participate in the CAS Scholars Program. There is no special application procedure for the program. Participation is by invitation of the faculty
board of the program at the time of admission to CAS and normally continues throughout the student’s undergraduate career. Upon acceptance to CAS, potential CAS Scholars are invited to visit the campus and discuss the possibilities available to them with the director and potential faculty mentors.

In addition to completing the requirements for a degree in CAS, participants also are assigned a special faculty mentor (or succession of mentors) to help them in shaping an individualized curriculum of courses, tutorials, and creative or research projects related to their intellectual priorities. Each scholar has access to a research fund to support this course of study and associated summer or travel expenses; the seminars, lectures, and other activities of such facilities as the Kaplan Center for the Humanities and the International Studies Program; and additional advising and other assistance from the director of the program.

M entors in the CAS Scholars Program are chosen from the faculty on the basis of outstanding scholarship in a field appropriate to a scholar’s interest and demonstrated aptitude for working with bright, highly motivated undergraduates.

Formal Options

Pass/No Credit (P/N)
The P (pass) or N (no credit) option allows students to explore fields beyond the areas of their specialization without concern about grade point average. Many undergraduate courses are open to the P/N option. For information about a particular school’s P/N policy, see that school’s section in this catalog.

Student Organized Seminars (SOS)
Students who wish to pursue studies not included in the catalog may plan and initiate their own courses under the supervision of sponsoring faculty members. SOS credit courses may be developed in all undergraduate schools except the Medill School of Journalism.

Independent Study (C99)
Many departments offer undergraduate seminars and independent studies for qualified students. C99 in any department enables a student to engage in individual special study and research. Depending on the student’s interests, independent projects may involve work in a laboratory or library, fieldwork outside the University, or the creation of a work of art. The maximum credit a student may receive for C99 (or equivalent independent study) during any one quarter is two units.

Double Major
A double major is available to all students who complete a full major program in two departments.

Self-Designed Major
A self-designed major permits all students, with the permission of the school’s curriculum committee or dean, to concentrate advanced study in an area other than one of those recognized through a departmental or interdisciplinary major. This option is identified as an ad hoc major in the College of Arts and Sciences, the interdepartmental studies major in the School of Speech, and the Combined Studies Program in the McCormick School.

Departmental Honors Programs
Departmental honors programs are available to students through most departments of the College of Arts and Sciences, some departments in the School of Speech, and all departments of the McCormick School and the School of Education and Social Policy. They involve advanced study through special undergraduate seminars or graduate courses and/or independent work under faculty supervision.

Teacher Certification
CAS students also may complete the requirements of the secondary teaching program and qualify for Illinois state certification. See Teacher Certification at Northwestern in the School of Education and Social Policy section.

Off-Campus Programs

Field Study
Many off-campus field studies, internships, and research opportunities sponsored by various schools and departments are available to Northwestern students. The programs vary greatly: Some carry academic credit; some are undertaken in conjunction with a class or seminar; some make provision for a stipend; some entail living away from campus.

Following is a representative list of field studies programs with their sponsoring school, department, or program:
• Chicago Field Studies Internship (arts and sciences)
• Communication Studies Field Studies Program (communication studies)
• Education and Social Policy Practicum (education and social policy)
• Internships in the Arts (art history)
• Internships in Business Institutions (business institutions)
• Internships in Environmental Sciences (environmental sciences)
• Internships in the Humanities (Alice Berline Kaplan Center for the Humanities)
• Internships in Television Production (radio/television/film)
• Internship in Women's Services (women's studies)
• Northwestern Archaeological Field School (anthropology)
• Political Campaigning (political science)
• Professional Apprenticeship in Music Education (music)
• Teaching Magazine Program (journalism)
• Teaching Newspaper Program (journalism)
• Teaching Practicum (education and social policy)
• Teaching Television Program (journalism)
• Theatre Field Experience (theater)
• Walter P. Murphy Cooperative Engineering Education Program (engineering)

Study Abroad
Northwestern encourages qualified students to pursue study abroad when such study promises to enrich their academic program. The Office of Study Abroad provides advice to students about available foreign study options. Any undergraduate student who desires to transfer credit earned through foreign study to Northwestern must receive the approval of the Office of Study Abroad prior to embarking on a foreign study program. Students also are required to review their plans with the dean's office of the school in which they are registered. In most cases, a fee is charged for the transfer of credit earned in study abroad programs.

Most Northwestern students studying abroad do so in one of the University's affiliated foreign study programs. Countries in which affiliated programs are currently available include Egypt, France, Germany, Israel, Italy, Japan, the People's Republic of China, Russia, Spain, and the United Kingdom. Students participating in affiliated programs during the academic year remain registered at Northwestern during their foreign study and are eligible to receive financial aid through Northwestern as necessary.

Qualified students may also participate in non-affiliated foreign study programs that have been preapproved by Northwestern. Students may also request permission to transfer credit from ad hoc programs. Students participating in nonaffiliated (preapproved or ad hoc) foreign study programs are not registered at Northwestern during their foreign study and are not eligible for any financial assistance from Northwestern.

Since foreign study often requires special language or other preparation, students interested in study abroad are urged to consult with the Office of Study Abroad early in their Northwestern careers. The office sponsors workshops on planning for study abroad as well as sessions on specific foreign study options.
Undergraduate Schools and Courses

Key to Course Listings

Changes
Although the course listings in this catalog are as complete and exact as is possible at the time of printing, some changes may occur later and courses may be dropped or added. The official Class Schedule issued for each quarter contains a complete and updated listing of courses for that quarter. The University reserves the right to cancel courses for which registration is not sufficient.

Arrangement
Courses offered by each school are listed by departments arranged alphabetically. In the departments, courses are arranged by A, B, C, D, and E:
• A-level courses are primarily for freshmen and sophomores, usually without college prerequisite.
• B-level courses are primarily for freshmen, sophomores, and juniors, sometimes with the prerequisite of an A-level course in the same or a related department.
• C-level courses are primarily for upperclass and graduate students, with the prerequisite of junior standing or an A- or B-level course in the same or a related department.
• D-level courses or seminars, in which the major part of the work is not research, are primarily for graduate students; they may be open to advanced undergraduate students with permission.
• E-level courses or seminars, in which the work is primarily research, are only for graduate students.

Course Credit and Quarters
Daytime work in all the schools on the Evanston campus is on the quarter system. A quarter-course, the unit of instruction, is the work done in a class meeting at least three hours per week and carries the value of one unit of credit. Exceptions are courses meeting fewer than three hours per week, which may carry less than one unit, and 15-week courses, which carry 1.5 units. A quarter-course is the equivalent of 2 1/2 semester hours. (For transfer to other institutions or for certification stated in credit hours, undergraduates may consider a quarter-course equivalent to four quarter hours of credit.)

Summer Session combines the course offerings of University College, which is on the semester system, and the schools on the Evanston campus, which are on the quarter system. (For transfer credit, courses taken during Summer Session are the equivalent of four quarter hours or three semester hours.)

Numbering System
Three sets of characters denote all courses. The first set (three numbers) indicates the school and department or area of study, the second (a letter and two numbers) is the course number, and the third (one, two, or more numbers) usually indicates whether the course is part of a sequence. Special characters may identify certain groups of courses; for example, 15-week courses are designated as FW or TS. If courses carry less or more than one unit of credit, the number of units in parentheses follow the course title.

• 720-B06-0 Environmental Literacy
  7 = McCormick School
  20 = Department of Civil Engineering
  B06 = specific course
  0 = one-quarter course

• 610-B10-1,2 Landmarks in Rhetorical Theory
  6 = School of Speech
  10 = Department of Communication Studies
  B10 = specific course
  1,2 = two-quarter sequence

• 471-C69-FW Field Research and Methods of Data Collection (1.5)
  4 = College of Arts and Sciences
  71 = Department of Sociology
  C69 = specific course
  FW = 15-week course
  (1.5) = 1.5 units of credit
A liberal arts education equips students to take advantage of the diverse opportunities of a constantly evolving society. The ability to reason clearly, to extract the essential significance of large bodies of information, to apply general principles in new contexts, and to communicate effectively—these are skills required for success and advancement in professional schools, graduate programs, and occupations. A liberal education develops the qualities of mind needed by citizens in a democracy. CAS students often rise to positions of leadership after graduation, and one aim of the college is to prepare them to make decisions informed by knowledge, understanding, and thoughtfulness.

At Northwestern, faculty research enriches undergraduate learning. Our faculty members have achieved international reputations as scholars, and many CAS departments stand among the best in the nation. Students share in the excitement of discovery in the sciences, humanities, and social sciences through the intellectual energy professors bring to the classroom and through special projects developed by students under faculty guidance. Northwestern's outstanding library, research facilities, and professional schools support this stimulating pursuit.

**Academic Policies**

**Program of Study for the Degree of Bachelor of Arts**

CAS offers courses of study in the arts and sciences leading to the degree of bachelor of arts. Within a framework of requirements established by the faculty, students have extensive flexibility in structuring their academic programs.

Before graduation each student must demonstrate proficiency in writing and competence in a classical or modern foreign language, complete at least 45 quarter-courses, and fulfill the residence and grade requirements described below. First-year students complete two freshman seminars. Students take courses in each of the six major areas of intellectual
inquiry within the arts and sciences—areas defined by shared subject matter, sources of primary data, evaluative criteria, and modes of analysis—to acquire familiarity with a broad range of subjects and methods for approaching them. These general requirements are complemented by in-depth exploration of a major.

There is considerable latitude to fashion a personally rewarding and intellectually challenging course of study. Students who enter with sharply focused interests find that the college's limited admission programs offer immediate immersion in specialized work. Other students use the flexibility of the quarter system to pursue a variety of interests concurrently. A period of study abroad can complement many academic programs; students interested in such study are encouraged to explore the many possibilities early in their academic career.

CAS provides a large array of independent, small group, active learning experiences for its students: research and advanced study in special departmental seminars, independent study with a faculty member or in a laboratory, junior tutorials, and senior seminars. Honors study for seniors of exceptional academic ability provides the opportunity to pursue integrative and pathbreaking research. Departmental honors are awarded at graduation to those who complete their honors program with distinction.

Guidance in planning a coherent personal curriculum is available in several places. General advising is centered in the CAS Office of Studies, where faculty advisers are available throughout the year to discuss academic matters. They can answer questions about academic programs and discuss difficulties in courses, choices of major and career, and preparation for graduate and professional schools. Sophomores who have not declared a major are especially encouraged to seek advice from these advisers. Those unsure of where to turn with a question should begin in the Office of Studies; its staff will know where to direct queries they cannot handle themselves.

Each freshman is assigned a freshman adviser, a faculty member who, whenever possible, is in the student's area of general academic interest or associated with the student's living unit. Each CAS department and program has a corps of faculty advisers who advise undergraduates (including freshmen and sophomores) in their unit about courses, majors, and minors.

For various reasons, some CAS students will complete their graduation requirements in fewer than four years. Some transfer to the college from other schools in the University; others transfer to Northwestern from other institutions. Many freshmen enter with advanced placement and credit for work done before matriculation. All students pursuing abbreviated programs need to be particularly attentive to general education and major requirements.

Requirements for the Degree of Bachelor of Arts

Residence and Grade Requirements

Of the required 45 quarter-courses, the last 23 must be taken while students are enrolled as undergraduates at Northwestern. During the last three quarters preceding the granting of the BA degree, students must be enrolled in the College of Arts and Sciences.

Pass/No Credit Option

Full-time students in CAS are permitted to enroll in a limited number of courses with the understanding that they will receive in place of a regular letter grade the notation P (pass) or N (no credit), neither of which counts in the student's grade point average. No more than one course per quarter and six courses in all may be taken under this P/N option. No more than one-fifth of the total courses taken at Northwestern and offered for graduation may have grades of P or D. Courses used to satisfy the distribution, foreign language, and freshman seminar requirements cannot be taken P/N.

While some other undergraduate schools of the University offer a Target Grade-P/N registration option, such registration is not available for courses offered by CAS. Special rules govern registrations by CAS students in courses of the undergraduate schools where this plan is available as well as by non-CAS students who transfer into CAS. Questions concerning this policy should be addressed to the Office of Studies.

Students must achieve a grade point average of C (2.0) or higher in courses offered to meet degree requirements. No work passed with a grade of D or P counts toward a major or minor (including any course prerequisite to a course required in the departmental unit or any related course), and a grade of C– or higher must be earned in the last
effectively, typically through the investigation of a specific theme or issue. Freshman seminars are limited to 15 students to encourage discussion, and each seminar requires considerable expository writing—usually a minimum of 15–20 typed pages per quarter. These seminars ordinarily supplement rather than replace standard introductory courses and usually do not provide the preparation necessary for advanced work in a departmental program.

Every student in the college is required to complete two freshman seminars in the freshman year. To ensure that class sizes are limited and that registrations are equally distributed, the college specifies the two quarters in which each student will take the seminars. P/N registration is not allowed in freshman seminars.

Writing Proficiency Requirement
The writing proficiency requirement has two parts: passing a writing proficiency examination (or having the exam waived on the basis of test scores) and writing satisfactorily in courses taken at Northwestern. Freshman seminar instructors make the initial evaluation of writing in courses. Students who do not write well on the exam, in their freshman seminars, or in other courses may be asked to take English A05 Expository Writing. Courses in expository writing and intermediate composition are available for all students who wish to increase their skill and confidence in writing.

Foreign Language Requirement
Before graduation students must demonstrate proficiency in a classical or modern foreign language equivalent to the work covered in a second-year, college-level course. Language proficiency may be demonstrated by achieving a score designated by the CAS Council on Language Instruction on a College Entrance Examination Board Advanced Placement Examination, by passing a proficiency examination administered at Northwestern during New Student Week and periodically thereafter through the school year (language departments may impose a limit on the number of times a proficiency examination may be taken), or by successfully completing course work designated by the Council on Language Instruction.

Students who believe they are proficient in reading, writing, listening, speaking, and the culture of a language not regularly taught at Northwestern
may petition the Council on Language Instruction for a proficiency examination in that language. Petitions are available in the Office of Studies and must be filed during a student’s first quarter in CAS. In certain extraordinary cases of certified learning disability directly related to foreign language acquisition, the Council on Language Instruction has the authority to authorize a substitute for the proficiency requirement. The council will not, however, simply excuse a student from the foreign language requirement.

**Distribution Requirements**

To ensure breadth of education, CAS students must take two quarter-courses in each of the six distribution areas listed below. The list of courses that satisfy the distribution requirements is established by a CAS faculty committee. The list changes from year to year; a course must appear on the list for the year in which it was taken in order to satisfy these requirements. A current list is available in the CAS Office of Studies.

- **I. Natural Sciences**
  - Courses in this area introduce methods of inquiry and fundamental concepts in the natural sciences.
- **II. Formal Studies**
  - Courses in this area introduce concepts, methods, and use of formal rules of inference in mathematics, statistics, computer science, logic, linguistics, and cognate areas by showing how objects of thought and experience and their relationships can be analyzed in formal terms.
- **III. Social and Behavioral Sciences**
  - Courses in this area introduce the theories, methods, and findings of empirical research on human behavior and its relation to social, cultural, economic, and political groups and institutions.
- **IV. Historical Studies**
  - Courses in this area introduce the chronological development and historical relationships in cultural, social, political, economic, and military affairs in a broad temporal perspective.
- **V. Values**
  - Courses in this area introduce the analysis of moral, social, and religious values and how they have developed.
- **VI. Literature and Fine Arts**
  - Courses in this area foster understanding of how the attitudes, ideas, and values of individuals, groups, societies, or cultures are represented in their literature, arts, and creative activities.

As many as six of these distribution requirements may be satisfied by achieving sufficient scores on College Entrance Examination Board Advanced Placement or higher level International Baccalaureate examinations. A list of qualifying scores and tests as well as detailed information concerning the distribution requirements are available from the Office of Studies.

**Major Study Requirement**

All students must fulfill the requirements of a major, which must be declared by the end of the sophomore year. Majors are declared by meeting with the designated adviser in the department or program offering the major; at that meeting a course plan is developed and a Declaration of Major form is completed.

Students may pursue two or more majors by completing each department’s major requirements. With limited exceptions in certain formal dual-major programs, the same course may not be applied to the major requirements of two departments. However, a course used as a major course in one department may also fulfill a course requirement for another major program.

A student may elect a major from among the following options:

- **Departmental Major**
  - Each department offers one or more programs of specialization, which are described in detail immediately preceding the departmental course offerings in this catalog.
- **Area or Interdisciplinary Major**
  - The college offers 13 interdisciplinary majors that apply the approaches of several departments to certain scientific, cultural, and political areas. These programs, described in the corresponding entries, are American studies, Asian studies, cognitive science, comparative literary studies, computing and information systems, drama, environmental sciences, geography, integrated science, international studies, mathematical methods in the social sciences, urban studies, and women’s studies. American studies, integrated science, and mathematical methods in the social sciences are limited-admission majors that require a special application, as does the writing major in the English department. Geography, international studies, mathematical methods...
in the social sciences, urban studies, and women's studies are available only as adjunct majors (that is, in conjunction with a second major).

- Ad Hoc Major

Occasionally students with well-defined interests are led to programs of study that do not fit neatly into the mold of a traditional major. They may develop an ad hoc major by bringing together courses from various departments. Ad hoc majors must be approved by the CAS faculty's Curricular Review Committee. Ad hoc majors approved in recent years include the history of medicine, ethnomusicology, and American social dynamics; there is an established curriculum for the ad hoc major in neuroscience. For more information, see the assistant dean for curriculum in the Office of Studies.

Special Opportunities

Junior Year Tutorials

These tutorial classes for juniors, always with fewer than eight students, emphasize intense intellectual exchange and detailed mastery of texts and concepts. They develop critical skills, including research design if appropriate, through mutual criticism and practice in written and oral communication. Recent tutorials have included British Science Fiction (English), Masculinity and the Politics of Abortion (sociology), Philosophy of Language: The Question of Origins and Ends (philosophy), and The Life and Work of W. E. B. DuBois (history).

Senior Linkage Seminars

In their senior year, undergraduates may take specially designed linkage seminars that approach social and work-related concerns through the eyes of an accomplished nonacademic professional with an affinity for the liberal arts and a gift for intellectual inquiry. These seminars link liberal education to professional issues, illustrating how theory and practice affect and enrich one another. In this way, they focus on the transition from the academic to the nonacademic world. Topics have included philosophy in the practice of medicine, the role of nonprofit organizations in American society, public policy in science and technology, and women and sexual violence. Linkage seminars are announced to CAS seniors before registration each quarter.

Undergraduate Seminars and Independent Study

By departmental invitation, seniors may take C98 Undergraduate Seminar in one or more quarters, up to a maximum of four quarter-courses.

Seniors, as well as juniors with excellent records, may register for C99 Independent Study under the supervision of a faculty member. During the quarter before enrolling in C99, students must submit to the department for approval a detailed description of the work they will undertake and the basis for its evaluation. At the completion of the course, they also must submit an abstract of the completed work to the department, where the description and the abstract are filed.

Students may not register for more than two credits of C99 in a quarter. No more than nine quarters of C98 and C99 can be presented as credit for graduation. Certain independent study courses offered by some departments with course numbers different from C98 and C99 are also subject to these restrictions.

Honors

Each major in the College of Arts and Sciences offers an honors program leading to the award, at graduation, of departmental honors to seniors with outstanding achievement in connection with a research project or other integrative type of work. Although the detailed criteria vary somewhat by major (and may be consulted under the listings of individual departments and programs), all share certain features.

Students recommended for departmental honors must have completed with distinction both such regular courses as may be required of them by their major and at least two quarters of C98 or C99 or their equivalent or D-level courses or some combination thereof. The honors project must result in a research report, thesis, or other tangible record; course work alone, such as completion of D-level courses, is not sufficient. Simple data collection, computer programming, analysis of data with canned programs, and summaries of primary or secondary sources are not alone bases for the award of departmental honors.

Each major has an undergraduate honors committee responsible for administering its honors program and for preparing the final recommendations for honors that are submitted in May to the CAS Committee on Superior Students and Honors. Students
are proposed for honors by the faculty adviser, who writes a letter describing and evaluating the student project. Additional evaluative letters giving independent and substantive judgments of the project must be submitted by faculty members unconnected with the student's project. The departmental honors committee reviews all nominations for departmental honors in a given year during spring quarter and takes a separate recorded vote on each candidate. Approved nominations are then forwarded to the Committee on Superior Students and Honors for final review.

Minors
Students may choose to pursue one of 40 minors or minor concentrations currently offered in CAS as well as the interschool Integrated Arts minor (see Other Undergraduate Programs). Specific minor requirements are given under the appropriate headings in this catalog. Completion of a minor is optional and not a degree requirement, and no more than one minor or minor concentration may be pursued and listed on a student's transcript.

Concentrations in the School of Music and the School of Speech for CAS Students
Students in CAS may elect to pursue a special concentration in music studies offered by the School of Music or one of four special concentrations offered by the School of Speech. These special curriculum concentrations, consisting of five to six courses, have limited enrollment and are available only to CAS students. More information is available at the CAS Office of Studies.

Preprofessional Study
CAS offers its students excellent preparation for subsequent training in professions such as law, medicine, and management. Each year many graduates pursue professional study in these areas. Other students enter the work force directly.

All majors can furnish suitable preparation for professional schools, provided appropriate courses are included in the student's course of study. However, no major is intended solely as preprofessional training. The college advisers in the Office of Studies help students design academic programs that combine the breadth of a liberal arts education with adequate preparation for further professional study. The Office of Studies has prepared pamphlets describing in detail the admission requirements of graduate professional schools and the ways in which those requirements can be met at Northwestern.

Academic Options

Combined Bachelor's and Master's Degree Programs
Exceptional undergraduates may be able to earn both a bachelor's degree and a master's degree in four years of study in the following departments: anthropology, art history, chemistry, classics, economics, French and Italian, geological sciences, Hispanic studies, linguistics, mathematics, political science, sociology, and statistics. Students are admitted to these programs only by invitation of the department and with the approval of the Graduate School. (See Academic Options in the Undergraduate Education section of this catalog.)

Combined CAS-Medical School Program
The Honors Program in Medical Education (HPME) is designed for unusually gifted high school students who seek a career in medicine or medical science. It provides a plan whereby students entering Northwestern are admitted simultaneously to CAS and to the Medical School. HPME students then participate in a challenging program, with the first three years in undergraduate study and the last four years in the Medical School, thus reducing the period of formal training by at least one year.

Students in HPME must successfully complete 36 quarter-courses while in CAS and complete a University Enrollment Requirement of nine quarters. The course requirement includes 11 prescribed science courses. Selection of the remaining 25 courses depends on the curriculum chosen by the student. Options include completion of a BA degree, a senior concentration, or study abroad in a Northwestern-affiliated program.

Further information can be obtained from the premedical adviser in the Office of Studies.

Combined CAS-School of Music Program
Students accepted into the combined CAS-School of Music program may simultaneously earn a BA degree from CAS and a BM degree from the School of Music. They must complete all CAS degree requirements, including at least 30 CAS courses, as well
as all requirements for the bachelor of music degree in the School of Music, including at least 30 music courses. Fulfilling both CAS and School of Music requirements usually takes five years of full-time study, and a University Enrollment Requirement of 15 quarters is obligatory.

Participants in this combined program must be accepted by both the School of Music and CAS. The entrance requirements and structure of the program are currently undergoing revision; interested students should consult with the associate dean for undergraduate studies in CAS and the director of admissions in the School of Music for current information.

Teaching Certification
Students enrolled in a number of departments of the College of Arts and Sciences may simultaneously pursue secondary teacher certification through the School of Education and Social Policy. Areas of certification are art, biological sciences, chemistry, economics with history, English, French, German, history, mathematics, physics, political science with history, sociology with history, and Spanish.

Majors in the certification areas who wish to be considered for teaching certification must apply, be admitted to, and complete all requirements of the Secondary Teaching Program as described in the School of Education and Social Policy section of this catalog. Application should be made with the Office of Student Affairs in the School of Education and Social Policy.

Other Undergraduate Programs
Students in CAS may enroll in courses offered by the interschool Undergraduate Leadership Program as well as those offered by several other interschool programs administered by the college, including the Center for the Writing Arts, the Integrated Arts minor, and the International Studies adjunct major (see the Other Undergraduate Programs section of this catalog).

Study Abroad
CAS students may study abroad, both in programs that are affiliated with Northwestern and those that are not. Prior approval is required in order to receive credit for any study abroad other than the summer programs in Mexico and Quebec operated by the Committee on Institutional Cooperation (consisting of the 11 Big Ten universities and the University of Chicago). Students who have studied abroad must return and be enrolled as full-time students in CAS for at least as many quarters as were spent abroad, even if all other requirements for graduation had been satisfied at an earlier time.

The philosophy of the college is that the best foreign study experiences combine strong academic programs with a significant opportunity for immersion in the culture of the host country. For that reason, CAS strongly encourages students who study abroad to do so for a full academic year. Complete information on study abroad is available from the University’s Office of Study Abroad.

General Studies
These interdivisional courses are open to all qualified students.

401-B98-0 Student Organized Seminars Students who desire to study topics in arts and sciences that are not covered in the college’s course offerings may initiate their own courses under the supervision of sponsoring faculty members. Enrollment in these seminar courses is limited to 20 students. The student organizer or organizers must, in consultation with the faculty sponsor, prepare a plan for the seminar and submit it to the associate dean for undergraduate studies before the middle of the quarter preceding the quarter in which the seminar is held. The plan must include a topic description, a reading list, specification of the work that will be graded (such as term papers and written examinations), prerequisites, and the meeting schedule. The associate dean for undergraduate studies forwards proposals to the Curricular Review Committee of the college, which must review and approve all seminars to be offered. Students may enroll in only one Student Organized Seminar per quarter, and enrollment must be on the P/N basis. CAS students interested in organizing a seminar should consult the associate dean for undergraduate studies for further details.

401-C50-0 Foreign Study Registration for students participating in a Northwestern-affiliated foreign study program in England, France, Germany, Israel, Italy, Japan, the People’s Republic of China, or Russia. Four units of P/N credit each term.

401-C51-0 Foreign Study in Seville Registration for the Northwestern/University of Seville Junior Year Program in Spain. Four units of P/N credit each term.

401-C93-0 Chicago Field Studies Internship (4 units) Full-time participant-observer experience in Chicago-area political, planning, and policy organizations; service, civic, and community institutions; groups committed to social change. Placement of students in responsible volunteer
The study of the African American experience has a very long and distinguished history in the United States. The field has developed exciting insights as well as firm intellectual and empirical foundations for the systematic study of the African American experience and, through such study, for a greater understanding of the larger American experience. From its beginnings, the field has been strongly interdisciplinary, bringing the perspectives of different disciplines to bear on understanding black life. The Department of African American Studies exemplifies these traditions and strengths, and through its courses provides students the opportunity to explore the richness and diversity of the African American experience in a meaningful and coherent way.

The primary focus of courses in the department is on blacks in the United States. At the same time, because of the scope and importance of the African diaspora throughout the New World, serious attention is also given to peoples of African descent in the Caribbean and in Latin America. Many courses in the department compare the black experience in one part of the New World with that in another as well as with that of other racial minorities in the New World. This broad study of the African American experience is one of the key features of the department, one that distinguishes it from similar departments in other institutions. Other major themes in the department’s curriculum include the nature of colonization and its impact on the colonizer and on the colonized; racism and its effects on society as well as on scholarship; the importance of oral language, history, and tradition in the African American experience; the roots and development of African American music, literature, and religious styles; and analysis of key institutions such as the family.

African American studies provides good preparation for graduate work in the social sciences, the humanities, and the professions as well as for jobs and careers in a variety of fields. Education, law, journalism, urban planning, health-care delivery and administration, business, social work, and politics are only a few of the fields for which African American studies provides an excellent background. In addition, since considerable attention is being paid by scholars and political leaders to the Caribbean and Latin America as well as to blacks and other minorities in the United States, students of African American studies will enter a field that touches on issues of far-reaching national and international significance.

Major in African American Studies

Departmental courses

Core courses: B10-1,2, B25, B36-1,2

Concentration: in addition to the core sequence, five courses selected from one of the following areas:
• Social and behavioral studies: C20 and four other courses, one to include data handling and analysis
• Historical and comparative studies: B45, C32, and three other courses
• Cultural studies of the black experience: C49 and four other courses

Senior sequence: two-quarter sequence taken in the senior year: C90 and either C96 or C99.

Related courses: subject to approval of the department adviser, majors must take five courses offered by other departments at the B or C level, at least three of which are at the C level. Students are expected to choose related courses that develop the methodological skills and substantive focus appropriate to their areas of concentration.

Minor in African American Studies

The minor in African American studies gives students a thorough exposure to contemporary scholarship concerning the African American experience.

Minor course requirements (8 units)
• Two foundation courses chosen from B10-1,2, B25, B36-1,2, B40
• Six additional courses in the department or approved by the department, four at the C level and one a history course chosen from B14-1,2, C26, C32; History C01-1,2 or another approved history course

Core Courses

404-B10-1,2 Survey of African American Literature
Two-quarter sequence on the literature of blacks from slavery to freedom. Works of major writers and significant but unsung bards of the past.

404-B25-0 African American Culture
Principal facets of African American culture, slavery to the present. Interconnections between African American culture and the sociopolitical context in which it developed. Role of African American culture in the larger American culture.

404-B36-1,2 Introduction to African American Studies
1. Method, historical overview (Africa, slavery, rural, urban), social class, racism. 2. Institutional development of politics, church, education, culture, women/family; historical and contemporary liberation struggle.

Social and Behavioral Studies

404-B30-0 The Civil Rights Movement
Interdisciplinary analysis of the civil rights movement, focusing on the period between the end of World War II and 1966. Opposition to the movement, competition among movement
organizations, radicalization, and the movement as a problem in historiography.

225-C13-0 Development of African American Children and Families
Research and Social Policy See Human Development and Social Policy in the School of Education and Social Policy section of this catalog.

404-C15-0 Urban Education Problems of urban education; special attention to prospects for reforming urban school systems.

404-C20-0 The Social Meaning of Race Race as a social concept and recurrent cause of differentiation in multi-racial societies. Impact of race on social, cultural, economic, and political institutions. Discussion of prejudice, racism, and discrimination.

471-C24-0 Social Structure in African American Communities See Sociology.

449-C27-0 Black American Politics in the United States See Political Science.

Historical and Comparative Studies

404-B14-1,2 History of Racial Minorities in North America Problems and experiences of racial minorities: blacks, Native Americans, Asian Americans, and Hispanic Americans. Comparative exploration of their relationships to each other and to the majority society. 1. 1600–1865. 2. 1865–1974.

404-B45-0 Black Communities in Diaspora Comparative exploration of social and cultural life in communities of African slaves and their descendants in the Caribbean, Latin America, Asia, and the United States. Common heritage and diverse developments.

427-C01-1,2 Survey of African American History See History.

417-C21-0 African American Economic History See Economics.

404-C32-0 Issues in African American Historiography Research seminar. Use of primary and secondary sources for design and execution of a research project. Prerequisites: consent of instructor and B36-1,2 or two courses in American history.

Cultural Studies of the Black Experience

404-B59-0 Introduction to African American Drama Thematic and historical survey of African American drama. Sociopolitical context, thematic issues and styles, the aesthetic reflected in the work, impact on African American and general theater audiences.

404-C38-0 Dostoevsky's Way Impact of Dostoevsky's Notes from the Underground and Crime and Punishment on Wright's Native Son, Ellison's Invisible Man, and Faulkner's Light in August.

404-C44-0 Black Presence in Faulkner Centrality of black culture to the themes of violence, rites of passage, tradition, guilt, and the family in Faulkner's The Sound and the Fury, Light in August, Absalom, Absalom! and Go Down, Moses.

404-C49-0 Black Families in Literature Starting with James Baldwin's novel Go Tell It on the Mountain (1953), much of the most significant literature written by black American authors has had at its center a deep concern for the problems of family life, particular and even peculiar to African Americans living under the duress of racism.

404-C60-0 The Art of Toni Morrison Investigates all the published novels by Toni Morrison: The Bluest Eye, Sula, Song of Solomon, Tar Baby, and Beloved. The mythical powers of Morrison's art, her ability to haunt the reader's imagination with some of the most memorable characters in modern literature, and her evocative way of storytelling.

404-C78-0 The Harlem Renaissance An African American political and social movements and cultural production in theater, music, visual arts, and literature from 1915 to 1930. Prerequisites: consent of instructor and B10-1,2 or another African American literature course.

404-C79-0 African American Women Playwrights Texts written from approximately 1916 to the present. Recuperation of biographical information, theatrical representations of the "folk" and of black feminism, anti-lynch and other propaganda plays, and development of analytical tools. Prerequisites: consent of instructor and B59 and/or other African American literature courses.

404-C80-0 Topics in African American Studies Advanced work on social, cultural, or historical topics: for example, images of black women in the diaspora, urban revolts of the 1960s, black feminist theory. May be repeated for credit with different topic.

Courses for Advanced and Senior Students

404-C90-0 Research Seminar in African American Studies Methods of researching the African American experience. Identification of research problems: location, selection, and critique of relevant literature; data gathering and analysis; report writing. Topics vary.

404-C96-0 Internship in African American Studies Direct participation in the regular activities of a community organization in Evanston or Chicago. Analysis of
social and cultural institutions through field study and participant observation.

404-C99-0 Independent Study Open to advanced students with consent of the department.

**African and Asian Languages Program**

The Program of African and Asian Languages (PAAL) offers an opportunity to explore through language study some of the fascinating cultures that are most vital for Americans to understand: those of Africa, China, Japan, Korea, and the Middle East. Students who combine study of one of PAAL’s African or Asian languages with a major or strong background in such departments as history, economics, political science, or sociology will be well prepared for graduate and professional programs and a future career in international business, journalism, trade, law, or diplomacy. Even in the natural sciences there are now exchange programs in which knowledge of one of the non-Western languages is useful. PAAL offers courses in Arabic, Chinese, Hebrew, Japanese, Korean, and Swahili. Other African languages can be made available. Any PAAL language can be taken to fulfill the CAS requirement of two years of foreign language study.

For programs in African and Asian studies of which the language offerings of PAAL are an integral part, see African studies, Asian studies, and Jewish studies. Opportunities for study abroad are available.

Undergraduates may take advanced language study through C99 registration. Work in the language laboratory is an integral part of some of the following courses.

**African Language Courses**

433-A05-1,2,3 Elementary Arabic Three-course introduction to modern standard Arabic. Speaking, reading, and listening. Proficiency skills developed.

433-A06-1,2,3 Intermediate Arabic Grammar, reading of Arabic texts, oral communication in Arabic. Prerequisite: A05-3 or equivalent.

433-B07-1,2,3 High Intermediate Arabic Reading and discussion of Arabic writings relevant to students’ interests and needs. Emphasis on writing skills. Prerequisite: A06-3 or equivalent.

433-A21-1,2,3 Swahili I Basic literacy and interactive proficiency, in cultural and historical context.

433-A22-1,2,3 Swahili II Development of literacy and interactive proficiency skills; introduction to verbal arts. In Swahili. Prerequisite: A21-3 or equivalent.

433-B23-1,2,3 Introduction to Swahili Literature Overview of Swahili oral verbal arts, classical literature, modern writing. In Swahili. Need not be taken in sequence. Prerequisite: A22-3 or equivalent.

433-C99-0 Independent Study For undergraduate students of any of the above languages who have advanced beyond the regular course offerings.

**Asian Language Courses**

433-A11-1,2,3 Elementary Chinese Speaking, aural comprehension, reading, writing of basic vernacular Chinese. Both standard and simplified characters involving about 1,500 compounds. Accelerated section available for students with some oral proficiency but no literacy.

433-A12-1,2,3 Intermediate Chinese Conversation, aural comprehension, writing based on reading Chinese stories, poems, ballets, historical and cultural texts. Accelerated section available for students with some oral proficiency but no literacy. Prerequisite: A11-3 or equivalent.

433-A21-1,2,3 Advanced Chinese Readings from the works of contemporary Chinese writers. Discussion and writing based on the reading materials. Prerequisite: A12-3 or equivalent.

433-A01-1,2,3 Elementary Hebrew Understanding, speaking, reading, writing of mainly conversational Hebrew. Hebrew used as language of instruction. Drill in language laboratory.

433-A02-1,2,3 Intermediate Hebrew From language to literature: review of grammar; reading and discussing Hebrew literary works (prose and poetry) and newspaper articles. Compositions and oral presentations. Prerequisite: A01-3 or equivalent.

433-B03-1,2 Advanced Hebrew Reading Hebrew literature, some Biblical but mostly modern prose. Compositions and oral presentations. Prerequisite: A02-3 or equivalent.

433-A15-1,2,3 Japanese I Conversation, grammar, reading, writing for beginners. Issues of U.S.-Japan cross-cultural communication. Five class meetings a week plus language laboratory.

433-A16-1,2,3 Japanese II A comprehensive approach to conversation, grammar, reading, writing. Four class meetings a week. Prerequisite: A15-3 or equivalent.

433-B17-1,2,3 Intermediate Japanese Advanced readings in modern colloquial Japanese; prose essay, literary, and newspaper styles. Prerequisite: A16-3 or equivalent.

433-C18-1,2,3 Advanced Japanese 1. Advanced reading skills: comprehension, vocabulary acquisition, speed. Oral and written translation. 2. Newspaper reading and developing oral/aural skills. 3. Advanced writing skills, further reading, and oral/aural skill development. Prerequisite: B17-3 or equivalent.

433-A25-1,2,3 Korean I Three-course introduction to basic literacy and oral proficiency in Korean.

433-A26-1,2,3 Korean II Development of literacy and interactive proficiency skills. In Korean. Prerequisite: A25-3 or equivalent.
433-C99-0 Independent Study For undergraduate students of any of the above languages who have advanced beyond the regular course offerings.

African Studies Program
In 1948, the distinguished scholar Melville J. Herskovits organized the Program of African Studies at Northwestern; a half-century later, the program remains a model at the forefront of Africanist study and research. Through sponsorship of multidisciplinary courses with African content, language training, and promotion of Africa-based study, the program supports and enlivens the undergraduate study of Africa while serving as the University’s “headquarters” for formal and informal interaction among interested students, faculty, and visitors.

Every year the program brings undergraduates studying Africa together with faculty and other experts in many areas of inquiry—across disciplinary boundaries and regional specializations—for lectures, seminars, workshops, conferences, and research programs. Northwestern’s Melville J. Herskovits Library of African Studies, an unparalleled resource for Africanist study, attracts students and scholars from all over the world. Over the years, the program has remained in active contact with its counterparts in Africa and elsewhere, while expanding its role in the University and off-campus communities.

Minor in African Studies
The minor in African studies approaches the study of African societies, cultures, histories, and arts across the disciplines—in the humanities, social sciences, and the professions. Students earning a bachelor’s degree in CAS or another undergraduate school may complete a minor in African studies by merging a core of courses with African content with their major program of study. Undergraduates in all disciplines are welcome to participate formally or informally in the program’s activities, which advance the training of Africa specialists at Northwestern and promote awareness of Africa in a wider context.

Minor course requirements (6 units)
- Six courses with African content from at least two departments. At least two of the six courses must be from the three-quarter sequence of History B55-1,2,3. Students are encouraged to develop a full-length research paper on an African topic, supervised by faculty with African interests. They may write this paper as part of a regularly offered class, an independent study course, or a senior honors program.
- Demonstrated competence in any African language or a European language other than English that is used in Africa (French or Portuguese) by completing the second year of language study or being certified by the appropriate language department. Professional school students whose curricula preclude meeting this requirement as well as students with proficiency in another CAS language may petition the program to count additional courses with African content toward the minor in lieu of fulfilling the language requirement as stipulated.
- Minimum of an overall B average in these courses.
- Courses taken for P/N are not counted toward the minor.

Students applying for the minor in African studies, conferred at the end of each spring quarter, must present records showing a minimum of five courses not double-counted in their major. Program staff encourage students to meet with them to initiate and monitor progress toward meeting the requirements.

American Studies Program
The American Studies Program is an integrated interdisciplinary major involving faculty members from several departments. By drawing on a broad range of knowledge from the humanities and social sciences, the program examines the components of American culture and ways of integrating them. Students are allowed a wide-ranging yet disciplined exploration of problems that cross the boundaries of traditional academic fields. Freshmen and sophomores apply for admission to the major in the spring quarter. Because this selective program has more applicants than available space, admission depends in part on academic distinction and on demonstrated interest in American cultural studies.

Major in American Studies
Program courses: all sophomore and junior majors must complete C01-1,2,3. Seniors must complete C90-1,2,3.

Related courses: 10 quarters at the B and C levels in those courses throughout the college comprising the general curriculum in American studies. These courses will be apportioned in a way that satisfies the interdisciplinary purpose of a major in American studies and expresses each student’s explicit intellectual goals, but every major is normally expected to take History B10-1,2 or an approved equivalent as early as possible in his or her academic career.

Courses Primarily for Freshmen and Sophomores
418-B10-0 Topics in American Culture Topics of interest to the American cultural analyst and historian: for example, early American symbols of heroism, the meaning of the frontier. Aimed at large general undergraduate enrollment. May be repeated for credit with consent of program director.

418-B15-1,2 Humanistic Dimensions of Technological Change Technological change in America, 1830–1920, and imaginative responses to this change. 1. General survey. 2. A significant aspect of American life (e.g., work) in relation to technological change. Prerequisite for B15-2: B15-1 or consent of instructor.
Courses Primarily for Juniors and Seniors

418-C01-1,2,3 Seminar for Majors Yearlong sequences sharing a broad theme, integrating methods and materials from different disciplines. Change of instructor each quarter; change of theme every year. Limited to 20 students—majors only.

418-C10-0 Studies in American Culture Readings and discussions of topics in American cultural life: for example, law in 19th-century America; manners and morals in antebellum society. Limited enrollment with emphasis on student participation. Prerequisites vary (check with program director or in program office). May be repeated for credit with consent of program director.

418-C90-1,2,3 Senior Project Thesis, field study, or work of creative art. Required for honors.

418-C99-0 Independent Study Readings and conferences on special subjects for students pursuing their area of interest within the major.

Anthropology

Anthropology studies humankind from a broad comparative and historical perspective: the biological evolution of the human species and aspects of the biology of living human populations, the comparative study of living primates, the origins of languages and cultures, the long-term development of human cultures over many millennia, and the social life of humans in groups—families, communities, and nations. Anthropologists attempt to describe specific cultural traditions, forms of social structures, languages, and specific transitions in human evolution and cultural history. They compare cultures and societies to assess what cultures are similar or different and why. Anthropology is at once a biological science, a social science, and one of the humanities.

Anthropology’s breadth and its emphasis on biological and cultural change and cross-cultural comparison make it an ideal major for anyone seeking a solid liberal education as well as for those seeking careers in academic or applied anthropology or archaeology. It serves as an excellent background for students who plan to pursue specialized training in law, medicine, nursing, social work, education, conservation, international relations, or commerce. The world is an ever-smaller and more culturally mixed global community. Knowledge of the developmental processes that explain biological and cultural differences is relevant to a variety of careers. For example, prelaw students would profit from the cross-cultural study of conflict and conflict resolution; premedical students from courses in human evolution and population genetics as well as the cross-cultural study of health and disease.

The department has many strengths: (1) the application of evolutionary and other biological perspectives to the development of humankind; (2) North American, South American, Middle Eastern, and European prehistoric archaeology; (3) the study of African societies; (4) the anthropology of complex societies; (5) political economy; and (6) gender. The department is strong in basic theory and refinements of qualitative and quantitative (mathematical) analysis of anthropological data as well as ethnography. Two field schools, in archaeology and in cultural anthropology, provide practical proving grounds for classroom theorizing. All majors receive training and supervision in field research from our faculty.

Major in Anthropology

Students are expected to complete a 16-course program (12 courses in anthropology and 4 in related fields) for a major in anthropology. The department’s four required B-level courses provide background in the four major subfields of anthropology. C70 examines the philosophical and historical roots of the discipline. C62-1 and C88 introduce students to research design issues. Four additional C-level courses develop the student’s intellectual maturity in the discipline. All seniors are required to take C98 and to prepare a senior thesis. This requirement provides students with an opportunity to conduct original research and, in the process, gain valuable analytic, critical thinking, and writing skills.

Departmental courses

- B11, B13, B14, and B15. Students with previous background in anthropology may petition to substitute a C-level course for a B-level requirement.
- C62-1 and C88. In the case of archaeology and cultural/linguistic students, an additional course in subfield methods is required (see C-level requirements below).
- C70
- Four additional C-level courses. These courses should be selected in consultation with an adviser. Normally, these courses are chosen from one of the three subfields listed below, but students may, after consultation with and consent of their adviser, develop a focus that bridges the subfields of anthropology (e.g., culture and technology, medical anthropology, the institutionalization of power).
- C22 or C25 and three courses chosen from C01, C02, C11, C21 (offered in summer), C29, C81, C84, C85, C90, C96 (offered in summer)
- C06, C10, C12, C13, C17, C90
- C89 and three courses chosen from C10, C11, C20, C30, C32, C41, C47, C50, C54, C60, C76, C77, C83, C90, C92, C95
- C98 (senior year)

Related courses: subject to the approval of the department adviser, four courses—including at least two C-level courses—from other departments and programs. These courses should relate to the student’s independent research work and strengthen the focus that guided the selection of C-level courses in anthropology.
**Minor in Anthropology**

The minor in anthropology provides students in other fields with a framework to pursue a particular focus within the discipline. Such a focus might be within one of the subfields of anthropology (i.e., biological anthropology, archaeology, cultural anthropology, linguistic anthropology), in area studies (e.g., Africa, the Middle East, the United States), or in a specific topic (e.g., ethnicity, gender, the origins of the state, urban studies). To fulfill this goal, the minor in anthropology combines two of the four B-level courses required of majors in anthropology, one in the area of ethnography (B11 or B15) and one in the area of origins (B13 or B14) with five C-level courses that constitute a coherent focus. The B-level courses provide a foundation for pursuit of specialized topics.

Students pursuing the minor in anthropology must consult with the department’s director of undergraduate studies to establish a program and be assigned a departmental adviser.

**Minor course requirements (7 units)**

- B11 or B15
- B13 or B14
- A coherent combination of five C-level courses in anthropology with a specific focus. Depending on the focus selected, a methods course may be required as one of the five C-level courses.

**Sample programs:** Students majoring in biological sciences but with an interest in ecology and behavior would build a coherent minor in biological anthropology by taking B11 or B15, B13, and a focused course selection such as C06, C10, C12, C13, and C83. Students majoring in history with an interest in pre- and early history would build a coherent minor in archaeology by taking B11 or B15, B14, and a focused course selection such as C01, C02, C22, C29, and C81. Students majoring in political science with an interest in noninstitutional or nongovernmental political processes would build a coherent minor in cultural anthropology by taking B13 or B14, B11, and a focused course selection such as C11, C20, C32, C41, and C47. Other programs for the minor in anthropology can be designed to meet a student’s particular needs or interests.

**Note:** Students who are following the previous department curriculum should consult with the director of undergraduate studies.

**Four-Year BA/MA**

The department offers a four-year BA/MA program in anthropology for outstanding undergraduate majors. Interested students should contact their adviser or the director of undergraduate studies and should see Four-Year Master’s Programs in the Undergraduate Education section of this catalog.

**Honors in Anthropology**

Students wishing to be considered for departmental honors should make inquiries no later than spring quarter of the junior year. In order to be eligible for honors, students must have a grade point average of 3.5 or above in anthropology courses. Enrollment is required in one quarter of C99 or an appropriate graduate-level course in addition to C98 (required for all majors). C99 should be taken before enrolling in C98. Students who meet these requirements and prepare an outstanding senior thesis will be awarded honors in anthropology. For more information, consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

**Courses Primarily for Freshmen and Sophomores**

- **403-A05-0 Fundamentals of Anthropology** Introduction to anthropology; the biological evolution of humankind; the evolution of culture; and the comparative study of existing or historically recorded societies.
- **403-A12-0 New Directions in Archaeology** New frontiers in archaeological perspectives of historical events, public policy, historic preservation, and prehistoric interpretation.
- **403-B11-0 Culture and Society** Introduction to the comparative study of culture, exploring different types of social organization, their evolutionary significance, and their economic and political correlates.
- **403-B13-0 Human Origins** Emergence of human species through the process of organic evolution, emphasizing genetics, the fossil record, comparison with our nearest living relatives.
- **403-B14-0 Culture Origins** The evolution of culture from its earliest beginnings through the development of urbanism and the state. Principles of archaeological research.
- **403-B15-0 The Study of Culture through Language** The scope of linguistic anthropology, from the study of language as an end in itself to the investigation of cultures through the medium of human languages.
- **403-B20-0 Evolution of Moral Systems** Critical examination of evolutionary theories of the origin and development of the human propensity to make moral judgments.
- **403-B32-0 Myth and Symbolism** Introduction to different approaches to the interpretation of myth and symbolism, e.g., Freudian, functionalist, and structuralist.

**Courses Primarily for Juniors and Seniors**

For C-level courses in anthropology, the prerequisite is sophomore or higher standing or one A- or B-level course unless a specific prerequisite is included in the description below. A student without the prerequisite occasionally
may be admitted to a course with the consent of the instructor.

403-C01-0 Hunter-Gatherer Archaeology Evolution and cultural history during the Pleistocene epoch. Interrelationship of biology, environment, and culture from earliest hominids through appearance of Homo sapiens. Prerequisite: B14 or equivalent.

403-C02-0 Origins of Civilization Comparative survey of prehistoric civilizations and systematic examination of the formative factors in their evolution. Prerequisite: B14 or equivalent.

403-C06-0 Evolution of Life Histories Strategies evolved by species for allocating metabolic resources between growth and reproduction, including gestation length, litter size, age at first reproduction, longevity.

403-C10-0 Evolution and Culture Introduction to the application of theory from evolutionary biology to cultural anthropology; principles of evolutionary biology; application of principles to human social behavior and culture. Prerequisite: B13 or equivalent.

403-C11-0 The Indians of North America A borginal cultures of northern Mexico, continental United States, Alaska, and Canada. Languages, art, and social, economic, and religious life.

403-C12-0 Human Genetics Introduction to quantitative approaches. Chromosomal variation, segregation analysis, genetics of disease, population genetics, and polygenic inheritance with applications to morphology, behavior, and disease. Prerequisites: B13; Biology B10.

403-C13-0 Anthropological Population Genetics Principles of population genetics applied to primates. Mathematical models, analyses of small populations, and interaction of social and genetic processes. Prerequisites: Mathematics A13 or equivalent, C12, or consent of instructor.

403-C17-0 Human Evolution Fossil record and reconstruction of phylogeny, morphological and behavioral adaptation of early hominids and forebears.

403-C19-0 Theoretical Approaches in Archaeology Introduction to theoretical approaches in archaeology; explanation of major cultural processes and events. Prerequisite: B14 or equivalent.

403-C20-0 Peoples of Africa A survey of the cultures of Africa and the significant similarities and differences among the indigenous societies of the continent. Prerequisite: B11.

403-C21-0 Archaeological Field Methods Practical training in basic methods and techniques at an excavation site: given with Summer Archaeology Field School.

403-C22-0 Introductory Archaeological Methods Quantitative and numerical approaches to the description and analysis of patterns in archaeological data, including typology, sequence ordering, and attribute analysis. Prerequisite: C01 or C02 or equivalent.

403-C25-0 Archaeological Methods Laboratory Analysis of archaeological methods (faunal, botanical, artifact, or soil analysis) with various techniques. May be repeated for credit.

403-C29-0 Near Eastern Prehistory The Levant and Mesopotamia, 9000–2400 B.C., from first domestication of plants and animals to earliest village communities and urban civilization in Mesopotamia. Prerequisite: B14 or equivalent.

403-C30-0 Peoples of the World Comparative ethnography of a regionally or historically associated group of cultures or a type of community defined in ecological, ideological, or other terms. May be repeated for credit.

403-C32-0 Strategies of Marriage and Reproduction Marriage and reproduction throughout the world, particularly the developing world and Africa. Conjugal strategies, fertility, contraception.

403-C41-0 Economic Anthropology Economic organization in small-scale, nonindustrialized communities. Traditional structures of primitive and peasant economies.

403-C47-0 Political Anthropology Cross-cultural study of political organization in stateless and state societies. The state, its origin, and changing role in developing countries.

403-C50-0 Anthropology of Religion The human relationship with the supernatural and action patterns accompanying beliefs. Comparison of nonliterate religions and historical religions.

403-C54-0 Gender and Anthropology Cross-cultural survey of women's roles from three perspectives: biosocial, sociocultural, politicoeconomic. Theory of gender inequality; emphasis on the third world.

403-C60-0 Language and Culture Relationship between language and culture; language as the vehicle of culture and as the manifestation of thought.

403-C62-1,2,3 Quantitative Methods of Analysis 1, 2 A broad range of classical statistical methods, univariate and multivariate, currently being applied to anthropological data. 3. Recently developed distribution-free techniques, e.g., multidimensional scaling, entailment analysis. Prerequisite: graduate standing or consent of instructor.

403-C70-0 Anthropology in Historical Perspective Major schools of thought in social, archaeological, and biological anthropology over the last century. Prerequisite: B-level course in anthropology or consent of instructor.

403-C76-0 Socialization Cross-cultural study of the intergenerational transmission of culture; processes by which social groups pass on social tradition and behavior to succeeding generations. Prerequisite: B11, introductory psychology, or consent of instructor.
403-C77-0 Psychological Anthropology  Contemporary approaches to cross-cultural behavior: ecocultural aspects of behavior development through maturation and socialization in human and nonhuman primates. Prerequisite: introductory survey courses in psychology or anthropology or consent of instructor.

403-C81-0 North American Prehistory  Intensive study of cultural history of one or more areas of the continent from archaeological evidence.

403-C83-0 Ecological Anthropology  Theory of interactions between organisms and their environments, with application to human populations.

403-C84-0 Introduction to Zooarchaeology  Introduction to the study of animal bones from archaeological sites. Identification, sampling, quantification, hunting economies, domestication, and herding systems in complex societies. Prerequisites: B14, C01 or C02, or consent of instructor.

403-C85-0 The Archaeology of State Societies  Origins and organization of prehistoric state societies. Comparison of political systems, elites, and regional economic organization in Old and New World. Prerequisite: C02 or equivalent.

403-C88-0 Research Design  Introduction to fundamentals of research design; overview of major types of designs, data collection, and analysis strategies; managing and analyzing data from multiple sources. Prerequisite: C62-1 or consent of instructor.

403-C89-0 Ethnographic Methods and Analysis  Descriptive, naturalistic study of the culture of human social groups. Data gathering through observation and interview. Data analysis for ethnographic reporting. Prerequisites: B11 and B15.

403-C90-0 Topics in Anthropology  Advanced work in areas of developing interest and special significance. May be repeated for credit with different topic.

403-C92-0 Urban Anthropology  Social and cultural context of urbanism. Contemporary problems of urban subcultures and rural-urban migration. Prerequisite: a basic social science course or consent of instructor.

401-C93-0 Chicago Field Studies Internship  See General Studies.

403-C95-0 Field Study in Anthropology  Ethnographic field experience in the United States (e.g., the Southwest) or abroad. Offered in conjunction with summer field schools for exceptional students. Prerequisite: consent of instructor.

403-C96-0 Advanced Archaeological Field Methods  Complex excavation and survey procedures, topographic map-making, excavation drawing, soil description; offered in conjunction with the summer Archaeology Field School.

403-C96-7 Junior Tutorial  Intensive work on a topic not normally offered.

403-C98-0 Senior Seminar  Supervised group discussion of research in preparation of senior thesis. Required of all majors. Prerequisite: C88.

403-C99-0 Independent Study  Open with consent of department to juniors and seniors who have completed with distinction at least two quarter-courses or equivalent in anthropology. Under direction of individual members of department.

Related Courses in the School of Music

Archaeology Field School: Courses may include C21, C22, C25, and C96, some of which are also offered on the Evanston campus

Ethnographic Field School in Cultural and Linguistic Anthropology: C95

Art History

Art history is the historical study, in the widest sense, of the production and use of architecture and the visual and decorative arts. It focuses on technical practices, aesthetic ideals, modes of pictorial representation, iconographies, changing economic conditions, and social functions within different cultures. The study of art history offers a firm factual and theoretical basis for further study of or work in various areas of cultural studies. It also offers sound training in writing and critical thinking for students who wish to pursue vocations both inside and outside the arts.

The department is particularly strong in the Western European tradition from prehistoric times to the present day. Interested undergraduates can choose from a wide range of courses that include surveys of Western and non-Western art as well as more specialized surveys and “special topics” courses in a variety of fields. An active program of extracurricular seminars, lectures, and field trips supplements the formal program of study.

Many undergraduate majors profit from participation in a Northwestern-affiliated study abroad program, thereby obtaining firsthand experience with another culture and its art. Upper-division undergraduate majors also are encouraged to supplement their regular programs by taking a museum studies course in preparation for an internship with a local museum or gallery. An undergraduate seminar (content varies) offered on a regular basis provides majors with an opportunity to study a specific topic in depth in a discussion format.
Major in Art History

Departmental courses
• B10; B30 or B40; B20 or B50
• Nine C-level quarter-courses in art history (Classics C58 and C59 may also be counted). Students are expected to pursue a variety of approaches to the material of art history and to explore a diversity of the cultures and time periods covered by the department: ancient, medieval, Renaissance and baroque, modern, and non-Western art. The remaining C-level courses are to be chosen at students’ discretion in consultation with the undergraduate adviser. Study abroad work approved by the director of undergraduate studies may be substituted for some departmental courses.

Related courses: Six B- and C-level related quarter-courses, of which at least one must be a studio course in art and the remainder chosen from one or more of the following departments and programs with the approval of the adviser: anthropology, art theory and practice, classics, comparative literary studies, English, European thought and culture, French and Italian, German, Hispanic studies, history, history of film, musicology, philosophy, religion, Slavic languages and literatures, and women’s studies.

Sequence courses do not need to be taken in order; special topics courses may be repeated for credit with a change in topic.

Minor in Art History

The minor in art history offers students a broad and systematic introduction to the interpretation and analysis of the visual arts. The introductory course focuses on conceptual approaches and the social context of art making. B-level courses are required in one of the two non-Western areas, Africa and Asia, and in one of the two arenas of Western art, America and Europe. Students must take three C-level courses approved by the director of undergraduate studies that reflect different approaches and periods represented in the department, at least one of which should be in a field other than modern art (19th and 20th centuries). The electives permit students to explore in greater detail some specific part of the general field.

Minor course requirements (8 units)
• B10; B20 or B40; B30 or B50
• Three C-level courses approved by the director of undergraduate studies
• Two art history electives, no more than one at the B level

Four-Year BA/MA

The department offers a four-year BA/MA program in art history by invitation to outstanding undergraduate majors. Interested students should contact their adviser or department chair and should see Four-Year Master’s Programs in the Undergraduate Education section of this catalog.

Honors in Art History

Students may be nominated for honors in art history after completing the following prerequisites: successful completion of seminar work involving a research paper; a distinguished record in the major, normally a grade point average of 3.5 or above; and completion of a senior honors project, normally a senior thesis prepared in one or more quarters of C99 and presented to the departmental honors committee at the end of April of the senior year. For more information, consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

Courses Primarily for Freshmen and Sophomores

405-B10-0 Introduction to Visual Culture
Artworks in many media from varied cultures and time periods provide a range of conceptual, visual, and verbal skills essential to the description and analysis of visual forms.

405-B20-0 Introduction to African Art
Thematic and historical survey of the major periods of art making in Africa; analysis of a few exemplary works.

405-B30-0 Introduction to American Art
Arts and architecture of the Americas from their first emergence in the pre-Columbian period through the conquest and the 19th century to today.

405-B40-0 Introduction to Asian Art
Primarily art of India, China, and Japan; selected major themes from early devotional imagery in India and the transfer of Indic religions to East Asia to European colonialism and its relationship to the study of Asia.

405-B50-0 Introduction to European Art
Leading centers and artists of Europe from ancient Greece to the 20th century. Architecture, sculpture, painting, and graphic arts in relation to their social and cultural settings.

Courses Primarily for Juniors and Seniors

405-C10-1,2 Ancient Art
Painting, sculpture, architecture, and allied arts in the ancient world. 1. Ancient Egypt and the ancient Near East. 2. Greek art and architecture beginning with Minoan art and ending with art in the 5th century B.C.

405-C19-0 Special Topics in Ancient Art
Content varies: for example, prehistoric art of Europe, including cave painting and megalithic construction; structuralist and other approaches to anthropological arts; text and image in the ancient world.

405-C20-1,2 Medieval Art
Art and architecture in Europe during the Middle Ages. 1. Early Christian and Byzantine. 2. Carolingian and Romanesque.

405-C29-0 Special Topics in Medieval Art
Content varies: for example, history of illuminated manuscripts.
405-C30-1,2,3 Renaissance Art Painting, sculpture, and allied arts in Europe from the late Middle Ages through the 16th century. 1. The monastic style in Italy through the 15th century. 2. The 16th century in Italy. 3. France, the Netherlands, and Germany from the 14th to the 16th centuries.

405-C39-0 Special Topics in Renaissance Art Content varies (see also listings under C 49): for example, the art of Hieronymus Bosch and Pieter Brueghel; the graphic arts in northern Europe from the 15th to the 17th centuries.

405-C49-0 Special Topics in Baroque Art Content varies (see also listings under C 39): for example, French art of the 16th and 17th centuries.

405-C50-1,2 19th-Century Art A survey of European painting and sculpture from the late 18th through the end of the 19th centuries. 1. Late 18th century to 1848. 2. 1848-1900.

405-C59-0 Special Topics in 19th-Century Art Content varies: for example, the art of Georges Seurat.

405-C60-1,2 20th-Century Art The artist and the environment: a survey of European painting, sculpture, architecture, and design from the 1890s to the 1960s. 1. Symbolism to constructivism. 2. Berlin dada to the situationist international.

405-C65-0 American Art A survey of the visual arts in the United States from the 17th century to the present.

405-C67-0 Special Topics in American Art Content varies: for example, nationalism and internationalism in American art; the myth of America; the artist in American society; elite and popular visual traditions.

405-C68-0 Special Topics in Modern Art and Performance Advanced interdisciplinary study of the interrelated histories of visual and performance arts in the 20th century. Content varies: for example, American painting and dance; postmodern art and performance from the Judson Church to Pina Bausch. Prerequisites: B-level courses in two of the following areas—integrated arts, art history, theater; consent of instructor.

405-C69-0 Special Topics in 20th-Century Art Content varies: for example, American art with a French accent; totalitarian art.

405-C70-0 Modern Architecture Development of architecture from 1800 to the present.

405-C78-0 Architecture and Urbanism of the World City in the 20th Century Critical examination of the modern city as a socioeconomic system everywhere reproducible in our increasingly unified world. How Western architectural and urban patterns are transformed and non-Western patterns confronted.

405-C79-0 Special Topics in Modern Architecture Content varies: for example, Chicago architecture, including the work of Sullivan and Wright; Beaux-Arts architecture in Europe and America; modernism in architecture; American architecture from Thomas Jefferson to Frank Lloyd Wright.

405-C82-0 Visual Culture of the Tang and Song Dynasty China Survey of Chinese painting from the 7th to 12th centuries, focusing on moments of transition in painting theory and practice.

405-C84-0 African American Art Art of the African-descended cultures of North and South America and the Caribbean; what this art owes to its European context and African origins.

405-C86-0 Art of Africa Thematic and historical survey of the arts and architecture of Africa from the ancient periods (Nubian Egypt) to the present.

405-C89-0 Special Topics in Non-Western Art Content varies: for example, art and architecture of the ancient Maya; African architecture.

Courses Primarily for Art History Majors

405-C90-0 Undergraduate Seminar: Theories and Problems of Art History Content varies: for example, the methods of cultural history.

405-C94-0 Senior Linkage Seminars Content varies: for example, prints and drawings (at the Art Institute of Chicago); the museum and its public.

405-C95-0 Museums Museum studies seminars. Power, politics, ethics: history of museums, their ethical basis, community responsibilities, educational prerogatives, future directions.

405-C96-0 Internship in the Arts Direct participation in the regular activities of an established arts organization in Evanston and the Chicago area, under the supervision of a faculty member. By petition, on a limited basis; may be taken only once.

405-C99-0 Independent Study Special projects in art history, involving reading and conferences and culminating in a paper. Open only to qualified seniors with consent of instructor. Required for departmental honors.

Related Courses in Other Departments

Art Theory and Practice C20 Media and Process in Art
Classics C58 Roman Architecture
Classics C59 Topography of Imperial Rome
Comparative Literary Studies C75 Literature and the Arts

Art Theory and Practice

The study of art involves the development of skills and techniques plus the stimulation of critical awareness, understanding, and appreciation of the visual arts. Philosophical questions raised in both theory and studio courses help students integrate and enrich their lives and perceptions. Nonmajors and majors share the unique experience offered by this diverse range of courses. Suggested introduction: survey course B70 or B72.
Major in Art Theory and Practice
The major in art theory and practice plans a program of study in consultation with and subject to the approval of a department adviser. Areas of concentration are painting, printmaking, and the teaching of art. Specific requirements in each area are listed below. Qualified students may petition a department committee for exemption from one or more prerequisites.

Practice of Art—Painting Concentration
Departmental courses
Introductory courses (6): A20; A24; A25; B70 or B72; any two courses chosen from Art History B10, B20, B30, B40, B50
Major courses (8): B22 or C20; B25; B40 or B50-1 or B50-2; C22-1; C22-2; C25-1 or C25-2; C31 or C32 or C33; plus one course chosen from those listed below under Art Criticism and the Tradition of Art
Related courses: five quarter-courses at the B and C levels chosen from one or more of the following departments with the approval of the adviser: anthropology, art history, classics, comparative literary studies, English, French and Italian, German, Hispanic studies, history, music, philosophy, Slavic languages and literatures

Practice of Art—Printmaking Concentration
Departmental courses
Introductory courses (6): A20; A24; A25; B70 or B72; any two courses chosen from Art History B10, B20, B30, B40, B50
Major courses (8): B22 or C20; B25; C25-1 or C25-2; C31; C32; C33; plus one B- or C-level art history elective and one course chosen from those listed below under Art Criticism and the Tradition of Art
Related courses: same as for Practice of Art—Painting

Teaching of Art Concentration
CAS students pursuing a major in art who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Honors in Art Theory and Practice
Outstanding students may qualify for departmental honors in their senior year by enrolling in two consecutive or interrelated C99 or D99 courses in which they complete an approved studio project and related essay under the supervision of department faculty. See Honors under Academic Policies earlier in this section of the catalog.

Courses Primarily for Undergraduates
An asterisk (*) preceding the course number indicates a lecture course open to all upperclass students and requiring no art skills or background unless otherwise noted.

Painting and Drawing
406-A20-0 Basic Painting and Composition
Introduction to watercolor, oil, or acrylic painting techniques. Includes surface preparation, color mixing, composition. Emphasis on still life.

406-A24-0 Essentials of Design
Principles of visual composition. Color theory; fundamentals of line, shape, texture, and value. Pictorial illusion; symbolic and narrative form. No previous studio experience necessary.

406-A25-0 Basic Drawing
Problems in line, tonal value, and space. Drawing techniques and application to perception and invention. Relation of drawing to experience. No previous studio experience necessary.

406-B22-0 Intermediate Painting
Still-life and figure painting. Problems in composition and content. Exploration of techniques with oil or acrylic paint. Prerequisite: A20 or acceptable substitute.

406-B25-0 Intermediate Drawing
Studies in light and space in drawing with emphasis on development of drawing disciplines in relation to figure drawing from life. Prerequisite: B22 or equivalent.

406-C31-0 Relief Printmaking
Design and production of prints from wood, linoleum, and plastic surfaces; also collograph and monoprint techniques.

406-C32-0 Intaglio
Printmaking with etching, engraving, aquatint, mezzotint, and drypoint.

406-C33-0 Lithography
Design and production of prints in basic lithographic processes.
Asian Studies Program

Major in Asian Studies
On the recommendation of the Asian studies adviser, students who complete the following plan of study may apply for a major in Asian studies. Students must take 18 quarter-courses selected, in consultation with the adviser, from an approved list of Asian-related courses. The major should include an appropriate geographic or other focus and normally also at least six quarter-courses selected from each of three departmental clusters:

- Anthropology, economics, and political science
- History
- Literature, philosophy, and religion

With the adviser’s consent, students may substitute up to six quarter-courses of language study in Arabic, Chinese, Hebrew, Japanese, or Korean. (Native-speaker proficiency does not count for course credit.) See the Program of African and Asian Languages for specific language offerings.

Minor in Asian Studies
Students wishing to do some concentrated course work in Asian studies but not wishing a major in this field should consider the minor.

Minor course requirements (8 units)
Students may qualify for this minor by satisfactorily completing eight quarter-courses selected from an approved list of Asian-related courses, including at least two quarter-courses from each of three departmental clusters:

- Anthropology, economics, and political science
- History
- Literature, philosophy, and religion

Six such courses—including two from each cluster—will suffice for students who also complete satisfactorily two years of language study in Arabic, Chinese, Hebrew, Japanese, or Korean. (Native-speaker proficiency does not count for course credit.) See the Program of African and Asian Languages for specific language offerings.

For further information, contact the CAS Office of Studies.
Astronomy
See Physics and Astronomy.

Biochemistry, Molecular Biology, and Cell Biology
The Department of Biochemistry, Molecular Biology, and Cell Biology does not offer an undergraduate degree. See Biological Sciences, Undergraduate Program in, for a description of the major in biological sciences.

Biological Sciences, Undergraduate Program in
The science of biology is the study of living organisms at all levels of complexity and in all their diversity. The Undergraduate Program in Biological Sciences draws particularly on two departments: biochemistry, molecular biology, and cell biology (BMBCB) and neurobiology and physiology (NBP). Additional opportunities in life sciences are available for students in a variety of departments: anthropology, biomedical engineering, chemistry, engineering sciences and applied mathematics, geological sciences, psychology, and communication sciences and disorders. The curriculum is intended to maximize students’ access to offerings from these departments. The baccalaureate degree offered in CAS through the Undergraduate Program in Biological Sciences is the bachelor of arts with a major in biological sciences. No minor in biological sciences is offered.

The Study of Biological Sciences
The goal of a baccalaureate degree program in biological sciences at a research university is to develop and enhance the intellectual and creative potential of life sciences students. To this end, the program includes the following components:
• A foundation in mathematics, chemistry, and physics
• A core curriculum offering an introduction to fundamental areas of biological science
• Areas of concentration that subsequently focus students’ interests
• Opportunities to participate in research through the independent study program

Major in Biological Sciences
Because biology is grounded in the principles of chemistry, mathematics, and physics, all majors must complete the courses listed under related courses below. During the freshman year, students usually complete A-level chemistry and most or all of the mathematics requirements. In the sophomore year, students start Chemistry B10-1 in the fall quarter concurrent with Biological Sciences B10-1. Physics should be completed by the end of the junior year.

Program Courses
Core Curriculum: To set the stage for study in biological sciences at the advanced level, each major must complete Biological Sciences B10-1,2,3. These three courses taken in sequence address the central topics in contemporary biology with the goal of preparing students for further study in either the biological sciences or professional school. In this sequence, students are presented with a series of questions: What is the hypothesis? the concept? the principle? Finally, and very important: How do we test the hypothesis experimentally? To this end, the B-level core curriculum is augmented by a complementary laboratory sequence that provides biology students with an appreciation of the discipline as an experimental science.

The B10-1,2,3 sequence also serves the needs of preprofessionals majoring in other disciplines and those in specialized programs.

Areas of Concentration: The continuing expansion of knowledge in biology makes it difficult to master all areas in a four-year curriculum. Thus, the junior and senior years are designed to permit students to explore in depth a focused area in the biological sciences that builds on the principles of the B-level core curriculum. To provide a variety of coherent pathways, five areas of concentration have been designed. In addition to the five courses specifically required for each concentration, each student must take three C-level life science elective courses approved by the adviser, at least two of which must be in a different concentration area or areas. The concentration will be noted on the transcript; only one concentration can be noted. Following are the five concentrations and a summary of their requirements.

Molecular and Cell Biology
• Biological Sciences C01, C15, C90, plus any one of C19, C33, C55, C91, C92, C93, C95
• Laboratory requirement: Biological Sciences C54

Biochemistry and Biophysics
• Biological Sciences C01; Chemistry C42-1; plus any two of Biological Sciences C22, C60, C61, C62
• Laboratory requirement: Biological Sciences C54

Evolutionary Biology
• Biological Sciences C42, C43; Anthropology C06; Geological Sciences C17
• Laboratory requirement: Biological Sciences C44

Neurobiology
• Biological Sciences C01, C02, C06, plus any one of C03, C04, C77
• Laboratory requirement: Biological Sciences C05, C08, or Psychology C21.

Physiology
• Biological Sciences C01, C25, plus two of C06, C56, Biomedical Engineering C02
• Laboratory Requirement: Biological Sciences C92
Related courses
All majors must complete the following foundational courses:
- Chemistry A01, A02, and A03 or A71 and A72
- Chemistry B10-1,2 or B12-1,2
- Mathematics B14-1,2 and either B14-3 or Statistics B02
- Physics A30-1,2,3 or A35-1,2,3

Advising
Sophomores who declare a major in biological sciences are assigned to a specific faculty adviser. Juniors and seniors involved in independent study (C99) also have a specific research adviser.

Research/Independent Study/Honors Program
This program offers students the unique opportunity to work on a research project in a faculty member’s laboratory. It is recommended for all students who may wish to consider a career involving research. Students who have completed at least five quarters of course work and have attained a grade point average of 3.0 or higher in science and mathematics courses are eligible to apply for C99.

A directory of research training faculty is available at the Undergraduate Program in Biological Sciences (UPBS) office. At least two weeks before the registration period for the quarter in which students begin a C99, an application form for independent study should be obtained from the UPBS office. Students visit the faculty members whose research areas are of interest and explore with them the possibility of doing research in their laboratories. By mutual agreement, a plan of study is proposed; the application/proposal is signed by the student and the faculty member. Students bring the completed, signed application to the UPBS office, where they are given a course authorization form for independent study should be obtained from the UPBS office.

Students engaged in C99 research are encouraged to submit a senior thesis proposal by the beginning of their senior year. A faculty committee evaluates each proposal and either recommends or does not recommend that the student should proceed with the writing of a senior thesis. Students complete the laboratory work, data analysis, and writing of the thesis (literature survey, materials and methods, results, discussion) according to an established timetable. Satisfactory completion of the thesis allows the faculty committee to recommend students for program honors and makes them eligible to compete for one of three awards given yearly for superior honors research. Completion of a senior thesis in the spring quarter enables students to use the spring quarter C99 as a C-level elective toward the major. Additionally, prior participation in C99 for two quarters is mandatory for the spring quarter of C99 to count as a C-level elective. In general, a research project leading to honors cannot be pursued outside C99 in a paid or unpaid job. The only exceptions are cases in which a student’s supervisor is a participant in the UPBS honors program and an appropriate research/study plan has been approved by the honors coordinator. See Honors under Academic Policies earlier in this section of the catalog.

Integrated Science Program
The Integrated Science Program (ISP) is a highly selective BA program in CAS (see Integrated Science Program). Students majoring in ISP who wish to complete a second major in biological sciences should fulfill the following requirements instead of those listed above. They may not substitute ISP C98 for any biology or chemistry course in the ISP curriculum and must take the following additional courses:
- Chemistry B12-2
- An appropriate laboratory course for the chosen concentration. (If the lab course is waived due to C99 or other research experience, another C-level biological sciences course must be taken in its place.)
- Two or three additional courses, as specified below for the indicated concentration:
  - Molecular and cell biology: Biological Sciences C15, C90, C91
  - Biochemistry and biophysics: two courses chosen from Biological Sciences C60, C61, C62
  - Evolutionary biology: Biological Sciences C42, C43;
  - Neurobiology: Biological Sciences C03, C06
  - Physiology: Biological Sciences C06, C25, C56

Honors Program in Medical Education
C-level biological sciences course requirements for students also in the HPME Program consist of four core courses appropriate for each of the five department concentrations (not including the lab course, which is waived), plus two C-level electives.

Premejical, Predental, and Preveterinary Students Majoring in Other Departments
Biological sciences requirements for most U.S. schools offering degrees in medicine, dentistry, and veterinary medicine are satisfied by either A10-1,2,3 or B10-1,2,3. Students with these career objectives usually begin such a sequence in their second year.

The Teaching of Biological Sciences
CAS students pursuing a major in biological sciences who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.
Courses Primarily for Undergraduates

409-A03-0 Diversity of Life Comparative survey of organisms, emphasizing adaptation and phylogenetic relationships. No credit while or after taking any part of the B10-1,2,3 sequence.

409-A10-1 Biology/Genetics and Biochemistry Principles of genetics and biochemistry and their application. Laboratory. Chemistry A01 recommended. No credit while or after taking any part of the B10-1,2,3 sequence.

409-A10-2 Biology/Molecular and Cellular Biology How genes direct synthesis of proteins; how proteins generate a cellular phenotype. Laboratory. Prerequisite: A10-1. No credit while or after taking B10-2 or B10-3.

409-A10-3 Biology/Physiology and Evolution How cells are organized into tissues; how tissues function. Selection, macroevolution, and their central role in our understanding of biology. Laboratory. Prerequisite: A10-2. No credit while or after taking B10-2 or B10-3.

409-A24-0 Biological Clocks Daily and annual biological rhythms, their mechanisms, and their effects on health, performance, and society. Scientific method emphasized. No credit while or after taking any part of the B10-1,2,3 sequence.

409-A60-0 Human Reproduction Basic biology of reproduction; relation between hormones, emotions, intelligence, and behavior; related policy issues. No credit while or after taking any part of the B10-1,2,3 sequence.

409-A63-0 Human Biology Principles of human biology; function of the 10 major organ systems of the body and how they are currently understood. No credit while or after taking any part of the A10-1,2,3 or B10-1,2,3 sequences.

409-A64-0 Genetics and People Principles of inheritance with emphasis on human characteristics and the interaction of genetics and society. Credit not allowed for both A64 and A70. No credit while or after taking any part of the B10-1,2,3 sequence.

409-A70-0 Concepts of Biology Cellular organization, energy conversion, genetics, reproduction, evolution. Credit not allowed for both A70 and either A80 or A90. No credit while or after taking any part of the B10-1,2,3 sequence.

409-A80-0 Biology at the Molecular Level The micro-world of biological molecules; the diverse roles that they play in the lives of cells. Credit not allowed for both A80 and either A70 or A90. No credit while or after taking any part of the B10-1,2,3 sequence.

409-A90-0 Characteristics of Living Organisms Rigorous introduction to biology as an experimental science. Laboratory. Prerequisite: consent of instructor. Credit not allowed for both A90 and A70 or A80. No credit while or after taking any part of the B10-1,2,3 sequence.

409-A91-0 Evolution Major evolutionary principles. No credit while or after taking any part of the B10-1,2,3 sequence.

409-B04-0 Environmental Biology Underlying biological principles necessary to make informed decisions about environmental issues. Laboratory. Prerequisites: A70, A90, or B10-1; M athematics B14-1,2; Chemistry B04; Physics A30-1,2; one course in statistics.

409-B10-1 Genetics and Evolutionary Biology Transmission and demic genetics; evolutionary biology. Laboratory. Prerequisites: Mathematics B14-1,2; Chemistry A01, A02, and A03 or A71 and A72.

409-B10-2 Biochemistry and Molecular Biology Biochemical and molecular biology. Laboratory. Prerequisites: B10-1; Chemistry B10-1; concurrent registration in Chemistry B10-2.

409-B10-3 Physiology and Cell Biology Cell biology and systems physiology. Laboratory. Prerequisite: B10-2.

409-C01-0 Biochemistry Major areas and principles of biochemical processes at the molecular level; structure, metabolism, energetics, and control mechanisms. Prerequisites: B10-1,2,3; Chemistry B10-1.

409-C02-0 Fundamentals of Neurobiology Cellular and biochemical approaches to the nervous system, focusing on neuron structure and function; mechanisms underlying cell-to-cell communication. Prerequisites: B10-3; Physics A30-2.

409-C03-0 Molecular Neurobiology Mechanisms of signal transduction and synaptic plasticity; basic neurochemistry. Prerequisites: B10-3, C02.

409-C04-0 Developmental Neurobiology Cellular aspects of nervous system development; relationship between structure and function during development. Prerequisites: B10-3, C02.

409-C05-0 Neurobiology Laboratory Hands-on experience in the performance of classical experiments in cellular neurophysiology. Laboratory course for students of neurobiology. C02 strongly recommended.

409-C06-0 Central Nervous System Physiology Integrative approach toward understanding functioning of mammalian central nervous system. Prerequisite: B10-3.

409-C08-0 Neuroanatomy Laboratory Organization and morphology of the vertebrate central nervous system. Prerequisite: B10-3.

409-C09-0 ISP Biochemistry and Cell Biology Biochemistry, including intermediary metabolism and macromolecules; molecular biology; cellular genetics. Laboratory. Prerequisites: ISP enrollment; A70 or equivalent; Chemistry B12-1.

409-C10-0 ISP Quantitative Biochemistry and Molecular Biology Protein interaction with small molecules, location of genetic markers, X-ray diffraction
studies of DNA fibers, protein tertiary structure determination. Prerequisite: C09.

409-C11-0 ISP Neurobiology Detailed look at membrane properties of single neurons and synaptic transmission. Mechanisms of basic sensory and motor processes in the brain. Prerequisite: C09.

409-C14-0 Mind and Brain Neural transmission; effects of endogenous substances and exogenous drugs; how neural dysfunction can translate into cognitive abnormality. Prerequisite: A10-3, A70, A90, or B10-3.

409-C15-0 Cell Biology Relationship of shape, structural dynamics, and function with the cellular state and gene expression; chromosomal and cellular structure; cell-to-cell communication. Prerequisite: B10-3.

409-C19-0 Biology of Animal Viruses Virus structure, synthesis of viral nucleic acids and proteins, the interaction of the viral and cellular genomes, structural and functional alteration of virus infected cells. Prerequisite: B10-3.

409-C20-0 Behavioral Ecology Seminar Evolutionary study of animal behavior, emphasizing theory but using field data to test or illustrate aspects of theory. Prerequisites: B10-1 and consent of instructor.

409-C22-0 Biochemistry of Macromolecular Complexes Structure and behavior of membranes and complexes that function in association with membranes. Prerequisite: C01.

409-C25-0 Animal Physiology Physiological principles and mechanisms responsible for the ability of animals to regulate variables in the steady state and to survive in the face of alterations in the external environment. Prerequisite: B10-3.

409-C33-0 Microbial Cell and Molecular Biology Structure, growth, metabolism, and genetics of prokaryotes. Computer-based analyses. Prerequisite: B10-3.

409-C40-0 Biological Aspects of Disease Cellular response to injury; biology of cancer, including molecular and genetic aspects; inflammation and immunity; genetic basis of human disease; and developmental pathology. Prerequisite: B10-3.

409-C42-0 Evolutionary Processes Seminar Natural selection as a predictive process. Prerequisites: B10-1 and consent of instructor.

409-C43-0 Phylogenetics Current concepts of evolutionary biology as background for an understanding of systematics and phylogeny reconstruction. Prerequisites: B10-1,2 and consent of program.

409-C44-0 Evolutionary Morphology of Vertebrates Laboratory Vertebrate phylogeny illustrated via comparative morphology; anatomical/functional consideration of the musculoskeletal and other selected systems. Prerequisites: B10-1,2 and consent of program.

409-C45-0 Topics in Evolutionary Biology Topics vary, but always deal with phylogenetic techniques and/or the biology of a major group of organisms. Laboratory. May be repeated for credit with different topic. Prerequisites: B10-1,2.

409-C54-0 Experimental Techniques in Biochemistry and Molecular Biology Laboratory course in molecular and biochemical experimentation, using microorganisms to probe fundamental problems in biology. Prerequisite: B10-3.

409-C55-0 Immunobiology Nature of host resistance; characteristics of antigens, antibodies; basis of immune response; hypersensitivity; specific immunologic paralysis and transplantation. Prerequisite: B10-3.

409-C56-0 Vertebrate Endocrinology Physiology and biochemistry of hormones and glands of internal secretion in vertebrates; hormone structure, measurement, function, and interrelationship among endocrine glands. Prerequisite: B10-3.

409-C60-0 Biophysics of Living Organisms Physical principles involved in functions of living organisms; how physical methodology contributes to understanding biological functions. Prerequisites: B10-3; Physics A30-1,2; Mathematics B14-1,2.

409-C61-0 Biophysics of Macromolecules Structure and function of biological macromolecules; methods in molecular biophysics. Topics include X-ray crystallography and NMR methods for structure and dynamics. Prerequisites: Chemistry B10-2; Mathematics B14-2; Physics A30-3.

409-C62-0 Biophysics of Macromolecular Systems Biophysics of macromolecular assemblies, organelles, and cells. Topics include molecular motors and signal transduction assemblies. Prerequisites: Chemistry B10-2; Mathematics B14-2; Physics A30-1,2.

409-C77-0 Sensory Neurobiology Physiological processes in sensory receptor cells; chemical senses, vision, hearing, and lateral line organs; analysis of specialized sensory systems. Prerequisite: B10-3.

409-C89-0 Biology of Reproduction Seminar Molecular aspects of gametogenesis and fertilization; intercellular communication in testes; signal transduction/receptors involved in fertilization. Prerequisites: B10-3 or C09 and consent of instructor.

409-C90-0 Molecular Biology Nucleic acid structure; cell and virus genetics; DNA mutation, repair, recombination, replication, restriction and modification; translation; lysogeny; recombinant DNA technology. Prerequisite: B10-3.

409-C91-0 Eukaryotic Regulatory Mechanisms Seminar Control of vertebrate gene expression in organisms by the external environment via organismic signal transduction pathways and by intrinsic developmental mechanisms. Prerequisites: B10-1,2,3; C90.
**409-C92-0 Developmental Biology** Processes that result in spatial arrangements of cells from gametogenesis to the differentiation of specialized cell types; cytodifferentiation, mechanisms of morphogenesis and pattern formation. Laboratory. Prerequisite: B10-3.

**409-C93-0 Molecular Biology of Human Disease Seminar** Use of biochemical, cellular, and molecular biology to elucidate contemporary problems in biomedical research. Prerequisites: B10-3, C01, C15, C90.

**409-C95-0 Molecular Genetics** How molecular genetics is used to study biological problems, using examples from the cell biology of yeast, development of fruit flies, and genetic diseases of humans. Prerequisites: C15, C90.

**409-C96-0 Undergraduate Research Seminar** Advanced work for superior students through supervised reading, research, and discussion. Prerequisite: consent of faculty supervisor and program.

**409-C99-0 Independent Research** Supervised individual research open only to juniors and seniors meeting specified requirements. Prerequisite: consent of faculty research supervisor and program.

**Business Institutions Program**
The Program in Business Institutions approaches the study of business through a thoughtful investigation of the cultural, political, philosophical, literary, and social consequences of business institutions. Therefore, business institutions is not intended to constitute a narrowly conceived preprofessional training or to function as a business concentration within any single departmental major. This program is instead conceived as a means to a broad, multidisciplinary perspective on a significant area of inquiry in late 20th-century society. Students who wish to pursue the minor in business institutions should open to inquiries grounded in the intellectual approaches of many disciplines.

**Minor in Business Institutions**
The minor in business institutions requires the successful completion with a grade of C- or above of eight courses: three required core courses and five elective courses. The program director may approve a course offered in a particular year as a substitution for one business institutions core requirement. Students interested in the minor in business institutions should consult with a program adviser. Information is available in the CAS Office of Studies and the program office, University Hall, room 001. Students applying for the minor in business institutions must present records showing a minimum of five courses not double-counted in their major. Grades of P/N are not accepted.

**Minor course requirements (8 units)**

**Core courses**
- Economics B01 and B02 (which together count as one business institutions core requirement) or C10-1
- Economics C34 or Political Science C75
- Sociology C02

**Electives:** five courses chosen from Anthropology C41; Business Institutions C92; Economics C05, C07, C08, C09, C23, C39, C49, C50, C55; History C67, C91; Philosophy B60; Political Science C61, C71, C72, C73; Sociology B15, C12, C15, C16, C31, C32, C76

**Course**

**493-C92-0 Business Institutions Program Internship Seminar** Allows students to relate the scholarship concerning an aspect of corporate culture to experience gained from a previously completed summer internship. Prerequisites: completion of business institutions core courses and consent of instructor.

**Chemistry**
Chemistry is the study of molecular structure, chemical reactions, and the molecular basis of solids, liquids, and gases. The broad applicability of phenomena and rigorous methodology of chemistry provide a wide range of career options for chemistry majors. Training in chemistry blends descriptive, conceptual, and mathematical elements in both lectures and laboratory work. While developing chemical knowledge is essential, the progressive honing of analytical abilities is equally important.

The chemistry department offers courses carefully designed to provide a rigorous introduction to chemistry for science or nonscience students. Additional courses provide several chemistry program options and serve the needs of Northwestern’s engineering, biology, and medical programs. The chemistry faculty conducts vigorous, original research that includes undergraduates, graduate students, and visiting scholars from around the world. This environment, i.e., modern instrumentation, seminars, colloquia, and informal contacts, invigorates the educational process and provides exciting opportunities for undergraduates.

The department offers programs to meet the needs of students with diverse career objectives, including professional chemistry, medicine, and teaching.

**Major in Chemistry**
The major is recommended for students planning careers in chemistry. It is suitable preparation for graduate study in chemistry and for those seeking positions as professional chemists. Only this program qualifies students for certification as a professional chemist by the American Chemical Society.
Departmental courses: A01; A02; A03 or A71; A72; B10-1,2,3 or B12-1,2,3; B15; C29; C33; C35; C42-1,2,3; C45; C61
Related courses: Mathematics B14-1,2,3 and B15 (the accelerated mathematics courses B90-1,2 or B91-1,2 also satisfy this requirement); Physics A25-1,2,3 or A35-1,2,3 or A90-1,2,3

Chemistry Program with Biochemistry Emphasis
This program is designed for students who wish to emphasize the biochemical aspects of chemistry. For example, this program is suitable preparation for medical school or for advanced study in fields that require a strong background in chemistry. Three courses from the regular chemistry program (C35, C61, and B15 or C45) are replaced by Biological Sciences B10-1,2 and one of the following: Chemistry C97, D14; Biological Sciences C01, C22, C50, C54, C90.

Minor in Chemistry
The minor in chemistry allows majors in other fields to complete a significant portion of the course work required for a chemistry major. It permits the flexible selection of course work from the traditional subdisciplines of organic, inorganic, physical, and analytical chemistry. Majors must obtain permission from the department to register in B12-1,2,3, B15, and C35. Majors have priority for registration in these courses, which may have limited enrollments, and in C99.

Basic courses: A03 or A72 or equivalent (C-level chemistry courses have additional chemistry, physics, and mathematics prerequisites)

Minor course requirements (6 units): six B- or C-level chemistry courses (exclusive of B01, B02, B04, and C99)

Sample programs: Life science majors and premedical students are advised to take B10-1,2,3 or B12-1,2,3, C-43, and two additional courses. Physical science majors should take C42-1,2,3, C45, and two additional courses. Students with interests in materials science, geological science, environmental science, or chemical engineering should take B10-1,2, C35, C43 and two additional courses. Other programs for the minor can be designed to suit the needs of individual students.

Four-Year BA/MS
Students who have done outstanding work during their first three years and who have a professional interest in chemistry or biochemistry are eligible to apply for the four-year BA/MS program. Applications should be made during the spring quarter of the junior year. By the end of three years, the applicant should have completed all the C-level chemistry courses, all or nearly all CAS requirements, and one quarter of independent study. To fulfill the MS requirements, students must take nine graduate courses, including four chemistry courses selected from a list approved by the department and at least 3 units of independent study. None of these nine courses can be used to fulfill any specific undergraduate CAS or major course requirement. See Four-Year Master's Programs in the Undergraduate Education section of this catalog and consult a department adviser.

Integrated Science Program
The Integrated Science Program (ISP) is a highly selective BA program in CAS (see Integrated Science Program). Students majoring in ISP who wish to complete a second major in chemistry must take the courses listed under one of the following options.
Chemistry option: B12-2,3, B15, C29, C33, C35, C45, C61
Biochemistry option: B12-2,3, C29, C33; B15 or C45 (ISP C98 may not be substituted for Biological Sciences C01, C09, or C10)
Program in the teaching of chemistry: B12-2, C29, C33, three B- or C-level chemistry electives

Honors in Chemistry
Seniors who have done outstanding work in the classroom and research laboratory are eligible for graduation with honors in chemistry. A student who is recommended must have completed the sequence of courses required by the department with a grade point average of 3.3 or above in chemistry and at least two quarters of either C98 or C99 during which the student was engaged in original research. A written report of research activities along with a strong recommendation from the student’s research adviser is also necessary. For more information consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

The Teaching of Chemistry
CAS students pursuing a major in chemistry who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Advanced Placement
Entering students seeking advanced placement will be advised to register for Chemistry A71, B10, or B12 according to their score on either the College Board advanced placement chemistry examination or the department chemistry placement examination.
Courses Primarily for Freshmen and Sophomores

411-A01-0 General Chemistry Descriptive chemistry, elements and compounds; basic chemical calculations, mole problems, stoichiometry, and solution concentrations; gases; law; thermochemistry; quantum theory and electronic structure of atoms; periodic properties of the elements; nuclear chemistry; chemical bonding.

411-A02-0 General Inorganic Chemistry Descriptive chemistry, inorganic reactions; chemical bonding; condensed phases; introduction to chemical equilibria; phase equilibria; solutions and colligative properties; metal complexes. Prerequisite: A01 (C- or better) or consent of department.

411-A03-0 General Physical Chemistry Chemical equilibria; equilibria in aqueous solution, thermodynamics; chemical kinetics; electrochemistry and oxidation-reduction reactions; solid-state chemistry; industrial chemical processes. A grade of C- or better in A03 required to enroll for any higher-level chemistry course. Prerequisites: A02 (C- or better) or consent of department; Mathematics B14-1.

411-A71-0 Accelerated General Inorganic Chemistry Review of mole problems and stoichiometry; descriptive chemistry, elements, compounds, and inorganic reactions; gases; law; phase equilibria and colligative properties; chemical equilibria; aqueous equilibria; topics in chemical bonding and molecular structure. Prerequisite: placement by the department through department placement exam.

411-A72-0 Accelerated General Physical Chemistry Thermodynamics and equilibrium; chemical kinetics and mechanism; electrochemistry; electronic structure of the atom and quantum theory; advanced topics in chemical bonding; coordination compounds; solid-state chemistry; nuclear chemistry. Prerequisites: A71 (C- or better); Mathematics B14-1.

411-B02-0 Color Science Science necessary to understand color. For students with majors not in the physical or biological sciences.

411-B04-0 Environmental Chemistry The chemistry of the environment. Air, water, and soil; effects of pollution, heating, nuclear emissions, toxicity, and remediation. Laboratory. Primarily for environmental science majors but open to all qualified students. Prerequisites: A01, A02, A03 or A71, A72.

411-B10-1,2,3 Organic Chemistry 1. Basic concepts of structure, stereochemistry, and reactivity of organic compounds. The chemistry of hydrocarbons and alcohols. No P/N registration. Prerequisite: A03 or A72 (C- or better).

2. The chemistry of aromatic, carbonyl, and nitrogen compounds; characterization of organic substances by chemical and spectral methods; reaction mechanisms. With laboratory. No P/N registration. Prerequisite: B10-1 (C- or better).

3. The chemistry of polyfunctional compounds of biological and medicinal interest. Modern organic synthesis, bioorganic chemistry, and recent developments in organic chemistry. With laboratory. No P/N registration. Prerequisite: B10-2 (C- or better).

411-B12-1,2,3 Organic Chemistry Primarily for chemistry majors and students in ISP. Similar to B10-1,2,3 except with laboratory in the first and second quarters. No P/N registration. Prerequisites: A72 or A03 (C- or better) and consent of department, enrollment in ISP, or department placement.

411-B15-0 Organic Synthesis Laboratory A laboratory course in modern methods of synthesis, separation, and spectroscopic characterization of organic compounds. Included are organization, access, and use of chemical information. Prerequisite: B10-3 or B12-3 (students may take B12-3 concurrently).

Courses Primarily for Juniors and Seniors

411-C29-0 Analytical Chemistry with Laboratory Principles and applications of analytical methods with emphasis on chromatography and electrochemistry. With laboratory. No P/N registration. Prerequisites: C42-1, C42-2, or C43 (students may take C43 concurrently).

411-C33-0 Inorganic Chemistry Descriptive chemistry of some important elements. Current concepts and models of chemical bonding. Prerequisites: 2 units of B- or C-level chemistry.

411-C42-1 Thermodynamics Laws of applications of thermodynamics. Thermochemistry, chemical potentials, solution thermodynamics, nonideal gases. Prerequisites: A03 or A72 (C- or better); Mathematics B14-3; Physics A35-1,2 (students may take Physics A35-2 concurrently).

411-C42-2 Quantum Mechanics and Spectroscopy Quantum mechanics with emphasis on atomic and molecular electronic structure. Electronic, vibrational, rotational, and magnetic resonance spectroscopy. Prerequisites: Mathematics B14-3 (B15 recommended); Physics A35-1,2.

411-C42-3 Kinetics and Statistical Thermodynamics Chemical kinetics, including experimental techniques and theories of rate processes. Statistical mechanics, including Boltzmann distribution, partition functions, and applications to thermodynamics. Prerequisites: C42-1,2.
411-C43-0 Kinetics and Spectroscopy Chemical kinetics, including experimental techniques and elementary theory. Ultraviolet, visible, infrared, and magnetic resonance spectroscopy. For nonmajors. Prerequisites: C42-1 or Physics A35-1,2; M mathematics B14-3.

411-C45-0 Spectroscopy Laboratory Experiments on modern spectroscopic methods and data analysis. Prerequisite: C42-2 (students may take C42-2 concurrently).

411-C48-0 Physical Chemistry for ISP Gas laws and properties; kinetic theory; first, second, and third laws; phase equilibria; kinetics. Prerequisites: ISP enrollment; A72; M mathematics B91-1,2,3; or consent of department.

411-C61-0 Advanced Laboratory Advanced laboratory in analytical and physical chemistry. Prerequisites: C29, C42-1,2, C45.

411-C80-0 Cooperative Chemistry Education Participation in approved industrial work experience away from the campus. No credit; no tuition. Prerequisite: consent of department.

411-C97-0 Medicinal Chemistry: The Organic Chemistry of Drug Design and Action Introduction to principles of drug design and mechanisms of drug action from a chemical viewpoint. Historical introduction, drug design and development, receptors, enzymes and enzyme inhibitors, DNA, drug metabolism, and prodrugs. Prerequisites: B10-3, B12-3, or consent of instructor.

411-C98-0 Undergraduate Seminar Advanced work for superior students through supervised reading, research, and discussion. Prerequisite: consent of department.

411-C99-0 Independent Study Faculty-directed research. Prerequisite: consent of department.

Classics
Classics is the multidisciplinary study of Greek and Roman civilization. The chief purpose of the undergraduate programs is to elucidate the classical foundations of our culture and to sharpen the abilities that grow from the study of the classical languages, literature, and history. The department also offers MA and PhD programs that prepare scholars for a career in teaching and research.

The classics programs at Northwestern are strong in history and literature. Complemented by resources in the Department of Philosophy, the department also is well qualified to offer undergraduate and graduate programs in Greek philosophy. A major commitment to classical studies is evident in the holdings of the University Library, which provides extensive research opportunities to classics undergraduate and graduate students.

The Department of Classics offers a major in classics and minor concentrations in Latin and in Greek. CAS students pursuing a major in classics who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Additional information about classics programs and courses may be obtained from the department's Web site <http://www2.mmlc.nwu.edu/classics/> or on request from the department office.

Major in Classics
The major in classics, with emphasis in Latin or Greek, provides extensive contact with classical literature in the original language and a broad knowledge of the classical world and its place in the Western tradition. Requirements for the classics major can be satisfied by 18 or 19 courses, evenly divided between language courses (413 in Latin; 415 in Greek) and courses with readings in English (414). A classics major is a viable option even for students enrolling at Northwestern with little or no language background.

Departmental courses
Basic courses: Latin B01-1,2,3 or Greek B01-1,2,3; Classics B10, B11, B12.

Major courses
- Six C-level Latin or Greek courses in any combination or three C-level courses in one language and four at any level in the other language
- Three B-level classics 414 courses in English (With departmental approval, related B-level courses outside the department may be used to fulfill this requirement.)
- Three C-level classics 414 courses (With departmental approval, related C-level courses outside the department may be used to fulfill this requirement.)

Minor Concentrations in Classics
Classics offers two minor concentrations designed to provide a solid foundation in language, literature, history, and culture and to complement specialization in any other discipline. Each concentration calls for six quarters of Greek or Latin and three approved C-level classics courses. Students planning to minor in classics should meet with a departmental adviser.

Latin
Prerequisites: Latin A01-1,2,3 or equivalent
Minor course requirements (6 units)
- Latin B01-1,2,3
- Three C-level classics 414 courses approved by the department

Greek
Prerequisites: Greek A01-1,2,3 or equivalent
Minor course requirements (6 units)
- Greek B01-1,2,3
- Three C-level classics 414 courses approved by the department
Study Abroad
Qualified majors have the opportunity to attend the Intercollegiate Center for Classical Studies at Rome during their junior or senior year. Students interested in this program or similar opportunities in Greece should consult the department chair.

Four-Year BA/MA
Students with a strong background may apply for a two-degree program that can be completed in four years. This is ideal for students interested in continued graduate studies in any of several fields. It also serves to prepare highly qualified secondary school teachers of classics, for whom there is a renewed demand. See Four-Year Master’s Programs in the Undergraduate Education section of this catalog and consult a department adviser.

Honors in Classics
Outstanding seniors in classics are encouraged to prepare an honors thesis based on two or more quarters of C99. Successful completion of this project entitles the candidate to nomination for honors in classics. For more information, consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

Courses in Latin
413-A01-1,2,3 Elementary Latin Classical Latin vocabulary, grammar, and syntax with graded readings for translation. Four class meetings a week.
413-A11-0 Introduction to Latin Basic Latin texts and essential Latin vocabulary, grammar, and syntax. Students receiving outstanding grades are eligible for Latin A01 credit.
413-A50-0 Intermediate Latin Review Intensive review of Latin grammar and forms; readings from Latin prose and poetry. Prerequisite: department placement.
413-B01-1,2,3 Introduction to Latin Literature Grammar and vocabulary review. Readings in Catullus, Horace, and other selected comedy and prose authors; emphasis on literary analysis. Prerequisite: A01 or department placement.
413-C10-0 Readings in Latin Literature Authors and topics arranged in a three-year cycle. Authors include Plautus, Terence, Lucretius, Cicero, Virgil, Horace, Ovid, and Tacitus. Prerequisite: B01 or equivalent.
413-C99-0 Independent Study For advanced students approved by the department, individual programs under the direction of a department member.

Courses in Greek
415-A01-1,2,3 Elementary Greek Vocabulary, forms, and syntax of the Homeric dialect of ancient Greek, using Homer’s Iliad as the basic text.
415-B01-1,2,3 Introduction to Greek Literature Review of basic grammar and vocabulary. Representative selections from Greek authors in their historical and cultural context. 1. Epic. 2. Drama. 3. History, philosophy. Prerequisite: A01 or equivalent.
415-C01-0 Readings in Greek Literature Authors and topics arranged in a three-year cycle. Authors include Homer, Pindar, Herodotus, Thucydides, and Plato. Prerequisite: B01 or equivalent.
415-C99-0 Independent Study For advanced students approved by the department, individual programs under the direction of a department member.

Courses with Readings in English
These courses offer an understanding of classical culture and its influence in history, literature, and art. There are no prerequisites in Greek or Latin.

414-A10-0 Scientific Vocabulary through Classical Roots Greek and Latin etymology in the vocabulary of the sciences. Designed primarily for science or medical students. Self-paced independent study.
414-B10-0 Early Western Civilization Comparative study of early Greek and Hebrew cultures against the background of other civilizations of the ancient Near East.
414-B11-0 Classical Greece Political, social, and intellectual culture of Greece in the 5th and 4th centuries B.C.
414-B12-0 Roman Civilization Development and character of the Roman Republic and Empire, emphasizing political and social institutions. Roman origins of Europe’s politics, religion, literature, and ideas.
414-B40-1,2 The Literary Achievement of Greece and Rome 1. Homer and Hellenism: the Iliad, the Odyssey, and their early influence. 2. Hellenistic and Roman humanism; new values in comedy, Virgil’s Aeneid, satire.
414-B44-0 The Ancient Novel Critical approach to the origins of the genre of the novel through works by ancient Greek and Latin authors.
414-B50-0 Introduction to Greek Philosophy Survey of pre-Socratic philosophy, Plato, and Aristotle.
414-B60-0 Classical Mythology Stories of gods and heroes as reflections of the structure and attitudes of Greek and Roman society and as changing models for human behavior.
414-C30-0 Ancient Economy Preindustrial Mediterranean economies of ancient Greece and Rome. Farming,
Major in Cognitive Science

Program courses

Introductory courses (3): B07, B10, B11

Basic requirements (3): Computer Science A10 or A11; Psychology B01, B05

Intermediate requirements (3): Linguistics B05 or B06 or B07 and two courses chosen from Psychology B12, B28; Computer Science C48; Communication Sciences and Disorders B02, C01

Advanced requirement (1): C66 (should be taken in the junior year)

Advanced electives (6): six courses chosen from four areas; at least three must be in one area (major emphasis) and at least two must be outside of that area. Other C- and D-level courses not listed below may be substituted for advanced electives with consent of the cognitive science adviser. It is strongly advised that students pursue independent study (C99) in one of the departments listed below. This course may count as an advanced elective.

Asterisks (*) denote courses required for major emphasis in that area.

• Anthropology: C60, C89, C90, C95 or E95, D71
  • Artificial intelligence: Computer Science C25-1*, C25-2, C37, C44, D32, D37-1,2
  • Cognitive psychology: Psychology C11, C14, C24, C27-1,2, C33, C34, C35, C60, C62, D60
  • Cognitive neuroscience: Biological Science B10-3*, C02, C03, C04, C06, C08-3*, C77; Psychology C12-2, C21
  • Learning sciences: C01, C21, D01, D22, D23, D29, D39, D50, D51
  • Linguistics: C05, C06, C09, C16, C19, C29, C46, C71
  • Philosophy: C25, C27

Note: Cognitive science majors who wish to double major must show a minimum of 11 courses not double-counted in any other major(s). Cognitive science majors seeking a minor in another discipline cannot double-count for that minor any courses used to meet the major requirements in cognitive science.

Minor in Cognitive Science

The minor in cognitive science gives a broad foundation in this interdisciplinary field, encompassing cognitive psychology, linguistics, artificial intelligence, neuroscience, and related disciplines. Introductory courses survey basic phenomena and approaches; methods courses impart the core methods of cognitive science; elective courses allow students to pursue more advanced study in particular disciplines.

Minor course requirements (8 units)

• Introductory courses: two courses chosen from B07, B10, B11
• Methods courses: two courses chosen from Psychology B01, B05; Computer Science A10, A11
The Program in Comparative Literary Studies offers an undergraduate major and a graduate program leading to the PhD degree.

Major in Comparative Literary Studies
The major in comparative literary studies includes a core curriculum and electives that make up a concentration. The core curriculum consists of eight courses common to all majors that introduce basic texts, methods, and theoretical models of the discipline. Students consult with an undergraduate adviser to plan an eight-elective concentration.

Each concentration exemplifies an important orientation of comparative literary studies. Concentrations are generally organized according to three broadly defined fields: language and literature (focus on particular literary traditions); world literature (exploration of a broader range of literatures, particularly non-Western); and literature and theory (integration of a study of literature with work in related disciplines).

During the spring quarter of the junior year, comparative literary studies majors submit written proposals to the program adviser explaining in detail the concentration chosen and how the requirements will be fulfilled. Majors in study aboard programs during their junior year should submit their proposal before leaving Northwestern. Majors may preregister each quarter during the week preceding general preregistration. Additional information may be obtained from the program office.

Program courses
Core courses (8)
- B01-1,2; B02; B80
- Two courses at the B level or above in a literature other than English in the original language; if literature is not taught at the B level in the original language, at least three years of the language and corresponding courses in the literature in translation, which can be concentration electives
- C01, C02, or C03
- C98

Concentration (8): Eight courses organized according to an individual concentration drawn from the following categories:
- B- or C-level courses in literature in the original language
- C-level courses in literature in translation
- C-level courses in disciplines related to literary studies (for example, art history, film studies, history, philosophy, women's studies)

Students must take at least one course in Western literature before 1750 and at least one course in a non-Western literature. At least five electives must be at the C level or higher.

The principle for the construction of a concentration is precisely that it concentrates the student's interests into
a coherent and recognizable program of study. Examples of individual concentrations:
• Regionally defined or “national” literatures (African [including anglophone and/or francophone], American, Chinese, English, French, German, Italian, Japanese, Latin American, Spanish [peninsular])
• Epochs of literature (medieval, Renaissance, romanticism, modernism)
• Genres (novel, drama, lyric)
• Literature and another discipline (anthropology, art history, film, history, intellectual history, philosophy, theater)

**Double Major**
Majors in comparative literary studies must show a minimum of 12 courses not double-counted in any other major(s).

**Honors in Comparative Literary Studies**
Students may qualify for honors with a grade point average of 3.3 or above in the major. They must take C-97, which can also count as one of the eight courses in their concentration. In addition, students must take 1 or 2 units of C99 beyond the regular course requirements of the major, and they must write an honors thesis of 25–30 pages. The paper will be evaluated by the director of the independent study and a second reader appointed by the comparative literary studies director of undergraduate studies. Students who wish to pursue honors must declare their intention to do so by the end of the junior year. For more information, consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

**Preparation for Graduate Study**
While it is possible to complete the Northwestern BA in comparative literary studies with only two B-level courses in one language other than English, most PhD programs in comparative literature require significant mastery of at least two languages in addition to English.

**Study Abroad**
The Program in Comparative Literary Studies encourages all majors who qualify to consider a year of study abroad during the junior year.

**Courses Primarily for Freshmen and Sophomores**
416-B01-1,2 Western European Literature: Tradition and Transformation A two-quarter sequence interweaving selected classics of the Western European literary tradition from Homer and Genesis forward with modern transformations of traditional themes.
416-B02-0 Practices of Reading Introduction to fundamental skills and problems of close reading, with special focus on the “conflict of interpretations” between competing practices of reading.
416-B03-0 Introduction to Comedy Survey of comic drama from Aristophanes to the present day.
416-B05-0 Introduction to Modern Drama Survey of principal dramatic movements since Ibsen.
416-B06-0 European Fiction since 1900 Reading in translation of some important works written in continental languages during the present century, by writers such as Dostoevsky, Mann, Kafka, Rilke, Sartre, Camus.
416-B10-0 The Bible as Literature Selected books of the Hebrew Bible and New Testament studied from a literary perspective; issues of plot, character, genre, narrative strategy, and theories of interpretation.
416-B13-0 Introduction to Fiction Fictional modes such as the novella, the short story, and the novel. May be repeated for credit with different topic.
416-B71-1,2,3,4 Japanese Literature in Translation A set of four courses surveying Japanese literature from the eighth century to the present.
416-B74-1,2,3 Introduction to Chinese Literature Survey of Chinese poetry and fiction from the fifth century B.C. to the present.
416-B75-0 Arabic Literature in Translation Introduction to Arabic literary background; survey of literary genres from the pre-Islamic period to the present.
416-B76-0 African Literature in Translation Continental African literature. Content varies. May be repeated for credit with different topic.
416-B78-0 Modern Hebrew Literature in Translation Introduction to the main works of contemporary Israeli writers.
416-B79-0 Modern Jewish Literature A study of modern European, American, and Israeli Jewish literature in its historical context.
416-B80-0 Interpreting Culture Introduction to the theory and practice of interpreting “cultural texts,” the literary and other texts through which human culture imposes structures of meaning on the world.

**Courses Primarily for Juniors and Seniors**
Comparative literary studies and language majors will read the texts and be tested in their language or area of expertise whenever the course material allows.
416-C01-0 Writing in Society Studies in relations between literature and society through a series of theoretical readings in the sociology of literature, juxtaposed with literary examples from different societies.
416-C02-0 Language in the Text Close reading of exemplary literary and theoretical texts with a focus on the relationship between the meaning of texts and the linguistic devices that produce meaning: that is, on the tension between what a text means and how it means.
416-C03-0 Literature in History
Studies in the historicity of literature, with attention to the development of literary kinds over time and to the historical circumstances in which literature is produced.

416-C10-0 Studies in Literary Genres
Selected literary genres, such as epic, pastoral, autobiography, comedy, satire, the essay. May be repeated for credit with different topic.

416-C12-0 Studies in Drama
Content varies. May be repeated for credit with different topic.

416-C13-0 Studies in Fiction
Content varies. May be repeated for credit with different topic.

416-C21-0 Medieval Epic and Romance
Major forms of medieval narrative from heroic saga to courtly romance.

416-C24-0 Backgrounds of Medieval Literature
Intellectual background of medieval literature, with special emphasis on the interpretations of Plato and Aristotle by late classical and scholastic philosophers.

416-C62-1,2,3 Modern Drama
1. Major developments from the late 19th century to the end of World War I.
2. 1920s–1950s.
3. From absurdist theater to the present.

416-C65-0 The Avant-Garde
Nature, origins, and development of the avant-garde movements in Europe, North America, and Latin America since the early 20th century.

416-C75-0 Literature and the Arts
Differences and similarities of literature and the visual arts and/or music. Content varies. May be repeated for credit with different topic.

416-C82-1,2,3 History of Literary Criticism
1. Changing concepts of mimesis, genre, and style, from Plato to the Renaissance.
2. The emergence of neoclassical theories in France and England and their replacement by romantic theories in England and Germany.

416-C83-0 Special Topics in Theory
For students with previous study of criticism and literary theory. Content varies. May be repeated for credit with different topic.

416-C90-0 Topics in Comparative Literature
Content varies: for example, problems of literary translation, literature and psychoanalysis. May be repeated for credit with different topic.

416-C97-1,2,3 Literary Studies Colloquium
Yearlong course carrying 1 unit of credit, organized around a particular problem in the study of literature: presentations by distinguished visitors and Northwestern faculty. Preparation and follow-up for each presentation. Prerequisite: consent of department.

416-C98-0 Senior Seminar
Variable topics and reading lists to develop work undertaken in earlier courses in a setting that introduces the active give-and-take of current intellectual debates. Required of senior majors in comparative literary studies. Prerequisite: consent of the program adviser.

416-C99-0 Independent Study (1–3 units)

Related Courses in Other Departments
The following courses in literature in translation are from other department listings, which should be consulted for fuller descriptions.

Classics B40-1,2 The Literary Achievement of Greece and Rome
German B10-1,2 German Literature in Translation
German B12 Introduction to German Culture and Literature
German B20 The German Film
German B40 The Theme of Faust through the Ages
German B61 Turn-of-the-Century Vienna: In Search of New Values
German B62 Berlin: The Golden ’20s
German C14 German Contributions to World Literature
Italian B75 Dante's Divine Comedy
Italian C80 Topics in Italian Cinema
Portuguese C97 Topics in Luso-Brazilian Culture and Civilization
Slavic Languages and Literatures B10-1,2,3 Introduction to Russian Literature
Slavic Languages and Literatures C10 Tolstoy
Slavic Languages and Literatures C11 Dostoevsky
Slavic Languages and Literatures C18 19th-Century Russian Comedy and Satire
Spanish B23 Cervantes
Spanish B43 Contemporary Spanish-American Prose Fiction
Spanish C96 Topics in Spanish Culture and Civilization
Spanish C97 Topics in Latin American Culture and Civilization

Computing and Information Systems Program
The Program in Computing and Information Systems offers students in CAS the opportunity to study computer science within the context of the college’s focus on liberal arts and sciences, as distinct from the engineering context offered by the Department of Computer Science in the McCormick School of Engineering and Applied Science. Faculty and courses for the program are drawn from the McCormick department. Courses and research in the department address the underlying theories, enabling technologies, and applications of modern computer science. There is a strong focus on the design, implementation, and evaluation of software systems, including interactive, distributed multimedia, artificial intelligence, robotics, and database systems. Research in the department is highly
interdisciplinary, including important links with the Cognitive Science Program and the Department of Psychology in CAS as well as the Department of Learning Sciences in the School of Education and Social Policy. Undergraduates are encouraged to join ongoing research projects within the department. For more information on the Department of Computer Science and its course offerings, see the McCormick School section of this catalog.

The major in computing and information systems is highly flexible, emphasizing the interdisciplinary study and project work that are critical in a field as rapidly changing as computer science. The specific courses to be taken are largely determined by the goals and interests of individual students. The major includes a two-quarter capstone project that helps integrate the skills and knowledge acquired in course work.

Computing facilities available to students in the program are extensive. The campus, including all dormitories, is completely networked. All students have full Internet access. E-mail, Web sites, and other computer-based communication resources are extensively used within the program to foster a sense of community and facilitate communication among students and faculty beyond the classroom. The program also draws on the facilities and staff of the Institute for the Learning Sciences, an interdisciplinary research and development center dedicated to building innovative, multimedia-intensive educational software.

**Major in Computing and Information Systems**

For requirements in mathematics, see related courses below.

**Program courses**

**Introductory sequence:** Computer Science A11, B11, and C11. Students without prior programming experience may wish to take A10 before A11.

**Intermediate and advanced courses:** Eight courses chosen from Computer Science B30 and C10 through C99

**Additional advanced technical courses:** Two courses chosen from Computer Science C10 through C99; Mathematics B15, B21, C08, C10, C13, C35, C37-1,2,3; Electrical and Computer Engineering B01, B05, C13, C28, C58, C61, C62. (See the program director for up-to-date information on suitable courses in this category.)

**Advanced electives:** Two courses chosen with the consent of the student's adviser. Examples of appropriate courses include advanced courses in computer science; social sciences such as psychology, economics, or learning sciences; mathematics; natural sciences such as biology, chemistry, or physics; or other disciplines such as radio/television/film, journalism, or music.

**Project courses:** Two courses requiring substantial project work (e.g., Computer Science C94 or C99). The project or projects developed in these courses must be approved by the student's adviser as well as the course instructor in order to fulfill the program requirements.

**Related courses:** Mathematics B14-1,2,3, B17, and C30-1 or equivalent.

**Integrated Science Program**

The Integrated Science Program (ISP) is a highly selective program in CAS. Students majoring in ISP may complete a second major in computing and information systems through a curriculum tailored specifically to their needs.

**Program courses**

**Introductory sequence:** Computer Science A11, B11, C11

**Intermediate and advanced courses:** Seven courses chosen from Computer Science C10 through C95

**Project courses:** Two quarters of ISP C98 or two quarters of Computer Science C99. Projects developed in these courses must be approved by the student's advisers in both ISP and the computing and information systems program in order to fulfill the program requirements.

**Minor in Computing and Information Systems**

The program offers a minor in computing and information systems for students who wish to develop a strong competence in computer science while majoring in another area. Students choosing this minor are expected to have completed Mathematics B14-1,2,3 and B17, which are prerequisites for most computer science courses.

**Minor course requirements (9 units)**

- Introductory sequence: Computer Science A11, B11, and C11. Students without prior programming experience may wish to take A10 before A11.
- Intermediate and advanced courses: Six courses chosen from Computer Science B30 and C10 through C99

**Drama Program**

The Program in Drama offers undergraduates the opportunity to combine the study of dramatic literature in classics, comparative literary studies, English, and modern language courses with performance studies and theater courses in the School of Speech. Recognizing the uniqueness of drama among literary genres as a performing art, it seeks to develop an understanding and appreciation of dramatic literature informed by the study of acting, interpretation, playwriting, or directing. The program is not intended for students interested in professional performance but is directed rather toward those who wish to bring to the study of dramatic history and criticism a developed awareness of the problems and techniques involved in bringing a dramatic text to full life.
requirements ensure a balance of historical, literary, and theatrical approaches to drama; they are flexible enough to allow for special interests and concentrations, including the study of non-English drama in the original language. All students electing this major must work out a long-range plan of study with the program’s director.

**Major in Drama**

**Program courses**

**Introductory courses:** 2 units from each of the following sets of courses, one from CAS and one from the School of Speech:

- **CAS:** Comparative Literary Studies B03; English B12; Integrated Arts B91-1
- **Speech:** Performance Studies A03, B10-3; Theatre A40-1,2, A43

**Major courses:** 12 courses with a minimum of 9 C-level courses; to maintain a balance between literary and theatrical approaches to the study of drama, no more than 7 courses should be from one school and they must be distributed as follows:

- At least 6 units in the history and criticism of drama, including 3 units in drama before 1850 (but not all in Shakespeare) and 2 units in drama after 1850. Eligible courses include African American Studies B59; Classics B40-2, C45; Comparative Literary Studies B05, C12, C62-1,2,3; English C12, C32, C34-1,2, C39, C42; French B72, C30; German C24; Hispanic Studies C21, C42; Slavic Languages and Literatures C69; Theatre B44-1,2, C45-1,2,3, C65, C66, C67, C68

- At least 3 units in performance practices: French C90; Integrated Arts C90-1; Performance Studies B24, C09-2, C18, C24-1,2; Theatre B43-1,2,3, C40-1,2, C41-1,2,3, C46-1,2

- One unit in an advanced seminar, normally a D-level course approved by the program director

**Related courses:** 4 units at the B or C level in subjects related to the study of drama, approved by the program director. Applicable areas include aesthetics, criticism, cultural and intellectual history, humanities, literature, teaching of dramatics.

**Honors**

Seniors with distinguished records in major courses who wish to be candidates for honors in the program do so by completing an independent project. This project is normally based on work done in the required D-level seminar and a subsequent unit of C99. Interested students should consult with the program director in the spring quarter of the junior year. See Honors under Academic Policies earlier in this section of the catalog.

**Course**

420-C99-0 Independent Study in Drama For senior drama majors who have completed the required seminar and wish to undertake a project in candidacy for honors in drama. Prerequisite: approval of program director.

**Economics**

The program in economics enables students to understand the basic concepts, theories, and techniques of economics as they apply to economic problems and policies. These may focus on macroeconomics, applied microeconomics, quantitative economics, or economic history. Whatever courses students take, they will become familiar with the way economists think about problems and devise solutions to them. Although the program does not offer specialized professional training in economics, it is an excellent preparation for graduate work in economics, the study of law, or a career in business or government.

Students should consult a department advisor about elective courses to fit their needs.

**Major in Economics**

The introductory courses B01 and B02 must be taken first and in that order. Statistics B10 and Mathematics B14-1 should also be taken early in the program; the former is a prerequisite of Economics B81 and the latter of C10-1. B81 and the intermediate theory courses should be completed before C-level electives are taken. Although only Mathematics B14-1 is required, some C-level electives may require Mathematics B14-2 or B14-3, both of which majors are strongly urged to take.

**Departmental courses**

**Introductory courses:** B01, B02, B81

**Intermediate theory courses:** C10-1, C10-2, C11-1

**Elective courses:** six additional C-level courses

**Related courses:** Mathematics B14-1, Statistics B10, and three additional courses in the social sciences, mathematics, or statistics, no more than one at the A level. Economics B60 may be taken in partial fulfillment of this requirement.

**Minor in Economics**

The minor offers training in economic theory through the intermediate level, instruction in quantitative methods of econometrics, and opportunity for advanced elective work in students’ areas of interest. The introductory and intermediate courses are the same as those in the major, except that only two of the intermediate theory courses are required (C10-1 and C10-2 or C11-1). As in the major, Mathematics B14-1 and Statistics B10 must be taken early in the program because they are prerequisites for required courses.
Minor course requirements (8 units)
- Introductory courses (3): B01, B02, B81
- Intermediate theory courses (2): C10-1 and C10-2 or C11-1
- Elective courses (3): Three additional C-level courses

Four-Year BA/MA
The department offers a four-year BA/MA for outstanding students in economics. Graduate-level courses in economics theory are required. Interested students should consult the director of undergraduate studies in their sophomore year and should see Four-Year Master's Programs in the Undergraduate Education section of this catalog.

Honors in Economics
By invitation only, superior students in economics may pursue departmental honors by completing, in addition to the regular requirements of the major, one of the following three options: (1) C98-1,2; (2) two quarters of C99; or (3) two D-level field courses in economics. Under each option, candidates must submit an honors thesis presenting original research. Interested students should consult with the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

The Teaching of Economics
CAS students pursuing a major in economics who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Courses Primarily for Freshmen and Sophomores
417-B01-0 Introduction to Macroeconomics Scarcity and choice; elements of demand and supply, determinants of aggregate output, employment, inflation, growth, and balance of payments.
417-B02-0 Introduction to Microeconomics Consumers' and producers' influence on structure of output and prices and distribution of income. Social efficiency in resource allocation. Government impact on allocative efficiency and distributive equity. Prerequisite: B01.
417-B13-0 Economics of Gender Analysis of gender differences in employment and earnings. Family, labor market, discrimination, segregation, historical and international conditions, and antidiscrimination legislation.
417-B60-0 Accounting and Business Finance Accounting and managerial finance, including the principles of accounting, the elementary concepts of the theory of capital and its relationship to the objectives and problems of managing the firm. Prerequisites: B01, B02, or consent of instructor.

417-B81-0 Introduction to Applied Econometrics Estimation and analysis of a variety of empirical econometric models. Descriptive statistics, univariate regression, multiple regression, simultaneous equations, and forecast- ing. Prerequisite: Statistics B10 or equivalent.

Courses Primarily for Sophomores, Juniors, and Seniors
Prerequisites: B01, B02, and B81 are normally required for C-level courses, except that C10-1 and C11-1 may be taken before or concurrently with B81. Additional prerequisites are indicated for specific courses. Prerequisites may vary somewhat, depending on the instructor.

417-C05-0 Comparative Economic Systems Development of welfare capitalism, market socialism, and centrally planned socialism and the problems confronting them in the contemporary world.
417-C06-1,2 International Economics 1. International and interregional trade. Factors influencing trade in goods and services between areas. Reasons for and effects of impediments to trade, such as transport costs, tariffs, quotas, and voluntary export restrictions. Prerequisites: C10-1, Mathematics B14-1. 2. International finance. Determination of exchange rates, balance of payments, and international asset flows and prices; international transmission of macroeconomic disturbances. Prerequisites: C10-1 and C11-1.
417-C07-0 Economics of Medical Care Effects of medical care on health; health insurance and public and private demand for medical care; the market for medical care; efficient organization and regulation of hospitals and physicians.
417-C08-0 Money and Banking Nature of money and bank credit. Development, functions, and operation of monetary standards and credit systems. Banking and credit policies; price levels. Interrelationships of domestic and foreign monetary systems. Prerequisites: C10-1, C11-1; Mathematics B14-1.
417-C10-1,2 Microeconomics 1. Consumer behavior and the theory of demand; production, cost, supply functions; choices under uncertainty, insurance; competitive equilibrium; subsidies, taxes, price controls; monopoly and monopsony. Prerequisite: Mathematics B14-1. 2. Price discrimination and public utility pricing: monopolistic competition, oligopoly, duopoly models; game theory; factor demands; general equilibrium theory and welfare

417-C11-1,2 Macroeconomics 1. M macroeconomics and monetary policy. Behavior of economy as a whole. Income, inflation, unemployment, and growth; consumption, investment, and rate of interest; monetary and fiscal policy. 2. Advanced macroeconomics. M microeconomic foundations of aggregate demand and supply; consumption, investment, money demand and supply; labor-market behavior; rational expectations. Prerequisites: B81 or equivalent, C11-1, Mathematics B14-1,2.

417-C15-0 Topics in Economic History Topics vary: for example, the decline of European feudalism, M althusianism, convertibility and free trade, constant wage shares during growth, the origins of the welfare state. Prerequisites: C10-1, C11-1.

417-C17-0 Population and Economic Growth Role of population growth in the process of economic growth; the effect of changes in economic conditions on the growth of population.

417-C18-0 History of Economic Thought Development of economic thought from the advent of the mercantilists to the formation of current schools of economics. Prerequisites: C10-1, C11-1.

417-C21-0 African American Economic History Economic experiences of African Americans as slaves and free people in the pre-Civil War period and in post–Civil War agriculture. South-north migration, urbanization, civil rights movements, and global economic competition.

417-C23-1,2 Economic History of the United States Economic development of the United States with emphasis on changing structure and performance of the economy. 1. Colonial period to 1865. 2. 1865 to the present.

417-C24-0 Western Economic History Western European developments, 1750 to the present: demographic, technical, social, and economic change. Prerequisites: C10-1, C11-1.

417-C26-0 Economic Development in Africa Economic change in sub-Saharan Africa, emphasizing current issues and policies in their historical contexts. Agriculture and rural development, industrialization, and international economic relations.

417-C30-0 Economic Analysis and the Social Sciences Relationship between economics and the other social sciences. The economic analysis of “noneconomic” topics; economic insights of other social sciences. Prerequisites: C10-1, C11-1, Mathematics B14-1,2.

417-C34-0 Business and Government Survey of the functions, origins, and evolution of government control over business decisions in the American economy. Special emphasis on the modern structure of government regulation with attention to remote origins.

417-C36-0 Analytic Methods for Public Policy Analysis Formulation of objectives, structuring decision problems, choices under uncertainty, interactive decisions, and the impact of organizational structure on project outcomes. Prerequisites: C10-1, C11-1, Mathematics B14-1.

417-C37-0 Economics of State and Local Governments Economic functions and financing of state and local governments in theory and practice; costs and demands for local public services; role of government finance in urban and regional growth. Prerequisites: C10-1, C11-1, Mathematics B14-1.

417-C38-0 Theories of Income Distribution Issues of economic equity and the distribution of economic resources. Alternative models of a just economic distribution, analysis of existing U.S. income distribution and its underlying causes, analysis of government policies designed to redistribute income. Prerequisite: C10-1.

417-C39-0 Labor Economics Survey of economic problems growing out of employment relationships; theories and processes of wage and employment determination, income distribution, and the role of trade unions and issues of economic security. Prerequisites: C10-1, C11-1, Mathematics B14-1,2.

417-C49-0 Industrial Economics Price and efficiency performance of American industries representative of various types of market structures and practices. Prerequisites: C10-1, Mathematics B14-1,2.

417-C50-0 Monopoly, Competition, and Public Policy Present public policy and unsettled issues with respect to structure and practices of industrial markets; concentration, vertical integration, and forms and effectiveness of competition. Prerequisites: C10-1, Mathematics B14-1,2.

417-C53-0 Urban and Regional Economics Influence of various factors on spatial distribution of economic activity. Consideration of methods for analyzing economic structure of urban areas.

417-C54-0 Issues in Urban Economics Applications of economic analysis to specific problems of urban areas, such as housing markets, zoning restrictions, and racial patterns of employment and housing. Prerequisites: C10-1, Mathematics B14-1,2.

417-C55-0 Transportation Economics and Public Policy The demand for alternative modes by passengers and shippers. Cost of providing transportation, competition, regulation, optimal pricing, subsidies, congestion pricing, and urban transit. Prerequisites: C10-1, Mathematics B14-1.
417-C60-0 Foundations of Corporate Finance Theory
How corporations allocate resources over time as facilitated by capital markets. Theory of asset evaluation, economic analysis of uncertainty, and capital budgeting and capital structure decisions. Prerequisites: C10-1, C11-1, Mathematics B14-1,2.

417-C70-0 Environmental and Natural Resource Economics
Externalities and the role of property rights, pollution, waste disposal, common property problems, renewable resource management, nonrenewable resource use and depletion, recyclable resources, water allocation, and management of public lands. Prerequisites: C10-1, Mathematics B14-1.

417-C80-1,2 Introduction to Mathematical Economics
1. Noncooperative game theory, with applications to industrial organization, auctions, and theories of the firm. Prerequisites: C10-1, C11-1, Mathematics B14-2.
2. Cooperative and noncooperative game theory, and decision making under uncertainty. Prerequisite: C80-1 or consent of instructor.

417-C81-1,2 Introduction to Econometrics
1. Probability and distribution theory, statistical inference, simple and multiple regression, specification error and multicollinearity, heteroskedasticity and serial correlation, measurement error, dummy variables. Prerequisites: B81, C10-1, C11-1, Mathematics B14-1,2.
2. Hypothesis testing, estimation with deficient data, distributed lags, panel data, simultaneous equation systems, limited dependent variables. Prerequisite: C81.

417-C82-0 Welfare Economics and Social Choice
Rigorous analysis of the classical problems of welfare economics. Efficiency of competitive equilibrium, social versus private costs, norms for evaluating economic systems, social rankings, and social welfare functions. Prerequisites: C10-1, C11-1, Mathematics B14-1,2.

417-C83-0 Economic Forecasting
Techniques for making and evaluating economic and business forecasts, including univariate regressions, autoregressive and ARMA models, vector autoregressive models, and structural econometric models. Prerequisite: B81.

417-C95-0 Junior Seminar
Small seminars led by department members on their special interests. Advanced work through supervised reading, research, or discussion. Prerequisites: C10-1, C11-1, Mathematics B14-1,2.

417-C98-1,2 Senior Honors Seminar
For students of superior ability. Original research on a topic of interest to the student, culminating in a senior honors thesis. By department invitation only. Grade of K given in C98-1. Prerequisites: C10-1, C11-1, Mathematics B14-1,2, at least four C-level economics electives.

417-C99-0 Independent Study
Advanced work through reading, research, and discussion in areas of particular interest to the student. Project to be decided by mutual agreement with a faculty member.

Related Course
403-C41-0 Economic Anthropology
This course can be taken in partial fulfillment of the six elective requirements in economics. See Anthropology.

English
Perhaps the most striking thing about the study of English literature today is how varied it is. While some scholars and teachers emphasize the formal qualities of literary works, others address such questions as what counts as "literary" and the relationship of literature to society. The particular kinds of texts they examine also vary a good deal, as do their assumptions, methods, and emphases. The unity underlying this variety is a common emphasis on close reading and careful analysis of the written word. The English department's curriculum reflects this variety and unity, and it offers a major that enables each student to pursue a particular area of interest within a broader understanding of the sweep of literary history and the range of literary study. The department also offers students disciplined training in the writing of verse and fiction. Virtually all of its courses also include practice in the writing of clear, concise, and persuasive expository prose. Rigorous training in thinking and writing is valuable for any career that an undergraduate may ultimately pursue and makes English an attractive major for students preparing for careers in medicine, law, and business, as well as in the teaching of English at all levels.

The department takes pride in the diversity of perspectives afforded by its courses. In addition to teaching classes in the department, English faculty contribute substantially to the course offerings in theater and drama, comparative literary studies, and American studies.

The University Library is a valuable resource for the advanced study of British and American literature, maintaining notable collections and databases in 19th- and 20th-century materials, especially modern "little" magazines. English majors also often profit from University programs for foreign study, particularly at the University of Sussex in England.

Majors in English
A complete description of undergraduate English major programs can be obtained from the department office and from the department Web page <www.english.nwu.edu>. Detailed descriptions of courses offered each quarter are published in "English Notes," available from the department office three times a year in advance of registration. In addition, a tentative list of course offerings for the following year is available each spring. Writing courses
B06, B07) and other courses whose content varies may be repeated, but only with consent of the department.

**English and American Literature**

**Departmental courses**

**Introductory courses:** B10, followed by B98

**Major courses:** 11 courses

- Five courses within a designated concentration:
  1. new world and postcolonial literature
  2. medieval literature
  3. British literature, 1500–1660 plus Milton
  4. Restoration and 18th-century British literature
  5. 19th-century British literature, including Romantic literature
  6. 20th-century literature in English
  7. American literature
  8. literary criticism and theory
  9. literature and culture
  10. literature and gender
  11. poetry
  12. drama
  13. fiction

- Six courses outside the concentration
- Nine courses at the C level or above
- At least nine English department courses, literature courses offered by the Department of African American Studies, or courses taught by members of the English department through other departments or programs and that deal substantially with literary works originally written in English (i.e., not in English translation)
- At least three of these courses must deal substantially with texts written before 1798 and at least three with texts written after 1798
- At least one course in American literature
- At least one course in literary criticism or theory

**Related courses:** At least two quarter-courses in fields outside of literature and related to the student's concentration. Specific listings are available in the department office and on the departmental Web page <www.english.nwu.edu>.

**Note:** Requirements for different concentrations vary. For more information, consult with the department office, University Hall, room 215, or the departmental Web page.

**English Major in Writing**

Students majoring in English may apply to the major in writing. Admission to the writing major is competitive, and the overall configuration of courses in the writing major is somewhat different from the literature major. The writing major includes the writing of poetry and fiction, but it is not restricted to "creative writing" alone. A required course in prose style and argument encourages students to focus on discursive forms, while a strong literature component and a course in cultural criticism further situate the writing done in the practical workshop courses in poetry and fiction within a context of general literacy.

Students may apply for admission to the writing major through the department office in the early spring of each year.

**Departmental courses**

**Introductory courses:** B10, B06, B07

**Major courses**

- One yearlong practice and theory sequence: C93-FW, TS or C94-FW, TS
- C92 and C95
- Five literature courses, at least two of which must deal with works written before 1798 and at least two with works written after 1798

**Note:** C-level writing courses will satisfy the major requirement in the literary criticism and theory concentration. Other major requirements apply.

**Related courses:** Two courses in fields outside of literature selected with the advice and consent of the student's writing major adviser. Recommended are those courses that provide a broad historical background for the study of literature.

**Minor in English**

The minor in English offers students experience in reading literary texts and writing critical analyses. Two courses in literature before the 19th century are required to ensure historical perspective. Students pursuing the minor will be permitted to preregister in the department after declared English majors.

**Minor course requirements (7 or 8 units)**

- Two or three B-level courses: B10 followed by B98 or B06 and B07
- Five C-level courses, at least two of which must deal with literature written before 1798 and at least two with literature written after 1798; one course may be in comparative literary studies

**Honors in English**

Literature majors who wish to earn honors may apply during the spring of their junior year for admission to the two-quarter honors seminar, C98-1,2, which meets the following fall and winter quarters. Each student in the seminar is expected to produce an honors essay. Under the direction of the department honors coordinator, students in C98 discuss their work and issues of common interest, at the same time receiving individual advice on their particular topics from faculty members with expertise in relevant areas. The aim is to foster intellectual community among the department's most ambitious students while encouraging outstanding independent work. Admission to
the seminar is competitive; a grade point average of 3.4 or above and a description of a likely topic are among the requirements. Students interested in honors through the writing major should consult with the director of the program. See Honors under Academic Policies earlier in this section of the catalog.

The Teaching of English
CAS students pursuing a major in English who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Related Programs
Department of English courses are used in the American studies, comparative literary studies, and drama programs. Students also may pursue creative writing in courses offered by the writing arts program.

Courses Primarily for Freshmen and Sophomores
419-A05-0 Expository Writing Emphasizes all phases of the composition process (gathering and analyzing material, drafting, revising, and editing), research methods, and critical thinking (analysis, argument). Careful review of student papers and reports.
419-A06-1,2 Writing in Special Contexts An introduction to expository writing that is paired with a course in another discipline. Emphasizes the composition process, research methods, and critical thinking. Careful review of student papers and reports.
419-B05-0 Intermediate Composition Expository writing at an intermediate level. Emphasis on techniques for writing clearly, precisely, and persuasively. Prospective writing majors take both B06 and B07.
419-B06-0 Reading and Writing Poetry Forms and techniques of verse.
419-B07-0 Reading and Writing Fiction Forms and techniques of fiction.
404-B10-1,2 Survey of African American Literature See African American Studies.
419-B10-0 English Literary Traditions Chronological survey of the common history and traditions of English literature from the Middle Ages to the 20th century in its cultural contexts, emphasizing earlier periods.
419-B11-0 Introduction to Poetry Elements of lyric and narrative poetry—diction, imagery, metrics, plot—with emphasis on the ways these can create meaning and elicit response.

419-B12-0 Introduction to Drama Fundamental elements of drama as perceived in performance. How a play communicates from text to stage and from stage to audience, through analysis of representative early and modern plays. Prerequisite for drama major.
419-B13-0 Introduction to Fiction Major 19th- and 20th-century fiction examined to define the genre (novel or short story) and distinguish between its conventional and experimental modes.
419-B34-0 Introduction to Shakespeare Representative Shakespearean plays.
404-B59-0 Introduction to African American Drama See African American Studies.
419-B60-0 Introduction to 20th-Century British Literature Principal writers and works since World War I.
419-B70-1,2 Introduction to American Literature Representative writers and works of American literature in cultural context, including history, art, and other extraliterary forms. 1. Puritans to Moby Dick. 2. Mid-19th century to 1900.
419-B74-0 Introduction to 20th-Century American Literature Principal writers and works since World War I.
419-B98-0 Introductory Seminar in Reading and Interpretation Practice in close reading and analysis of literature in relation to important critical issues and perspectives in literary study. Prerequisite: B10 (may be taken concurrently).

Courses Primarily for Juniors and Seniors
486-C01-0 The Art of Fiction See Writing Arts.
419-C02-0 History of the English Language The English language from the earliest times to today. Examples from Old English, Middle English, and Early Modern English literature.
486-C02-0 The Art of Poetry See Writing Arts.
486-C03-0 The Art of Expository Prose See Writing Arts.
419-C04-0 Practical Rhetoric The theory of writing and of skills that underlie good writing. Intended to meet the special problems of teachers in secondary schools and universities.
419-C05-0 Advanced Composition For students with previous formal training in composition; admission by consent of department.
419-C07-0 Advanced Creative Writing: Fiction For students with previous formal training in creative writing who are not writing majors; admission by consent of department.
419-C10-0 Studies in Literary Genres
Content varies: for example, satire, biography, comedy. May be repeated for credit with consent of department.

419-C11-0 Studies in Poetry
Such elements of poems as diction, imagery, rhythm, structure; how they work with the subject matter to determine the individual poem, and how they guide interpretation of the poem.

419-C12-0 Studies in Drama
Content varies: for example, Ibsen, Shaw, and Pirandello; women and modern drama. May be repeated for credit with consent of department.

419-C13-0 Studies in Fiction
Content varies: for example, the subversive hero in 20th-century literature, experiments in modern literature. May be repeated for credit with consent of department.

419-C20-0 Medieval English Literature
Representative works in their intellectual and cultural contexts.

419-C21-1,2 Old English 1. The Old English language and readings in prose and poetry. 2. Beowulf and other poetry. Prerequisite for C21-2: C21-1.

419-C23-1,2 Chaucer 1. The Canterbury Tales. 2. Troilus and Criseyde and other works.

419-C24-0 Studies in Medieval Literature
Content varies: for example, courtly romance, poems in manuscripts, Arthurian tradition, women in medieval culture.

419-C31-0 Renaissance Poetry
English poetry from the Elizabethan period to 1660, including such writers as Wyatt, Jonson, Donne, Herbert, and the Cavalier poets.

419-C32-0 Renaissance Drama
English plays of the Tudor, Elizabethan, and Jacobean periods, including such writers as Marlowe, Jonson, Beaumont and Fletcher, Webster, M. Iddleton, and Ford.

419-C33-0 Spenser
Spenser's major poetry, with emphasis on The Faerie Queene.

419-C34-1,2 Shakespeare 1. Principal plays up to 1600. 2. Principal plays after 1600.

419-C35-0 Milton
Milton's poetry, with those parts of his prose that illuminate his poetical and intellectual development.

419-C38-0 Studies in Renaissance Literature
Content varies: for example, Marvell, Herbert, and Vaughan.

419-C39-0 Special Topics in Shakespeare
Content varies: for example, late comedies and romances, illusion and the social order, Shakespeare in film.

419-C40-0 Restoration and 18th-Century Literature
Representative works in their intellectual and cultural contexts.

419-C41-0 Restoration and 18th-Century Poetry
Dryden, Pope, and other poets of the period 1660-1744.

419-C42-0 Restoration and 18th-Century Drama
English drama from 1660 to the end of the 18th century.

419-C43-0 18th-Century Prose
Johnson, Swift, Gibbon, Burke, Wollstonecraft, and other nonfiction prose writers.

404-C44-0 Black Presence in Faulkner
See African American Studies.

419-C44-0 18th-Century Fiction
Defoe, Richardson, Smollett, Fielding, Sterne, Burney, Radcliffe, and Austen.

419-C48-0 Studies in Restoration and 18th-Century Literature
Content varies: for example, biography and autobiography, literary careers, literature and social criticism.

404-C49-0 Black Families in Literature
See African American Studies.

419-C50-0 19th-Century British Literature
Representative works in their intellectual and cultural contexts.

419-C51-0 Romantic Poetry
Blake, Wordsworth, Coleridge, Byron, Shelley, and Keats.

419-C53-0 Studies in Romantic Literature
Content varies: for example, Blake, poet and painter; romanticism and revolution; Byron and the Byronic.

419-C56-0 Victorian Poetry
The principal British poets from Tennyson to Hopkins, with attention to cultural context and developments in form.

419-C57-0 19th-Century British Fiction
Important and representative novels written between 1800 and 1900.

419-C58-0 Dickens
Representative major works of Charles Dickens.

419-C59-0 Studies in Victorian Literature
Content varies: for example, Victorian autobiography, novels of the Brontë sisters, painting and Victorian literature.

419-C60-0 20th-Century British and American Literature
Representative works in their intellectual and cultural contexts.

419-C61-1,2,3 20th-Century Poetry
1. Major British poets such as Yeats, Eliot, Auden. 2. Major American poets from Frost and Robinson to Crane. 3. British and American poetry since World War II.

416-C62-1,2,3 Modern Drama
See Comparative Literary Studies.

419-C63-1,2 20th-Century Fiction
1. British writers such as Conrad, Ford, Forster, Greene, Huxley, Lawrence, Waugh, and Woolf. 2. American writers such as James, Hemingway, Fitzgerald, Faulkner, and West.

419-C65-0 Studies in Postcolonial Literature
Themes, antecedents, and contexts of selected literature produced in societies now emerging from colonial rule: for example, autobiography, initiation narratives, magical realism, Walcott, Rushdie.

419-C66-0 Studies in African American Literature
Content varies: for example, black women's fiction; the slave narrative in modern African American fiction;
the Harlem Renaissance, vernacular theories of African American literature.

419-C67-0 Postwar British Fiction Representative British novels since 1945, including such writers as Orwell, Greene, and Waugh.

419-C68-0 Studies in 20th-Century Literature Content varies: for example, boundaries of modernism (Kafka, Joyce, Nabokov), Forster, Cather.

419-C70-0 American Literature before 1914 Intellectual and cultural contexts of American literature from the Puritans to 1914. Such writers as Bradford, Edwards, Franklin, Emerson, Thoreau, Fuller, and Henry Adams.

419-C71-0 American Novel Writers such as Cooper, Alcott, Chopin, Hawthorne, M. Doyle, Poe, Twain, James, Howells, Crane, Dreiser, and Wharton.

419-C72-0 American Poetry Writers such as Bradford, Freneau, Bryant, Poe, Whitman, Dickinson, Robinson, and Frost.

419-C78-0 Studies in American Literature Content varies: for example, radicalism in American literature, Twain, cultural imagination of turn-of-the-century America.

416-C82-1,2,3 History of Literary Criticism See Comparative Literary Studies.

416-C83-0 Special Topics in Theory See Comparative Literary Studies.

419-C85-0 Topics in Combined Studies Special topics in literature and related disciplines. Content varies: for example, opera and literature, mythology and the arts.

419-C86-0 Studies in Literature and Film Content varies; comparison of representative films and literary works with emphasis on aesthetic principles and social and historical contexts they share.

419-C92-0 The Situation of Writing Literary and cultural contexts of writing; the competing claims of tradition and innovation; current literary ideologies; the relation of writer to audience and marketplace. Prerequisite: admission to writing major.

419-C93-FW, TS Theory and Practice of Poetry (1.5 units each) Sequence of two 15-week courses. 1. Theory of prosody, including the major form of poetry in English (accentual-syllabic verse) and minor forms (accentual, syllabic, and free verse). 2. Intensive writing practice culminating in the production of a long poem. Prerequisite: admission to sequence or writing major.

419-C94-FW, TS Theory and Practice of Fiction (1.5 units each) Sequence of two 15-week courses. 1. Tenets of fictional realism and its substitutes, with practice in different applications of plot, narrative technique, and point of view. 2. Culminates in the writing of a novella. Prerequisite: admission to sequence or writing major.

419-C95-0 Fundamentals of Prose The techniques of prose for writing majors. How syntax, diction, special vocabularies, and methods of argument and analysis contribute to tone and expression.

419-C98-1,2 Honors Seminar For seniors preparing an honors essay. Students pursue individual topics with careful guidance while meeting collectively to discuss common issues and present their works-in-progress. Admission by application. K grade given pending completion of essay.

419-C99-0 Independent Study Reading, writing, and conferences on special subjects for senior majors with excellent records. May be elected three quarters but only one unit at a time. Prerequisite: consent of instructor or director of writing major.

Environmental Sciences Program
A major challenge facing our species is to learn to understand and coexist with the natural environment. The environmental sciences major is designed to provide students with an understanding of the physical environment and the relations of humans to it. Environmental science necessarily differs from the more traditional divisions of scientific inquiry. The intellectual approach is that of synthesis, where the focus is concentrated on the integration of knowledge rather than on further refinement of knowledge within a particular scientific field. Also, the concern for translating theory into practice requires a strong association with engineering. With this approach, environmental sciences provides a mechanism for motivated students to work in a multidisciplinary framework with a common theme.

The major gives students the expertise to address issues of environmental concern from a scientific basis, such as energy options, environmental law, the relation of society and resources, and health problems of air and water pollution. It provides a background for employment in environmentally oriented firms or for graduate study in any of several different environmental science disciplines as well as an exceptional preprofessional experience for students interested in law or business.

Major in Environmental Sciences
The major is rigorous but reasonably flexible. It requires a basic grounding in the sciences and mathematics, a core curriculum that introduces students to environmental problems, courses that consider society’s impact on the environment, and a series of advanced courses tailored to each student’s interest. This is capped by a senior seminar where students conduct environmental research and present their results.

For a double major and to determine the grade point average in the environmental sciences major, the
Foundations in Science and Mathematics courses are not considered major courses but rather courses related to the major.

Program Courses
Foundations in Science and Mathematics: Basic science and mathematics courses are necessary to understand the environmental sciences; all the courses in chemistry, mathematics, physics, and biological sciences listed under related courses below are required for the major.

Core Curriculum: Physical systems of the environment are emphasized in the core courses; any three of the following are required for the major:

- Biological Sciences A91 Evolution
- Biological Sciences B04 Environmental Biology
- Chemistry B04 Environmental Chemistry
- Environmental Sciences B35 Atmosphere and Climate
- Geological Sciences B01 The Skin of the Earth
- Geological Sciences B04 Environmental Geology
- Political Science B04 Politics and Nature

Environment and Society: Society’s place in and interaction with the environment is treated in social science courses; any two of the following are required for the major:

- Anthropology C83 Ecological Anthropology
- Economics C70 Environmental and Natural Resource Economics
- Geography C28 The Human Use of the Earth
- Political Science C71 Environmental Politics
- Sociology C12 Social Basis of Environmental Change

Advanced Studies: The following courses focus on developing skills for detailed understanding of specific environmental issues described in the core curriculum and preparing students for research; any four courses with no more than two from one department are required for the major; Environmental Sciences C98-1,2 is required of all majors.

- Biological Sciences C20 Behavioral Ecology Seminar
- Chemistry C29 Analytical Chemistry with Laboratory
- Chemistry C42-1 Thermochemistry
- Geography C43 Geographic Information Systems
- Geological Sciences C01 Environmental Biogeochemistry
- Geological Sciences C12 The Earth’s Changing Climate
- Geological Sciences C17 Paleobiology
- Geological Sciences C18 Stable Isotope Geochemistry
- Civil Engineering C58 Airphoto Interpretation
- Civil Engineering C59 Hazardous Waste Management
- Civil Engineering C60 Environmental Impact Evaluation
- Civil Engineering C61 Public Health Engineering
- Civil Engineering C63 Community Air Pollution
- Civil Engineering C66 Ecosystems and Ecotoxicology
- Civil Engineering C67 Aquatic Chemistry

Senior Seminar:

- Environmental Sciences C98-1,2 Environmental Research Seminar (required of all majors)

Related Courses
The following foundations in science and mathematics are required for the major:

- Biological Sciences A70 Concepts of Biology or A90 Characteristics of Living Organisms or B10-1 Genetics and Evolutionary Biology
- Chemistry A01 General Chemistry
- Chemistry A02 General Inorganic Chemistry
- Chemistry A03 General Physical Chemistry
- Chemistry B10-1 Organic Chemistry
- Mathematics B14-1,2,3 Calculus
- Physics A35-1,2 General Physics or A30-1,2 College Physics

Integrated Science Program
The Integrated Science Program is a highly selective BA program in CAS (see Integrated Science Program). Students majoring in ISP who wish to complete a second major in environmental sciences should fulfill the following requirements instead of those listed above. They may not substitute ISP C98 or Environmental Sciences C98 for the ISP-required course Mathematics C91-2 and must take the following additional courses:

- Geological Sciences C01
- Biological Sciences A91 or Environmental Sciences B37
- Two of the following courses: Environmental Sciences B35, B36; Geography B11; Geological Sciences B04
- Two courses listed under Environment and Society above
- Two courses, not in the same department, from those listed under Advanced Studies above, except Chemistry C42-1
- Students may take the two quarters of Environmental Sciences C98 instead of ISP C98

Advising and Course Selection
As soon as students have declared a major in environmental sciences, they should consult with the environmental sciences adviser to plan their programs. They should try to complete the foundations in science and mathematics courses by the end of their sophomore year.

Premedical students and students interested in advanced study in environmental biology are advised to take the B-level sequence in biological sciences and one or two additional quarters of organic chemistry.

Core Courses

422-B35-0 Atmosphere and Climate Nature and composition of the atmosphere, principles of atmospheric motion; frontogenesis; precipitation processes; global patterns of climate and climatic change. Prerequisite: Mathematics B14-3 or equivalent.

422-B37-0 Ecology and Environment Principles of ecology with an emphasis on environmental factors and problems. Growth and regulation of populations. Community
ecology, extinction, habitat fragmentation. Population genetics in an ecological context. Prerequisites: Biological Sciences B10-1; Chemistry A03; Mathematics B14-3. Two Saturday field trips required.

Other Courses
422-C90-0 Internship in Environmental Sciences (1–2 credits) Participation in off-campus research activities of public and private environmental organizations under the supervision of faculty. Prerequisite: junior or senior standing and consent of program director.
422-C98-1,2 Environmental Research Seminar Independent research directed by environmental sciences faculty. Research design and scientific communication. Prerequisite: senior standing. Open only to majors.

European Thought and Culture
The series of courses Patterns of European Thought and Culture is a joint enterprise of faculty in classics, the modern language and literature departments, art history, history, music, philosophy, and religion. Through a study of the forms and values of particular ages in their historical context, the courses aim at tracing patterns of social and cultural representation that are shared by different European societies and give to the different eras of European history their temporal boundaries. The courses are frequently team-taught by faculty from different disciplines. The courses meet various distribution requirements in the areas of historical studies, values, and literature and fine arts, but any combination of six may be used to meet all the requirements in those three areas.

Courses
414-B10-0 Early Western Civilization See Classics.
414-B11-0 Classical Greece See Classics.
414-B12-0 Roman Civilization See Classics.
430-B13-0 The Middle Ages Introduction to the distinctive institutional, political and spiritual horizons, and aesthetic expressions of medieval culture, with special emphasis on the 12th and 13th centuries.
430-B14-0 The Renaissance Introduction to some themes associated with the Renaissance, principally humanism, the invention of printing, the discovery of the Americas, the Copernican revolution, the Reform and Counter-Reformation, and more generally, radically new ways of conceiving the self and its relation to social orders.
430-B15-0 The Birth of Modernity (1550-1720) Introduction to the social, political, and intellectual history of Europe from 1580 to 1720, with special emphasis on the change from medieval monarchy to the modern nation state and on the origins of modern philosophy and natural science.
430-B16-0 The Age of Enlightenment Introduction to European scientific and philosophical thought in the 18th century, with special emphasis on natural philosophy and evolving concepts of gender and race.
430-B17-0 The Romantic Period Introduction to the romantic movement and the radical shift it introduced to traditional concepts of the self, with special emphasis on philosophy, lyric poetry, and music as dominant cultural forms of this period.
430-B18-0 Modern Culture: The 19th Century Survey of 19th-century culture with special emphasis on the political and social consequences of the French Revolution, the industrial revolution, and the emergence of the novel as the most characteristic form of artistic expression.
430-B19-0 Modern Culture: The 20th Century Survey of the relationship between history, thought, literature, and the fine arts in the 20th century, with special emphasis on the massive revaluation of traditional norms in modernism, the political implications of philosophic movements (Nietzsche, existentialism), and the impact of mass phenomena (wars, revolution, urban life) on modern experience.

French and Italian
Studies in French or Italian provide insight into the language, thought, and character of cultures different from our own. Such knowledge builds an awareness of our own society’s diversity and the ways it resembles and differs from others. As the merging of domestic and international events increasingly affects the material and intellectual life of every individual, the ability to communicate with other peoples assumes vital importance. Whether a student is planning a career in teaching, government, science, the professions, or business, the study of a foreign language, literature, and culture is a wise option in a university education.

Programs in the department are varied. Language courses, from the elementary through the graduate levels, develop communication skills that allow students to function at ease with foreign texts or in a foreign environment. Courses in literature and civilization not only broaden and deepen insights into the thought and writing of another culture; they also train students to think independently, to organize and analyze materials thoughtfully, and to discuss ideas effectively.

There is a minor in French, a major in French studies, a minor and a major in Italian, and MA and PhD programs in both languages. These may be supplemented by foreign study, which allows students to increase their knowledge of a foreign language and society while continuing university work abroad in a variety of fields. It is not necessary to be a major to participate in these programs. An excellent library, modern audiovisual resources, and a learned faculty (of which nearly one-half are native speakers) further strengthen studies in French and Italian.
French

Major in French
The program for majors in French studies consists of 17 quarter-courses; at least 12 must be at the C level. Courses at the A level do not count toward the major. Students may count up to five B-level courses toward the major. Of the 17 courses, up to two may be French department courses taught in English. At least two of the C-level courses must be on literature and culture before 1800. All majors must take 2 units of senior seminar, C96 and C97.

Students returning from a study abroad program in France will receive up to eight credits if the content of the courses taken abroad relates in a substantive way to some aspect of French or Francophone culture. All returning students must take 2 units of senior seminar.

Minor in French
The goal of the minor in French is to give students a solid grounding and good fluency in the French language and to provide a basic familiarity with important aspects of French culture and society. Together these accomplishments will enable students to pursue their interests in French and in countries where French is used.

The minor is designed for students who have a strong interest in French but cannot fulfill the requirements of the French major, either because their knowledge of French was nonexistent or elementary when they came to Northwestern or because they are also engaged in another major with requirements that preclude pursuing a second major. Except for one possible course at the C level, all courses are conducted in French, with class discussion and papers also in French.

Students choosing to minor in French are assumed to have completed either A21 or A23 or the equivalent.

Minor course requirements (9 units)
• Four B-level courses: two chosen from B01, B02, B03, B04; two chosen from B10, B71, B72, B80, B82
• Five C-level courses: two or three chosen from C02-1,2, C03, C05, C09, C91-1,2; two or three other courses in literature or civilization, one of which may be a French department course taught in English. C90 may be counted either as a language course or as literature or civilization course.

Students returning from a study abroad program must enroll in at least one C-level course in the department.

Four-Year BA/MA
The department offers a four-year BA/MA program in French for outstanding undergraduate majors. Interested students should consult with the department chair and should refer to Four-Year Master's Programs in the Undergraduate Education section of this catalog.

Honors in French
Students who have a grade point average of 3.4 or higher in the major and are interested in writing an honors thesis should declare their intention of doing honors work no later than the spring quarter of their junior year. They also should consult with the director of undergraduate studies. The honors project is produced through one or two quarters of C99. It can build on previous work done in a C-level course or, with consent of the instructor, in a graduate seminar. These courses will count toward the 17 required credits for the major. See Honors under Academic Policies earlier in this section of the catalog.

The Teaching of French
CAS students pursuing a major in French who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Courses Primarily for Undergraduates
455-A11-1,2,3 First-Year French Conversation, grammar, reading, writing for beginners. Five class meetings a week.
455-A15-1,2 Accelerated First-Year French For students with some previous experience in French. Review and development of skills in speaking, understanding, and reading as preparation for work at the second-year level. Four class meetings a week. Prerequisite: department placement.
455-A21-1,2,3 Second-Year French Grammar review, conversation, reading, writing. Four class meetings a week. Prerequisite: A11 or A15.
455-A23-0 Second-Year French Individualized Instruction Intermediate French in a format allowing students a choice of skill concentrations and learning paces. Credit possible for up to three quarters. Prerequisite: department placement.
455-A27-1,2,3 Second-Year French for Reading Designed to develop skill in reading prose, drama, and poetry texts through discussion and translation. Grammar review. Preserves previously acquired oral skills. Prerequisite: A11, A15, or department placement.
455-B01-0 Introduction to French Studies Development of fluency, accuracy, and creativity in speaking, comprehension, reading, and writing French; introduction to social, cultural, and literary topics. May not be repeated for credit.
455-B02-0 Writing Workshop Practical study of French grammar and structure; students develop and improve writing skills through practice in preparing short compositions. Prerequisite: CAS proficiency in French or equivalent.
455-B03-0 Oral Workshop Practical course to increase listening comprehension, build vocabulary and idiom use, and enhance communication skills. Three hours per week.

455-B04-0 Advanced Intermediate Conversation Increases listening comprehension, builds vocabulary, and enhances communication skills through extensive use of French television broadcasts and class presentations. Prerequisite: B02 and B03 or consent of instructor.

455-B10-0 Introduction to French Literature Study of texts illustrating various genres from the 16th century to the present such as poetry, drama, fairy tale, novel, autobiography. Prerequisite: department placement, AP score of 5, or B02.

455-B71-0 Introduction to the French Novel Fundamental concepts and significant achievements of the French novel. Representative novels chosen from writers of the 17th to the 20th centuries. In French. Prerequisites: B02 and B03 or consent of instructor.

455-B72-0 Introduction to French Theater Basic concepts and representative works of the French theater with emphasis on the 17th and 20th centuries. Principles of tragedy and comedy; contemporary developments. In French. Prerequisites: B02 and B03 or consent of instructor.

455-B80-0 French Cultural Studies: Historical France Major cultural and intellectual problems of France from a historical perspective, such as France in the 19th century, history of gender, rise of the bourgeoisie. Prerequisites: B02 and B03 or consent of instructor.

455-B82-0 French Cultural Studies: Contemporary France Major cultural and intellectual problems of contemporary France, such as the Occupation, the Algerian War, racism and immigration, ethnicity and social relations, role of the intellectual, role of France in a unified Europe. Prerequisites: B02 and B03 or consent of instructor.

Courses with Reading and Discussion in English No prerequisite in French; readings, discussions, papers, and exams in English.

455-B76-0 Culture and Autobiography Autobiography as a literary genre examining culture, race, and gender identity from a subjective perspective.

455-B77-0 The Literature of Existentialism Existentialism in its literary, philosophical, and cultural manifestations.

455-B78-0 From Novel to Film Conceptual, aesthetic, and cultural dimensions of selected 19th- and 20th-century French novels and their screen adaptations.

455-C72-0 Medieval Movies Films representing medieval and Renaissance culture; films that a medieval viewer would have understood.

455-C74-0 French Feminist Fiction Feminist poetry, prose, and experimental texts.

455-C76-0 Feminist Theory Introduction to fundamental theoretical texts and basic tenets of contemporary feminist theory.

455-C78-0 Contemporary Theory Introduction to some major trends in contemporary French theory and the way they have influenced literary studies in the U.S.

Courses with Prerequisites in French Students taking these courses are assumed to have completed at least three B-level courses in French, including B10, unless otherwise stated.

455-C02-1,2 Advanced Grammar and Composition Grammar, vocabulary, and discourse features related to a particular linguistic function (such as narrating, describing, persuading) and writing practice to synthesize these elements. Prerequisite for C02-1: B02 or consent of instructor. Prerequisite for C02-2: C02-1.

455-C03-0 Advanced Conversation Free oral practice based on short readings and spontaneous scenarios. No formal grammar or composition. Language laboratory required. Prerequisite: C02 or consent of instructor.

455-C05-0 French Phonetics Study of syllabic division, intonation, rhythm, accent, linking, vowels, consonants. Practical exercises to improve pronunciation.

455-C09-0 French in Commerce and Industry Introduction to fundamentals of the French business world in historic, economic, social, and political context. Acquisition of language skills for communication in commerce and business. Prerequisite: C02-1 or consent of instructor.

455-C10-0 Medieval French Songs Songs of the troubadours; songs of courtly love, social and political songs, women's songs. Study of musical setting and performance. No musical training required.

455-C12-0 Medieval Heroic Narratives Epics such as the Song of Roland, romances such as The Story of the Grail. Texts read in modern French versions.

455-C20-0 On the Threshold of Modernity: Rabelais and Montaigne Transition from the Middle Ages to modernity in two major 16th-century artists: Rabelais and optimistic faith in human potential, Montaigne and profound skepticism. In-depth reading of works that speak to the modern condition.

455-C30-0 Classical Theater and Society Major dramatic writers of the 17th century, including Corneille, Molière, and Racine, and the social and historical context in which their plays were written and performed.

455-C35-0 The Literature and Thought of the 17th Century Major works of poetry, prose, and drama of the 17th century in historical and social context; content varies and may include Descartes, Pascal, Corneille, Racine, Molière, La Fontaine, La Fayette, and others.
455-C40-0 Sexual Politics in the Ancien Régime
Literary, intellectual, and political role of women in view of the debates generated by the issues of women’s power in the public sphere before and during the French Revolution.

455-C45-0 La Philosophie des Lumières
Enlightenment thought in philosophical and literary works by Montesquieu, Voltaire, Diderot, and Rousseau, emphasizing political thought, materialism, ethics, and aesthetics.

455-C50-0 The Rhetoric of Romanticism and of Realism
Representations of 19th-century France, primarily through literary texts; historical and cultural contexts of French romanticism and realism.

455-C55-0 The Invention of Modernity
Study of the origins of modernity in the 19th century, addressing such issues as the rise of mass culture, urbanization, and the beginnings of consumer society.

455-C60-0 From Modernism to Postmodernism: Experiments in Narrative Form
Crisis and reinvencions of French prose from the modernist moment of the early 20th century through the ambiguities of “engaged” literature of the 1930s to postmodernism.

455-C62-0 The French Avant-Garde
Literary and cultural experiments of the various French avant-garde movements, from dada and surrealism to the theater of the absurd and new wave cinema.

455-C66-0 Francophone Literature of Africa and the Caribbean
Literary traditions of north and sub-Saharan Africa, the Caribbean, and the Indian Ocean. Historical and cultural contexts of literary production; role of oral traditions in the emergence of intellectual and literary movements.

455-C80-0 Political and Social Thought in France
An inquiry into the major French political and social trends from the ancien régime to the 20th century. The intellectual and cultural framework for study of French political life.

455-C82-0 Literature and Exoticism
Various modalities of the rhetoric of exoticism throughout the history of French literature and in popular culture.

455-C84-0 Women Writing in French
Female-authored texts analyzed in relation to their respective social, cultural, political, and historical contexts.

455-C90-0 Topics in Culture
Study of various topics, issues, and questions in French and francophone culture. Content varies; for example, French and francophone cinema, the intellectual in France. May be repeated for credit with different topic. May have language prerequisite.

455-C91-1 Theory and Practice of Translation
Intensive, advanced, two-quarter course integrates previously acquired skills through the comparative study and translation of English and French. Culminates in individual translation project in second half of second quarter.

455-C96-0 Contemporary French Thought
An examination of different perspectives and paradigms for understanding literature and culture.

455-C97-0 Studies in Literature and Culture
In-depth research and analysis of a problem or topic concerning cultural representation.

455-C99-0 Independent Study
Independent reading and research. Topics arranged through consultation with an instructor and approval of the department.

Italian

Major in Italian
Courses indicated as a prerequisite for an advanced course may not be taken for credit after the advanced course is completed.

Departmental courses

Introductory courses: B01, B02, B03

Major courses: at least two courses chosen from C01, C02, C03; five credits of other C-level Italian literature and culture courses, one of which must be on Dante; one course on literary theory as approved by the director of undergraduate studies, possibly Comparative Literary Studies B02, English B06, B07, C80, or C92. No more than one credit of C99 except with departmental honors. Of the seven required C-level courses, up to four may be approved study abroad courses; no more than two may be courses given in English.

Related courses: Students choose one of the three following options:

- Language: 5 units in French, German, Greek, Hebrew, Latin, Russian, or Spanish, including at least 2 units at the B level
- Literature: 5 units of B- and C-level work in literature other than Italian, including literature in translation; at least 2 units must be at the C level
- Culture: 5 units in courses pertinent to Italy in art history, classics, European thought and culture, history, linguistics, music, philosophy, or political science; the choice of related courses in culture must be approved by the major adviser (with departmental approval, students may take as many related courses abroad as they wish)

Minor in Italian

The minor in Italian is designed to give students a solid proficiency in the language and significant knowledge of the literature and culture of Italy that will complement a variety of major studies in the University.

Students choosing to minor in Italian are assumed to have completed A02-3 or equivalent.
Courses with Prerequisite in Italian
Prerequisite: B01, B02, B03, or equivalent.

457-C01-0 Advanced Writing Workshop

457-C02-0 Literary Traditions and National Identity
Selective survey of the Italian literary tradition, 1300 to the present. Theme of national identity, techniques of textual analysis.

457-C03-0 Modern Italian Cultural Studies
Culture of Italy from World War II to the present. Novels, films, popular culture. Content varies; may be repeated for credit with different topic. Sometimes given in English; consult department for details.

457-C10-1,2,3 Studies in Dante
Interpretations of the Divina Commedia, the Vita Nuova, and selections from other works.

457-C20-0 Topics in Renaissance Literature
Content varies: for example, epic poems of Ariosto and Tasso, drama, Machiavelli and Italian humanism.

457-C50-0 Topics in 19th-Century Literature
Content varies: for example, romantic prose and poetry, Verga and Italian realism.

457-C60-0 Topics in 20th-Century Literature
Content varies: for example, prose fiction of Pavese, Svevo, Moravia; theater of Pirandello, D’Annunzio, Betti; poetry of Ungaretti, Quasimodo, Montale.

457-C99-0 Independent Study
Independent reading under supervision (consult department chair).

Geography Program
The Program in Geography offers three types of courses to students who seek a knowledge of the physical earth and its various modes of human occupancy. Introductory courses develop global perspectives on environments that are relevant to many social and physical science fields. Courses in regional geography present a unique way of understanding how nature and culture have interacted over time to give character to specific places or regions. Advanced courses focus on the concepts and techniques of professional geography, especially on the construction of maps and on the uses of maps in solving geographical problems.

Programs of study may lead to a major or a minor in geography. In addition to the following requirements, students majoring in geography also must complete a major in a related social or natural science field.

Major in Geography
Program courses: Geography B10 or Environmental Sciences B35; Geography C41; and four additional geography courses, at least three of which must be at the C level, including 1 unit of research (C98 or C99)
Related courses: Mathematics B14-1,2; Economics B01, B02; Statistics B10 or equivalent.

Minor in Geography
The minor in geography supplements the academic programs of students who major in related social and natural sciences by training them in the theory and method of geographical analysis. In addition to the courses listed below, students choosing to minor in geography must complete Mathematics B14-1,2 or equivalent.

Minor course requirements (7 units)
- Statistics B10
- Geography B10 or Environmental Sciences B35
- Geography C41
- Four additional courses, at least three at the C level; one may be taken in a department or program other than geography on the recommendation of the geography program adviser

Introductory Courses
421-B10-0 The Natural Environment Introduction to the physical elements of geography. Major local and global atmospheric processes producing weather and climate. Study of the earth-shaping forces that give rise to the geography of landform features.

421-B11-0 World Biogeography Geography of the world's major ecosystems based on the global climate model. Physical processes of soil formation and vegetation development in various ecosystems. Human impacts on natural systems resulting from past and present land-use practices.

Regional Geography
421-C13-0 North America Detailed study of the regional geography of the United States and Canada. The regional distribution of landform types. Patterns of culture, history, and economic development that underlie the distribution of distinctive lifeways in the two countries.

Advanced Courses
421-C28-0 The Human Use of the Earth Geography of the earth's natural environments as modified by human agency. Natural versus anthropogenic environmental change. Processes of habitat alteration in hunter-gatherer societies. Impacts of modern agriculture and forestry.

421-C42-0 Map Production Techniques Advanced techniques for constructing publication-quality maps. Compilation from multiple sources, scribing, and negative construction. Photographic methods, peel coats. Prerequisite: C41.

421-C43-0 Geographic Information Systems Methods and techniques of digital cartography; encoding and analysis of spatial information; applications to archaeology, environmental sciences, and business geographics. Prerequisite: C41.

421-C98-0 Undergraduate Seminar Advanced work through readings, research, and discussion. Open only to undergraduate majors. Prerequisite: consent of department.

421-C99-0 Independent Study Independent research projects. Open to qualified advanced students by consent of department.

Geological Sciences
The geological sciences use diverse and interdisciplinary approaches to the study of complex physical, chemical, and biological processes occurring on and within the earth. The undergraduate program combines fundamental background in mathematics, physics, and chemistry with courses applying these techniques to geological problems. Undergraduates are encouraged to select individual programs reflecting their scientific interests and career goals, whether graduate study in the earth sciences, professional employment, or advanced study in areas such as management or law.

Undergraduates are involved in the full spectrum of departmental activities beyond class work: research, seminars, field trips, and social functions. The resulting educational environment offers unusual opportunities for motivated and interested students.

Major in Geological Sciences
Departmental courses: B01, B02, and four C-level courses.

Related courses
- Chemistry A01, A02, A03; or A71, A72
- Mathematics B14-1,2,3, B15, B17, B21
- Physics A35-1,2,3 or A90-1,2,3

Mathematics, chemistry, and physics are prerequisites for B- and C-level courses and should be taken at the earliest opportunity.

Minor in Geological Sciences
The minor in geological sciences offers students in any major a flexible path to improved knowledge of Earth, its processes and, more generally, Earth system science. Students select paths with advice from faculty that emphasize such fields as physical geology, geochemistry, geophysics, or a combination of these.

Minor course requirements (6 units)
- B01, B02
- Four other geological sciences courses at the B or C level; three of the four must be at the C level. C98 and C99 will not be credited toward the minor.
Note: Most B- and C-level courses in geological sciences have prerequisites in other disciplines and/or in geological sciences. Students should consult the course descriptions in this catalog for details.

Honors in Geological Sciences
Graduation with honors in geological sciences requires completion of a research project. For more information, consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

Four-Year BA/MS
Students with a professional interest in the earth sciences and a grade point average of 3.5 or above may be eligible for the four-year BA/MS honors program offered by the Department of Geologcal Sciences. The department only recommends students for this program; final approval is made by the Graduate School. Students may apply for this program in the spring quarter of their junior year; by the end of that year, applicants should complete all courses required for the major in geological sciences and all (or nearly all) the CAS BA requirements. See Four-Year Master’s Programs in the Undergraduate Education section of this catalog and consult with a department adviser.

To fulfill the MS requirements, students must complete
• 12 courses approved by the student's advisory committee and bearing graduate credit in science or engineering (Mathematics B21, Chemistry C42-1, and the four C-level courses taken for the BA may be counted)
• a final independent research report (not necessarily a formal thesis)

Integrated Science Program
The Integrated Science Program (ISP) is a highly selective BA program within CAS. Students majoring in ISP who wish also to complete a major in geological sciences must take B01 and three C-level courses in addition to C15. These requirements replace the usual major requirements noted above.

Courses Primarily for Freshmen and Sophomores
423-A01-0 Earth Processes and Products Minerals, rocks, and structures of the earth’s crust, changes wrought through geologic time. Lectures, laboratory; weekend field trip.
423-A06-0 The Ocean, the Atmosphere, and Our Climate Physical, chemical, and geological oceanography; emphasis on interactions with the atmosphere and the role of the world ocean in the earth’s climate. Lectures and discussion.
423-A07-0 Plate Tectonics Drift of continents and spreading of sea floor; pattern of motions; relation to earthquakes, volcanism, mountains, and the earth’s interior. Lectures and discussion.

423-A10-0 The Earth As a Planet Origin of the solar system, accretion and differentiation of the earth, early history of the moon, abundance of elements, geologic time. Lectures and discussion.

423-A11-0 Global Environmental Change Natural and human causes of change and environmental changes on land, in waters, and in the atmosphere. The earth system on long and short timescales. Lectures and discussion.

423-B01-0 The Skin of the Earth Weathering, sedimentation, glaciation, mountain building, deiformational features, metamorphism, volcanism, and historical geology. Field trip. Prerequisite: Chemistry A03, Mathematics B14-1, or equivalent.

423-B02-0 The Body of the Earth The earth as a planet: origin, composition, and evolution of the solar system and the earth; internal structure of the earth; plate tectonics. Prerequisite: Mathematics B14-2, Physics A35-1, Chemistry A03, or equivalent.

423-B03-0 Minerals, Natural Solids, and Rocks Rock-forming minerals, natural solids, crystal structure, and their formation. Main rock-forming processes, mineral assemblages, and conditions for formation of crust and mantle. Prerequisite: Chemistry A02 or A71, Physics A35-1, or equivalent.

423-B04-0 Environmental Geology Hazardous earth processes, human interaction with the environment, problems of resource availability and use. Laboratory and one-day field trip. Prerequisites: Mathematics B14-2, Chemistry A03.

423-B88-0 Earth in Science and Art Major ideas and discoveries behind our understanding of the earth and its environment. Similarities and differences between the views of the earth in science and pictorial art. Prerequisite: one college-level course in physics, chemistry, or geological sciences, or consent of instructor.

Courses Primarily for Juniors and Seniors
423-C01-0 Environmental Biogeochemistry Surficial processes and their geological and biological driving forces (atmosphere-land-water interactions, weathering, geochemical transport, sedimentation). Biogeochemical cycles and their role in the global environment. Prerequisites: B01, B02, or B04.

423-C03-0 Hydrogeology Transport and storage of water on the earth. Hydrostatics, hydrodynamics, flow models, infiltration, permeability, erosion, sediment transport, sediment dewatering, climate and sea-level changes, resource limitations, and pollution. Prerequisites: B01, Mathematics B15, Physics A35-1,2,3, or consent of instructor.

423-C04-0 Coastal Processes Competition between motions of water, beach, sediments, and crust. Waves,
currents, tides. Sediment transport, beach evolution, cliff erosion, sea-level change, coastline and landform development. Processes in Lake Michigan. Prerequisites: B01, Mathematics B15, Physics A35-1,2,3, or consent of instructor.

423-C07-0 Tectonics and Structural Geology Deformation of rock masses: strain, fracture, slip, stress, and rheologic regimes; rock structures; folds, faults, foliations; seismic parameters in tectonic studies; orogenic belts and their tectonic evolution. Lectures and lab. Prerequisites: B01, Mathematics B17, Physics A35-1, or equivalent.

423-C09-0 Reflection Seismology Acquisition, processing, and interpretation of reflection seismograms. Hydrocarbon prospecting, structural geology, tectonics, stratigraphy, and deep continental reflection profiling. Prerequisites: Mathematics B14-3, Physics A35-1, or consent of instructor.

423-C12-0 The Earth's Changing Climate The physics of climate and climate change; methods of study of past climates of the earth. The climate from the Cretaceous to the present.

423-C13-0 Sedimentary Geology Sedimentary rocks; stratigraphy; local, regional and global correlation. Ancient depositional systems; facies analysis in context of tectonic, eustatic, and climatic controls on deposition. Prerequisite: B01 or equivalent.

423-C15-0 Physics of the Earth for ISP Solid earth geophysics: the earth's gravity field, the earth's magnetic field, interior of the earth, heat flow, elementary wave propagation, plate tectonics. Prerequisite: second-year standing in ISP or comparable background in mathematics and physics.

423-C16-0 Sedimentary Geochemistry Formation and diagenesis of carbonate, geochemistry of organic matter, petroleum formation, evaporite precipitation, paleoenvironmental reconstruction, isotope, organic, and trace and major element geochemistry. Prerequisites: B01, C13, Chemistry A03, or equivalent.

423-C17-0 Paleobiology Major fossil groups; origin and evolution of life; speciation and mass extinction; evolution of communities and ecosystems. Application of paleobiologic methods to paleoenvironmental reconstruction. Prerequisites: A01, A06, or A11; Biological Sciences A03 or B10-1; or consent of instructor.

423-C18-0 Stable Isotope Geochemistry Fractionation and distribution of stable isotopes (C,H,N,O,S) in the biosphere, hydrosphere, atmosphere, and geosphere; isotopic biogeochemistry, environmental problems and global climate change. Prerequisites: B01 or B04, C01, C16.

423-C19-0 Field Problems in Sedimentary Geology Field methods in stratigraphy and sedimentology; interpretation of depositional systems and development of facies models based on field observations. Continuation of C13; 2½-week field trip to Colorado and Utah in early to mid-September, returning in time for beginning of fall classes. Prerequisite: C13.

423-C24-0 Seismology and Earth Structure Elastic theory, seismic waves, seismometers and seismograms, ray paths, travel times; internal structure of the earth; earthquakes: location, characteristics, mechanism, and relation to plate motions. Prerequisites: Mathematics B21, Physics A35-2.

423-C27-0 Chemical Processes in the Earth's Crust Fundamental principles of multiphase equilibria and solution chemistry; fluid-rock interactions in the earth's crust; hydrothermal ore deposits, geothermal systems, metamorphism. Prerequisites: B01 and Chemistry A03 or A72.

423-C29-0 Tectonophysics Quantitative kinematics of distributed deformation within plate boundary zones; gravity field and geoid; principle of isostasy; flexure of the crust and lithosphere. Prerequisites: Mathematics B21 and Physics A35-2 or consent of instructor.

423-C50-0 Physics and Thermochemistry of the Earth's Interior Finite strain theory, solid solution thermodynamics, phase transitions, subduction zone processes, seismic velocity structures, mineral equations of state. Prerequisites: Chemistry A03, Physics A35-1, Mathematics B14-3.

423-C98-0 Undergraduate Seminar Opportunity for advanced work through supervised reading, research, and discussion. Open only by invitation of the department.

423-C99-0 Independent Study Special problems under direct supervision of one or more members of staff. Comprehensive report and examination required. Open with consent of department to juniors and seniors who have completed a field of concentration in the department.

German
The Department of German offers courses in three separate tracks, giving students a choice in satisfying their educational needs or interests. Courses are designed to:
• offer students who select German to fulfill the college language requirement and those who wish to acquire a basic knowledge of the language an opportunity to read modern German prose and to express themselves in German.
• educate majors in German language and literature or German studies, German minors, and prospective teachers in all aspects of German language, literature, and culture with an emphasis on the “modern” period (from the 18th century to the present)
• provide a basis for the understanding of the intellectual and cultural life of Germany for students who are not proficient in German

Majors in German
Courses indicated as a prerequisite for an advanced course may not be taken for credit after the advanced course. Students returning from a study abroad program in their junior year must enroll in three C-level quarter-courses in the department.

German Language and Literature

Departmental courses
• Four quarter-courses in the German language, two at the B and two at the C level, chosen from B05, B08, C91
• Three quarters of B01-1,2,3,4 or B04 and two quarters of B01-1,2,3,4
• Three quarters of C10-1,2,3,4
• Three quarters of C29 and/or C32

Note: Students may substitute a C-level criticism course for one C-level literature and culture requirement.
Related courses: Students choose one of the following options with the consent of the director of undergraduate studies
• Five quarter-courses, at least two at the C level, in the humanities or social sciences in topics pertinent to German or to the study of language and literature in general
• Five quarter-courses in another foreign language, including at least three at the B level or higher

German Studies
This program offers students the opportunity to study German life and culture in the broadest sense, including language, geography, institutions, politics, economics, social and intellectual history, literature, and music. Since the program was designed to prepare the German studies student for a career in government service or for graduate study in international economics, management, trade, or law, a secondary concentration in economics, political science, history, or a combination thereof is highly recommended.

Students pursuing a second major in addition to German studies must select a concentration in an area distinct from that second major; for example, a double major in German studies and economics must select a German studies concentration in a field other than economics. Courses required for either major may be counted in one major only.

Departmental courses
• Four quarter-courses in the German language: C80, C91, and two courses chosen from B05, B08, and B80
• Two quarters of B01-1,2,3,4 or B04 and one quarter of B01-1,2,3,4
• Three quarters of C10-1,2,3,4
• Two quarters of C32

Related courses
• Two quarter-courses chosen, with consent of the director of undergraduate studies, from German B33-2, B50, History C44-1, C44-2, C49

Secondary concentration: five quarter-courses pertinent to German, at least two at the C level; must be approved by director of undergraduate studies

Minor in German
The minor in German is designed to give students a solid language proficiency at the upper level and to provide significant knowledge of German culture. Students returning from a study abroad program in their junior year must enroll in one C-level quarter-course in the department.

For more information, consult the department’s director of undergraduate studies.

Minor course requirements (8 units)
• Four quarter-courses in German language: B05; one course chosen from B03, B08, B80; two quarters of C80 and/or C91
• Four quarter-courses in German literature and culture: two quarters of B01-1,2,3,4 or B04 and one quarter of B01-1,2,3,4; two quarters chosen from C10-1,2,3,4 and C32

Honors in German
Superior students majoring in German language and literature or German studies may qualify for departmental honors by completing (a) two quarters of C98 or C99, (b) two quarters of D-level courses, or (c) one quarter of C98 or C99 and one quarter of a D-level course. In addition, they must present a research paper at the end of their second quarter of honors study. Interested students should consult with the department’s director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

The Teaching of German
CAS students pursuing a major in German who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog.

Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.
Language Courses

425-A01-1,2,3 Elementary German German language and culture. Understanding, speaking, reading, and writing of German.

425-A02-1,2,3 Intermediate German German language and culture. Understanding, speaking, reading, and writing of German continued. Prerequisite: A01-3 or equivalent.

425-A05-0 German for Research (0 units) Introduction to the translation of scholarly and scientific German texts. No prerequisites in the language.

425-B03-0 Intermediate Conversation Practical training in communication skills with sole emphasis on listening comprehension and speaking. May be repeated for credit with different materials. Prerequisite: A02-1 or equivalent.

425-B04-0 Foundations of Literary Study Bridges the gap between intermediate language courses and B- and C-level literary and cultural offerings. Emphasizes skills needed to work with literary, philosophical, and historical texts. May not be repeated for credit. Prerequisite: A02-3 or AP score of 3 or consent of instructor.

425-B05-0 Intermediate Grammar and Composition Practice in the writing of short essays; German grammar and structure. May be repeated for credit with different materials. Prerequisite: A02-3 or equivalent.

425-B08-0 German through Reading News Periodicals Articles of current interest in German newspapers, read and discussed in German, with regular compositions. May be repeated for credit with different materials. Prerequisite: A02-3 or equivalent.

425-B80-0 German in Commerce and Industry German language study oriented toward business and economics. Prerequisites: B-level courses in German or equivalent.

425-C60-0 Advanced German in Commerce and Industry Advanced German language study oriented toward business and economics. May be repeated for credit with different materials. Prerequisite: B80 or equivalent.

425-C91-0 Topics in Language Special topics in German language: for example, advanced grammar and composition; translation; advanced translation; stylistics. May be repeated for credit with different topic.

Courses in Literature and Culture with Prerequisites in German

425-B81-1,2,3,4 Introduction to German Literature Works from the 18th century to the present. Readings, lectures, and discussions in German.

425-B85-0 Special Studies in German Literature and Culture Studies of a major author, a prominent theme in German literature or culture, a movement, or a genre. May be repeated for credit with different topic. Prerequisite: A02-3 or equivalent.

425-C10-1,2,3,4 Epochs of German Culture Thought, literature, arts, and music of four epochs of German history in their sociopolitical contexts. 1. Age of reason and revolution. 2. Myths and monumentalism. 3. German literature and politics, 1900-45. 4. German literature and politics after 1945. Prerequisites: B-level courses in German or equivalent.

425-C29-0 Topics in Literature Readings and discussions of topics in German literature, as announced annually. May be repeated for credit with different topic.

Courses with Reading and Discussion in English No prerequisite in German required.

416-B06-0 European Fiction since 1900 See Comparative Literary Studies.

425-B10-1,2,3 German Literature in Translation Articles of current interest in German literature and thought as announced annually. May be repeated for credit with different topic.

425-B12-0 Introduction to Contemporary Germany German political, social, and cultural scene after 1945. Prerequisites: B-level courses in German or equivalent.

425-B20-0 The German Film Topics vary: for example, the pioneer film, “new” German cinema. May be repeated for credit with different topic.

425-B33-1,2 German History and Culture German cultural, political, and intellectual history, from its origins to the present. 1. Reformation to founding of the Empire. 2. Imperial Germany to the present.

425-B40-0 The Theme of Faust through the Ages Faust theme in literature and music through shifting intellectual and social climates from the 16th century to the present.

425-B50-0 Introduction to Contemporary Germany German political, social, and cultural scene after 1945. May be repeated for credit with different readings.

425-B61-0 Turn-of-the-Century Vienna Search of New Values Literature and thought of fin de siècle Vienna and its impact on the modern consciousness. Fiction, poetry, essays, plays by Freud, Schnitzler, Wittgenstein, Hofmannsthal, Musil, Kraus, Schoenberg.

425-B62-0 Berlin: The Golden '20s Literature, philosophy, fine arts, and architecture of the Weimar Republic (1918-33) as expressions of its intellectual debates and
encouraged to enrich their work in Spanish by studying other languages and literatures and other fields in the humanities. The department regularly offers two years of work in Portuguese. All students who are competent in Spanish (not only majors) are encouraged to take part in the Northwestern/University of Seville Junior Year Program in Spain or in the summer program in Mexico sponsored by the Committee on Institutional Cooperation (CIC), the academic consortium of the Big Ten universities and the University of Chicago.

The department also offers a full program of graduate studies leading to the MA and PhD degrees.

Spanish

Majors in Spanish

Courses indicated as a prerequisite for an advanced course may not be taken for credit after the advanced course is completed.

Language and Literature

Departmental courses

Basic courses: three quarter-courses chosen from B01-1,2,3 and B02-1,2,3; one quarter of B03-1,2,3

Major courses

• C02 or C03; C23; C50 or C51; C80,
• Five C-level quarter-courses in Spanish or Latin American literature, including at least one course in each of the following areas:
  Spanish literature before 1700 (in addition to C23)
  Modern Spanish literature
  Latin American literature

One C-level course in comparative literary studies taught by a member of the department may be substituted for one C-level requirement in Spanish or Latin American literature; Linguistics B07 is strongly recommended.

Foreign study: All majors are encouraged to spend at least one quarter studying in a Spanish-speaking country

Related courses: five quarter-courses, constituting a coherent pattern of study, chosen from other departments or programs with the approval of a department adviser; the study of another foreign language is encouraged.

Latin American Studies

Departmental courses

Basic courses: one quarter of B01-1,2,3; three quarters of B02-1,2,3; one quarter of B03-1,2,3

Major courses

• C02 or C03; C23; C40; C41; C43 or C44; C51; C90 or C99
• Four quarter-courses relating specifically to Latin America chosen from history, linguistics, political science, or other departments or programs; a year of Portuguese is recommended.
Prerequisite: A02-3 or equivalent

• B03-1,2,3; C02; C03 (the B03-1,2,3 sequence is a prerequisite for C02 and C03)
• Two quarters of B01-1,2,3 or B02-1,2,3
• One C-level Hispanic studies course in the history of the Spanish language or in literature taught in Spanish

Minor Concentrations in Hispanic Studies
Requirements for the minor concentrations in Hispanic studies can be met by equivalent courses taken in the Northwestern program in Seville, the CIC program in Mexico, or other approved study abroad programs. Also see Latin American and Caribbean Studies.

Hispanic Culture and Civilization
The minor concentration in the culture and civilization of Spain provides students the opportunity to study a foreign culture. This minor is for students planning careers in business, law, medicine, and service professions or preparing for advanced degree programs in which the knowledge of Spanish culture is useful.

Prerequisite: A02-3 or equivalent

Minor course requirements (8 units)
• B01-1,2,3 or B02-1,2,3; one quarter of B03-1,2,3; C50
• Three C-level Hispanic studies courses on Spain or Latin America; may be given by other departments when approved by the Department of Hispanic Studies

Spanish Language
The minor concentration in Spanish language provides students the opportunity to achieve advanced competence and facility in the Spanish language. This minor is for students planning careers in business, law, medicine, and service professions or preparing for advanced degree programs in which the knowledge of the Spanish language is useful.

Prerequisite: Spanish A02-3 or equivalent

Minor course requirements (8 units)
• B03-1,2,3; C02; C03 (the B03-1,2,3 sequence is a prerequisite for C02 and C03)
• Two quarters of B01-1,2,3 or B02-1,2,3
• One C-level Hispanic studies course in the history of the language or in literature taught in Spanish

Four-Year BA/MA
The department offers a four-year BA/MA program in Spanish for outstanding undergraduate majors. Interested students should consult the department chair and should see Four-Year Master’s Programs in the Undergraduate Education section of this catalog.

Honors in Hispanic Studies
Seniors with a grade point average of 3.3 overall and 3.5 or above in any of the major programs in Hispanic studies may qualify for departmental honors by taking two quarters of C99 (or in some cases a quarter of C99 and a D-level seminar) and writing a substantial research paper. They should identify a prospective faculty adviser as soon as they are admitted to the program. During the first quarter of C99, students work with a professor of their choice to prepare a bibliography and do the reading and research for an honors paper. In the second quarter of C99, they organize the research results and write the paper. See Honors under Academic Policies earlier in this section of the catalog.

The Teaching of Spanish
CAS students pursuing a major in Spanish who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Courses Primarily for Undergraduates
463-A01-1,2,3 Elementary Spanish Pronunciation, grammar, translation, and easy conversation. Five class meetings a week. Drill in language laboratory.
463-A02-1,2,3 Intermediate Spanish Grammar review, conversation, composition, and readings in modern prose and drama. Four class meetings a week. Prerequisite: A01 or 2 units of Spanish.
463-A15-1,2 Accelerated First-Year Spanish For students with some previous experience in Spanish. Pronunciation, grammar, and easy conversation. Four classes per week plus one hour in the language laboratory. Prerequisite: department placement.
463-B01-1,2,3 Introduction to the Literature and Civilization of Spain Main currents of Spanish literature and culture. 1. 19th and 20th centuries. 2. 16th and 17th centuries. 3. Middle Ages. Prerequisite: A02 or 4 units of Spanish.
463-B02-1,2,3 Introduction to the Literature and Civilization of Latin America Main currents of Latin American literature and culture. 1. From modernismo to the present. 2. From the 17th century to 1888. 3. Indigenous literatures of Latin America and from Columbus to Ercilla. Prerequisite: A02 or 4 units of Spanish.
463-B03-1,2,3 Intermediate Conversation and Composition Prerequisite: A02 or 4 units of Spanish.

Courses with Reading and Discussion in English
463-B10-0 The Literature of Spain A study of major works of Spanish literature of significance to the European tradition: from the late Middle Ages to the present.
463-B11-0 Survey of Latin American Literature Representative works of Latin American literature from Columbus to the present.
463-B23-0 Cervantes Don Quixote and selected novels in translation.
463-B43-0 Contemporary Spanish American Prose Fiction Selected works in English translation of 20th-century Spanish American authors.
463-C96-0 Topics in Spanish Culture and Civilization Lectures, readings, discussions, and papers on specific topics in Spanish culture and civilization as announced annually.
463-C97-0 Topics in Latin American Culture and Civilization Lectures, readings, discussions, and papers on specific topics in Latin American culture and civilization.
463-C98-0 Topics in Literature Content varies: for example, single author (Borges, Cela, García Márquez, Galdós, Lorca), the picaresque novel, voices of women in colonial Latin America. May be repeated for credit with different topic.

Courses with Prerequisite in Spanish
Prerequisite for these courses is B01 or its equivalent.
463-C02-0 Advanced Grammar Thorough study of grammar and syntax for majors and prospective teachers. Prerequisite: B03.
463-C03-0 Advanced Conversation For advanced students and prospective teachers. Prerequisite: B03.
463-C04-1,2 Topics in Language Advanced topics focus on teaching high school and college Spanish. 1. Methodology. 2. Grammar and syntax. Prerequisite: B03 or the equivalent.
463-C05-0 History of the Iberian Languages Phonology, syntax, morphology, semantics of old Castilian as it evolved from Latin, Portuguese and Catalan. Historical development of Spanish from the Middle Ages through the colonization of America.
463-C06-0 Introduction to Catalan Language and Literature Pronunciation and grammar for reading knowledge of Catalan; readings in major works of Catalan literature.
463-C10-0 Medieval Literature Masterpieces of Spanish literature from the Poema de Mio Cid to the Celestina.
463-C21-0 Golden Age Drama Antecedents and development of drama of the Golden Age.
463-C23-0 Cervantes The works of Cervantes, especially Don Quixote.
463-C30-0 History of Ideas in Modern Spain Spanish thought since the 18th century, in relation to main trends in the rest of Europe.
463-C31-0 The Romantic Movement Origin and development of romanticism in Spain.
463-C32-0 The Novel of the 19th Century Development of the novel from Férnan Caballero to Blasco Ibáñez.
463-C33-0 Literature and Society in 20th-Century Spain How literature gives shape to the social institutions and historical events that circumscribe the reality of 20th-century Spain.
463-C34-0 Modern Poetry Reading, analysis, discussion of major modern Spanish poets.
463-C35-0 Literature of Post–Civil War Spain Trends and tendencies in contemporary Spanish literature. Prerequisite: B01 or equivalent.
463-C40-0 Latin American Literature and Civilization before 1888 The colonial period and the 19th century.
463-C41-0 The Modernist Movement in Latin American Literature Spanish American literature from 1888 to about 1920. The modernist movement.
463-C42-0 Latin American Drama Spanish American drama of the 19th and 20th centuries.
463-C43-0 Contemporary Latin American Literature Fiction Selected works in English translation of 20th-century Spanish American authors.
463-C44-0 Contemporary Latin American Literature Latin American literature from about 1915 to 1950.
463-C45-0 Latin American Culture and Civilization Historical and social backgrounds of Latin American civilization.
463-C46-0 Critical Analysis Detailed examination of representative selections from Hispanic writers. Critical analysis and discussion in Spanish.
463-C47-0 Undergraduate Seminar Investigation of special problems; supervised readings and discussion. Open to qualified seniors. Offered in Spanish and English. Consult with department chair.
463-C48-0 Topics in Literature Content varies: for example, single author (Borges, Cela, García Márquez, Galdós, Lorca), the picaresque novel, voices of women in colonial Latin America. May be repeated for credit with different topic.

Courses with Prerequisite in Spanish
Prerequisite for these courses is B01 or its equivalent.

Portuguese

Courses
459-A01-1,2,3 Intensive Elementary Portuguese Rapid audiolingual study of the Portuguese language followed by readings from Portuguese and Brazilian writers. No prerequisite in Portuguese.
459-C03-0 Advanced Portuguese Development of competence in four areas of foreign language proficiency. Readings focus on Brazilian historical, cultural, and sociopolitical structures. Prerequisite: A01-1 or equivalent.
459-C05-0 Brazilian Literature The intellectual and social climate of Brazil as a monarchy. Representative Brazilian authors from independence to 1900. Prerequisite: A01-3 or equivalent.

459-C06-0 20th-Century Brazilian Literature From modernismo to the present: nationalism, censorship, and current trends. Prerequisite: A01-3 or equivalent.

459-C97-0 Topics in Luso-Brazilian Culture and Civilization Lectures, reading, and papers on specific topics in Luso-Brazilian culture and civilization. In English.

459-C99-0 Independent Study Independent study under supervision.

History
The Department of History is distinguished by the breadth of its faculty’s expertise. The faculty includes nationally distinguished scholars in United States, European, Latin American, African, and Asian history. These faculty resources enable the department to offer major fields of study in the history of the Americas, English/European history, African/Middle Eastern history, and Asian/Middle Eastern history. The department is particularly strong in social, cultural, and intellectual history.

Most history courses are open to any undergraduate. Few have specific prerequisites, although freshmen are generally advised to try A- and B-level courses before attempting C-level. History majors have priority in registering for classes, but the majority of students enrolled in most history courses are majoring in other departments and schools. The history faculty welcomes this diversity of students.

As all courses listed below cannot be given in any one academic year and the quarters in which they are offered are subject to change, see the Class Schedule for actual offerings.

Major in History
The purpose of the major is to help students understand themselves as products and makers of history by introducing them to historical patterns and problems in a variety of areas and periods as well as to different historical materials and techniques of analysis. It encourages students to learn to think critically and to search deeply in at least one area of concentration. Achievement of these goals depends heavily on effective use of faculty advice, and each student should see his or her adviser as soon as one is assigned. Thereafter, each student should confer with the adviser at least once each quarter to ensure smooth progress through the program of study.

Students majoring in history select one of four concentrations:
- History of the Americas
- English/European history
- African/Middle Eastern history
- Asian/Middle Eastern history

Students may arrange to emphasize certain special fields within the context of one of these four areas.

The program for majors consists of 11 graded quarter-courses in history and 5 graded quarter-courses in related subjects, none of which may be substituted with advanced placement credits. These courses, chosen by the student in consultation with the adviser, are distributed as follows.

Departmental courses (11)
- Two undergraduate seminars: C95 plus one chosen from A01, A02, A03, C89, C92, and C93
- Nine B- and C-level quarter-courses: five in one of the four areas of concentration listed above and four that lie outside the area of concentration and are distributed to provide both geographical and chronological variety
- Two of those nine courses must be a C-trailer sequence, preferably taken in the junior or senior year. (A C-trailer sequence consists of two courses: a B- or C-level lecture course plus a linked C95 seminar in a subsequent quarter. The C-trailer sequence need not be within the student’s concentration.)
- At least two of the nine courses must be in fields other than modern European or United States history. Such courses might be in the history of Europe before 1800 or in African, Asian, or Latin American history in any period.

Related courses (5)
- Five quarter-courses of related subjects at the B and C levels, at least two of which must be at the C level and must be chosen from at least two programs or departments in the social sciences and humanities. The courses should bear some coherent relationship to the student’s major program. Students are encouraged to discuss their related courses with their adviser.

Minor in History
The minor in history encourages students majoring in other fields to study history and to organize their historical studies in a coherent way. The structure of the minor requires students to gain both depth and breadth in history. Students must select a concentration, which enables them to acquire significant knowledge of one area of the world, and take courses outside the concentration, which encourages an understanding of diverse cultural contexts.

Minor course requirements (7 units)
- Seven history courses at the A, B, or C level; at least three must be at the C level
- Four of those seven courses must be in one of the following areas of concentration:
  - Europe, including Britain
  - United States
  - Latin America
  - Asia
  - Middle East
  - Africa
• At least two of those four courses must be at the C level
• Three of the seven courses must be outside the area of concentration

Honors in History
Superior students may qualify for departmental honors by enrolling in the honors seminar (C98-1,2,3) during their senior year and completing a senior thesis judged to be of honors quality. See Honors under Academic Policies earlier in this section of the catalog.

The Teaching of History
CAS students pursuing a major in history who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Introductory Colloquia
The following three courses are colloquia, each limited to 15 undergraduates, which introduce students to modes of historical analysis through the study of various topics in history. Specific subjects will be listed in the Class Schedule. Open to freshmen and sophomores only.
427-A01-0 Introduction to Historical Analysis: European History
427-A02-0 Introduction to Historical Analysis: American History
427-A03-0 Introduction to Historical Analysis: Non-Western History

United States
427-B10-1,2 History of the United States Interpretable survey from the 17th century to the present. 1. Colonial settlements to the Civil War era. 2. Reconstruction to the present. Lectures, discussion sections.
427-B11-1,2 Problems in United States History Basic problems in United States history. 17th-20th centuries. 1. First European and African migrations to the American Civil War. 2. American Civil War to the present. For students with a strong secondary-school preparation or special motivation.
427-B91-0 Core Seminar in Latin American-Caribbean Studies Option for core seminar requirement in Latin American and Caribbean studies program. Also open to other students, but a reading knowledge of Spanish or Portuguese is desirable. Prerequisite: consent of instructor.
427-C03-1,2 American Women's History Women and gender in American life, with attention to differences among women based on class, race, and ethnicity. 1. To 1890. 2. Since 1890.
427-C05-0 American Immigration Origins, social characteristics, cultural values, and assimilation of immigrants in the 19th and 20th centuries. Consequences of immigration in comparative and historical perspective.
427-C10-1,2 Early American History 1. Cultural and social development of England’s mainland colonies from the reign of Queen Elizabeth to 1750. 2. Creation of a new republic: from revolution to the Constitutional Convention.
427-C14-0 The Civil War and Reconstruction “Middle period” of American history, emphasizing origins of the Civil War, its revolutionary nature, and its immediate and long-term consequences for the South and the nation.
427-C15-1,2,3 The United States in the 20th Century America’s domestic history and role in world affairs since 1900. 1. 1900–29. 2. 1929–60. 3. 1960–present.
427-C17-0 American Cultural History Changing values of the American people, how they have been transmitted, and how they have shaped American society, politics, and economy, 1890–present.
427-C19-0 History of American Foreign Relations The relationship of Americans, their culture, and their government with the rest of the world; foreign, as well as American, perceptions of that interaction, 1945–present.
427-C22-1,2 Development of the Modern American City Characteristics of urban society in America from the period of settlement to the present. 1. To 1870. 2. 1870–present. Prerequisite for C22-2: C22-1 or consent of instructor.
427-C23-0 Development of American Political Thought Major strands of American political thought from the revolutions of the 17th and 18th centuries to the 20th century. Changing meaning of liberalism; relationship between political ideology and society.
427-C24-0 American Lesbian and Gay History Gender, sexuality, and the rise of modern lesbian and gay identities. Lecture and discussion.
Europe
427-B01-1,2 European Civilization 1. Culture and structure of preindustrial society, high medieval through mid-18th century. 2. Impact of industrial and political change and development of modern society to the present.
427-C32-1,2 The Development of Medieval Europe 1. High Middle Ages. 2. Late Middle Ages.
427-C33-0 The Age of the Renaissance Decline and revival of European civilization, 1350–1530. Cultural, political, economic, and social developments.
427-C34-0 The Age of the Reformation Europe in the 16th century, especially origins, evolution, and effects of changes in religion.
427-C35-0 European History in the 20th Century Growth of mass politics, Fascism, the home fronts, rise of the welfare state, loss of empire, economic resurgence and integration, 1900–35.
427-C42-0 History of Modern France The old regime and the French revolution, 1715–99.
427-C43-0 Modern Italy Italy from the Enlightenment to the present, concentrating on the Risorgimento, the World Wars, Mussolini and fascism, the postwar economic miracle, and terrorism.
427-C44-1,2 Modern Germany German social, economic, political, and cultural developments. 1. 1918–45. 2. 1945–present.
427-C45-1,2 History of Russia 1. Russia from Peter to the Revolution, 1700–1917. 2. The Soviet Union and its successor states, 1917–present.
427-C49-0 History of the Holocaust Origins and development of the massacre of European Jewry during World War II.
427-C50-1,2,3,4 The Intellectual History of Europe 1. Heritage from antiquity and the Middle Ages. 2. From the Renaissance to the end of the 18th century. 3. 19th century. 4. 20th century.
427-C51-0 History of Communism Marx’s Marxism and movements and regimes that have claimed to be Marxist. Specific content varies.

Africa
427-B55-1,2,3 Background to African Civilization and Culture Historical approach to society, economy, polity, and culture in Africa. 1. Origins of humankind to the mid-18th century. 2. Mid-18th century to 1900. 3. 1900 to the present.
427-C56-1,2 History of South Africa 1. From the African iron age to the establishment of the multinational gold mining industry, emphasizing the rise of African states and the contest for land with white settlers. 2. Emphasis on the 20th century, the rise of African nationalism, and the clash with the apartheid state.
427-C57-0 East Africa Selected topics in the history of Kenya, Uganda, and Tanzania.
427-C58-1,2,3 West Africa Selected topics in West African history: economy, society, and government.

England and the British Isles
427-B60-0 Britain, 1688–Present National development, industrialization, democratization, and imperial expansion and decline.
427-C62-1,2,3 Modern British History 1. Social, political, and institutional history, 1688–1815. 2. The age of industrialization and liberalism, 1780–1900. 3. The welfare state, democracy, and total war, 1900–present.
427-C63-0 Modern Ireland in Historical Perspective History of Ireland from the Celts to the “troubles” in Northern Ireland; emphasis on 19th and 20th centuries.
427-C64-1,2 Social and Intellectual History of Modern Britain 1. Rise and fall of Victorian culture, 1780–1900. 2. Main themes in 20th-century culture and thought, 1900–present.

Latin America
427-C65-0 The Formation of Latin American Society Development of Latin American socioeconomic structures, political institutions, and cultural tendencies from the pre-Columbian and Iberian backgrounds through the colonial period.
427-C66-0 Latin America in the Independence Era The 18th-century background to Latin American independence and 19th-century aftermath. The process of achieving independence, changing social structures, and economic patterns and the problem of forming new nations.
427-C67-0 Politics and Development in Latin America Political, economic, and social problems since 1880, with emphasis on the period since 1930. Interaction between economic change and politics of rapidly urbanizing societies.
427-C68-1,2 Revolution in 20th-Century Latin America 1. Mexico and its revolutions. Mexican history, from the modernizing regime of Díaz, through the revolutionary upheaval and the consolidation of a new regime, to contemporary problems. 2. Comparative study of the origins and aftermaths of major 20th-century revolutions in Bolivia, Cuba, and Central America.

Middle East
427-B70-0 Islam in History Influence of Islam on the components of Middle Eastern societies (nomads, agrarian and urban populations) from the inception of the faith (7th century a.d.) to the modern period.

427-C70-1,2,3 History of the Islamic Middle East 1. 600–1200: the classical Islamic community; medieval Islamic civilization. 2. 1200–1789: the great empires—Mamluks, Ottomans, and Safavids; cultural and economic decline. 3. 1789–present: Jewish and Arab nationalism, oil diplomacy, Islam in the modern context.

427-C71-0 Islamic Institutions Religious, legal, political, and socioeconomic institutions of traditional Muslim societies. Regional and cultural variations of principles and concepts common to all Muslims. Modernization and religious reform.

427-C74-0 Historical Background of Jewish-Muslim Relations Formation of Jewish-Muslim relations in the medieval Near East; process by which a common heritage became a basis for contention as well as mutual understanding.

History of Science

427-B75-1,2 History of Western Science and Medicine 1. Origins of science and medicine in early modern Europe: science, religion, and cosmology; anatomy and sexual difference; the Enlightenment and social science. 2. Modern science and medicine in Europe and America: quantum physics and the A-bomb; Darwinism, genetics, and eugenics; DNA typing and "racial science."

427-C25-0 History of American Technology American history through its material culture; industrialization and its discontents; consumer culture and household technology; mass communication and democracy; technological utopia and the computer revolution.

427-C75-1,2 Technology: History, Society, and Economy Economic, cultural, and intellectual aspects of the history of technological change, including non-Western technologies, from medieval Europe to America. Students must enroll in both quarters, receive a grade of K for work completed in the first quarter, and letter grades for both quarters determined by the second-quarter final research project. Prerequisites: B01 and B02 or Economics B01 and B02 or consent of instructor.

427-C76-1,2 Science and Modern Society 1. Rise of science in early modern Europe and colonial America: relationship with philosophy, theology, and Enlightenment culture; science, society, and utopian thought. 2. Science in Europe and America, 1800–present: physical sciences and the power to transform the world; biological and medical sciences and changing social values.

Asia

427-B81-0 Chinese Civilization Chinese history from antiquity to the 18th century, emphasizing cultural and intellectual history.

427-B84-0 Japanese Civilization Japanese history from antiquity to the 19th century. Integrates economic, political, intellectual, social, and cultural trends.

427-B85-0 Indian Civilization History of Hindu culture from antiquity to the 20th century. Change and continuity in religious ideas, practices, institutions, caste, and family life.

Courses Primarily for Majors in History

427-C91-0 Special Lectures Lecture courses given on special topics not covered in regular course offerings. Content varies. May be repeated for credit with consent of department.

427-C92-0 Topics in History Advanced work through reading, research, and discussion in area of special significance. Graduate students permitted in some courses. Prerequisite: consent of instructor.

401-C93-0 Chicago Field Studies Internship See General Studies.

427-C93-0 Seminar in Historical Writing Advanced work in the research, organization, and writing of selected subjects. Prerequisite: consent of instructor.

427-C95-0 C-Tealier Seminar Research seminar linked to and following a designated B- or C-level history course; students research and complete a term paper on topic of choice related to prerequisite. Prerequisite: completion of a designated B- or C-level lecture course.

427-C98-1,2,3 Honors Seminar Advanced work through supervised reading, research, and discussion. Admission by written application, to be reviewed by department. Grade of K given in C98-1 and C98-2.

427-C99-0 Independent Study Reading and conferences on special subjects for advanced undergraduates. Open only with consent of student's adviser and instructor.

Undergraduate Leadership Program Course

427-B95-0 Leaders in History Emphasis on the historical context within which leadership is exercised. Figures, periods, and cultures vary from year to year.
Related Courses in Other Departments
A history major may take no more than two quarter-courses listed below to satisfy the history requirement.

African American Studies B14-1,2 History of Racial Minorities in North America
American Studies B15-1,2 Humanistic Dimensions of Technological Change
Classics B11 Classical Greece
Classics B12 Roman Civilization
Classics C21-1,2,3 Roman History
Economics C15 Topics in Economic History
Economics C23 Economic History of the United States
Economics C24 Western Economic History

Humanities, Kaplan Center for the
The Alice Berline Kaplan Center for the Humanities promotes advanced research and stimulates educational innovation and curricular development, fosters a lively interdisciplinary community and continuing interdepartmental exchange, and provides a general coordinating resource for research and teaching initiatives in the humanities and related social science fields. The center offers two yearlong seminars, one at the graduate level and the other for undergraduates, as well as four junior/senior seminars each year. It administers an internship program that places undergraduates in Chicago humanities and arts institutions. It also offers undergraduates a minor in advanced interdisciplinary studies in the humanities.

For more information about lectures, conferences, courses, and programs offered, consult the Alice Berline Kaplan Center for the Humanities, 2010 Sheridan Road, 847/491-7946 or hum@nwu.edu.

Minor in Humanities
The minor in advanced interdisciplinary studies in the humanities trains humanities and social science majors in interdisciplinary methods, topics, and theories and exposes them to contemporary developments and debates in disciplines other than their own.

The minor complements existing majors in small departments, which are often restricted in the diversity and range of their seminar offerings, and in large departments, which may find it difficult to make special provision for their students planning to continue graduate studies.

Minor course requirements (6 or 7 units)
- C95-1,2,3 (three-quarter sequence, counts as 1 unit)
- Three quarter courses chosen from C01 and/or C02 (3 units)
- Option A or B (2 or 3 units)
  - Option A: three C-level humanities courses approved by the center; these may include C90 and C99
  - Option B: one C-level humanities course approved by the center and C95-1,2,3 (three-quarter sequence, counts as 1 unit) with a different topic than that of the above-required C95

Students applying for the minor must present records showing that at least five courses have not been double-counted in their major. Students pursuing a minor in advanced interdisciplinary studies in the humanities must consult with the associate director of the center to establish their program.

Sample program: two yearlong C95 seminars on themes such as The Meanings of the Modern or Science and Defining the Human; 2 units of C01 and C02; and one C90 internship—for instance, at the Art Institute of Chicago or the Newberry Library.

Courses
410-C01-0 Topics in the Humanities
Interdisciplinary issues and current research in the humanities, offered by fellows of the Center for the Humanities: for example, ethnography and literature; gender, militarism, and modern culture; democracy, ancient and modern; literary theory and the practice of writing. May be repeated for credit with change in topic.

410-C02-0 New Perspectives in the Humanities
New issues in the humanities and current innovative research, offered by fellows of the Center for the Humanities: for example, bandits, criminals, and outcasts; female divinity in the Christian tradition; technology and its discontents: the computer revolution; the language and art of the insane—from psychiatry to art brut. May be repeated for credit with change in topic.

410-C90-0 Humanities Internship
Places undergraduates in Chicago-area humanities, arts, and cultural institutions, such as the Art Institute of Chicago, the Chicago Humanities Festival, the Guild Complex, the Lyric Opera of Chicago, the Newberry Library, and other museums and theaters for one quarter (1 unit). Involves about 10 hours of work each week at the host institution and an academic project done under the guidance of a Northwestern faculty mentor. Prerequisites: grade point average of 3.0 or above and consent of center.

410-C95-1,2,3 Humanities Seminar
Yearlong seminar meeting approximately every two weeks; revolves around meetings with eminent visiting humanists from various fields, who address questions related to an annual theme (1995–96, The Claim of Theories; 1996–97, The Meanings of the Modern; 1997–98, Science and Defining the Human). One credit for successful completion of sequence. Prerequisite: consent of center.

410-C99-0 Independent Study
Integrated Arts Program
The interschool Integrated Arts Program offers courses leading to a minor that explore the creative process from the perspective of the artist in the disciplines of theater, visual arts, music, dance, and media arts. (See Integrated Arts Program in the Other Undergraduate Programs section of this catalog.)

Integrated Science Program
The Integrated Science Program (ISP) is a highly selective curriculum of natural sciences and mathematics presented predominantly in small classes at an accelerated pace. ISP courses emphasize the common base and interrelationships of the sciences, including the importance of mathematics and the development of first principles, leading to advanced topics at the forefront of science today. The goal is to provide students who are interested in careers in science and mathematics with a broad, quantitative background that will give them superior preparation for further work in graduate or professional school or permanent employment. The curriculum is composed of 23 quarter-courses as well as a regular seminar series and the opportunity to pursue research. ISP may lead to a three-year bachelor of arts degree if, by the end of the third year, the student has completed 36 or more quarter-courses and satisfied all other college requirements.

Admission to ISP is by special application to the director of the Integrated Science Program. For more information on admission procedures, see the description of ISP under Academic Options in the Undergraduate Education section of this catalog. Also see the Admissions section for achievement tests required.

The ISP curriculum consists of specially designed courses taught by faculty members of the science and mathematics departments. Course descriptions are found with the appropriate departments in this catalog. Though listed in a three-year format, many students spread the program over four years, often to combine an ISP major with a second major in a traditional department. Specific second major requirements for ISP students can be found under individual departments in this catalog. For more information, see the ISP Web page <http://www.isp.nwu.edu>.

Major in Integrated Science
• First year
  ISP A01-1,2,3 Computing Applications
  Chemistry A71 Accelerated General Inorganic Chemistry
  Chemistry A72 Accelerated General Physical Chemistry
  Mathematics B91-1,2,3 Accelerated Mathematics for ISP: First Year
  Physics A25-1,2,3 General Physics for ISP
  • Second year
  Biological Sciences C09 ISP Biochemistry and Cell Biology
  Biological Sciences C11 ISP Neurobiology
  Chemistry B12-1 Organic Chemistry
  Chemistry C48 Physical Chemistry for ISP
  Geological Sciences C15 Physics of the Earth for ISP
  Mathematics C91-1 and 3 Accelerated Mathematics for ISP: Second Year
  Physics C39-1,2 Quantum Mechanics
  • Third year
  Astronomy C31 Astrophysics
  Biological Sciences C01 Biochemistry
  Biological Sciences C10 ISP Quantitative Biochemistry and Molecular Biology
  Mathematics C91-2 Accelerated Mathematics for ISP: Second Year
  Physics C39-3 Nuclear Physics
  ISP C98 may substitute for up to three of the following courses: Astronomy C31; Biological Sciences C01, C10, or C11; Mathematics C91-2 or 3, Physics C39-3.
  All students must take at least one of the following courses: Biological Sciences C01, C10, C11, or Geological Sciences C17.

Courses
481-A01-1,2,3 Computing Applications Introduction to formulation and solution of scientific problems on the computer. One-third credit each quarter.

481-C98-0 Undergraduate Research Advanced work for superior students through reading, research, and independent study. Consent of ISP director required.

International Studies Program
International studies, an undergraduate interschool adjunct major that is taken in conjunction with a traditional major, is open to CAS students. (See International Studies Program in the Other Undergraduate Programs section of this catalog.)

Italian
See French and Italian.

Jewish Studies Program
The Jewish Studies Program focuses on Judaism, not only in its narrow sense as a religious phenomenon but also in its broader sense as a phenomenon of culture and civilization. A good case can be made that the roots of Western culture lie in two places: Athens and Jerusalem. The traditional education of the humanist scholar recognized this by requiring not only the mastery of Greek and Latin but also of Hebrew. Thus the study of Judaism in this program considers the many and varied dimensions of the phenomenon of Jewish civilization. A typical program of study includes, in addition to the religious dimension, the
Minor in Jewish Studies
The minor in Jewish studies requires the successful completion of seven courses in three general areas:

- A three-course survey of Jewish history providing a basis for advanced work and a unified view of the history of the Jews in the Western world:
  1. Religion B10 Introduction to Hebrew Bible
  2. one course that deals with the history or culture of the Jewish people in the Middle Ages (consent of director required)
  3. History C49 History of the Holocaust
- Two courses in Jewish literature chosen from Religion D32 Modern Jewish Literature, English courses studying Jewish themes in American literature, Slavic Languages and Literatures C72 Introduction to Eastern European Jewish Culture, and African and Asian Languages B03-1,2 Advanced Hebrew. Other courses, subject to approval by the Committee on Jewish Studies, can satisfy this requirement.

For students who also satisfactorily complete two years of language study in Hebrew, requirements for the minor are the successful completion of five courses, three in the first area and one each in the second and third areas.

Students applying for minor in Jewish studies must present records showing a minimum of five courses not double-counted in their major.

Latin
See Classics.

Latin American and Caribbean Studies

Program
The Program in Latin American and Caribbean Studies recognizes the importance of the Latin American and Caribbean regions to the foreign and domestic policies of the United States as well as the region's appeal to a variety of intellectual interests. This program allows a coherent interdisciplinary course of study with a particular emphasis on the social sciences in addition to history, languages, and literature. It also aims to create a community of students and faculty with common intellectual interests in the area. The program attempts to realize these goals through (1) core seminars required for all students wishing to enter the program, (2) a strong program of advising to give students a clear sense of direction while preserving flexibility toward individual interests, and (3) required senior research seminars.

Advising
Regular contact between students and their adviser not only supports the sense of scholarly community but also offers students guidance in pursuing a course of study tailored to their particular needs and interests. Students must consult the director upon entering the program and also are required to discuss their plans with the program director at least once each quarter.

Minor in Latin American and Caribbean Studies
Nine quarter-courses are required for the minor in Latin American and Caribbean studies, including one core seminar, three core courses, one interdisciplinary senior research seminar, and four additional courses in Latin American and Caribbean studies. All students in the program are required to have an effective reading knowledge of Spanish or Portuguese. The program expects the level of proficiency required by the Department of Hispanic Studies for entry into its C-level courses or successful completion of a B-level course or equivalent. Students applying for the minor must present records showing a minimum of five courses not double-counted in their major.

Core seminar: A core seminar should be taken as early as possible after entry into the program. These are C96 seminars, offered in Hispanic studies, history, and political science.

Core courses: Three courses, one each in Hispanic studies, history, and political science, must be selected from the following list:
- Hispanic Studies 463-B02-1,2,3 Introduction to the Literature and Civilization of Latin America
- History C65 The Formation of Latin American Society or C66 Latin America in the Independence Era
- Political Science C53 Politics in Latin America

Senior seminars: During the senior year, all students are required to take an interdisciplinary research seminar.

Electives: Four additional courses, not already taken to fulfill the core course requirement, may be drawn from the list of core courses or from the following list of related courses. (Other courses may be counted with the approval of the program director.)
- Economics C25 Economic Development
- Hispanic Studies 459-C03 Advanced Portuguese
- Hispanic Studies 459-C05 Brazilian Literature
- Hispanic Studies 463-C40 Latin American Literature and Civilization before 1888
- Hispanic Studies 463-C41 The Modernist Movement in Latin American Literature
- Hispanic Studies 463-C43 The Avant-Garde and Regionalism in Latin American Literature

historical, sociological, linguistic, philosophic, and artistic dimensions.
Linguistics

Linguistics is the scientific study of language. Since languages are systematic, linguistics, at its core, analyzes the structure of speech sounds (phonetics, phonology), the structure of words and sentences (morphology, syntax), and their meaning (semantics, pragmatics). In addition, linguistics is concerned with language change and the social and psychological factors that affect language use.

The members of the faculty are especially interested in theoretical foundations, experimental and computational methods, and the study of language use, including language in the professions.

Knowledge of the origins, nature, and functions of language is one of the best tools we can employ in seeking to understand our humanness. Holders of the BA in linguistics find employment in editorial work and technical writing and as legal, educational, and administrative assistants in business and government. The major also prepares students for professional studies such as law as well as for graduate work in linguistics, psycholinguistics, computational linguistics, and related disciplines. The PhD prepares individuals to teach at the college or university level or for a language-related position in business or government. At any level of preparation, the chances of securing attractive employment are greatly enhanced by interdisciplinary studies in language-related fields, education, social sciences, mathematics, or computer science.

Major in Linguistics

Departmental courses

Introductory courses (3): B05, B06, B07

Core courses (9): three courses chosen from C05, C06, C16, C29, C71, plus six additional C-level linguistics courses (certain exceptions or substitutions, such as Cognitive Science B10, granted by consent of the undergraduate adviser)

Related courses (4): four courses selected from other departments in consultation with the linguistics undergraduate adviser

Minor in Linguistics

The minor in linguistics broadens the academic background of students majoring in related fields, including anthropology, cognitive science, communication sciences and disorders, computer science, philosophy, psychology, a language, or a language and culture area, by offering training in the theory and methods of linguistic analysis.

Minor course requirements (8 units)

• B05, B06, B07
• Two courses chosen from C05, C06, C16, C29, C71
• Three additional C-level linguistics courses

Four-Year BA/MA Program

Students with a strong record in their major courses and an interest in pursuing linguistics at the graduate level are eligible to apply for the four-year BA/MA program in linguistics. Applications should be made no later than spring quarter of the junior year. To be considered for this program, students must demonstrate that they will be able to complete by the end of their senior year all the CAS requirements for the BA degree plus the department’s requirements for the MA degree. See Four-Year Master’s Programs in the Undergraduate Education section of this catalog.

Courses Primarily for Undergraduates

434-A10-0 Languages and Linguistics The nature and structure of language. Methods of linguistic analysis. Language change, acquisition, and varieties.

434-B04-0 Language and Prejudice How language represents and reproduces the stereotypic thinking of prejudice; analysis of derogatory labels, discourse of exclusion, discriminatory language policies and practices.

434-B05-0 Meaning Introduction to linguistic meaning. Basic concepts in word and sentence meaning, prototype theory, metaphor, presupposition, and philosophical and psychological issues.

434-B06-0 Formal Analysis of Words and Sentences Formal analysis, rules, and notation for morphology (word structure) and syntax (sentence structure) in human languages.

434-B07-0 Sound Patterns in Human Language The formal analysis, rules, and notation of sound contrasts and sequences in various languages.

434-B09-0 Language and Society Introduction to social structure and language use. Standard and nonstandard language; regional, social, and ethnic dialects; language functions, norms, and attitudes.
434-C01-0 Introduction to Comparative and Historical Linguistics Principles of the comparative method and the method of internal reconstruction. Historical syntax. Quantitative methods in historical linguistics. Prerequisite: A10 or B07.

434-C04-0 Practical Rhetoric See English.

434-C05-0 Lexical Semantics Introduction to lexical semantics; issues in the linguistic study of word meanings, including internal organization and interrelationships within the lexicon. Prerequisite: B05 or consent of instructor.

434-C06-0 Fundamentals of Syntax Principles of syntactic theory through analysis of various syntactic phenomena, based mainly on English data. Linguistic argumentation. Prerequisite: B06 or consent of instructor.

434-C09-0 Psycholinguistics Interrelationships of linguistic and psychological variables in human language use. Developmental and experimental psycholinguistics, the relationship between language and cognition.

620-C09-0 Culture, Language, and Learning See Communication Sciences and Disorders, School of Speech.

434-C10-0 Sociolinguistics Social factors in linguistic variation. Linguistic diversity; multidialectal and multilingual societies; diglossia. Prerequisite: B07 or consent of instructor.

434-C11-0 Child Language How children acquire the forms and functions of their native language. Child bilingualism, the acquisition of literacy.

434-C12-0 Linguistics and English Composition Recent trends in the study of the uses and forms of writing and the processes of written composition. The learning and teaching of written language.

434-C15-0 Bilingualism Sociological, psychological, and linguistic factors affecting the simultaneous or sequential acquisition of two or more languages. Effects of bilingualism on phonology, syntax, the lexicon, cognition.

434-C16-0 Phonetics Principles of articulatory and acoustic phonetics. Analysis of experimental evidence about language sound structure. Prerequisite: B07 or consent of instructor.

434-C17-0 Language Variation Historical, geographical, social, and functional differences in language. Theories of variation and their relation to the concepts of competence and idealization. Prerequisite: a B-level course or consent of instructor.

434-C18-0 Language and Gender Use of language by and about women and men, cross-cultural gender differences in language and language attitudes.

434-C19-0 Language Typology Comparative overview of the classification and analysis of major grammatical structures found across languages of the world.

434-C20-0 Language and Law Survey of contemporary social science research on the interaction of language variables and our legal system; application of linguistics to the resolution of legal cases. Prerequisite: an A- or B-level course or consent of instructor.

434-C25-0 Language and Medicine Analysis of language patterns used in medical settings, including doctor-patient interaction and technical language use. Prerequisite: A- or B-level course or senior standing.

434-C29-0 Pragmatics Nontruth-conditional meaning, role of context in utterance production and interpretation. Implicature, presupposition, speech acts. Prerequisite: B05 or consent of instructor.

434-C30-0 Topics in Language and Behavior Topics in the relationship between language and human behavior. Topics vary. May be repeated for credit with different topic.

434-C44-0 Research Methods in Linguistics Linguistic data collection, management, and analysis. Use of computational, experimental, and statistical methods.

434-C46-0 Introduction to Computational Linguistics Computer programs for syntactic analysis of sentences and semantic analysis of sentences and larger texts. Implications for design of natural language interfaces.

434-C51-0 The History of Linguistics Linguistics from antiquity to the present.

434-C62-0 Second Language Acquisition Major theories of second-language acquisition; current issues in the field. Cognitive, personality, and sociocultural variables affecting second-language learning.

434-C71-0 Morphology Examination of the internal structure of words. Introduction to central problems facing a theory of morphology. The evolution of theories of morphology within generative grammar.

434-C80-0 English in the University English conversational skills culturally appropriate for an American university, primarily for foreign graduate students. Content varies by quarter.

434-C81-0 Advanced English in the University Written argumentation skills and all aspects of academic writing, primarily for foreign graduate students.

434-C98-0 Undergraduate Seminar in Linguistics By invitation of the department. For students of superior ability, with choice of topic left to the group.

434-C99-0 Independent Study
Mathematical Methods in the Social Sciences Program
A central feature of modern social, behavioral, managerial, and policy sciences is the use of mathematics, statistics, and computers, both as languages and as methods of abstraction and analysis. The Mathematical Methods in the Social Sciences (MMSS) Program was created to give students an opportunity to acquire these skills and to become acquainted with modern analysis of social systems. This is accomplished through an accelerated program for high-ability students and through the offering of courses open to all undergraduates.

Major in Mathematical Methods in the Social Sciences
MMSS enables students to combine the study of social sciences with training in formal analytical methods. The program is intended for students with high mathematical aptitude and strong interest in social problems and issues, including their policy and research implications. It provides excellent preparation for graduate study in social or managerial sciences as well as for careers that require both quantitative skills and a solid background in the social sciences.

In each of their first two years in the program, students enroll in two coordinated three-quarter courses covering mathematical methods and their applications to the social sciences. In addition to this core curriculum, students participate in a senior seminar and complete a major in one of the social sciences—anthropology, economics, linguistics, political science, psychology, sociology, or statistics. Students who satisfy all requirements for a social science major and for the program are granted a dual major.

Required courses:
• First year: MMSS B92-1,2,3; Mathematics B92-1,2,3
• Second year: MMSS C92-1,2,3; Mathematics C92-1,2,3
• Senior year: MMSS C98-1,2

Admission to the MMSS program is very selective; it is limited to entering freshmen and to Northwestern sophomores with superior academic records and a demonstrated strong aptitude in mathematics.

Prerequisite for admission consideration is a full-year course in calculus. High school students fulfilling this prerequisite are encouraged to enter the program as freshmen. Students lacking calculus but planning to enter the program should complete at least two quarters of calculus (Mathematics B14-1 and 2) in their freshman year.

Students who wish to be considered as candidates for the program should request an application from the director, MMSS, G26 Walter Annenberg Hall, Evanston, Illinois 60208-2250.

Courses
436-B92-1,2,3 MMSS: First Year
1. Mathematical and statistical analysis of data; social science theories and methods. 2. Mathematics and computer models for decision analysis. 3. Political conflict and collective choice. Prerequisite: first-year standing in MMSS.

435-B92-1,2,3 Accelerated Mathematics for MMSS: First Year
See Mathematics.

436-C92-1,2,3 MMSS: Second Year
1. Network/policy analysis. 2. Game theory models. 3. Welfare economics and social choice. Prerequisite: second-year standing in MMSS.

435-C92-1,2,3 Accelerated Mathematics for MMSS: Second Year
See Mathematics.

436-C94-0 Special Topics
Advanced work for investigation of topics of current interest. Offered in different quarters. May be repeated for credit with different topic. Prerequisite: third-year standing in MMSS or consent of instructor.

436-C98-1,2,3 Senior Seminar
By invitation of the department.

Mathematics
Mathematics plays a central role in modern society. It has long been an important tool in science and engineering, and it is now increasingly being used in varied and sophisticated ways in the social sciences, the humanities, and business. With expanding applications, many areas of mathematics, from pure to applied, have grown tremendously. At Northwestern, a variety of courses for nonmajors address these diverse applications of mathematics.

The department offers major programs in mathematics and applied mathematics as well as the more demanding Mathematics Program. Applied mathematics will appeal to students who are primarily interested in applications of mathematics in the physical, biological, social, or behavioral sciences; management; or engineering. Talented undergraduates may take some graduate courses to enrich their studies, preparing them for employment or further study in graduate school.

A mathematics course that is a prerequisite for another mathematics course may not be taken for credit after the more advanced course has been completed. Consent of the department may be substituted for the prerequisite for any mathematics course. No A-level course may be taken for credit after a B- or higher level mathematics course has been completed. See the course descriptions for other restrictions.

Majors in Mathematics
Mathematics majors are urged to take C08 early in their academic career. Also recommended are B21 and a course in computer science. Mathematics majors preparing for
graduate school should take C10 and C37 as early as possible; they should also take C28.

Students pursuing the applied mathematics major are urged to take computer programming courses. Mathematics and applied mathematics majors interested in probability and statistics should take C30 and some further courses in statistics (Statistics C50, C51, C52, or C54). They should complete the requirements by taking additional courses from among real analysis (C10), computer science, and areas where probability and statistics are used.

Majors interested in economics should take Mathematics C10, C30, and Economics C80-1,2 or C81-1,2.

All majors are encouraged to discuss their programs with the department director of undergraduate studies.

Mathematics

Departmental courses

Basic courses: B14-1,2,3, B15, B17, or equivalent

Required major courses: Students must take a total of nine C-level courses in mathematics, including either C34 or C37-1, and at least three courses must form one of the complete sequences C10-1,2,3, C30-1,2,3, or C37-1,2,3. Students may not count both C34 and C37-1 for the major without consent of the department. (Students may count both courses toward the 45 courses required for graduation.)

With the approval of the department, students may substitute as many as three of the remaining six courses with a coherent set of the same number of C-level courses offered by other departments. Those courses must be deemed to focus on serious applications of mathematics.

Applied Mathematics

Departmental courses

Basic courses: B14-1,2,3, B15, B17, B21, or equivalent

Required major courses

• C34

• Two groups chosen from the following (substitution of substantially equivalent courses may be allowed): C10-1,2, C30-1,2,3 or C30-1 and Industrial Engineering and Management Sciences C03, C04 C03, C05, C16 or C03, C13-1,2 C17-1,2

• Additional C-level courses for a total of 10. Three or four must be in an area making substantial use of mathematics. Some suitable areas are computer science, economics, applied mathematics, geology, industrial engineering, physics, and statistics, but coherent sets of courses in other areas also may qualify. Approval of the program by the department’s director of undergraduate studies is required.

MENU Program

The MENU (Mathematical Experience for Northwestern Undergraduates) program is for students who would normally major in mathematics but want a more rigorous and individualized approach. Requirements include B90-1,2,3 (first-year course), C40-1,2,3 (second-year course), C38-1,2,3 (MENU algebra course), and three one-quarter courses chosen from a list approved by the director of the MENU program.

In addition, students in the MENU program must complete an honors project in their senior year under the direction of a mathematics faculty member.

Four-Year BA/MS

For a small number of mathematically talented and highly motivated students, the department offers a combined graduate-undergraduate program. In this four-year program, students ordinarily begin taking graduate courses in the junior year. As they complete work for a bachelor’s degree, they also earn a master’s degree. Interested students should consult with the department as early as possible in their college career and should see Four-Year Master's Programs in the Undergraduate Education section of this catalog.

Integrated Science Program

The Integrated Science Program (ISP) is a highly selective BA program in CAS (see Integrated Science Program). Students majoring in ISP who wish to complete a second major in mathematics should fulfill the following requirements instead of those listed above. They must take a full-year sequence, C10-1,2,3 or C37-1,2,3. It is recommended (but not required) that students planning graduate work in mathematics take both of these sequences. Students pursuing an ISP/math double major may not substitute ISP C98 for any mathematics course in the ISP curriculum.

Honors in Mathematics

Majors with outstanding records may be nominated for graduation with departmental honors. Those graduating under the regular mathematics option should complete C10 and C37 (or the equivalent). Those graduating under the applied mathematics option should complete C10 (or the equivalent). In exceptional cases, students who have not completed these courses may also be considered for honors.

In addition, to be nominated for departmental honors a student must complete with distinction two quarters of independent study or two quarters of a graduate course; in either case the student must complete an acceptable project that culminates in an honors thesis. Finally, the student must have a grade point average of 3.5 or above in courses that satisfy major requirements. (Courses such as those in the calculus sequence that are prerequisites for the major are not counted.)
For more information on honors consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

The Teaching of Mathematics
CAS students pursuing a major in mathematics who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Placement in Calculus
Students who have taken three years of high school mathematics, including some trigonometry, should in most cases be adequately prepared for the first quarter of calculus (B14-1).

Students who have a weak preparation in trigonometry and algebra and who want to eventually take calculus should take the Mathematics Diagnostic Examination during New Student Week of their first year. This exam is necessary for placement in precalculus (A13) and special five-days-a-week sections of B14-1.

Students who have taken calculus in high school are encouraged to begin their study of calculus at Northwestern in the most advanced course appropriate to their background. Students who have completed a year's course in calculus with good grades should ordinarily register for B14-3 or B20-1. To help determine the appropriate placement before registration, students should take the Self-Placement Examination available at the department office. Students who skip B14-1 and/or B14-2 may earn credit for the course(s) skipped by passing a credit examination, which is given in October and must be taken during the first year of enrollment at Northwestern. Credit earned by this examination may not duplicate AP credit or transfer credit earned at other colleges or universities. For CAS students, this credit counts as elective credit but does not count toward the distribution requirement. Engineering students should consult with their advisers about the necessity for this examination.

General Course Recommendations
Students interested in mathematics, natural sciences, premed, engineering, or economics should take the standard calculus sequence B14-1,2,3.

Students who intend to major in behavioral science ordinarily should take B10-1,2 but may take B14-1,2,3.

Students who desire an introduction to mathematics to fulfill the distribution requirement but who do not intend to do more advanced work in mathematics should consider an A-level course (except A13) or B10.

Students who have mastered the elements of single variable calculus in high school and desire an early introduction to theoretical mathematics should consider B90-1,2,3. They should take the CEEB Advanced Placement Examination (preferably the BC exam), on the basis of which invitations are given. Students who wish to take B90 but have not received an invitation must obtain consent from the department.

Material in the basic calculus sequence B14-1,2,3, B15, B17, B21 is covered in other sequences, particularly B20-1,2,3 and B91-1,2,3. Other sequences such as B90-1,2,3, B92-1,2,3 and Engineering Sciences and Applied Mathematics B52-1,2,3 cover substantial parts of this material as well as other topics. Students who are uncertain about the exact equivalences should consult with the department's director of undergraduate studies. Students who wish to pursue combinations from different sequences should plan a coherent program with the director of undergraduate studies. They will not be permitted to take courses in these sequences that lead to excessive duplication of subject matter.

Courses Primarily for Undergraduates
435-A04-0 Games and Fallacies Number puzzles and games; conceptualizing numbers; common fallacies. For nonscience students who may never have seen the charm of pure mathematical play or the spirit of mathematical applications.

435-A10-0 Survey of Modern Mathematics I Set theory, probability and statistics, matrices, number theory. Students may not take A10 for credit after having taken a C-level mathematics course. Prerequisite: high school mathematics.

435-A13-0 Precalculus Mathematics Preparation for calculus. Basic algebra, functions, and graphs; exponential and logarithmic functions; trigonometry. Prerequisites: Mathematics B52-1,2,3 cover substantial parts of this material as well as other topics. Students who are uncertain about the exact equivalences should consult with the department.

435-B10-1,2 Mathematics for the Behavioral Sciences
1. Elementary linear algebra and applications. Finite probability. Elementary statistics. 2. Differential calculus. Integral calculus. Examples drawn from the behavioral and social sciences. Students may not receive credit for both B10-2 and B14-1. Prerequisite: three years of high school mathematics.

435-B13-0 Review of Calculus of One Variable Elements of differential and integral calculus with an emphasis on problem solving, for entering students who have had calculus in high school. As a prerequisite for other courses, B13 is equivalent to B14-2. Students may not receive credit for B13 and any of the following: B10-2, B14-1,2. Prerequisite: one year of high school calculus or consent of the department.
435-B14-1,2,3 Calculus 1,2. Elements of differential and integral calculus. 3. Vector algebra, vector functions, partial derivatives. Students may not receive credit for both B14-1 and B10-2 or for both B14-3 and B90-1, B91-1, or B92-1. Prerequisite: three years of high school mathematics.

435-B17-0 Sequences and Series, Linear Algebra. Sequences and series; power series; Taylor series. Linear algebra: vectors and matrices; Gaussian elimination; inverses; determinants; eigenvalues and eigenvectors; quadratic forms and diagonalization; application to quadric surfaces. Prerequisite: B14-3.

435-B20-1,2,3 Accelerated Calculus of Several Variables. Material of B14-3, B15, B17, and B21 covered in three quarters. Prerequisites: one year of high school calculus with good grades and good mathematics achievement test score.

435-B21-0 Elementary Differential Equations. Applications of calculus and linear algebra to the solution of ordinary differential equations. Prerequisite: B17, concurrent registration in B17, or consent of department.

435-B90-1,2,3 Accelerated Mathematics: First Year 1,2. Deeper treatment of calculus, including a rigorous treatment of its basic concepts. 3. Linear algebra. Prerequisite: one year of calculus (usually in high school) and consent of the department.

435-B91-1,2,3 Accelerated Mathematics for ISP: First Year 1. Vector differential calculus and multidimensional calculus. 2. Vector integral calculus, differential equations, infinite series. 3. Linear algebra, differential equations. Open only to students in ISP.

435-B92-1,2,3 Accelerated Mathematics for MMSS: First Year 1. Linear algebra. 2. Multidimensional calculus. 3. Calculus topics. Prerequisite: first-year standing in M MS.

435-C01-0 Mathematical Models in Finance. Analytic modeling of problems from finance; basics of partial differential equations, the diffusion equation, the Black-Scholes Equation, finite difference methods, and finite sampling. Prerequisite: B21 or equivalent.

435-C03-0 Differential Equations. Intermediate course. Topics chosen from linear systems, nonsingular boundary value problems, theory of periodic solutions, stability theory, asymptotic expansions, special functions of mathematical physics, perturbation theory. Prerequisite: B21 or graduate standing.

435-C04-0 Game Theory. Selected topics in game theory: noncooperative games, matrix games, optimal strategies, cooperative games. For students in mathematics, probability, business, social sciences. Prerequisite: B17 or consent of instructor.

435-C05-0 Complex Variables for Applications. Complex numbers, functions of a complex variable, theory of analytic functions, series development, analytic continuation, contour integration, conformal mapping. Students may not receive credit for both C05 and Engineering Sciences and Applied Mathematics 11-3 except by consent of the department. Prerequisite: B21.

435-C08-0 Foundations of Higher Mathematics. Introduction to fundamental mathematical ideas—such as sets, functions, equivalence relations, and cardinal numbers—and basic techniques of writing proofs. May be taken for credit after C10-1 or C37-1 only by consent of the department. Prerequisite: B17 or equivalent or consent of department.

435-C10-1,2,3 Introduction to Real Analysis. Sets, functions, limits, properties of the real number system. Metric spaces. Foundations of differential and integral calculus, including Riemann integral and infinite series. Lebesgue integration. Fourier series. Prerequisites: B15, B17, C08, or consent of department.

435-C13-1,2 Chaotic Dynamical Systems. 1. Chaotic phenomena in deterministic discrete dynamical systems, primarily through iteration of functions of one variable. 2. Iteration of functions of two and more variables, including the study of the horseshoe map, attractors, and the Henon map. Complex analytic dynamics, including the study of the Julia set and Mandelbrot set. Prerequisite: B17.

435-C16-0 Fourier Series and Boundary Value Problems. Expansion in orthogonal functions with emphasis on Fourier series. Applications to solution of partial differential equations arising in physics and engineering. Students may not receive credit for both C16 and C91-1 or Engineering Sciences and Applied Mathematics 11-2. Prerequisite: B21 or consent of department.

435-C20-0 Concrete Mathematics. Discrete mathematics emphasizing interplay between discrete and continuous mathematics. Recurrent problems, sums, floors and ceilings, divisibility and primes, binomial coefficients and
generating functions. Prerequisite: B14-1,2 or consent of department.

435-C28-0 Introduction to Topology Point-set topology. Prerequisite: C08, C10-1 (may be corequisite).

435-C29-0 Introduction to Differential Geometry Curves and surfaces in three-dimensional space. Prerequisites: B15, B17.

435-C35-1,2 Introduction to the Theory of Numbers 1. Divisibility and primes, congruences, quadratic reciprocity, diophantine problems. 2. Additional topics in analytic and algebraic number theory. Prerequisite: B14-3 or consent of department.

435-C37-1,2,3 Introduction to Modern Algebra 1. Abstract theory of vector spaces and linear transformations including canonical forms. Prerequisite: B17, C08, or concurrent registration in C08 or equivalent. 2. Groups and their structure; elementary ring theory. Prerequisites: B17, C08 or equivalent, C37-1, or consent of department. 3. Rings, modules, and fields with applications to the imposibility of certain ruler and compass constructions. Prerequisite: C37-2. Students may not take both C37-1 and C34-0 for credit without consent of the department.

435-C38-1,2,3 MENU:Algebra 1. Groups and their structure, including the Sylow theorems; elementary ring theory; polynomial rings. 2. Basic field theory; Galois theory. 3. Module theory, including application to canonical form theorems of linear algebra. Prerequisites: C40-1,2,3 or consent of department.

435-C40-1,2,3 MENU:Second Year 1. Multidimensional differential and integral calculus. 2,3. Introduction to real analysis. Prerequisites: B90-1,2,3 or consent of department.

435-C75-0 Mathematical Logic Mathematical formulation and rigorous discussion of logical systems, particularly the propositional calculus and the functional calculus of first and second order. Well-formed formulae, formal languages, proofs, tautologies, effective procedures, deduction theorems, axiom schemata. Prerequisite: consent of instructor.

435-C76-0 Theory of Computability and Turing Machines Algorithms, computability, decidability, enumerability; formal replacements and Church’s thesis. Turing machines, primitive recursive functions, mu-recursive functions, recursive functions. Undecidable predicates; the undecidability and incompleteness of arithmetic. Prerequisite: consent of instructor.

435-C91-1,2,3 Accelerated Mathematics for ISP: Second Year 1. Fourier series and boundary value problems. 2. Probability and statistics. 3. Complex analysis, elements of group theory. Students may not receive credit for both C91-1 and C16 or for C91-3 and C05. Ordinarily taken only by students in ISP. Prerequisites: B91-1,2,3; Physics A25-1,2,3.

435-C92-1,2,3 Accelerated Mathematics for MMSS: Second Year 1. Probability theory and its social science applications. 2. Econometric methods. 3. Stochastic processes. Students may not receive credit for both C92 and C30. Prerequisite: second-year standing in MMSS.

435-C95-0 Undergraduate Seminar (1–4 units) Topics of modern mathematics and relationships among different branches of mathematics. Open only to superior students by consent of department.

435-C99-0 Independent Study Open on approval of department to undergraduates who are qualified to do independent study and have a definite plan of study. Students who wish to enroll in C99 must file a plan of study with the department before registration.

Neurobiology and Physiology
The Department of Neurobiology and Physiology does not offer a major to incoming students. See Biological Sciences, Undergraduate Program in, for a description of the major in biological sciences.

Neuroscience Program
The Neuroscience Program provides an opportunity for undergraduates to do specialized work, including independent research during the academic year and Summer Session, on theoretical and practical approaches to the study of brain function.

On the recommendation of the program director, students who complete the approved course of study may apply for an ad hoc major in neuroscience. Participation in the program does not require election of the ad hoc
major in neuroscience. Students might instead follow the curriculum and, by the addition of appropriate courses, complete one of the regular major programs in biological sciences, psychology, or chemistry.

Program of Study

- **First year**
  - Biological Sciences B10-1 Genetics and Evolutionary Biology
  - Biological Sciences B10-2 Biochemistry and Molecular Biology
  - Biological Sciences B10-3 Physiology and Cell Biology
  - Chemistry A01 General Chemistry
  - Chemistry A02 General Inorganic Chemistry
  - Chemistry A03 General Physical Chemistry
  - Mathematics B14-1,2,3 Calculus
  - Psychology B12 Introduction to Neuroscience

- **Second year**
  - Chemistry B10-1,2 Organic Chemistry
  - Psychology B01 Statistical Methods in Psychology
  - Psychology C12-1,2 Neurobiology and Behavior (or equivalent)

- **Third year**
  - Biological Sciences C02 Fundamentals of Neurobiology
  - Biological Sciences C03 Molecular Neurobiology
  - Biological Sciences C04 Developmental Neurobiology
  - Biological Sciences C90 Molecular Biology
  - Physics A35-1,2,3 General Physics

- **Fourth year**
  - Biological Sciences C77 Sensory Neurobiology
  - Biological Sciences C91 Eukaryotic Regulatory Mechanisms Seminar
  - Psychology C95 Psychobiology Research Seminar

Philosophy

Perhaps the most notable feature of the Department of Philosophy is its pluralism—its commitment to exposing students to a broad range of philosophical traditions and philosophical issues. The department, long recognized as a leader in contemporary continental philosophy, also offers a strong array of courses in ancient, medieval, and modern philosophy as well as in other contemporary philosophies. All the major systematic areas of philosophy are taught, many of them from different perspectives in different courses. The research interests of members of the department show a similar breadth. This pluralism enables students to see philosophy’s application to all areas of life and to appreciate the diversity of approaches possible in philosophy.

Major in Philosophy

Because the study of philosophy involves the critical discussion of the most fundamental questions asked by human beings, it helps develop breadth of understanding and clarity of thought. This character of philosophical inquiry makes a double major attractive to many students. Moreover, with appropriate supporting courses, a philosophy major can be a sound preparation for many careers, whether or not they involve further study.

The core of our program is a firm grounding in the history of philosophy. Against this background, students can tailor a program that meets most fully their particular interests. Full descriptions of the courses offered each quarter are available in the department office two weeks before advanced registration.

Departmental courses (12)

Students should complete these required courses, especially B10-1 and B10-3, as early as possible, since material covered is a prerequisite to more advanced work.

- **Logic:** A50
- **History of philosophy:** B10-1, B10-3, B12 or B61, C10
- Of the remaining seven courses, at least four must be at the C level, and none may be at the A level. We strongly encourage our students to take at least one quarter of C95, a seminar open only to majors in their junior or senior year.

Minor in Philosophy

The minor in philosophy requires students to be well-grounded in the history of philosophy, especially ancient and early modern, covering the major texts of ethical and political theory as well as the major texts of epistemology and metaphysics. The emphasis on argument and logical structure in philosophy requires students to be familiar with contemporary logic, at least up to the level of the first-order predicate calculus. Beyond this foundational requirement, students take four courses tailored to their individual interests and, typically, to complement work being done in their major. To provide the greatest latitude for this, only three of the four remaining courses need be at the C level.

Minor course requirements (8 units)

- Four foundation courses: A50, B10-1, B10-3, B61
- Four philosophy electives: no A-level courses, at least three C-level courses

Honors in Philosophy

To be admitted to honors, a student must have a grade point average of 3.3 or above in the philosophy major and declare candidacy during the spring quarter of the junior year. The student must take C95 at least once. Declaration of candidacy involves approval of the project by a faculty adviser. The candidate then takes C98 in three successive quarters and submits a paper demonstrating an appropriate level of research or reflection. The paper is then read by the adviser and another faculty member. Their comments are submitted to the Committee on Undergraduate Studies, who recommends approved nominations to the CAS Committee on Superior Students and Honors. For more information, consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.
Courses Primarily for Freshmen and Sophomores
Beginning students of philosophy should take A10, A11, or A50 during their first year. Students with an informed interest in philosophy, especially those intending to choose philosophy as a major, should begin with B10-1 and B10-3 in their first year.

439-A09-6 Introductory Seminar in Philosophy
Introduction to philosophy: special topics or a general survey. Offered in small, discussion-oriented classes.

439-A10-0 Introduction to Philosophy
Fundamental problems and methods of philosophy.

439-A11-0 Introduction to Contemporary Philosophy
Major problems and types of contemporary philosophy. Representative writings of the 20th century.

439-A15-0 Society and the Individual
Traditional and contemporary moral problems concerning the relation of the individual to society: the rule of law, punishment, abortion, euthanasia, personal liberty, war, revolution.

439-A50-0 Elementary Logic I
Study of argument through the use of elementary formal systems of deductive inference. Informal fallacies and nondeductive modes of inference. First quarter of A50-B50-C50 sequence.

439-B05-0 Introduction to Oriental Philosophy
Philosophic conceptions developed in the Orient. Comparison with Western thought.

439-B09-0 Introduction to Existentialism
The principal sources of existential philosophy: Kierkegaard, Jaspers, Marcel, Nietzsche, Sartre, H. deleuze, M. erleau-Ponty, and others.

439-B10-1,2,3 The History of Philosophy

439-B20-0 Science in Human Culture
Interaction between science and other aspects of human culture. Emphasis on critical thinking about controversial issues. Content varies, e.g., creationism and sociobiology: abortion. May be repeated for credit with different topic.

439-B50-0 Elementary Logic II
Formal systems of deductive inference and their properties. Translation from ordinary language to formal languages, including first-order quantification and identity and related philosophical problems. Second quarter of A50-B50-C50 sequence. Prerequisite: A50.

439-B54-0 Scientific Method in the Natural Sciences
Philosophical and methodological issues in the natural sciences, such as the discovery and testing of hypotheses, explanation, theory selection, the nature of scientific laws, causality, space and time, determinism. Prerequisite: one course in the natural sciences.

439-B55-0 Theory of Knowledge
Basic philosophical questions about human knowledge, focusing on skepticism; competing theories of knowledge.

439-B60-0 Ethics
Representative theories of human conduct and character, dealing with such issues as the nature of the good, duty, happiness, virtue, freedom, and moral responsibility.

439-B61-0 Classics of Ethical and Political Theory
Classical works of moral and political philosophy from the ancient, medieval, and modern periods. Individual offerings may concentrate exclusively on moral or on political philosophy and may consider works from one period only.

439-B63-0 Social and Political Philosophy
Issues such as the rationale for existing in society, the justification and proper limits of political power, and the most desirable form of government.

439-B65-0 Introduction to the Philosophy of Law
Ethical and conceptual issues arising in connection with the law, such as the nature of law, the nature of liberty and of justice, and the theory of punishment.

Courses Primarily for Juniors and Seniors

439-C03-0 The Philosophy of Education
Educational theories of representative philosophers as related to their culture and the problems of their times.

439-C07-0 Studies in French Philosophy
One or more figures in French philosophy. The figures may vary, but the primary readings will be in French.

439-C10-0 Kant's Critique of Pure Reason
A close examination of Kant's Critique of Pure Reason.

425-C14-0 German Contributions to World Literature
When course is on Nietzsche; see German.

439-C20-0 Studies in Ancient Philosophy
The work of one important philosopher or philosophical movement before 500 A.D. Subject varies. May be repeated for credit with different topic. Prerequisite: B10.

439-C21-0 Studies in Medieval Philosophy
The work of one important philosopher or philosophical school between 500 and 1000 A.D. May be repeated for credit with different topic. Prerequisite: B10.

439-C22-0 Studies in Modern Philosophy
The work of one important philosopher or philosophical movement between 1500 and 1800. Subject varies. May be repeated for credit with different topic. Prerequisite: B10.

439-C23-0 Studies in Contemporary Philosophy
The work of one important philosopher or philosophical movement of the 19th and/or 20th centuries. Subject varies. May be repeated for credit with different topic. Prerequisite: B10.

439-C24-0 Phenomenology
Major works contributing to the phenomenological movement: texts by Husserl, Heidegger, Sartre, and M. erleau-Ponty. Questions of methodology, together with problems in theory of knowledge and ontology.
439-C53-0 Philosophy of Language 
Selected topics in the philosophy of mind: mind-body problem, problem of other minds, self-knowledge, personal identity, philosophical psychology. May be repeated for credit with different topic.

439-C61-0 Advanced Studies Ethics 
Philosophical study of a central problem, school of thought, or historical period or figure (e.g., Aristotle) in moral philosophy. Topics vary. May be repeated for credit with different topic.

439-C64-0 Principles of Political Philosophy 
Political power and authority; the notion of law; relations between society and the state; concepts of rights, liberty, equality, and justice. The problem of peace. Prerequisite: B63.

439-C66-0 Advanced Studies in Philosophy of Religion 
Central problems in the philosophy of religion.

439-C67-0 Philosophical Issues Concerning Technology 
Normative issues raised by technology, such as whether technology has intrinsic values and whether it is possible to make technology serve humane ends. Prerequisite: consent of instructor.

439-C68-0 Problems in Social and Political Philosophy 
Philosophical analysis of the social and political thought of a school, an individual philosopher, or an epoch. Problem varies.

439-C69-0 Special Topics in Philosophy 
Topics vary from year to year; may be repeated for credit with different topic.

439-C95-0 Junior-Senior Seminar 
Open only to majors in their junior or senior year.

439-C98-1,2,3 Senior Tutorial 
Undergraduate honors thesis. Grade of K given in C98-1 and C98-2. Prerequisite: C95 or approval of the chair.

439-C99-0 Independent Study 
Open to properly qualified students with consent of department.

Physics and Astronomy

The study of physics or astronomy provides an intellectual foundation appropriate to any field. The emphasis on quantitative thinking and mathematical analysis that characterizes physics and astronomy furnishes a good background for almost any career.

Students who major in physics or astronomy normally take A35-1,2,3 or A90-1,2,3 in their freshman year. Exceptionally qualified students may take Physics A25-1,2,3 with consent of the department. Depending on their high school preparation, majors in physics and astronomy normally also study mathematics in their freshman year, starting with M mathematics B14-1, B14-2, or B14-3. (See the prerequisites for Physics A35-1,2,3; students taking Physics A25-1,2,3 must be enrolled in either M mathematics B90-1,2,3 or B91-1,2,3.)
Students in the College of Arts and Sciences may complete their science distribution requirement by taking any of the following courses: Physics A03, A30-1,2, A35-1,2; Astronomy A01, A02, A03, or A20. Physics A03 and the four astronomy courses allow students who have taken only high school mathematics to explore important ideas in the physical sciences.

**Major in Physics**

The physics major is designed to help students acquire a broad and varied background in physics and related fields. The three basic steps toward completing the physics major are (1) fulfilling prerequisites in introductory physics and calculus; (2) taking a core sequence of courses in classical physics, modern physics, and mathematics; and (3) completing a course concentration in areas such as advanced physics, astronomy, or materials science.

**Departmental courses**

**Basic courses (6 units)**
- Mathematics B14-1,2,3
- Physics A25-1,2,3 or A35-1,2,3 or A90-1,2,3

**Core sequence (9 units)**
- Mathematics B15, B17, B21 or B20-1,2,3 or B91-1,2,3
- Mathematics C16-0
- Physics C30-1, C32-0, C33-1, C39-1, C59-3

**Concentration:** majors must choose one or more of the following areas
- Advanced physics (6 units)
  - Physics C59-1, C30-2, C33-2, C39-2
- two other C-level physics or astronomy courses except C35-0, C98, C99
- Astronomy (6 units)
  - Physics C30-2, C33-2, C39-2
- Astronomy B20
  - two other C-level astronomy classes except C98 or C99
- Materials Physics (8 units)
  - Chemistry A01, A02 or A71, A72
  - Physics C37-0, C39-2
- Materials Science and Engineering C16-1,2 plus two courses chosen from C32, C55, C61, C80
- Additional areas of concentration are currently under development. Students should check with the department's director of undergraduate studies to learn of the most recent updates to the curriculum.

Students intending to go to graduate school to continue their study of physics and/or astronomy should also consider taking some or all of the following:
- 2 or 3 units of C99 undertaken with the supervision of a faculty member and consisting of a research project in the student's area of concentration
- Mathematics C05, C34
- Selected introductory graduate courses such as Physics D11-1,2

Students should discuss specific options in undertaking this advanced program of study with the director of undergraduate studies before the end of the sophomore year.

**Minor in Physics**

The minor in physics gives students a basic understanding of the most essential concepts in the field. It carries the same prerequisites as the physics major, a somewhat lighter core, and two physics electives. Students choosing the minor in physics must also complete the following six prerequisites or their equivalent.

**Prerequisites:** Mathematics B14-1,2,3; Physics A25-1,2,3 or A35-1,2,3 or A90-1,2,3

**Minor sequence (8 units)**
- Mathematics B15, B17, B21 or B20-1,2,3 or B91-1,2,3
- Mathematics C16-0
- Physics C30-1, C32-0, C33-1, C39-1, C59-3
- Two other C-level physics or astronomy courses except C98 and C99

**Integrated Science Program**

The Integrated Science Program (ISP) is a highly selective BA program in CAS that includes Physics A25-1,2,3 and C39-1,2,3 and Astronomy C31 as part of its curriculum (see the Integrated Science Program section of this catalog). A double major in ISP and physics is feasible in four years of study. See the director of undergraduate studies in physics or the director of ISP for detailed requirements.

**Honors in Physics or Astronomy**

The honors program in physics and astronomy provides outstanding physics or astronomy majors with the opportunity to participate in research, under the supervision of a faculty adviser selected by the student. The program culminates in a written report that, in conjunction with the student's academic record, forms the basis for faculty decisions on the award of departmental honors. (Note that a student need not enter the honors program to participate in research. Students are welcome to initiate research projects by enrolling in C99 at any point in their undergraduate studies.)

The honors program is administered by the department's Undergraduate Curriculum Committee. This committee consists of the director of undergraduate studies, the assistant chair, and three other faculty members appointed by the chair of the department. The director of undergraduate studies serves as the departmental honors coordinator.

Physics or astronomy majors are eligible to participate in the honors program when they maintain an overall
grade point average of 3.3 or higher and a grade point average of 3.3 or higher in all physics, astronomy, and mathematics courses. These criteria also apply to all classes taken after the student has formally entered the honors program. Students who do not satisfy these requirements at graduation cannot be granted departmental honors.

Students who meet the above criteria and wish to participate in the honors program must notify the director of undergraduate studies. If the student has not yet selected an honors research adviser, the director can assist them in finding an appropriate faculty mentor.

Further details on completing the honors program and writing the honors thesis can be obtained from the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

**Advanced Placement**

Freshmen who have taken a calculus-level physics course in high school may waive parts of the introductory physics sequence in the following ways:

1. A score of 4 or 5 on the College Board Advanced Placement Physics C1 exam (Mechanics) and/or the C2 exam (Electricity and Magnetism) will give the student full credit for Physics A35-1 and/or A35-2, respectively.
2. A score of 4 or 5 on the College Board Advanced Placement Physics B exam (algebra-based physics) will give the student full credit for Physics A30-1 and A30-2.
3. A passing score on the departmental placement exam, given during New Student Week, will allow a student to place out of any or all parts of the A35-1,2,3 sequence. (No college credit is given for placing out of the course.)
4. High school students who have taken college-level physics while still in high school may apply to have that credit transferred to Northwestern. The class must have been taken on the campus of the accrediting college, and the student must have a transcript from the accrediting college. “College-level” classes taken at a high school are not eligible for transfer credit.

There is no placement exam or alternative credit mechanism for Physics A30-1,2,3.

**Physics**

**Courses Primarily for Undergraduates**

**447-A03-0 Ideas of Physics** Topics in modern and/or applied physics. Content varies; for example, relativity, the physics of music, and the progress of physics through history. Requires only high school mathematics and is designed for nonscience majors. Consult the Course and Teacher Evaluation Council listings for recent topics.

**447-A25-1,2,3 General Physics for ISP** General physics course relying extensively on calculus. Similar to A35-1,2,3 but more advanced and intended for ISP students. A concurrent advanced calculus course, Mathematics B91-1,2,3, is offered by the mathematics department. Prerequisite: first-year standing in ISP or consent of the department.

**447-A30-1,2,3 College Physics** Algebra-based physics primarily for premedical students who do not need to take calculus-based physics. Topics covered are similar to those of A35-1,2,3. Prerequisites: algebra and trigonometry.

**447-A35-1,2,3 General Physics** Classical physics for science and engineering majors and premedical students.

1. Mechanics. Prerequisites: M athematics B14-1,2; concurrent registration in M athematics B14-3.
2. Electricity and magnetism. Prerequisite: A35-1.
3. Introduction to modern physics; wave phenomena. Prerequisite: A35-2.

**447-A90-1,2,3 General Physics for Majors** General physics for physics majors. Topics covered are similar to those of A35-1,2,3. Prerequisites: M athematics B14-1,2; concurrent registration in M athematics B14-3 or A90-1.

**447-B52-0 Introduction to Computational Physics** Computing and its application to physics. Monte Carlo simulation of physical systems and numerical integration of equations of motion, discrete element methods in electromagnetism. Prerequisites: A35-3, knowledge of either FORTRAN or C at the level of ISP A01, Electrical and Computer Engineering A01 or Computer Science A10.

**447-C30-1,2 Classical Mechanics**

1. Newtonian mechanics, conservation laws, oscillations, the Lagrangian and Hamiltonian formalisms, central-force motion.
2. Two-particle collisions, motion in a noninertial reference frame, kinematics of rigid modes, systems with many degrees of freedom, and the wave equation. Prerequisites: A35-1 or equivalent; M athematics B15, B17, B21, or equivalent.

**447-C31-0 Thermodynamics** Equations of state, the three laws of thermodynamics, entropy, phase changes, ideal gas, applications. Prerequisites: A35-1,2,3 or equivalent.

**447-C32-0 Statistical Mechanics** Ideal gas, Boltzmann distribution, transport phenomena, fluctuation theory, Bose-Einstein and Fermi-Dirac statistics, applications. Prerequisites: C30-1; M athematics B15, B17, B21, or equivalent.
447-C33-1,2 Advanced Electricity and Magnetism
1. Vector calculus, electrostatics and magnetostatics, multipole expansion, solutions of Laplace’s equation by orthogonal function expansion, images, analytic functions.
2. Maxwell’s equations, electromagnetic equations, electromagnetic wave propagation and radiation, boundaries, microwave cavities, diffraction. Prerequisites: A35-1,2,3; Mathematics B15, B17, B21, or equivalent.

447-C34-0 Introduction to Relativity
Time dilation, length contraction, the Lorentz transformation, equivalence of mass and energy, relativistic momentum, space-time and some simple metrics, geodesics, classic tests of general relativity, black holes. Prerequisites: A35-1,2,3 or equivalent; C30-1,2; Mathematics B15, B17, B21, or equivalent.

447-C35-0 Modern Physics for Nonmajors
Survey of modern physics for nonmajors with a technical background. Relativity and quantum physics; their application to nuclear, atomic, and molecular structure and electrical conductivity. Prerequisites: A35-1,2,3 or equivalent. Does not fulfill C-level requirement for majors.

447-C36-0 Introduction to Solid-State Physics
Electrons in periodic lattices; phonons; electrical, optical and magnetic properties of metals and semiconductors; superconductivity. Prerequisites: C39-1,2.

447-C37-0 Quantum Mechanics
Introduction to quantum theory. Applications to atomic and molecular systems, with some discussion of the experimental foundations of quantum theory. Several simple systems (the harmonic oscillator, the one-electron atom, the hydrogen molecule, barrier penetration, etc.) are studied in detail. Prerequisites: second-year standing in ISP or C30-1, C33-1, Mathematics C16.

447-C38-0 Nuclear Physics
Topics covered include nuclei and their constituents, nuclear models, alpha and beta decay, nuclear reactions, nuclear fission and fusion, the strong, electromagnetic and weak interactions, and the fundamental particles and particle schemes. Prerequisites: C39-1,2.

447-C39-0 Physics Laboratory 1
Introduction to modern electronics, construction of elementary analog and digital circuits. 2. Introduction to microprocessors, hardware construction, interfacing to external devices, programming in BASIC, FORTRAN, or Pascal. 3. Classic experiments in atomic, nuclear, and solid-state physics using modern electronics and microcomputers. Independent work. Prerequisites: C33-1,2 or consent of instructor; C59-1,2 are not prerequisites for C39-3.

447-C99-0 Independent Study
Opportunity to study an advanced subject of interest under the individual direction of a faculty member. Open only to advanced students; consent of instructor required.

Astronomy
All A-level astronomy courses are specifically designed for students without technical backgrounds and require a mathematics background of only high school algebra.

407-A01-0 Modern Cosmology
Modern views on the structure of the universe, its past, present, and future. For science majors who seek to follow A20 with a more detailed course.

407-A02-0 Milky Way Galaxy
Structure of the galaxy, star formation, interstellar clouds and dust, star clusters, neutron stars and black holes, the galactic center, the future evolution of the sun and our solar system. For non-science majors who seek to follow A20 with a more detailed course.

407-A03-0 Solar System
The planets and their moons, the sun, comets, asteroids. For non-science majors who seek to follow A20 with a more detailed course.

407-A20-0 Highlights of Astronomy
Acquaints students with modern ideas about the solar system, stars (including black holes, neutron stars, and supernovae), galaxies, and the universe. Emphasizes fundamental principles and underlying concepts.

407-B20-0 Astrophysics
Classical mechanics, quantum mechanics, general relativity, statistical physics, fluid dynamics, and solid-state physics as they pertain to astrophysical phenomena. Prerequisites: Physics A35-1,2,3 or equivalent.

407-C25-0 Stellar Structure and Evolution
Physical conditions in stellar interiors. Comparison of theory and observations in stellar evolution. White dwarfs, neutron stars, and black holes. Offered alternate years. Prerequisite: B20.

407-C26-0 High-Energy Astrophysics
Physical processes occurring at high temperatures and pressures: X-ray and gamma-ray emission, cosmic rays, bremsstrahlung, synchrotron, inverse Compton radiation. Stellar and galactic accretion processes and jets, with applications to X-ray binaries, pulsars, and compact extragalactic objects. Offered alternate years. Prerequisite: B20.

407-C28-0 Interstellar Matter

407-C29-0 Galactic Structure and Dynamics
Observational topics include stellar populations, the disk and spheroidal components, galactic rotation, and the Galactic Center. Theoretical topics center on stellar dynamics,
including potential theory, stellar orbits, equilibria of collisionless systems, and spiral structure. Offered alternate years. Prerequisite: B20.

407-C30-0 Cosmology | Introduction to the concepts and observational foundations of modern big bang cosmology. Topics include the Hubble expansion, Friedmann universes, the cosmic microwave background radiation, big bang nucleosynthesis, inflation, growth of gravitational instabilities and galaxy formation, correlation functions, local density and velocity perturbations, and dark matter. Offered alternate years. Prerequisite: B20.

407-C31-0 Astrophysics | Stellar structure and evolution: basic equilibrium equations, physical conditions in the stellar interior, stellar energy sources, evolution of stars, nucleosynthesis, supernova phenomena, white dwarfs, neutron stars, and black holes. Prerequisite: Physics C39-3. Limited to students enrolled in the ISP or by consent of the physics department.

407-C60-0 Instruments and Techniques for Astrophysics | Introduction to the theory, design, and operation of modern X-ray, optical, and radio astronomical instrumentation: photon statistics, noise sources, Fourier analysis, signal processing, and atmospheric limitations. Offered alternate years. Prerequisite: B20.

407-C99-0 Independent Study | Opportunity to study an advanced subject under the individual direction of a faculty member. Open to all advanced students. Consent of instructor required.

Political Science

A knowledge of political science is central to any occupation or profession that needs an understanding of human behavior, to the relationships between people and governments, or to the analysis and communication of information about public problems. A background in political science is virtually indispensable for people in politics and government, lawyers, journalists, scientists, business managers, or people working in medicine. Such professionals are in constant need of information on and understanding of the political, legal, governmental, and public implications of their fields. The Department of Political Science is internationally recognized for excellence at both the undergraduate and graduate levels.

The department is especially strong in American politics and government; the politics of foreign countries, especially in Europe, Latin America, Asia, and Africa; international studies; law and politics; political economy; and political theory. Much of the department’s work is associated closely with the activities of the Program of African Studies, the Center for International and Comparative Studies, and the Institute for Policy Research, all of which are outstanding in their respective specialties.

The department offers an undergraduate major and minor and also graduate programs leading to the MA and PhD degrees in political science.

Major in Political Science

As soon as students have declared a major in political science, a department adviser can be assigned to consult regularly with them about the program of study. Students planning to major in political science should try to complete the B-level prerequisites and one C-level course by the end of their sophomore year.

To prepare for research, students normally take the required C95 in the junior year. They should take at least one of the following before taking C95: C10, C11, C12. All majors also are urged to acquire a working knowledge of a foreign language.

Departmental courses

Basic courses: three courses chosen from B01, B04, B20, B21, B30, B40, B50

Major courses: seven C-level courses in political science, one of which must be C10, C11, or C12 and another of which must be C95

Related courses: five quarter-courses in anthropology, economics, history, philosophy, psychology, or sociology, of which at least two must be at the C level; no more than one may be at the A level

Minor in Political Science

The minor in political science offers students the opportunity to acquire a solid foundation in the discipline as well as significant exposure to advanced courses. It also is designed to allow students to develop specialized competencies.

Minor course requirements (6 units)

- At least two B-level courses chosen from B01, B04, B20, B21, B30, B40, B50
- Four additional political science courses, at least three at the C level

Students should begin pursuing the minor with B-level courses, which provide a general introduction to major subfields of political science as well as background for C-level courses. They may pursue specialized interests in the minor. For example, for students who aspire to a legal career, an appropriate minor might concentrate on law and politics and could include B30, C30, C31, C32, or C33. Minors can political processes, or they may choose an array of courses that cut across subfields rather than concentrate on one or two areas. To develop an individual program of study for a minor in political science, students must consult with the director of undergraduate studies in the department.
Four-Year BA/MA
The department offers a four-year BA/MA program in political science for outstanding undergraduate majors. Interested students should contact the director of undergraduate studies no later than the winter quarter of the junior year and should see Four-Year Master’s Programs in the Undergraduate Education section of this catalog.

Honors in Political Science
Majors with outstanding records both overall and within the department may apply for graduation with departmental honors. The primary route to earning the departmental recommendation for honors involves enrolling in C98 Honors Tutorial, a two-quarter course that requires writing a senior thesis. Students interested in exploring an alternate route to honors should meet with the director of undergraduate studies in the junior year. Either way, departmental honors requires outstanding work in connection with a research project. See Honors under Academic Policies earlier in this section of the catalog.

The Teaching of Political Science
CAS students pursuing a major in political science who also wish to be certified for secondary teaching must be admitted to the Secondary Teaching Program in the School of Education and Social Policy (SESP) and complete all requirements as outlined in the SESP section of this catalog. Students are urged to contact the Office of Student Affairs in SESP as early as possible in their academic career.

Courses Primarily for Undergraduates
Political Theory
These courses examine the ideas that inform the thinking of today’s citizens, representatives, and political scientists. They are organized by historical periods and conceptual similarity.

449-B01-0 Introduction to Political Theory
Ideas like power, freedom, justice, and rationality in the work of major political theorists. How political thought influences political institutions and behavior.

449-C01-0 Classical Political Theory
Contributions of classical political theorists, such as Plato, Aristotle, and Cicero, and their modern applications. Modern concepts of scope and method of political science.

449-C02-0 Modern Political Thought
The nation-state, modern science, and the industrial revolution as context for a revolution in political ideals. Machiavelli, Hobbes, Locke, Rousseau, Marx. Relation of ideas to social movements and political institutions.

449-C03-0 Concepts in Democratic Theory
Contemporary analyses of the meanings of liberty, equality, representation, and other key concepts in the theory and practice of democracy.

Research Methodology
Courses in this field prepare students to do original research on the causes and consequences of political phenomena. The methodological techniques are often transferable to research problems in government and business.

449-C10-0 Elementary Statistics for Political Research

449-C11-0 Methods of Political Research
Introduction to methods and techniques of political research: research design, experimentation, comparative inquiry, measurement, data collection, and data analysis. Application of these methods to political phenomena.

449-C12-0 Logic of Political Inquiry
Political science as “science.” Identity sources, construction, functions, and validation of social science theory and explanation from varied perspectives. Not open to students who have taken Sociology C26.

449-C15-0 Introduction to Positive Political Theory
Techniques of formal modeling employed in the analysis of politics. Arms races, deterrence, bargaining and coalitions, rational choice, social choice and Arrow’s paradox, voting, game theory. Prerequisite: C10.

American Politics
These courses deal with the dynamics of behavior within and between domestic political institutions. Although focusing on American politics, the courses usually involve comparisons with behavior and institutions in foreign countries.

449-B20-0 American Government and Politics
The structure and process of American politics from competing perspectives. Analysis of representation, voting, interest groups, parties, leadership, and policy-making institutions. The gateway course for the American politics subfield.

449-B21-0 Urban Politics and Policies
Structure of local and regional political power and its relation to social and economic structure of community.

449-C20-0 The Presidency
Contemporary presidency in terms of recruitment, presidential character, public opinion, institutional constraints, and foreign versus domestic policy making. Prerequisite: B20 or equivalent.

449-C21-0 Community Political Processes
Selected problems of mobilizing and exercising political power in local and regional jurisdictional units. Relationships between political structure and community needs and demands. Prerequisite: B21.

449-C23-0 Public Opinion and Voting Behavior
Who votes and for whom. Social, psychological, economic, and political factors influencing election choices. Sources of
opinions. Focus on American presidential elections but some comparative and nonpresidential material. Prerequisite: B20 or equivalent.

449-C24-0 Political Parties and Elections: Role of political parties in a democratic society. Topics include nomination, national conventions, political funding, campaigns, party organization, and national, state, and local parties.

449-C25-0 The Legislative Process: Organization of legislatures to make public policy; legislative-executive relations; impact of interest groups and other forms of citizen activity on legislative decision making. Emphasis on United States Congress. Prerequisite: B20 or equivalent.

449-C27-0 Black American Politics in the United States: Historical survey of black politics and relationship of blacks to the government. Relevance of both reformist and revolutionary strategies in the struggle for black liberation.

449-C28-0 State Politics of the United States: Political process at the state level in the United States. Variety of institutional forms and decision-making processes attached to different kinds of issues existing in the several states. Prerequisite: B20.

Law and Politics
These courses study the role of the judiciary at the national, local, and emerging levels of government. They also investigate issues in jurisprudence and the administration of justice.

449-B30-0 Introduction to Law in the Political Arena: Roles of law in society and politics—how disputes are resolved, organization of the bar, why people litigate, the consequences of litigation. Compares common law, civil code, and other legal traditions.

449-C30-0 The Politics of Local Justice: Local justice systems, with emphasis on trial courts, civil and criminal litigation, and the political consequences of the involvement of the law in social conflicts.

449-C31-0 Appellate Processes: Operation of appellate courts, with emphasis on the United States Supreme Court. Decision making by appellate courts and the development of public policy.

449-C32-0 Constitutional Law I: Introduction to interpretation of the United States Constitution by the Supreme Court. Judicial review, federalism, separation of powers, economic and religious liberty, and personal privacy. Prerequisite: B20 or B30.

449-C33-0 Constitutional Law II: Civil and Political Rights: Consideration of decisions of the United States Supreme Court dealing with civil and political rights, including equality, freedom of expression, and criminal procedures. Prerequisite: B20 or B30.

International Politics
This field includes the study of major actors and arenas in the world scene, major processes through which cooperation and conflict are managed in the international system, and ways in which change occurs and resources become allocated in the global system.

449-B40-0 Introduction to International Relations: Surveys basic concepts and processes in international and transnational relations, including major actors, management of conflict and cooperation, and systemic changes at the global level. The gateway course to the international politics subfield.

449-C40-0 Global Society: Survey of human problems of global dimensions, such as population, poverty, human rights, and war. Evaluation of the adequacy of existing institutions for handling these problems. Alternative forms of global organization.

449-C41-0 American Foreign Policy in a Global Context: Economic, military, and diplomatic dimensions of policy; internal and external influences on policy; theories of foreign policy decision making in the United States and other nations.

449-C42-0 International Organizations: Role of international organizations in international relations. Similarities and differences between international and other political institutions. Comparison of different types of international organizations.

449-C43-0 United States and Latin America: Development of policy; internal and external influences on policy; international systems, while others focus on certain types of political phenomena and make cross-national comparisons.

449-B50-0 Introduction to Comparative Politics: Emphasis may be on industrialized and/or developing states; socialist and/or capitalist states. Major issues include regime-society relations, revolution, and policy making.

449-C45-0 National Security: Problems of maintaining national security in the military and economic spheres; deterrence theory, nuclear weapons, arms control, and defense policy among the major powers.

Comparative Politics
This field analyzes political behavior and institutions in foreign countries and areas of the world. Some courses concentrate on understanding the politics of specific national systems, while others focus on certain types of political phenomena and make cross-national comparisons.

449-B50-0 Introduction to Comparative Politics: Emphasis may be on industrialized and/or developing states; socialist and/or capitalist states. Major issues include regime-society relations, revolution, and policy making.

449-C43-0 United States and Latin America: Interaction between U.S. foreign policy and Latin American politics. The evolving importance of Latin America in U.S. geopolitical objectives from the turn of the century through the Cold War and during the emerging post-Cold
War period. How the projection of U.S. power and influence shapes the domestic politics of selected countries.

**449-C46-0 Politics of European Unification** The development and prospects of the European Union are examined by placing it in geopolitical and historical context.

**449-C50-0 Communism and Post-Communism** Causes, processes, and consequences of revolutionary movements. Theories and case studies, including victorious and unsuccessful urban and rural-based movements.

**449-C51-0 Peasant Politics** Characteristics of agrarian economic structures, social organizations, and peasant politics, movements, and revolutions; elite responses to, interactions with, rural society through public policy, clientelist mobilization, etc.

**449-C52-0 Politics of East Asia** Examines East Asia as a site for studying various concepts in comparative politics: war, revolution, imperialism, modernization, dependency, development, authoritarianism, party politics, and democratization.

**449-C53-0 Politics in Latin America** Patterns of socio-economic development and regime forms in Latin America. Interaction of internal and international economic and political structures and processes.

**449-C54-0 Southeast Asian Politics** Exploration of the political economy of Indonesia, Singapore, Burma, the Philippines, Thailand, M alaysia, Vietnam, as well as the smaller states of Laos, Cambodia, East Timor, and Brunei. Focus on the post-World War II period; attention also paid to colonial influences and the Japanese invasion. Important themes include industrialization, human rights, and democracy.

**449-C55-0 Chinese Politics** Fundamental conflicts in Chinese politics; party-mass relations; class; the urban-rural split; and debates over ideology, democracy, and development strategy.

**449-C57-0 Politics of Post-Colonial States** Problems and political behavior in underdeveloped areas in regard to their internal affairs and international relations. Interplay between economic conditions and political patterns.

**449-C58-0 Nationalism** Social, linguistic, religious, and political bases of the rise of modern nationalism in Europe, Asia, and Africa; wars of national liberation in relation to imperialism and colonialism.

**449-C59-0 Politics in Africa** Political structures and relation of cultural factors to political stability and change; development of modern political systems.

**449-C60-0 Comparative Racial Politics** The interplay of racial, socioeconomic, and cultural tensions in Germany, Trinidad, and Britain. Methods of comparative analysis used to identify and distinguish patterns of racial politics between and within multiracial nation-states. Theories and concepts of race and ethnicity and their relationship to issues of state power, national identity, and social policy.

**449-C61-0 Democratic Transitions** Causes for emergence and breakdown of democracy in cases from Europe, Latin America, Africa, and Asia. Focus on relationship between capitalist economic development, international forces, and timing of democratization across the globe.

**449-C62-0 Politics of Western Europe** Historical development, mass behavior, interest groups and parties, policy making, and social and economic policy.

**Public Policy and Political Economy**

The consequences of governmental action on political, social, and economic activity are analyzed in these courses. Other courses concerned with public policy and political economy are listed under the law and politics and international politics subfields.

**449-B04-0 Politics and Nature** Introduction to the study of environmental policy. Consideration of some fundamental issues and concepts concerning the maintenance of a livable planet, such as sustainable development, common property regimes, transformation of the environmental movement from a primary emphasis upon nature conservation to a complex set of foci concerning biodiversity, possible climate change.

**449-C71-0 Environmental Politics** Political problems associated with human impact on natural environment; pollution, natural resources, public lands, land use, energy, and population.

**449-C72-0 The Politics of the Global Economy** Interactions of politics and economies in the relations between nations and among subnational groups. Theories of imperialism, dependency, and the evolution of the global system; international policy and institution reform.

**449-C74-0 Politics and Markets** How democratic politics and markets interact. Examines the politics of policy choices democratic governments make and the economic impact those choices have. Explores some of the most significant ways in which the United States, Western Europe and Japan differ.

**449-C75-0 Comparative Politics of Business-Government Relations** Relations between business and government in a variety of economic, social, and political contexts. Patterns of influence in both business and government. Theories of business influence in politics, such as pluralism, corporatism, collective action, and instrumental and structural Marxism.

**449-C76-0 Comparative Capitalism in the Advanced Industrialized Countries** Different patterns of industrialization produce differences in the political organization of capitalism, i.e., in the position and role of labor and in
relations between business and the state. Historical roots of those differences and their implications for contemporary politics and policy.

Seminars, Independent Study, and Special Opportunities
C95 is required of all political science majors, who will be notified of scheduling arrangements in advance. C95 is ordinarily taken in the spring quarter of the junior year or the fall quarter of the senior year. With consent of the department, students may receive full credit for more than one quarter of C95 provided that, if C98 and C99 are also taken, C95 with C98 and C99 do not exceed a total of four course credits.

449-C90-0 Special Topics in Political Science
Designed for investigation of topics that are of current interest to students and faculty but are not adequately covered by other course offerings. No prerequisites. Offered in different quarters as announced.

401-C93-0 Chicago Field Studies Internship
See General Studies.

449-C94-0 Senior Linkage Seminar
Topics vary. Open only to senior majors and nonmajors.

449-C95-0 Political Research Seminar
Led by different members of the department, small seminars in research topics, providing students the chance to conduct research.

449-C98-1,2 Honors Tutorial
For seniors with excellent records, by department invitation. First quarter taken fall or winter for K grade, final grades given after research paper at end of second quarter. Two consecutive quarters. Prerequisite: C95.

449-C99-0 Independent Study
Study and research programs for unusual needs of political science majors. A written proposal, signed by the professor with whom the student will study, to be submitted to the department.

Portuguese
See Hispanic Studies.

Psychology
The study of psychology covers a wide range of topics in the natural and social sciences. It provides students a unique opportunity to increase their understanding of themselves and other people as developing individuals, biological organisms, and participants in society. Because of the strong research orientation of the department, it also provides an understanding of how research is done and an opportunity to participate directly in research.

Majors in psychology can lead in various directions after graduation. Graduate study can prepare students for a career as an academic, clinical, industrial, or other kind of psychologist. Psychology is a useful major for students planning careers in medicine, law, or management, as the department is strong in cognitive science, psychobiology, psychopathology, and social psychology. Whether or not students continue their education beyond the bachelor's degree, they will find that the psychology major provides knowledge about human behavior and methods of research and data analysis that is valuable in business, the helping fields, and other occupations.

At the graduate level, the department recognizes several specialties with programs leading to the PhD. Though opportunities for study and research are available to undergraduates in all these areas, there is only one undergraduate psychology major. Its requirements are designed to give every student a mastery of the basic methods and a balanced exposure to different aspects of psychology. Beyond that, students are encouraged to follow their interests in regular courses and in independent study. Extensive laboratory facilities, including a number of microcomputers, are available.

Major in Psychology

Departmental courses
Basic course: A10

Major courses: B01, B05, and at least seven additional psychology courses, subject to the following restrictions:
• At least one upper-level research course chosen from C01, C11, C13, C16, C21, C27, C33, C34, C35, C42, C51, C62, C97-2, C98 (any course listed both here and in one of the following two categories may be counted toward that category as well)
• At least two personality/clinical or social courses chosen from B04, B15, C01, C03, C06, C16, C26, C84, C85
• At least two cognitive or physiological courses chosen from B12, B28, C11, C12-1, C12-2, C21, C24, C27, C33, C34, C35, C60, C61, C62
• At least three C-level courses
• No more than two courses chosen from Cognitive Science B07, B10, and B11 may be counted toward the requirements
• No more than one quarter of C97-1 and C99 may be counted toward the requirements
• No more than one quarter of C97-2 may be counted toward the requirements
• B39 may not be counted toward the requirements
• Psychology majors should be aware of the following restrictions imposed by the college:
  1) Students may not register for more than two total credits of C97-1 and C99 in any quarter.
  2) No more than nine total credits of C97, C98, and C99 may be counted toward CAS graduation requirements
Related courses
- Any three courses from the following: mathematics at the B level or higher, statistics at the C level or higher, and computer science at any level
- Any two courses from biological sciences, chemistry, or physics

Minor in Psychology
The minor in psychology reflects the view that the most appropriate undergraduate study of psychology combines a methodological core with breadth of content. The minor therefore contains the general prerequisite (A10), the two central methods courses (B01 and B05), and at least one course from each of the two main content areas defined for the major.

Minor course requirements (7 units)
- A10
- B01 and B05
- Four additional psychology courses, subject to the following restrictions:
  - at least one personality/clinical or social course chosen from B04, B15, C03, C06
  - at least one cognitive or physiological course chosen from B12, B28, C12-1, C24, C60, C61, C62
  - at least two C level courses
- No more than one quarter of C97-1 and C99 may be counted toward the requirements
- B39 may not be counted toward the requirements

Integrated Science Program
The Integrated Science Program is a highly selective BA program within CAS (see Integrated Science Program). Students in ISP who also wish to complete a major in psychology should consult with the program director and the director of undergraduate studies in psychology as early as possible to determine their specific additional major requirements.

Honors in Psychology
Each spring quarter a few students with superior records in psychology are invited into C98 for the following academic year. Those who accept carry out a yearlong research project that, if completed, commonly leads to departmental honors in psychology. In exceptional circumstances honors in psychology may also be achieved by carrying out a major research project through two or more quarters of C99. For more information, consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

Courses Primarily for Freshmen and Sophomores
451-A10-0 Introduction to Psychology Basic psychological facts and principles of normal behavior. Laboratory experience is included and provides an introduction to psychology as a research science.

451-B01-0 Statistical Methods in Psychology Measurement scales. Descriptive statistics. Introduction to probability theory and sampling distributions. Inferential statistics, including t-test, ANOVA; correlation and regression. Prerequisite: A10; some college mathematics recommended.

451-B04-0 Social Psychology Psychological processes in social behavior. Prerequisite: A10.

451-B05-0 Research Methods in Psychology Study of methods of psychological research; experimental design; reliability and validity; review and application of statistics; execution and reporting of psychological research. Prerequisite: B01.

451-B12-0 Introduction to Neuroscience Brain processes in relation to behavior, including memory, perception, and motivation. Dissection, histology, and surgery for brain stimulation. One college or advanced high school course in biology recommended.

451-B18-0 Developmental Psychology Development of cognitive, social, and other psychological functions. Prerequisite: A10.

451-B28-0 Cognitive Psychology Introduction to research conducted by psychologists studying mental processes such as memory, reasoning, problem solving, and decision making. Prerequisite: A10; B05 is recommended.

451-B39-0 Marketing Management Basic principles and applications of marketing management; market segmentation, target marketing, brand positioning; survey of market research and consumer behavior; marketing of services, nonprofits, the arts. Prerequisite: one introductory behavioral social science course (e.g., anthropology, psychology, sociology).
Courses Primarily for Juniors and Seniors

451-C01-0 Personality Research Current research in personality, with emphasis on experimental approaches and methods. Basic concepts of test reliability and validity. Lecture and laboratory. Prerequisites: B05, B15.

451-C03-0 Psychopathology Deviations in psychological processes as they occur in psychopathology. Prerequisite: A10.

451-C06-0 Introduction to Clinical Psychology Definition and history of clinical psychology, personality theory in clinical psychology, diagnosis and classification of disorders, assessment, psychotherapy, and ethical issues. Prerequisite: A10.

451-C11-0 Human Learning and Memory The nature of human learning and memory with an emphasis on research methodology and report writing. Lecture and laboratory. Prerequisites: B05, B28.

451-C12-1,2 Neurobiology and Behavior 1. Neurophysiology, neuroanatomy, and electrophysiological substrates of behavior. Prerequisites: A10; one biology course. 2. Neuroanatomical, electrophysiological, and biochemical substrates of psychological processes and biofeedback. Prerequisite: C12-1 or equivalent; B05 recommended.

451-C13-0 Research-Focused Seminar Topic to be announced. Discussion and critical analysis of relevant research methods. Prerequisite: B05; additional prerequisites may apply for particular topics. May be repeated for credit with different topic.

451-C14-0 Special Topics in Psychology Topic to be announced. Prerequisites vary. May be repeated for credit with different topic.

451-C16-0 Experimental Social Psychology Social psychological experimentation (laboratory experiments, field experiments, quasi-experiments), with students conducting original research. Prerequisites: B04, B05.

451-C21-0 Neuroscience and Behavior Laboratory Classical exercises in the physiological psychology laboratory, including brain-wave recording and electrophysiology. Prerequisites: B05, C12-2.

451-C24-0 Perception Human perception, particularly vision. Also hearing, taste, smell, and touch. Biological foundations, development, and disorders of perception. The role of the senses in everyday life. Prerequisite: A10.

451-C26-0 Personality Development Research methods, theories, and facts relating to the development and modification of children's attitudes and behavior. Prerequisite: consent of instructor.

451-C27-0 Formal Models of Cognition Practical aspects of formal modeling in psychology. Possible topics: curve fitting, distribution theory, reaction-time models, semantic and neural network models, models of human choice and decision making, multidimensional scaling. Prerequisites: B05, B28; Mathematics B14-3 or equivalent.

451-C33-0 Psychology of Thinking Research methods and recent experimental findings for simple types of human thinking. Lecture and laboratory. Prerequisites: B05, B28.

451-C34-0 Psychology of Language Exposure to original research, journal articles, theoretical and methodological criticism, and experimental design. Prerequisites: B05, B28, or consent of instructor.

451-C35-0 Decision Making Human decision making from both descriptive and prescriptive perspectives. Theories and models of decision making applied to a variety of contexts. Prerequisites: B05, B28.

451-C37-0 Human Sexuality Sexual development and differentiation, deviations, dysfunctions, and controversies in sexology. Prerequisite: A10.

451-C42-0 Biological Bases of Mental Illness Effects of brain abnormalities on cognition, emotion, and behavior. Neurological aspects of mental disorders. Discussion of theories and research methods. Prerequisite: B05, C03, or consent of instructor; B12 or C12-1 strongly recommended.

451-C51-0 Advanced Statistics and Experimental Design Theory and use of advanced analytic techniques, including exploratory data analysis, model fitting, analysis of variance, and multidimensional scaling. Advanced topics in experimental design. Prerequisites: B05, Mathematics B14-3.

451-C60-0 Human Memory and Cognition In-depth survey of recent work in human memory and cognition. Prerequisite: B28 or consent of instructor.

451-C61-0 Brain Damage and the Mind Survey of human cognition (including attention, memory, and awareness) as studied via investigations of brain damage and modern brain imaging techniques. Prerequisite: A10, B12, or Cognitive Science B10.

451-C62-0 Cognitive Development Development of cognition and perception. Infant perception; development of human memory, concepts, language, and expertise. Prerequisites: B05, B18 or B28, or consent of instructor.

451-C84-0 Interpersonal Relations Psychological processes in social perception and interaction; focus on attraction and relationships, aggression, and conflict. Prerequisite: B04.

451-C85-0 Psychology of Attitudes Survey of social psychological research on attitudes; focus on the formation and measurement of attitudes, their structure and
Minor in Religion
The minor in religion provides a coherent and balanced set of courses with work on general theories of religion and Western and Eastern religious traditions. Enrollment in C95 ensures that students completing the minor have the opportunity to interact with religion majors. Students minoring in religion may preregister for courses with majors.

Minor course requirements (6 units)
• A10, C95
• Four other religion courses, at least two at the C or D level, at least one in Western religions (Christianity, Islam, Judaism), and one in Eastern religions

Honors in Religion
Superior students in the department become eligible for departmental honors by writing a senior thesis. This is usually accomplished by enrolling in two quarters of C96 during the fall and winter quarters of their senior year. Students who intend to qualify for honors should notify the undergraduate adviser in writing by the end of the spring quarter of the junior year. For more information, consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

Courses Primarily for Freshmen and Sophomores

429-A10-0 Religion in Human Experience
Religion as it has appeared in the past and as humans continue to express it in their personal and social lives.

429-A11-0 Varieties of Religious Tradition
Introduction to a variety of the major religious traditions of the world.

429-B10-0 Introduction to Hebrew Bible
Major genres of Old Testament literature. Basic theological views and the social-political history of ancient Israel.

429-B11-0 New Testament Origins
The beginning, development, and content of the New Testament. Its Jewish and Hellenistic environment.

429-B20-0 Introduction to Hinduism
Unity and diversity of Hindu mythology, beliefs, and practices from ancient times to the present.

429-B22-0 Introduction to Buddhism
The Buddha’s life and teachings, the traditions that developed from this teaching, and the systems of meditation, rituals, and ethics.

429-B23-0 Religion in China
Historical development of religious traditions in China from ancient to modern times: Confucianism, Taoism, and Buddhism.

429-B24-0 Introduction to Judaism
Main concepts in the theology of Judaism, main rituals and customs, and main institutions.
429-B25-0 Religion in Japan
Introduction to the religions in Japan from ancient to modern times, including Shinto, Confucianism, Taoism, and Buddhism.

429-B26-0 Introduction to Christianity
Christian doctrine, worship, and institutions in the various branches of Christianity.

429-B27-0 Introduction to Medieval Jewish Philosophy
Philosophic tradition of medieval Judaism focusing on the history of Judaism through study of the thought of Moses Maimonides (1138–1204), the most important Jewish medieval philosopher.

429-B28-0 Introduction to Islam
Principal beliefs and practices of Muslims set against the historic development of the faith.

Courses Primarily for Juniors and Seniors

Buddhism

429-C24-0 Buddhism in the Contemporary World: Traditional and Reform
Buddhism’s reinterpretation of its thought and practice in response to postcolonial modernizations.

429-C25-0 Theravada Buddhism and Culture
Theravada Buddhism in interaction with its culture.

429-C38-0 Central Ideas of Mahayana Buddhist Thought
Mahayana philosophy of life, its concept of reality, notion of individual existence, and view of the world.

429-C44-0 Nagarjuna’s Madhyamika Philosophy

429-C46-0 Contemporary Buddhist Philosophy

429-C48-0 Zen Buddhism
Historical development of Zen Buddhist theory and practice.

429-C55-0 Topics in Buddhism
May be repeated for credit with different topic.

Judaism

429-C05-0 History of Judaism
Survey of the religious history of Judaism from the post-Biblical period to the emancipation.

429-C06-0 Judaism in the Modern World
Impact of emancipation and modernity on Judaism. Fundamental problems that emancipation and modernity precipitate and the radical changes they bring to the religious expression of Judaism.

429-C13-0 Varieties in Ancient Judaism
Introduction to the Judaisms that flourished from the fifth century B.C. to the third century A.D.

429-C31-0 Jewish Thought in the 20th Century
Distinctive themes in the main 20th-century Jewish philosophers.

429-C32-0 The Rise of Rabbinic Judaism
Investigation of how Judaism was recreated after the destruction of the Temple in 70 A.D.

429-C34-0 Literary Expressions of Rabbinic Judaism
An examination of the forms of expression of Rabbinic Judaism: legal, mystical, philosophical, and poetic.

429-C35-0 The Art of Biblical Narrative
Ways in which the religious imagination of ancient Israel expresses itself through literary artistry.

429-C36-0 Religion and Mythology of the Ancient Near East
Myths, religious ideologies, and cultic practices of Sumer, Babylonia, Assyria, and Canaan, including Phoenicia; relation to ancient Greece and Israel, women, literature.

429-C37-0 Prophecy in Ancient Israel
Writings of ancient Israelite prophets and history of the prophetic movement; parallels with Near Eastern prophecy; prophecy in early Judaism and Christianity; themes and types of prophetic thought. Prerequisite: B10 or equivalent.

429-C52-0 Topics in Judaism
May be repeated for credit with different topic.

Christianity

429-C02-0 Christian Ethics
Content and role of ethics in Jesus’ formation of Christian teaching and in the theology of some recent Christian thinkers.

429-C12-0 Modern Study of Jesus
Recent approaches to the study of Jesus.

429-C51-0 Topics in Christianity
May be repeated for credit with different topic.

429-C60-0 Medieval Christianity
Major thought, institutions, and figures of medieval Christianity.

429-C61-1,2 Foundations of Christian Thought
Survey of the development of Christian thought. 1. Early or traditional Christianity. 2. Christian thought since the Reformation.

429-C64-0 The Idea of Sainthood in Christianity
Historical and contemporary conceptions of sanctity, especially in Roman Catholicism and Eastern Orthodoxy.

429-C65-0 The Christian Mystical Tradition
Writings of mystics (e.g., Meister Eckhart, Cloud of Unknowing, Julian of Norwich, Teresa of Avila) in their cultural context.

429-C69-0 Topics in Medieval Christianity
Selected themes in the history of Christianity during the Middle Ages. May be repeated for credit with different topic.

Islam

427-C55-0 Islam in Africa
See History.

429-C57-0 Topics in Islam
Selected topics in Islamic history and thought. May be repeated for credit with different topic.
medical knowledge and practice, medical ethics, and the boundaries between sickness and health. Topics addressed might include the authority of the physician, the role of the hospital, the social dimensions of racial and gender differences, and the changing conception of disease and healing.

Eligible courses (partial list)
- Anthropology C70 Anthropology in Historical Perspective
- Biological Sciences A60 Human Reproduction
- Civil Engineering B06 Environmental Literacy
- Classics C42 Early European Medicine
- Communication Studies B29 Communication Technology, Community, and Personal Identity
- European Thought and Culture B16 The Age of Enlightenment
- Geological Sciences B88 Earth in Science and Art
- History B75-1,2 History of Western Science and Medicine
- History C25 History of American Technology
- History C50-3,4 The Intellectual History of Europe
- History C75-1,2 Technology: History, Society, and Economy
- History C76-1,2 Science and Modern Society
- Philosophy B20 Science in Human Culture
- Philosophy B54 Scientific Method in the Natural Sciences
- Philosophy C25 Philosophy of Mind
- Philosophy C54 Advanced Topics in the Philosophy of Natural Science
- Philosophy C67 Philosophical Issues Concerning Technology
- Political Science B04 Politics and Nature
- Psychology C37 Human Sexuality
- Sociology C12 Social Basis of Environmental Change
- Sociology C19 Sociology of Science
- Sociology C55 Medical Sociology

Other courses are available periodically, including History C91 Special Lectures (e.g., The History of Abortion, The Origins of Modern Medicine) and History C92 Topics in History seminars (e.g., The Two-Cultures Problem, Gender and Medicine in History).

Slavic Languages and Literatures
The department offers a full program of study in Russian language and literature and a range of other courses on the languages, culture, and history of Eastern Europe. Russian study encompasses a broad discipline that touches on many others. The rich heritage of Russia includes much that is fundamental to Western culture. For example, Turgenev, Dostoevsky, Tolstoy, and Chekhov probe philosophical, social, political, and psychological issues that are central to the 20th-century experience. Courses in Russian literature open up the artistry and ideas of this
intellectual tradition. Russian language study can also serve as an entrée into other Slavic languages; with a foundation in Russian, one can branch off into related Slavic traditions. At this time, of course, Russian study has obvious practical significance as well.

Nonmajors as well as prospective specialists are served by the department’s courses. Many courses offering a general acquaintance with some facet of Slavic studies have no prerequisite. All periods of Russian literature are represented, with emphasis on the 19th and 20th centuries. Russian language at all levels is taught by Americans and native speakers.

Students major in Russian language and literature for a variety of reasons. Some want the rigorous intellectual training and the breadth of cultural exposure. Some students are primarily interested in acquiring language skills for use in government service, international law or trade, journalism, or scientific research. Others use the major as a foundation for graduate work in comparative literature, linguistics, history, or political science. A number of students combine the major in Russian with a second major in one of these fields. Northwestern's library is an excellent resource for undergraduate and graduate study in Russian literature. Qualified advanced students have the opportunity to spend a quarter in Russia through a Northwestern study abroad program.

**Major in Slavic Languages and Literatures**

**Departmental courses**

- **Basic courses:** A02-1,2,3 or equivalent
- **Electives:** 14 additional courses in Slavic languages and literatures and related fields
- **Honors:** two additional courses

**Plan A: No Study Abroad**

- **Basic electives (7):** B03-1,2,3 and four courses chosen from B10-1,2,3, B11-1,2, B55
- **Advanced electives (7):** C03 or C61 and five other C- or D-level Slavic languages and literatures courses; one course in a related field chosen with the undergraduate adviser

**Plan B: Study in Russia**

- **Basic electives (4):** four courses chosen from B10-1,2,3, B11-1,2, B55
- **Study abroad:** 4 or more units toward the major
- **Advanced electives (6):** C03 or C61 and five other C- or D-level Slavic languages and literatures courses

**Minor Concentrations in Slavic Languages and Literatures**

The department offers minor concentrations in Russian and Slavic studies.

**Russian**

The minor concentration in Russian is particularly suitable for students who wish to study the Russian language intensively (possibly for use in such fields as political science, international relations, law, or business) or for the increasing number of students of Russian background at Northwestern who major in other fields but wish to broaden their knowledge of their native language.

**Prerequisites:** completion of two years of college-level language study or equivalent as demonstrated by course work such as A02-1,3-3 or equivalent

**Minor course requirements (7 units)**

- **B03-1,2,3**
- **Four courses chosen from C03-1,2,3, C59-1,2, C60, C61**

**Slavic Studies**

The minor concentration in Slavic studies offers a broad survey of literature and culture but does not include a sequence of language courses. The program is particularly suited for engineering and science majors whose heavy course loads do not allow them to take a language course each quarter. The B-level offerings provide a broad background in literature and culture, and the C-level courses offer the opportunity to deal with more specific issues.

**Minor course requirements (8 units)**

- **Four B-level courses in Slavic languages and literatures**
- **Four C-level courses, at least two of them in Slavic languages and literatures; up to two can be courses in a related field chosen with consent of the undergraduate adviser (History C45 is strongly recommended)**

**Honors in Slavic Languages and Literatures**

The honors program in Slavic languages and literatures gives outstanding senior majors an opportunity to undertake a research project under the supervision of a faculty adviser. This honors thesis, together with the student’s record in Slavic courses, forms the basis for faculty decisions on the award of departmental honors. Most honors candidates research and write the thesis in two quarters of C99. Another option is to take a D-level seminar followed by C99 in which the student pursues a topic arising out of the D-level course. Students interested in pursuing honors should consult the director of undergraduate studies by the end of their junior year. See Honors under Academic Policies earlier in this section of the catalog.
Courses in Language and Linguistics

467-A01-1,2,3 Elementary Russian 1. A largely oral approach to the basic grammar and vocabulary necessary for reading, speaking, and writing simple Russian. 2,3. Graded readings, conversation, writing.

467-A02-1,2,3 Intermediate Russian The language of conversation, literature, and today’s posters and newspapers. Weekly language lab; unabridged poetry and fiction; tapes and films. Prerequisite: A01-3 or equivalent.

467-A06-1,2,3 Elementary Czech A largely oral approach to the basic grammar and vocabulary necessary for reading, speaking, and writing simple Czech.

467-B03-1,2,3 Russian Language and Culture Conversation, listening comprehension, reading, and composition. Unabridged contemporary readings on Russian culture and society. Third-year, multiskill course. Prerequisite: A02-3 or equivalent.

467-B06-1,2,3 Intermediate Czech/Language and Culture Continuation of A06; reading on topics in Czech culture. Prerequisite: A06-3.

467-C03-1,2,3 Advanced Russian Language and Culture Conversation, listening comprehension, reading, and composition. Unabridged contemporary reading and media, including television, on Russian culture and society. Fourth-year course. Prerequisite: B03-3 or equivalent.

467-C04-1,2,3 Russians: New and Old Values Advanced Russian with stress on oral and aural comprehension and writing; documentary films, newspaper and magazine articles in Russian. Prerequisite: C03-3 or equivalent.

467-C20-0 Structure of Serbian and Croatian Phonological and syntactic structure of Serbian and Croatian. Historical background.

467-C40-0 History of the Russian Language Russian phonology and morphology from Proto-Indo-European to modern Russian. Effects of the changes on the contemporary language.

467-C41-0 Structure of Modern Russian Theories and methods of linguistics as applied to the description of modern Russian. Phonetics, morphology, syntax.

Courses with Reading and Discussion in English

467-B10-1,2,3 Introduction to Russian Literature Comprehensive overview of the central prose works and literary movements in 19th-century Russia. 1. Thematic and formal study of major works by Pushkin, Gogol, Lermontov, Turgenev. 2. Tolstoy, Dostoevsky. 3. Turgenev, Leskov, the late Tolstoy, Chekhov, Bunin, Gorky.

467-B11-1,2 20th-Century Russian Literature Major works in cultural-historical context, from the Russian revolutions of 1917 through the avant-garde 1920s and Stalinist repressions to the present. 1. Literature of revolution, civil war, the transition to socialism (Babel, Olesha, Platonov, Bulgakov’s The Master and M argarita). 2. Post-World War II writers and problems (Pasternak’s Doctor Zhivago; Solzhenitsyn, Sinyavsky, and other dissidents; contemporary fiction).

467-B55-0 Early Slavic Civilization History, literature, and culture of the Slavs (Bulgarians, Macedonians, Serbs, Croats, Russians, Ukrainians, Byelorussians, Poles, Czechs, Slovaks) from antiquity through the 13th century.

467-B57-0 Introduction to the Soviet Union and Successor States Broad survey of Russian cultural, social, political, and economic life in the 20th century. Focus on the Soviet period and its aftermath in light of Russia’s historical background.

467-B67-0 Czech Culture: Film, Visual Arts, Music Cultural legacy of the Czech nation as represented in various media.

467-C10-0 Tolstoy Tolstoy’s artistic and intellectual development through his major fiction.

467-C11-0 Dostoevsky Dostoevsky’s artistic and intellectual position in Russian literature as revealed in the major novels, shorter fiction, and diaries.

467-C13-0 Nabokov Vladimir N abokov’s major Russian and American prose, from his émigré years (The Defense, The Gift, and Invitation to a Beheading) to his celebrated English language work (Lolita, Speak Memory, and Pale Fire).

467-C14-0 Chekhov Major short stories and plays considered in their broader literary and cultural context.

467-C18-0 19th-Century Russian Comedy and Satire The nature of comedy, the types of satire, and the functions of laughter in the works of Gogol and Chekhov.

467-C19-0 The Philosophical Story A key form of Russian and East European fiction, the story about abstract philosophical issues. The role it played in general philosophical debates, how it works as literature, philosophical issues raised.

467-C50-0 Folklore, Music, Poetry Traditional folk and religious folklore and poetry: from Biblical and Greek origins through East Slavic, Russian, and Western European works. Forms, literary and political implications, Russian and Western European poetic and rhythmic interrelations.

467-C67-1,2 Russian Film Development of Russian film and film theory from the silent era to the 1980s. 1. The Golden Age of Russian cinema (Eisenstein, Pudovkin, Vertov, Protazanov, Vasily brothers, Dovzhenko, socialist-realism). 2. Russian film since World War II (more socialist-realism, neorealism, Tarkovsky, Mikhalkov, Paradjanov, Abuladze, criticism and semiotic theories).

467-C68-0 Andrei Tarkovsky’s Aesthetics and World Cinema Major films of Tarkovsky and of those Russian and non-Russian directors whose work is related to his (Eisenstein, Wenders, Bergman, Kurosawa).

467-C69-0 20th-Century Russian Drama and Theater Modernist dramatic and theatrical traditions of Russia.
from the rise of the Moscow Art Theater to the advent of Socialist Realism. Dramas by Chekhov, Blok, Khlebnikov, M ayakovksy; productions of Stanislawsky, Diaghilev, M eierkhoud; design innovations of Tatlin, M alevich, Exter.

**467-C72-0 Introduction to Eastern European Jewish Culture** Cultural heritage of Russian and Eastern European Jewish communities from the 18th to 20th centuries. Works of Sholom Aleichem and Isaac Bashevis Singer; relations of Jewish culture to surrounding European cultures.

**467-C75-0 Eastern European Literature of the Holocaust** Novels, short stories, and memoirs by Eastern Europeans who experienced the Nazi occupation or were marked by its aftermath; problems of identity, memory, genre.

**467-C90-0 Literature and Politics in Russia** More than in any other European tradition, Russian literature has played a central role in defining the nation’s political agenda. The interaction of literature with Russian cultural and political history.

**467-C91-0 The Rise and Fall of Yugoslavia** Yugoslavia from origins as a dream to existence as a multinational state and collapse in the late 1980s; nationalism, interrelationship of politics and culture; readings from historians, cultural critics, and literary works.

**467-C92-0 Contemporary East European Literature** Post-World War II literature of the Czech Republic, Hungary, Poland, Romania, and the former Yugoslavia; national identity, dissidence, and literary postmodernism.

**Courses in Literature with Prerequisite in Russian**

Unless otherwise indicated, the prerequisite for C-level courses is B03-3 or equivalent.

**467-C37-0 Pushkin** Critical analysis of Pushkin’s major works.

**467-C59-1,2 Russian Prose** Selected works of Russian masters. 1. 19th century. 2. 20th century. Content varies; may be repeated for credit. All reading in Russian.

**467-C60-0 Survey of 19th-Century Russian Poetry** Introduction to the wealth of Russian 19th-century lyric poetry and basic techniques for its study: Pushkin, Baratynsky, Lermontov, Tютчев, Fet.

**467-C61-0 Survey of 20th-Century Russian Poetry** Introduction to the major currents of Russian 20th-century lyric poetry and basic techniques for its study: Blok, M ayakovsky, Khlebnikov, Akhmatova, Tsvetaeva, M andelstam, Pasternak, Brodsky.

**467-C98-0 Senior Honors Seminar** Topics vary yearly.

**467-C99-0 Independent Study** For Russian majors selected by the department as candidates for departmental honors and for other advanced students with consent of instructor.

---

**Sociology**

The Department of Sociology offers preparation for students who want to pursue careers in social research, social policy applications, and teaching. It provides an excellent background for all professions involved in the major structures of modern society, such as business, public administration, law, medicine, journalism, and planning. The department also emphasizes the sociological perspective as a fundamental part of a liberal education and a discipline for developing a humane understanding of the world.

The department is particularly strong in the areas of urban studies, comparative historical sociology, the sociology of art and culture, deviance and social control, organizations, and the sociology of law, education, and science. Unusually good opportunities are available for independent study, field internships, and the use of qualitative historical and comparative methods of research. In addition to the courses listed below, the department offers quarterly seminars on special topics of interest. The department offers a wide variety of approaches to fundamental issues of social inequality, its origins and consequences, including class and economic domination, race, ethnicity, and gender.

**Major in Sociology**

**Departmental courses:** one sociology quarter-course at the A or B level (except B26) and nine additional quarter-courses, distributed as follows:

- Three courses in methods of social research: B26, C03, C29 (B26 should be taken in the freshman or sophomore year; C03 and C29 in the junior year)
- C06 (junior or senior year)
- C98-1,2 (fall and winter quarters of the senior year)
- Four additional C-level sociology courses; only 1 unit each of C76, C99, and General Studies C93 Chicago Field Studies Internship may be used to fulfill this requirement

In certain cases, students who are combining a major in sociology with a major in another field that also requires a senior research seminar may arrange to fulfill their seminar requirement in a combined project.

**Related courses:** four C-level quarter-courses in African American studies, anthropology, economics, history, linguistics, philosophy, political science, psychology, or women’s studies selected with the approval of the adviser.

**Minor Concentrations in Sociology**

The Department of Sociology offers minor concentrations in sociological research and in sociological studies. Students seeking a minor in sociology must consult with the director of undergraduate studies.

**Sociological Research**

The minor concentration in sociological research prepares students to carry out their own research by offering an
undergraduate advisers early in their academic career.

Courses Primarily for Undergraduates
471-A10-0 Introduction to Sociology
Essential characteristics of group life. Interrelations of society, culture, and personality. Basic institutions and processes.

471-B01-0 Social Inequality: Race, Class, and Power

471-B02-0 Social Problems: Norms and Deviance

471-B03-0 Revolutions and Social Change
Causes and outcomes of large-scale social change. Role of violence and revolution in the development of the modern world.

471-B04-0 Social Interaction: The Individual and Society
Development of individual attitudes and behavior patterns through social interaction. Relation to students' everyday life and problems.

471-B05-0 American Society
How American society works as a whole. How major institutions relate and affect each other; how the different segments and strata of society experience such institutional processes. Tensions associated with differential experience of common and shared institutions.

471-B06-0 Law and Society
Introduction to the role of law in American society. Relationship of law, inequality, and social change. Patterns of change in major legal institutions: the courts, the legal profession, and legal services for the poor.

471-B07-0 Problems of Cities
Problems of American urban communities and possible solutions. Spatial, economic, and political trends; private and public decision making; class, race, and family needs. Consequences for adequate public services.

471-B15-0 Economy and Society
Introduction to sociological approaches to economic life. Topics include property rights, illegal markets, money, economic inequalities, direct sales, and boycotts.

471-B16-0 Gender and Society
Socialization (childhood and adult), values, economic opportunities in the United States, now and in the past.

**471-B26-0 Sociological Analysis** Logic and methods of social research, qualitative and quantitative analysis of social data, and ethical, political, and policy issues in social research. Foundation for further work in social research.

**471-C01-0 The City: Urbanization and Urbanism** Theories of urbanization, housing, jobs, race and class, segregation, social networks, politics, and reform policies. Research projects. Prerequisite: A10 or B07.

**471-C02-0 Sociology of Organizations** Structure and function of formal organizations, especially in business and government. Stratification, social control, and conflict. Discretion, rules, and information in achieving goals. Modes of participation. Development of informal norms. Prerequisite: A- or B-level sociology course.

**471-C03-0 Analysis and Interpretation of Social Data** Introduction to quantitative methods: the interpretation of descriptive statistics, relationships between variables, and the logic of inferential statistics. Prerequisite: B26 or consent of instructor.

**471-C05-0 Demography and Population Problems** Social causes and consequences of population dynamics (fertility, mortality, marriage, divorce, and migration) and population structures (age, sex, size, density). Possible roles of population changes in environmental and economic development problems. Prerequisite: A- or B-level sociology course.

**471-C06-0 Sociological Theory** Sociological perspective as developed by classic theorists. Elucidation and testing of sociological principles in contemporary research. Primarily for sociology majors. Open to others with consent of instructor. Prerequisite: B26.

**471-C07-0 School and Society** Reciprocal influences between formal institutions of education and the broader society from different theoretical perspectives. Internal organization of schools. Relationship between education and inequality and to problems of contemporary urban education. Prerequisite: A- or B-level sociology course.

**471-C08-0 Sociology of Deviance and Crime** The social organization of crime and other misdeeds, explanations of crime and deviance, creating criminal law, policing, detection and investigation, prosecution, plea bargaining, the courts, sentencing, punishment, prisons, and alternatives to criminal law. Prerequisite: A10 or B02.

**471-C09-0 Political Sociology** Selected topics in political economy and sociology: revolutions, the development of the modern state, third world development, international conflict. Prerequisite: A- or B-level sociology course.

**471-C10-0 The Family and Social Learning** Influence of socioeconomic and other structural and cultural resources and constraints on family structure and dynamics. Historical and comparative perspectives on the modern family. Prerequisite: A- or B-level sociology course.

**471-C12-0 Social Basis of Environmental Change** The role of production structures and other social institutions on pollution and depletion. Social support for and resistance to environmental protection policies. Inequalities in use of resources and incidence of environmental hazards. Prerequisite: A- or B-level sociology course.

**471-C14-0 Sociology of Religion and Ideology** Belief systems in society. Production of ideas. Religion, art, science, political ideology, and folk-knowledge as social products. Prerequisite: A- or B-level sociology course.

**471-C15-0 Industrialism and Industrialization** Structure and culture of modern industry; consequences for status and class organization. Labor force, formal and informal organization of management and labor. Union-management interaction. Factors affecting industrial morale. Prerequisite: A- or B-level sociology course.

**471-C16-0 Economic Sociology** Sociological approach to production, distribution, consumption, and markets. Classic and contemporary approaches to the economy compared across social science disciplines. Prerequisite: B15 or Economics B02 or equivalent.

**471-C18-0 Sociology of Law** Sociological analysis of legal institutions such as courts, the police, and lawyers. Law, inequality, and social change. Prerequisite: A10 or B06.

**471-C19-0 Sociology of Science** Science as a social system. Personality, social class, and cultural factors in scientific development, creativity, choice of role, simultaneous invention, and priority disputes. Social effects on objectivity and bias.

**471-C21-0 Armed Forces and Society** Contemporary military institutions and sociological theory. Changing dynamics of combat, peacekeeping, race relations, gender, and other social issues. Prerequisite: A- or B-level sociology course.

**471-C23-0 American Subcultures and Ethnic Groups** Differentiation, organization, and stratification by ethnicity, race, lifestyle, and other traits. Maintenance of subgroup boundaries and distinctiveness. Development and continuity of American society as a system of subgroups. Consequences of difference: identity, political and economic participation, group solidarity. Prerequisite: A- or B-level sociology course.

**471-C24-0 Social Structure in African American Communities** Institutional variation and social change. Black populations in local settings, urban and rural, contemporary and historical. Some attention to different eras and regions in United States and other New World societies. Prerequisite: A- or B-level sociology course.

**471-C25-0 Social Stratification** Bases of social stratification. Effects on life conditions and social organization.
Theoretical, methodological, and empirical dimensions. Emphasis on advanced industrial societies. Prerequisite: B26.

471-C26-0 The Logic of Social Inquiry Tensions between methodological rules and researcher judgments in the practice of social inquiry. Trade-off in various research designs. Social contexts and their resources for or restraints on social researchers. Impact of research context on forms of observation and reporting of inferences. Prerequisite: B26.

471-C27-0 Youth and Society How young people interact with families, schools, peers, neighborhoods, and workplaces, influencing them and being influenced by them. Prerequisite: A- or B-level sociology course.

471-C29-0 Field Research and Methods of Data Collection Practicum in first-hand data collection using observation and structured and unstructured interviewing. Issues of reliability and validity, and qualitative analysis. Prerequisite: B26.

471-C31-0 Markets, Hierarchies, and Democracies The forms and social structures for making economic decisions in modern societies. Prerequisite: A- or B-level sociology course.

471-C32-0 Work and Occupation in Modern, Industrialized Societies Sociological perspectives on work. Students view their own occupational futures in the context of the changing social relations of production. Prerequisite: A- or B-level sociology course.

471-C33-0 Law, Norms, and Power How laws and informal social rules are related to the exercise of power by some people over others. Prerequisite: A- or B-level sociology course.

471-C35-0 Sociology of Rational Decision Making Analysis of the role played by numerical and quantitative information in organizational decision making in the private and public sectors. Prerequisites: B15 and C02 or Economics B02 or consent of instructor.

471-C39-0 Comparative and Historical Sociology Theoretical and methodological issues in the comparison of whole societies and other macrosocial units. Prerequisite: A- or B-level sociology course.

471-C45-0 Class and Culture The role that culture plays in the formation and reproduction of social classes. Class socialization, culture and class boundaries, class identities and class consciousness, culture and class action. Prerequisite: A- or B-level sociology course.

471-C47-0 Sociology of Time and Space Social construction of time and space. Standardization of time, maps as ideological documents, capitalist time and space, personal and social spaces and memories. Prerequisite: A- or B-level sociology course.

471-C50-0 Sociology of the Arts Art as collective activity. Conventions in art and aesthetics. Professionals and audiences and other aspects of culture. Prerequisite: A- or B-level sociology course.

471-C55-0 Medical Sociology Social construction of health and illness; inequalities in distribution of illness and health care; organization of health care work and occupations. Prerequisite: A- or B-level sociology course.

471-C56-0 Sociology of Gender Gender and issues of social reproduction and social change with sexuality and reproduction emphasized. Prerequisite: B16 or B26.

471-C76-0 Topics in Sociological Analysis Advanced work on special topics in sociological study.

471-C80-7 Junior Year Tutorial Small seminar group in conjunction with various scheduled C-level classes.

401-C93-0 Chicago Field Studies Internship See General Studies.

471-C98-1,2 Senior Research Seminar Independent research projects carried out under faculty supervision. Prerequisite: C03, C29, or equivalent.

471-C99-0 Independent Study (1 or 2 units) Open with consent of department. Registration extension to more than one quarter.

Spanish See Hispanic Studies.

Statistics
Statistics is the scientific discipline that deals with the organization, analysis, collection, and interpretation of numerical data. Statistical methods are widely used to design and analyze experiments, sample surveys, censuses, and other observational programs. Such analysis involves both description of the properties of groups of observations and problems of drawing inferences from such data. Applications to the biological, social, and physical sciences are widespread, and statistical analyses are increasingly required in actuarial work, accounting, finance, engineering, medicine, and law.

Major in Statistics

Departmental courses

- M athematics C30-1 or Industrial Engineering and Management Sciences C02
- Statistics C25, C50, C51
- Industrial Engineering and Management Sciences C03, C04
- Two of the following courses: Mathematics C30-2; Industrial Engineering and Management Sciences C05, C15; Statistics C52, C55, C59. (Students may not apply both Mathematics C30-2 and Industrial Engineering and Management Sciences C15 to the major requirement.)
Related courses: (a) Mathematics B14-1,2,3; B15; and B17; (b) Mathematics B20-1,2,3; (c) Mathematics B90-1,2,3; or (d) equivalent

Minor in Statistics
Students who complete the minor in statistics receive serious exposure to probability theory, statistical estimation theory, statistical analysis, and the design of statistical data collection. Students choosing to minor in statistics are assumed to have completed Mathematics B14-1,2,3 or equivalent.

Minor course requirements (6 units)
- Statistics B01, B02, B10, or C03 (1 unit)
- Mathematics C30-1 or Industrial Engineering and Management Sciences C02 (1 unit)
- Industrial Engineering and Management Sciences C03, C04 (2 units)
- Statistics C50 or Economics C81-2 (1 unit)
- Statistics C25 or C51 (1 unit)

Four-Year BA/MS
The department offers a four-year BA/MS program in statistics for outstanding undergraduate majors. Interested students should contact their adviser or department chair and should see Four-Year Master's Programs in the Undergraduate Education section of this catalog.

Honors in Statistics
Departmental majors with outstanding records both overall and within the department may apply for graduation with departmental honors. A departmental recommendation for honors requires that students take two quarters of C98, through which a research paper is developed. For more information, consult the director of undergraduate studies. See Honors under Academic Policies earlier in this section of the catalog.

Courses Primarily for Undergraduates
473-B01-0 Statistics and Public Policy Basic statistical concepts and techniques introduced via case studies of interesting public policy issues. The cases illustrate methods of data collection and analysis.

473-B02-0 Introduction to Statistics Data collection, summarization, correlation, regression, probability, sampling, estimation, tests of significance. Does not require calculus and makes minimal use of mathematics.

473-B06-0 Elementary Statistics for Research Design of experiments, descriptive statistics, correlation and regression, probability, confidence intervals, and significance testing.

473-B10-0 Introductory Statistics for the Social Sciences Introduction to basic concepts and methods of statistics and probability. Methods of data collection, descriptive statistics, probability, estimation, sampling distributions, confidence intervals, hypothesis testing.

473-C02-0 Elementary Statistical Methods Tabular and graphical presentation of data, hypothesis tests, confidence intervals, comparisons of means and proportions, regression and correlation. Prerequisite: Mathematics B14-2 or equivalent.

473-C03-0 Concepts in Statistics with Public Policy Applications Public policy case studies introduce basic statistical concepts and techniques. The cases illustrate various data collection methods and their strengths and weaknesses. Emphasis on concepts.

473-C25-0 Survey Sampling Probability sampling, simple random sampling, error estimation, sample size, stratification, systematic sampling, replication methods, ratio and regression estimation, cluster sampling. Prerequisites: two quarters of statistics or consent of instructor.

473-C30-1 Applied Statistics for Research I Design of experiments and surveys, numerical and graphical summaries of data, correlation and regression, confidence intervals and tests of significance, one- and two-sample problems. Prerequisite: Mathematics B14-2 or equivalent.

473-C30-2 Applied Statistics for Research II Simple linear regression, inference, diagnostics, multiple regression, diagnostics, autocorrelation, one-way ANOVA, power and sample size determination, two-way ANOVA, randomized block designs. Prerequisite: C30-1.

473-C50-0 Regression Analysis Simple linear regression and correlation, multiple regression, residual analysis, selection of subsets of variables, multicollinearity and shrinkage estimation, nonlinear regression. Prerequisite: Industrial Engineering and Management Sciences C04 or equivalent.

473-C51-0 Design and Analysis of Experiments Methods of designing experiments and analyzing data obtained from them: one-way and two-way layouts, incomplete block designs, factorial designs, random-effects, split-plot and nested designs. Prerequisite: Industrial Engineering and Management Sciences C04 or equivalent.

473-C52-0 Nonparametric Statistical Methods Survey of nonparametric methods, with emphasis on understanding their application. Prerequisite: Industrial Engineering and Management Sciences C04 or equivalent.

473-C55-0 Analysis of Qualitative Data Introduction to the analysis of qualitative data. Measures of association, log-linear models, logits, and probits. Prerequisite: Industrial Engineering and Management Sciences C04 or equivalent.

473-C59-0 Topics in Statistics Topics in theoretical and applied statistics to be chosen by instructor. Prerequisite: consent of instructor.

473-C98-0 Undergraduate Seminar
Related Courses in Other Departments
Mathematics C30-1,2,3 Probability and Statistics
Industrial Engineering and Management Sciences C02
Probability
Industrial Engineering and Management Sciences C05
Statistical Methods for Quality Improvement
Industrial Engineering and Management Sciences C15
Stochastic Models and Simulation

Undergraduate Leadership Program
The Undergraduate Leadership Program, a certificate program open to all undergraduates, helps students understand the nature of leadership and prepares them to become leaders. (See Undergraduate Leadership Program in the Other Undergraduate Programs section of this catalog.)

Urban Studies Program
The Program in Urban Studies enables students majoring in anthropology, economics, history, political science, or sociology to master their disciplinary major and to complement it with a second major in urban studies. With special permission of the director of the program, students with other majors in CAS also may elect urban studies as a second major. The purpose of the program is to introduce students to an interdisciplinary perspective on the city and its problems, bringing together faculty and students who share common interests but have different academic backgrounds. In addition to the following requirements, it is recommended that students who major in urban studies complete a methods or statistics course in one of the social science departments and participate in the Chicago field studies program.

Major in Urban Studies
Program courses
- Fulfillment of the major requirements in any one of the following undergraduate departments: anthropology, economics, history, political science, sociology; or with consent of the director of the program, fulfillment of the major requirements in another department of the College of Arts and Sciences. Majors in urban studies must show a minimum of seven courses not double-counted in any other major(s). Of the courses that are double-counted, one may be counted in the the core requirement; another may be counted as an elective.
- Completion of four courses chosen from an urban studies core: Economics C53, C54; History C22-1,2; Political Science B21, C21; Sociology B07, C01
- Completion of three additional courses chosen from the following list, no more than two from the same department and no more than one from urban field studies or internships: African American Studies B36-2; Anthropology C92; Art History C79; Civil Engineering C71; Economics C37, C53, C54, C55; History C22-1,2; Political Science B21, C21, C27, C30; Sociology B07, C01, C24; any approved unit of urban field studies in any relevant department
- Completion of the two-unit Urban Studies Seminar during the fall and winter or winter and spring quarters of the student's senior year. Check Class Schedule for quarters this seminar is offered.

Course
475-C98-1,2 Urban Studies Seminar Open to senior majors in urban studies. Interdisciplinary approach to urban studies entailing design and execution of a research project over two quarters. Grade of K given in C98-1 changed to letter grade after completion of C98-2.

Women's Studies Program
The Women's Studies Program offers an interdisciplinary program of courses focused on scholarly research on women and issues of concern to women. These courses are supplemented by courses on women offered through other academic departments on campus. The curriculum is designed to examine women's experiences historically and cross-culturally and to explore social, political, and cultural issues as they relate to women's lives.

The rich and varied curriculum offers students a range of academic experience, including seminars, fieldwork, performance, and opportunities for original research. Consistently emphasized are the ways in which attention to women's lives and experiences has altered scholarly preconceptions and research methods.

Major in Women's Studies
The women's studies major is an adjunct major. Students majoring in women's studies must also fulfill the requirements of another major in CAS or in any other school in the University. The major in women's studies must show a minimum of nine courses not double-counted in any other major(s).

Program courses (at least 11 units)
- Three core courses: B10, B30, B31
- Six elective one-quarter courses, at least four at the C-level, focusing on women; four of those six courses must be offered by the women's studies program. Others may be women's studies courses or courses from other departments cross-listed under women's studies.
- C97 followed by either:
  a) C98 and C99, or
  b) one other C-level elective course
Students who choose option a) will generate an independent research project (a senior thesis) and may be recommended for departmental honors. Students who choose option b) will not write a thesis and will not be eligible for departmental honors.
Examples of courses that fulfill the elective requirement include, but are not limited to, the following:

- African American Studies C79 African American Women Playwrights
- Anthropology C54 Gender and Anthropology
- History C03-2 American Women’s History
- Linguistics C18 Language and Gender
- Radio/Television/Film C25 Feminism and Film/Video
- Sociology B16 Gender and Society

**Minor in Women’s Studies**

Students who wish to focus their interest in women’s studies may earn a minor in women’s studies while simultaneously pursuing a departmental major in any undergraduate school. Students qualify for the minor in women's studies by satisfactorily completing the requirements listed below and presenting a minimum of five courses not double-counted in their majors.

**Minor course requirements (7 units)**

- Two core courses chosen from B10, B30, B31
- Five electives chosen in consultation with an adviser in the Women’s Studies Program. At least three courses must be at the C-level; three must be women’s studies courses; the remaining two may be women’s studies courses or courses from other departments cross-listed under women’s studies. Students are encouraged (but not required) to take C97 as one of the five.

For examples of electives, see the list under Major in Women’s Studies.

**Courses**

- **480-B10-0 Introduction to Women's Studies: Life As Women Know It** — Theoretical, personal, and political issues; connections between gender, race, class, and sexual orientation.
- **480-B30-0 The Roots of Feminism** — The development of feminist thought and the women's movement. Readings contextualized in terms of social, political, and intellectual background.
- **480-B31-0 Feminisms: Voices and Visions** — A cross-cultural study of women as makers and consumers of literature and the arts. Challenges to tradition; strategies of resistance and revision.
- **480-B50-0 Women and the Scientific Community** — The integration of women into the culture of science and medicine. Women’s contributions to science; development of sexual differences; contemporary health issues.
- **480-B90-0 Women in Culture and Society: Topics** — Changing role and image of women in society. Investigates one or several cultural and/or national traditions.
- **480-C75-0 Internship in Women's Studies** — Field research and practical work experience in women's organizations; biweekly meeting with the instructor and other interns for discussions of common readings and their internship experiences. Consent of instructor.

**480-C90-0 Topics in Women’s Studies** — Topics vary: for example, contemporary women writers, activism in the sixties and beyond, women and war.

**480-C91-0 Writing Women’s Lives** — Seminar launching each student on a research project that illuminates the life of a woman or group of women. Exploration of archives, theories of the self, and historical contexts. Prerequisite: consent of instructor.

**480-C92-0 Women and Autobiography** — Investigation of women as readers and producers of autobiography. Exploration of memory and construction of self in relation to gender, culture, ethics.

**480-C95-0 Sexuality and Its Discontents** — Social and historical constructions of sexuality; emergence of lesbianism and homosexuality as categories; issues of sexuality, race, and class; problems of sexual domination and violence. Prerequisite: one introductory course in women’s studies or consent of instructor.

**480-C96-0 Feminist Therapy** — Theoretical basis for the feminist critique of traditional psychotherapy. Exploration of problems presented by female clients; gender-related causes and feminist strategies for resolution. Prerequisite: one course in women’s studies or psychology; junior/senior standing.

**480-C97-0 Senior Seminar in Feminist Theory** — Issues in feminist theory and research methods.

**480-C98-0 Senior Research Seminar** — Continuation of C97. Students work with an adviser and begin research on a senior thesis project, meeting on a reduced schedule. Prerequisites: C97 and consent of undergraduate adviser.

**480-C99-0 Independent Study** — Individual tutorial or research projects. Prerequisite: consent of instructor and a women’s studies adviser.

**Writing Program**

The Writing Program is an independent CAS unit that seeks to help all Northwestern undergraduates learn to write clearly and persuasively. A core faculty of experienced writing instructors teaches the program’s main sequence of basic, intermediate, and advanced expository writing courses. These are listed as English A05, A06, B05, and C05. Writing courses are limited to 15 students, allowing instructors to comment extensively on students’ writing and to meet regularly with students in individual conferences. Courses at every level emphasize revision, with the goal of strengthening each student’s ability to think clearly, analyze carefully, argue convincingly, and communicate effectively.

The Writing Program also operates the Writing Place, a center that provides free composition tutoring and consulting for all Northwestern students. The Writing Place, located in the University Library, is open most mornings, afternoons, and evenings during the academic year.
year. Students may make appointments, use the schedule of drop-in hours, or interact with Writing Place tutors through the campus computer network.

The Writing Program helps to oversee writing requirements—and thus provides writing advising—for undergraduates in the College of Arts and Sciences, McCormick School of Engineering and Applied Science, School of Music, and some programs in the School of Speech. Members of the Writing Program faculty also occasionally teach specialized courses and workshops. In recent years, these offerings have included courses in technical writing, a residential college tutorial on management communication, and a course in the Women's Studies Program, Writing Women's Lives. In all its courses and special offerings, the Writing Program concentrates on helping students develop skill, confidence, and insight as writers.

Students interested in a writing major should see English Major in Writing under English.

Courses
419-A05-0 Expository Writing See English.
419-A06-1,2 Writing in Special Contexts See English.
419-B05-0 Intermediate Composition See English.
419-C05-0 Advanced Composition See English.
The mission of the School of Education and Social Policy (SESP) is to understand and improve learning communities, defined as groups of people working together in structured social and/or technical environments that influence human development. Viewed in this way, learning environments include not only schools and classrooms but also workplaces, families, neighborhoods, and other societal arrangements in which learning takes place. Through their broad-based interdisciplinary research, teaching, and outreach activities, SESP faculty strive to better understand how social, psychological, and economic factors shape human development and learning and how innovations in pedagogical, technological, and social policies can benefit human lives.

At the undergraduate level, the school provides preprofessional training and research activities. Students learn to understand human development and improve learning in its various social contexts by applying the social and behavioral sciences. The school offers four programs leading to the degree of bachelor of science in education and social policy: Social Policy, Psychological Services, Learning and Organizational Change, and Secondary Teaching. Students in other undergraduate schools also may complete the requirements of the Secondary Teaching Program and qualify for secondary certification.

Applicants who hold a baccalaureate degree may apply to the school's master of science program, which leads to elementary or secondary teaching certification in the state of Illinois.

**Academic Policies**

**Requirements for the Degree of Bachelor of Science in Education and Social Policy**

The following requirements concerning residence and grade point average apply to all students seeking the degree of bachelor of science in education and social policy.

1. A minimum of 45 course units is required for graduation from the School of Education and Social Policy.

2. Students are required to maintain a minimum grade point average of 2.0 in all work presented for the degree. To qualify for teacher certification, students must earn a grade of A, B, or C for an overall average of 2.5 in all required core courses and all courses used to complete their teaching major. Students in the Social Policy, Psychological Services, and Learning and Organizational Change programs must earn a grade of A, B, or C in all their core and program courses.

3. Full-time students in the School of Education and Social Policy may elect to enroll in some courses with the understanding that they will not receive a regular letter grade but that they will receive the notation P (pass) or N (no credit). They may elect one course per quarter under this option and may not elect this option in any course in their core, program, or teaching major.

4. Not more than one-fifth of the grades in courses taken at Northwestern and presented for graduation may be a combination of P's and D's.

5. Any work taken at universities other than Northwestern that is to be counted toward fulfilling Northwestern requirements must be approved in advance by the student's adviser and the assistant dean.

6. Every candidate for a degree must file an application for the degree, along with a Planning and Advising Schedule, in the Office of Student Affairs one year in advance of the date of graduation (see Academic Calendar). That office will forward the application, when approved, to the Registrar's Office.

7. Students who wish to transfer into the School of Education and Social Policy's Secondary Teaching Program may not be able to meet the requirements unless they plan carefully throughout their undergraduate program.

8. Transfer students must meet the following conditions:

- Applicants must meet all program requirements expected of students in the School of Education and Social Policy.
• Applicants must present evidence of acceptable academic performance at Northwestern.

9. Students transferring from another university are required to complete the last 23 course units at Northwestern University.

In addition to and independent of the requirements set by the School of Education and Social Policy, all students must satisfy the University Enrollment Requirement (see Financial Regulations).

Honors
Students who maintain records of academic distinction may qualify for the Honors Program. Following completion of the junior year, any student who has attained an overall cumulative grade point average of 3.5 or above is eligible for the program. Students selected for the program work with a faculty adviser on an honors project during the senior year. The three-quarter program begins with registration for 210-C 98 Honors Thesis with the honors project adviser. If progress is satisfactory, students are then eligible to register for C 98 during winter and spring quarters of the senior year. Grades are based on performance throughout the project and on readers' evaluations of the project report. Additional information about the Honors Program is available from the honors program coordinator.

Probation
In addition to the University regulations regarding academic probation, an undergraduate student in the School of Education and Social Policy is ordinarily placed on academic probation when, in any one quarter, that student does not receive at least three final grades of A, B, C, or P or has a cumulative grade point average below 2.0.

Academic Advisers
Each undergraduate student is assigned to an adviser in the Office of Student Affairs. This adviser is responsible for helping students plan their programs to meet the requirements for graduation and for completion of the major or program. Students consult with faculty about area interests and career planning.

For the advising system to work effectively, students must take all academic questions to their adviser in the Office of Student Affairs.

Students are required to obtain their adviser's permission to register for at least the first two quarters of the freshman year.

Petitions
Students must petition if they wish to be exempted from any of the regular degree requirements of the School of Education and Social Policy. Petition forms may be obtained from the School of Education and Social Policy Office of Student Affairs. No petition is considered unless it is signed by a member of the advisory staff of the Office of Student Affairs.

Placement Service
A complete range of services is provided at the University's Placement Center in Scott Hall.

Students should register with the Placement Center by securing the necessary forms as early in their final year as possible. When the forms are completed, students should attend an orientation session. They also may receive individual help in preparing a resume as well as in career search and interviewing.

Students also should establish a reference file in the Placement Center to assemble credentials and confidential recommendations for future job or graduate school applications. Students who wish to register for on-campus job interviews should become familiar with the Placement Center's procedures early in the final year.

Academic Programs

Social Policy, Psychological Services, and Learning and Organizational Change Programs
Students in the Social Policy, Psychological Services, and Learning and Organizational Change programs receive a bachelor of science in education and social policy; 45 units are required for the degree.

Preprofessional Preparation
These three programs offer students an opportunity to prepare for a number of career options. Students in these programs have a wide variety of academic and career goals. Some intend to go immediately to graduate and professional schools, while others plan to enter a profession upon graduation. They are encouraged to design their program with career objectives and/or graduate and professional school admission policies in mind. The programs are especially appropriate for those seeking careers in management, consulting, clinical psychology, social work, counseling, law, public service, human resources, and public sector management.
Students interested in public service and law normally choose to follow the requirements of the Social Policy Program, where they can combine the policy-related course work of that program with courses in political science, communication studies, economics, urban affairs, and sociology to prepare either for graduate work in law or public policy or for policy positions in public and private agencies. Students in the Social Policy Program are encouraged to use their program electives to build specialties in such areas as juvenile justice, advocacy programs, or policy analysis and to develop the oral and written communication skills important to success in law school and in public policy positions.

Students interested in such fields as social work, clinical psychology, health, and counseling normally enter the Psychological Services Program. The core course work in human development and psychological counseling of this program, combined with other courses in psychology, sociology, and interpersonal communication, is particularly important for students considering such careers. Students with these interests are encouraged to use the program to complete the prerequisites in psychology and quantitative methods needed for graduate work in psychology and in the human service professions.

The Learning and Organizational Change Program is well suited to students who plan careers in management, consulting, training, and human resources in profit and not-for-profit organizations. Students combine core course work in learning sciences, organization behavior, psychology, and social policy with the necessary work in economics, quantitative methods, communications, and technology that will prepare them for careers as organizational leaders and change agents and for graduate study in the social sciences and management.

In all three programs, students focus on the interdisciplinary study of human behavior as it is influenced by social institutions, understanding the behaviors that people bring to various institutional contexts, identifying and analyzing how behaviors are shaped in these environments, and establishing criteria by which to evaluate the purposes and effectiveness of institutional activities.

To work toward these goals, students register for a one-quarter practicum in off-campus settings such as governmental entities, community agencies, hospitals, juvenile homes, service-oriented departments of for-profit organizations, and law firms where they can observe and participate in the activities of a socializing institution. During this quarter, usually during their junior year, students meet in a weekly practicum analysis seminar. This seminar helps students integrate their past learning from course work with their observations of human behavior in an organizational setting.

Distribution Requirements
All students must complete at least two courses in each of the following distributional areas:

I. Natural sciences
II. Formal studies
III. Historical studies
IV. Values
V. Literature and fine arts

Distribution requirements for the School of Education and Social Policy follow the pattern approved by the College of Arts and Sciences. Courses approved by the College of Arts and Sciences may be used to meet School of Education and Social Policy distribution requirements. In addition, selected courses in the School of Education and Social Policy or other professional schools may be used with the consent of the student's adviser.

Intellectual Core
All students must complete the School of Education and Social Policy intellectual core. The core course 210-B05 Undergraduate Proseminar introduces the concepts, research, methods, and faculty from across SESP. Students gain a basic understanding of a particular period of human development by choosing either 225-C01 Human Development: Childhood and Adolescence or C02 Human Development: Adulthood and Aging. One course chosen from the following is also required:

210-B12 Learning and Understanding
225-C01 Human Development: Childhood and Adolescence
225-C02 Human Development: Adulthood and Aging
225-C12 Development of African American Children and Families: Theory and Research
225-C13 Development of African American Children and Families: Research and Policy
225-C17 Gender and the Life Course
225-C18 Adult Development and Work Careers
225-C19 Family Development in Changing Society
Students must demonstrate theoretical and practical mastery of quantitative and conceptual analysis by completing two research methods courses, Statistics B06 Elementary Statistics for Research and 225-C72 Methods of Observing Human Behavior. Students must complete C72 before undertaking the practicum and practicum analysis seminar component of the intellectual core.

In the practicum component, taken during the junior year, students complete a supervised practicum experience during the course of their program of study. The practicum involves a one-quarter, unpaid internship in an off-campus setting related to the student’s program. Concurrent with the internship, students attend a weekly seminar on campus that integrates their experiential knowledge with the theoretical training in their course work.

Students must contact the practicum director in the school’s Office of Student Affairs at least two quarters before the beginning of the quarter in which the practicum will be taken. The practicum director advises students about procedures and application materials for a practicum placement.

**Individually Planned Programs**

Students in the Social Policy, Psychological Services, and Learning and Organizational Change programs must prepare a program plan that includes a rationale for the configuration of courses chosen for their program of study. The program plan must be submitted to the Office of Student Affairs for approval in the sophomore year no later than the quarter before the intended practicum.

**Social Policy**

Students in the Social Policy Program explore in depth the way in which policy decisions and social institutions influence the course of human lives.

Required courses include 225-B01 Introduction to Social Policy and three of the following:

- 225-C04 Social Policy and the Human Services
- 225-C07 Educational Policy
- 225-C11 The Political Economy of Social Policy
- 225-C30 Economics of Social Policy

The remaining units are composed of individually planned combinations of courses related to some aspect of social policy, chosen from an approved list of courses offered by the School of Education and Social Policy and other departments (anthropology, political science, psychology, sociology) in consultation with the student’s adviser. The Office of Student Affairs maintains the approved list from which students must select these courses, at least eight of which must be at the C level.

**Psychological Services**

Students in the Psychological Services Program explore in depth the complexity of the contributions of institutions such as the family, the educational system, government, religious organizations, and the workplace to human development.

Required courses include 230-C01 Introduction to Counseling and three of the following:

- 230-C02 The Human Personality
- 230-C03 Intervention Strategies
- 230-C11 Group Dynamics
- 225-C04 Social Policy and the Human Services

The remaining units are composed of individually planned combinations of courses related to some aspect of human services, chosen from an approved list of courses offered by the School of Education and Social Policy and other departments (anthropology, communication studies, linguistics, psychology, sociology) in consultation with the student’s adviser. The Office of Student Affairs maintains the approved list from which students must select these courses, at least eight of which must be at the C level.

**Learning and Organizational Change**

The Learning and Organizational Change Program teaches students how to increase effectiveness within organizations. This innovative concentration embodies technology internationalization, changing demographics, and new discoveries about effective learning and organizational behavior.

Required courses include

- 210-B11 Introduction to Organization Theory and Practice
- 210-C01 Learning in Context: Cognitive Science Foundations of the Learning Sciences
- 210-C02 Education and the Changing Workplace
- 210-C06 Studies in Organizational Change
- 210-C10 Learning Organizations for Complex Environments
- One C-level design course agreed upon by the student and academic adviser.
The remaining units are composed of other required courses, combinations of courses, and electives approved by the student's adviser, to complete the 45-unit degree requirement. Students planning to do graduate work in management are encouraged to take at least three courses in economics, including Economics C10-1 M microeconomics and C11-1 M macroeconomics. At least eight of the courses must be at the C level.

Secondary Teaching Program
Students enrolled in the School of Education and Social Policy or elsewhere in the University who wish to pursue a secondary teaching major and recommendation for secondary teaching certification must apply for formal admission to the Secondary Teaching Program. Students completing degree requirements within the School of Education and Social Policy receive the degree of bachelor of science in education and social policy; 45 units are required for the degree. Students in other undergraduate schools also must complete a major and fulfill degree requirements of their school.

Preparation for Professional Work in Middle and Secondary Schools
Individuals interested in the undergraduate Secondary Teaching Program should contact the Office of Student Affairs in the School of Education and Social Policy. The Secondary Teaching Program is approved by the Illinois State Teacher Certification Board; those completing the program therefore qualify for secondary certification in Illinois through entitlement. Students who plan carefully may qualify for provisional certification in another state.

Students in the Secondary Teaching Program take extensive course work in the liberal arts and complete a major in the academic subject they expect to teach. Students also observe in a variety of educational settings and complete a part-time co-teaching practicum experience and a full-time student teaching internship.

Distribution Requirements (21 units)
Distribution requirements for the Secondary Teaching Program meet the general education requirements of the Illinois State Board of Education.

I. Communications (4)
- Two courses in written composition
- One course in oral communication
- One additional course in speech or composition

II. Mathematics (2)
- Two courses chosen from mathematics and/or statistics

III. Biological and physical sciences (4)
- At least one biological sciences course
- At least one physical science course chosen from astronomy, chemistry, geological sciences, or physics
- One course with a laboratory component

IV. Humanities (6)
- One quarter of History B10 History of the United States (can be used to fulfill social and behavioral sciences or humanities requirement)
- One course in English literature
- One course focusing on Asian, African, Central American, Native American, and/or South American cultures (can be used to fulfill social and behavioral sciences or humanities requirement)
- Three additional courses chosen from the arts, history, languages, literature, philosophy, or religion

V. Social and behavioral sciences (4)
- Political Science B20 American Government and Politics
- Three additional courses chosen from African American studies, anthropology, economics, history, political science, psychology, or sociology

VI. Health and physical development (1)
- 230-C90 Health and Physical Development

Professional Core (9 units)
- 225-C01 Human Development: Childhood and Adolescence
- 236-C03 Problems in the Philosophy of Education or C04 History of Education in the United States
- 236-C27 Educating Exceptional Children or Speech and Language Pathology C36 The Field of Special Education
- 236-C41 Teaching and Learning in Social and Cultural Contexts
- One methods and techniques course chosen from 236-C54 through 59 M methods and Techniques
- 236-C81 Tutorial in Education: Student Teaching (4 units)
Teaching Major Requirements
Majors are as listed below under specific teaching major fields, which are designed to meet requirements of the Illinois State Board of Education. Teaching major requirements may differ from those of a departmental major, and departmental course offerings change frequently. Teacher certification candidates are required to meet regularly with the advising staff of the Office of Student Affairs to ensure that certification requirements are met.

Art (12 units)
• Three introductory courses: Art Theory and Practice A20, A24, A25
• Six studio courses: Art Theory and Practice B25; B22 or C20; four additional courses in painting and drawing, printmaking, sculpture, or photography
• Three art history, theory, and criticism courses: two chosen from Art History B10, B20, B30, B40, B50; one chosen from Art Theory and Practice B70, B72, or C72

Biological and Physical Sciences

Biological Sciences (12 units)
• Four core courses: Biological Sciences B10-1,2,3; C01
• Two botany courses chosen from Biological Sciences C15, C33, C90
• Three zoology courses chosen from Anthropology C06; Biological Sciences C02, C03, C04, C06, C20, C25, C45, C92
• One laboratory course chosen from Biological Sciences C05, C08, C45, C54
• Electives: two C-level biological sciences courses Related courses: Chemistry A01, A02, A03, B10-1,2; Mathematics B14-3 or Statistics B02 or C02; Physics A30-1,2,3 or A35-1,2,3

Chemistry (12 units)
• General chemistry: Chemistry A01, A02, A03; or A71, A72
• Organic chemistry: Chemistry B10-1,2 or B12-1,2
• Physical chemistry: Chemistry C42-1,2
• Advanced chemistry: Chemistry C29; C33
• Laboratory: one course chosen from Biological Sciences C01; Chemistry B15, C35, C45, or C61
• Electives: two or three B- or C-level chemistry courses to bring total to 12 units Related courses: Mathematics B14-1,2,3; Physics A35-1,2,3 and one additional physics course

Physics (12 units)
• Three introductory courses: Physics A25-1,2,3 or A35-1,2,3
• Four classical physics courses chosen from Physics C30-1,2, C31, C32, C33-1,2, C34
• Modern physics: Physics C39-1,2
• Laboratory: Physics C59-1,2,3
Related courses: Mathematics B14-1,2,3, B15, B17, B21
Students must also complete course work to qualify for a second teaching area.

English (14 units)
• Two prerequisites: English B10, B98
• Two composition courses: English B05 and one additional composition course
• Seven literature courses: two American literature courses, two English literature courses, and three additional literature courses
• One linguistics course chosen from Linguistics A10, B04, B05, B06, B07, B09, C11, C12, C15, C17, C18, C19, C62
• One reading and language acquisition course: 236-C23
• One course in Asian, African, Central American, Native American, or South American literature

Foreign Languages

French (12 units)
• Six language courses: French B02, B03, C02-1,2, C03, C05
• Three literature courses: French B10 and two additional C-level literature courses taught in French
• Three culture and civilization courses: two courses chosen from French B01, B80, B82; one chosen from C80, C91-1,2, C96

German (12 units)
• Four courses in language: two courses chosen from German B04, B05, B08; two quarters of C91 with different topics
• Three courses in literature: three quarters of German B01 with different topics
Education and Social Policy • Academic Programs

• Five courses in literature and culture: three quarters of German C10; two courses chosen from C29 and/or C32

Latin (12 units)
• Three language courses: Latin A01-1,2,3
• Four literature courses: Latin B01-1,2,3, C10
• Five other B- or C-level Latin, Greek, or classics courses

Russian (12 units)
• Six language courses: Slavic Languages and Literatures B03-1,2,3 and C03-1,2,3
• Four literature courses chosen from Slavic Languages and Literatures B10-1,2,3; B11-1,2; B55
• Two courses of advanced study: Slavic Languages and Literatures C60, C61

Spanish (12 units)
• Two courses in language and composition chosen from Hispanic Studies 463-B03-1,2,3, C02, C03
• Five literature courses: Hispanic Studies 463-C23 and C80; three courses chosen from B01-1,2,3 and B02-1,2,3
• Culture and civilization: Hispanic Studies 463-C50 or C51
• Four additional B- or C-level courses taught in Spanish

Mathematics (12 units)
• Five calculus/analysis courses chosen from Mathematics B14-1,2,3; B15; B20-1,2,3; B21; C03; C05; C10-1,2,3; C17-1,2
• Two geometry courses chosen from Mathematics C08; C26-1,2; C28; C29
• Two algebra courses chosen from Mathematics B17; C34; C37-1,2,3
• One probability and statistics course chosen from Mathematics C30-1; Statistics B02, C02
• One computer science course
• One additional C-level mathematics course

Social Sciences

History (12 units)
• Three courses in U. S. history
• Two courses in European history
• One course in non-Western/third world history
• Six additional history courses, four of which must be B- or C-level courses

Economics with History (16 units)
• Four introductory courses: Economics B01, B02, B81; Statistics B10
• Four major courses: Economics C10-1, C11-1, two additional B- or C-level economics courses
• Four U.S. history courses
• Four world history courses

Political Science with History (16 units)
• Three introductory courses: Political Science B20 and two courses chosen from B01, B21, B30, B40, B50
• Two methods courses: Political Science C95; one course chosen from C10, C11, or C12
• Three C-level political science courses
• Four U.S. history courses
• Four world history courses

Sociology with History (16 units)
• Two A- or B-level sociology courses
• Four theory and methods courses: Sociology B26, C03, C06, C29
• Two C-level sociology courses
• Four U.S. history courses
• Four world history courses

Electives
Additional units of elective course work must be taken to complete the 45-unit degree requirement.

Clinical Experiences
Students complete a co-teaching practicum during fall quarter of their junior or senior year. Applications for co-teaching placements must be submitted to the Office of Field Experience by the fourth week of the spring quarter preceding the co-teaching practicum. The co-teaching practicum includes a minimum of 10 hours per week in a classroom for 10 weeks. Students also take two evening seminars (236-C41 and the applicable methods and techniques course, C54–59) and at least one additional course that quarter. Students must complete a preliminary contract for their co-teaching practicum during the first two weeks of the quarter.

Students complete a student teaching internship during fall or winter quarter of their senior year. To apply for student teaching, students must have satisfactorily completed their co-teaching practicum, 236-C41, the applicable methods and techniques course (C54–59), and at least nine courses in their
teaching major. Further, students must have a grade point average of 2.5 or above in their major and professional core courses. (Note: While a grade point average of 2.5 is the minimum requirement, we recommend a grade point average closer to 3.0 to be competitive for a student teaching placement.)

Applications for student teaching must be submitted to the Office of Field Experience by the fourth week of the quarter preceding the student teaching internship. The student teaching internship is a full-time placement (40 hours per week) for 10 weeks in a local school. Students must also attend one evening seminar (236-C81). The student teaching internship and the evening seminar combined are worth 4 units of credit. No other courses are taken during that quarter. Students must complete a preliminary contract for their student teaching internship during the first two weeks of the quarter.

**Additional Requirements for Certification**
- United States citizenship or evidence of permanent resident status
- Illinois State Teacher Certification Examination (Basic Skills and Content Area tests)

Information about the required Illinois State Teacher Certification Examination is available in the Office of Student Affairs.

**Teacher Certification at Northwestern**
Students successfully completing approved teacher training programs at Northwestern qualify to receive Illinois certification. Although legal requirements for certification vary from state to state, each teacher training program offered at Northwestern is sufficiently flexible to permit a student who plans carefully to complete provisional requirements of most states. Information concerning these requirements is available in the Office of Student Affairs of the School of Education and Social Policy.

Northwestern will recommend a student for a teaching certificate only when the student has successfully completed an approved Northwestern University teacher preparation program. A student who qualifies for certification as described above must apply to the University's designated certifying official for a recommendation for certification. Students in the Schools of Music and Speech should apply through their schools. All other students should apply through the Office of Student Affairs of the School of Education and Social Policy. Applications must be submitted early in the quarter preceding the final quarter of study at Northwestern.

Graduates of a teacher training program at Northwestern who do not apply for certification upon graduation may not be eligible for licensure. The University will make every effort to assist its graduates in obtaining teaching certification but cannot guarantee eligibility at a later date.

**Accelerated Master of Science Program in Education and Social Policy**
Students who exhibit exceptional ability as Northwestern undergraduates and wish to become certified in elementary or secondary education as part of a master's degree may apply to the School of Education and Social Policy Master of Science Program in their senior year. This program allows students to complete their master's degree and certification requirements at an accelerated pace. Students who wish to pursue this option must consult with a certification adviser in the School of Education and Social Policy before their senior year for special undergraduate course planning.

**International Studies Program**
Any Northwestern undergraduate may enroll in international studies, an undergraduate interschool adjunct major that is taken in conjunction with a traditional major. (See International Studies Program in the Other Undergraduate Programs section of this catalog.)

**Undergraduate Leadership Program**
The Undergraduate Leadership Program, an interschool certificate program open to all undergraduates, helps students understand the nature of leadership and prepares them to become leaders. (See Undergraduate Leadership Program in the Other Undergraduate Programs section of this catalog.)
Learning Sciences

Courses Primarily for Freshmen and Sophomores

210-B05-0 Undergraduate Proseminar Introduction to issues faced by educators, policy makers, business leaders, and human service professionals and the methods used in addressing these issues. SESP faculty research and themes explored. Writing-intensive course.

473-B06-0 Elementary Statistics for Research See Statistics, College of Arts and Sciences.

210-B11-0 Introduction to Organization Theory and Practice Major organizational theories; opportunities for students to apply these theories in organizations.

210-B12-0 Learning and Understanding Framework for learning in all aspects of life: traditional school subjects, professional training, creative and performing arts, personal health, basic survival skills. Students are encouraged to draw from their own experiences.

Courses Primarily for Juniors and Seniors

210-C01-0 Learning in Context: Cognitive Science Foundations of the Learning Sciences How people learn to understand, reason, and solve problems; knowledge representation, expertise, transfer, and metacognition; learning in mathematics, science, reading and writing, and informal reasoning.

210-C02-0 Education and the Changing Workplace The changing nature of work and how this will affect skills required for work and the teaching of those skills in the 21st century.

210-C06-0 Studies in Organizational Change Theories and methods of organizational learning and change. Students design change interventions. Prerequisite: B11.

210-C10-0 Learning Organizations for Complex Environments Major change factors, including technology, globalization, and demographics, and their impact on organizations; how organizations are creating and responding to these changes through organizational design, learning systems, and human resource changes.

210-C26-0 Mathematics in the Elementary School Selected mathematical topics taught in the elementary school. Relevant teaching strategies and instructional materials. Mathematical and psychological aspects of the concepts studied.

210-C83-0 Undergraduate Internship Opportunity for advanced undergraduates to gain field experience in practical and theoretical aspects of learning. No more than two units may be taken in any one quarter. Prerequisite: consent of instructor directing the field study and of assistant dean. (Students wishing to register must first complete the Request for Independent Study/Internship in Education form available from the Office of Student Affairs.)

210-C98-0 Honors Thesis Open to seniors who have attained a cumulative grade point average of 3.5 by the end of junior year. Prerequisites: consent of assistant dean and instructor directing the honors thesis.

Human Development and Social Policy

Courses Primarily for Freshmen and Sophomores

225-B01-0 Introduction to Social Policy Social policy formulation: substance of major American social policies and manner in which the American political system shapes social policy in this country.

225-B98-0 Student Organized Seminar Students initiate courses supervised by sponsoring faculty to explore topics not covered in other courses. Consulting with a faculty sponsor, students prepare a seminar plan and submit it to the assistant dean for student affairs before the middle of the quarter preceding the quarter in which the seminar is to be held. The plan includes a topic description, reading list, specifications of term papers and written examinations, prerequisites, and meeting schedule. All proposals are formally reviewed and approved before the seminar is offered. Enrollment is allowed in only one Student Organized Seminar per quarter and must be on the pass/no credit basis. Consult with the assistant dean for further details.

Courses Primarily for Juniors and Seniors

225-C01-0 Human Development: Childhood and Adolescence Personal, social, and cognitive development, birth through adolescence. Interplay of biological and experiential factors on ego, personality, linguistic, and conceptual development.

225-C02-0 Human Development: Adulthood and Aging Psychological, sociological, and biological factors influencing socialization and development from young and middle adulthood through old age. Influences of family, school, and work on the individual.

225-C03-0 Administration and Policy Studies Education and human development as a multi-institutional, ecological, and macrosociological phenomenon. Issues in the philosophy, history, economics, and politics of education.

225-C04-0 Social Policy and the Human Services Development of social policy for human services in the United States. Human service policies for education, mental health, physical health, income, and aging.

225-C05-0 Law and Social Policy Use and influence of the legal system in and on social institutions and policy.

225-C07-0 Educational Policy Conflict between societal imperatives for selecting and preparing youth for future careers and offering youth opportunity; how society and schools address this conflict; various approaches to policy reform.
225-C10-0 Legal Aspects of Education  Structure of school governance; decision making; relevant state and federal legislation affecting public schooling.

225-C11-0 The Political Economy of Social Policy  American social policy from a cross-national comparative perspective. Examines the historical development of social policy in the Western world; assesses three competing perspectives on the “crisis” of the welfare state.

225-C12-0 Development of African American Children and Families: Theory and Research  Educational and human service policy concerns of African Americans; contemporary social policies affecting children and families; associated developmental, educational, and sociopsychological research.

225-C13-0 Development of African American Children and Families: Research and Social Policy  Educational and human service policy concerns of African Americans; contemporary social policies affecting children and families; associated developmental, educational, and sociopsychological research.

225-C16-0 Moral Values and Human Development: An Introduction  Moral development of the individual. Explores moral values from several perspectives: age-developmental differences, cross-cultural and gender differences, relationship between moral reasoning and moral behavior.

225-C17-0 Gender and the Life Course  How age and sex serve as a basis for the social construction of men’s and women’s lives. How social forces operate to create contrasting life trajectories, role patterns, and transitions; the role of social policies. Comparative view of different societies and periods in recent history.

225-C18-0 Adult Development and Work Careers  Adult development and careers from the perspectives of psychology, sociology, and organizational behavior. Individual career-development strategies and alternative career systems.

225-C19-0 Family Development in Changing Society  Societal changes and their effects on the family.

225-C30-0 Economics of Social Policy  How economists view social policy issues. Economic models of household decision making. How economists account for costs and benefits of of public and private programs and decisions. Prerequisite: Economics B01 or consent of instructor.

225-C83-0 Practicum  (2 units) Internship only for students in the Learning and Organizational Change, Psychological Services, and Social Policy programs. Intensive, supervised participant observation of (1) interpersonal relationships, especially those of professional and client, and (2) the effects of institutional structure and policy on both professionals and clients. Prerequisites: C72 and consent of program director.

225-C85-0 Practicum Analysis Seminar  (2 units) Small-group meetings only for students in the Learning and Organizational Change, Psychological Services, and Social Policy programs to analyze C83 practicum experiences, organize their perceptions of their own internships, and share them with other class members. To be taken concurrently with 225-C83. Prerequisite: C72.

225-C99-0 Independent Study  Opportunity for students to pursue, under the direction of faculty members, special topics in education not covered by regular courses. Prerequisites: consent of instructor directing the study and of associate dean. (Students wishing to register in C99 must first complete the Request for Independent Study/Internship in Education form available from the Office of Student Affairs.)

Counseling Psychology

Courses Primarily for Juniors and Seniors

230-C01-0 Introduction to Counseling  Overview of counseling theories, techniques, client systems, and service settings.

230-C02-0 The Human Personality  Classic and contemporary psychological approaches to personality; understanding the whole person in his or her societal and historical context. Emphasis on both theory and research.

230-C03-0 Intervention Strategies  Intervention strategies in the areas of human development, education, psychological well-being, and social welfare within a social-ecological framework. Emphasis on long-term change in people and social environments.

230-C11-0 Group Dynamics  Theory and research in the social psychology of groups and social systems. Small- and large-group dynamics; intergroup relations. Participation in a weekend group relations conference.

230-C32-0 Career Development: Theory and Counseling  Process of career development and its relation to the world of work. Discussion of career development theories. Focus on self-assessment; decision-making skills; educational, occupational, and community information; and job-seeking skills.

230-C50-0 Health and Physical Development  Interaction and interdependence of physical well-being, mental and emotional health, and surrounding social environment. Topical areas covered for secondary education students completing state certification requirements.
Teacher Education

Courses Primarily for Juniors and Seniors

236-C03-0 Problems in the Philosophy of Education
Classical and modern philosophies of education. Text interpretation, analysis of ideas, argument construction; relationship of philosophy to educational issues. Students develop their own philosophy of education.

236-C04-0 History of Education in the United States
Education and social change in the United States since 1789. Development of the American commitment to commonality in education; the changing relation between school and community since 1899; and the rise of the professional educator.

236-C23-0 Foundations of Reading and Language Acquisition

236-C25-0 Foundations of Writing Processes (Secondary)
Cognitive and sociocultural foundations of writing processes and their implications for instruction and assessment. Includes supervised field experience.

236-C27-0 Educating Exceptional Children
Students with disabilities, including learning disabilities resulting from human development and/or accidents; understanding and application of approved emergency, educational, and rehabilitative activities; interrelationships with medical, health, and educational personnel.

236-C41-0 Teaching and Learning in Social and Cultural Contexts
Current instructional theory, research, and practice. Definition of instructional goals, implementation of goals through curricular design, measurement of relevant outcomes. Minimum of 50 hours of observation in selected schools. Open only to teacher certification candidates. Concurrent registration with co-teaching required. Prerequisite: consent of Office of Student Affairs.

236-C54–C59 Methods and Techniques
Students in the Secondary Teaching Program take one of the following six methods courses:
• 236-C54 Methods and Techniques: Art
• 236-C55 Methods and Techniques: Foreign Languages
• 236-C56 Methods and Techniques: English
• 236-C57 Methods and Techniques: Secondary Mathematics
• 236-C58 Methods and Techniques: Sciences
• 236-C59 Methods and Techniques: Social Sciences

These methods courses analyze the literature and research related to the subject area and teaching methodology. In addition, they examine the development of learning experiences, methods, and educational techniques appropriate to the middle and high school levels.

Students also complete a co-teaching practicum that requires a minimum of 10 hours per week for 10 weeks observing and assisting in a school approved by the Office of Field Experience. Within the first two weeks of the quarter, students must develop a contract for their co-teaching practicum with the methods professor and a teacher or administrator in the school where the practicum is to be completed. This contract must be approved by the Office of Field Experience for the co-teaching practicum to continue. Methods courses are taken simultaneously with C41.

236-C81-0 Tutorial in Education: Student Teaching
(4 units) Further development of teaching methodologies through an intensive, 10-week clinical experience and teaching under the supervision of master teachers in the teacher training schools. Increasingly sophisticated teaching responsibilities and, finally, primary responsibility for teaching a group or a class. Prerequisites: successful completion of the co-teaching experience, an approved contract for the internship experience, and consent of the Office of Field Experience.
The McCormick School of Engineering and Applied Science is committed to providing leadership for the technological foundation of our society, economy, environment, and culture. The school's mission is twofold: the personal and professional development of its students and faculty and the development and application of new technology, which is increasingly of an interdisciplinary nature.

McCormick is dedicated to a high standard of excellence in:
- Teaching fundamentals of science and engineering disciplines and stimulating students to become innovative thinkers and leaders able to cope with complex issues in a changing environment
- Preparing undergraduate and graduate students for professional engineering careers in a competitive world, capable of understanding, applying, and contributing to technology in whatever areas or careers they subsequently pursue

Undergraduate students in McCormick may follow a curriculum leading to a bachelor of science degree in any of the following fields:
- Applied mathematics
- Biomedical engineering
- Chemical engineering
- Civil engineering
- Computer engineering
- Computer science
- Electrical engineering
- Engineering science
- Environmental engineering
- Industrial engineering
- Manufacturing engineering
- Materials science and engineering
- Mechanical engineering
- Medical engineering (Honors Program in Medical Education only)

The degrees in biomedical, chemical, civil, computer, electrical, environmental, industrial, and mechanical engineering and materials science and engineering, as well as the McCormick School and its cooperative education program, are accredited by the Accreditation Board for Engineering and Technology (ABET).

With proper use and combination of requirements, options, and electives, students may prepare themselves for graduate work in engineering and also for graduate studies in medicine, law, business, or other areas. Bachelor of science degrees are awarded also in approved ad hoc combined studies programs.

Graduate programs of study are available in all the above fields as well as in theoretical and applied mechanics, manufacturing management, project management, and engineering management. These programs leading to degrees at the master's and doctoral levels are described completely in the Graduate School catalog or in publications on engineering graduate programs.

Excellence in research is a distinguishing characteristic of the engineering faculty. A faculty such as this, working at the frontiers of knowledge, is in the best position to maintain courses and curricula in a state of currency and to develop an atmosphere inspiring scholarship and originality among students.

The McCormick School has a student body of approximately 1,500 undergraduates and 950 graduate students. The school is housed in the Technological Institute, which contains more than 750,000 square feet of floor area and provides excellent educational and research facilities.

The Seeley G. Mudd Library for Science and Engineering, adjoining the Technological Institute, is an integrated and centralized collection serving engineering, applied mathematics, astronomy, biochemistry, biology, chemistry, and physics.

**Academic Policies**

**Requirements for the Degree of Bachelor of Science**

Students must successfully complete all 48 courses of the curriculum or have equivalent academic experience. Students who interrupt their programs of study for an extended time during which degree requirements are changed will normally be held to
Advanced Placement

Advanced placement and college credit may be granted on the basis of the College Entrance Examination Board (CEEB) advanced placement tests. Placement or exemption may be granted on the basis of the CEEB tests or special examinations in subject areas or by appropriate analysis of high school background. Any placement (verified by a grade above C– in a subsequent course) in approved sequential work will reduce the course requirements for the BS by the number of courses preceding the placement. These stipulations regarding placement and exemption and degree requirements may differ from those of other schools of the University.

Personal Computers

Northwestern’s campus is fully networked, so students can access local and remote information sources from dormitory rooms and laboratories. Accordingly, the McCormick faculty has adopted a policy making each engineering undergraduate responsible for his or her own computing hardware and software for basic tasks such as word processing, spreadsheet calculations, and graphics and for connection to the University’s computer network. McCormick maintains a number of public and departmental computing laboratories, but these are used primarily for higher-level or specialized applications.

Academic Options

Cooperative Engineering Education Program

The Walter P. Murphy Cooperative Engineering Education Program alternates periods of paid industrial experience and academic studies for full-time students in all departments of engineering and applied science. During 18 months of industrial employment, students can apply theory while gaining practical experience. This perspective enables them to develop an understanding of the responsibilities of their future professional careers.

Freshmen are invited to participate in workshops to prepare them for the co-op program. Sophomores in good academic standing begin applying for co-op positions as early as the fall quarter. The co-op coordinator makes every effort to secure interviews for the students, so that cooperative work assignments are related to their professional objectives.
Generally, the first work experience for sophomore co-op students occurs the summer before their junior year. Co-op experience for junior and transfer students and others may begin as late as the spring of their junior year. If necessary, with the help of the academic advisers, special schedules may be arranged to enable students to meet individual academic requirements as well as co-op requirements.

Students register for their work quarters, but no tuition or fee is charged. The registration keeps co-op students enrolled at Northwestern during work periods. While no academic credit is given for co-op, special BS/MS programs may use co-op experience as the basis for undergraduate projects and master's theses.

Although emphasis is on the experience gained from cooperative work rather than on the income, students in the co-op program may earn at least a portion of their educational expenses.

The following table shows the college-industry schedule for the full five years of undergraduate education:

<table>
<thead>
<tr>
<th>College-Industry Schedule</th>

</tbody>
</table>

Students may be enrolled simultaneously in the co-op program and the Naval Reserve Officers Training Corps.

Students who complete the co-op plan receive tuition rebates during their final academic quarters to assure that they will not pay higher total tuition than other students in the same entering class.

In addition to the academic degree, the faculty of the McCormick School awards co-op students a certificate in recognition of successful completion of the Walter P. M urphy Cooperative Engineering Education Program. Students must successfully complete the schedule of school and work, which meets standards set by the program, the co-op employer, and ABET, in order to receive recognition as co-op students on graduation from the McCormick School.

In some states, ABET-accredited co-op experience may be credited for up to one year of the usual four years of engineering experience required for the Professional Engineer's License.

Employers of co-op students include government and service institutions as well as industry. Northwestern coordinators visit participating employers periodically to discuss the students' abilities, attitudes, and progress on the job. At the end of each work period employers are asked to evaluate student performance and progress. It is important to note that neither students nor cooperative employers obligate themselves to permanent employment by virtue of the co-op status, although most students get impressive permanent job offers as a result of the co-op experience. Others are admitted to prestigious graduate and professional schools.

Undergraduate Honors Program

Students with good scholastic records may be admitted to the Undergraduate Honors Program any time during their junior or presenior year. At the time of admission, they must have a cumulative grade point average of 3.5 or better. Students who become eligible will be notified by the dean.

Honors students participating in the program must (a) complete at least three units of approved advanced study (including courses normally accepted at the graduate level) with an average grade of B or better and (b) complete an extended independent study project (at least two quarters on the same topic) leading to an acceptable report.

Successful completion of the Honors Program will be noted on the student’s transcript. Recognition also will be given in the commencement program. If a student’s individually evaluated performance is not judged to meet the standards of success, the student will receive course grades and credits as earned.

Undergraduate Research

Opportunities for undergraduate research are made available and encouraged in several ways. Each major field of study offers C99 Projects for research enrollment on an elective basis. The Undergraduate Honors Program incorporates a required research component.

The McCormick School Undergraduate Research Board, composed of student leaders, administers a program that funds individual research projects from
the Sara Boley Undergraduate Research Fund. The board helps select the winner of the Harold Benedict Gotaas Award, presented to the senior engineering student who submits the best original research paper.

Students normally perform undergraduate research projects under the direction of faculty who are doing research in their department or in a University or McCormick School research center, laboratory, or council. Engineering faculty may be associated with a variety of research centers, including the Center for Advanced Cement-Based Materials, Center for High-Temperature Superconductivity, Materials Research Center, Center for Catalysis and Surface Science, Institute for the Learning Sciences, and McCormick School Centers for Engineering Tribology, Information Technology, Manufacturing Engineering, Optimization Technology, Parallel and Distributed Computing, and Quality Engineering and Failure Prevention. Important research is also carried out by faculty working in the Applied Optics Laboratory, Quantum Devices Laboratory, and Council on Theoretical and Applied Mechanics.

Students admitted as freshmen to the Honors Program in Undergraduate Research will have the opportunity to be involved in faculty-guided research in all four years of study.

**Multiple BS Degrees**
Students with wide-ranging interests may work toward two or more bachelor of science degrees in the McCormick School. The work in additional areas does not need to be completed at the same time, but the full requirements for each degree must be approved by each department (program) no later than two academic quarters before the completion of work for the second degree yet no earlier than the junior year. The full requirements for each degree must be satisfied. At least six additional courses or equivalents must be presented before the awarding of each additional degree.

**Second Field of Specialization**
The elective opportunities in the McCormick School curriculum may be used toward a departmental program in another school of the University. Satisfactory completion of the requirements for the second program, verified by the appropriate department, will be noted on the student's transcript. Carefully planned electives will normally enable students to obtain a second field of specialization within the 48-course requirement for the BS degree.

**Concurrent BS/MS**
During their senior year, qualified undergraduate students in the McCormick School may work simultaneously toward the bachelor of science and master of science degrees in engineering. Integrated planning of coursework allows the possibility of taking graduate-level courses during the third and fourth years. Also provided are early assurance of graduate admission and early planning of project or research work.

It is possible for some students to finish the work for an MS in a combined program in less than the normal five years. In the McCormick School, any advanced placement, exemption, or demonstrated proficiency will reduce the course work requirement. The course requirements remain unchanged for the two degrees. In the McCormick School, the requirement for the BS is 48 courses, and the requirement for the MS is specified by the individual department (9-12 courses). No course used for the MS requirement may be used for the BS requirement.

Application for admission to concurrent BS/MS study may be made any time during the seventh through the ninth quarters, in accordance with departmental advice. However, upon beginning graduate study, students may have no more than four courses to complete toward the undergraduate degree. The graduate application must be accompanied by a full plan of BS/MS studies and must be approved by the appropriate department and the Graduate School. A department may require that students do additional work preliminary to a concurrent BS/MS program at any level.

**Five-Year BA/BS**
The McCormick School encourages breadth of interest and to this end supports combined degree programs in engineering and liberal arts. One approach is the 3-2 program, in which students attend a liberal arts college for the first three years with a course of study that develops a basic understanding of science and mathematics and a strong component in the social sciences and humanities. Following the three years of basic studies and on recommendation of their liberal arts college, students transfer to Northwestern. When they complete the requirements of a field of engineering in two years, a BS in engineering
is awarded by Northwestern and a BA by the original college. Any student enrolled in an accredited liberal arts college program may apply for transfer admission to follow a 3-2 plan.

Another approach to combining liberal arts and engineering is a parallel arrangement of studies at Northwestern, in which a fifth year results in a BA with a major in the College of Arts and Sciences and a BS in a particular field of engineering. Students should file a petition outlining this dual plan of study before their fourth year; it must be approved by the departments and schools administering the degree work. Students must complete the stated requirements of both schools and expected majors.

**Engineering and Music**
Highly capable students who have a strong interest in and commitment to both engineering and music may pursue a five-year program leading to bachelor's degrees in both fields. In engineering, any field of study may be chosen, resulting in a bachelor of science in the chosen field. In music, the bachelor of music or bachelor of arts in music is awarded. The program may be entered no later than the beginning of the sophomore year; admission requires concurrent approval of both the School of Music and the McCormick School. (See also Five-Year BS/BM us or BS/BAM us in the School of Music section of this catalog.)

**International Education**
McCormick students will be awarded a certificate in international engineering experience for both completing three quarters of foreign language study while enrolled at Northwestern and spending six months abroad as full-time students or on co-op assignments, in paid engineering employment, or on project work at a foreign university, research institute, or company. Northwestern and the McCormick School have connections with selected leading universities around the world. Some of these provide access to academic opportunities and others to research collaborations. Contact the Undergraduate Engineering Office for more information.

The social science/humanities distribution is an opportunity for pursuing international themes. Appropriate sequences of course work, including language study, are suggested.

International studies, an undergraduate inter-school adjunct major that is taken in conjunction with a traditional major, is open to McCormick students. (See International Studies Program in the Other Undergraduate Programs section of this catalog.)

**Honors Program in Undergraduate Research**
The Honors Program in Undergraduate Research in the McCormick School provides an unusual opportunity for students with superior motivation and scholastic credentials (high school rank and test scores) to be admitted to work with an engineering faculty mentor/adviser in a challenging research project. This research project participation could begin in the first year and continue through all the undergraduate years, allowing close association with a faculty researcher probing the frontiers of knowledge in engineering or engineering science.

This unique opportunity for experiencing the excitement of original research and the associated approach to learning provides students with not only encouragement but also excellent preparation for graduate study. If students in the Honors Program in Undergraduate Research achieve advanced placement as well as satisfactory performance in the research project and accompanying course work, during their third year of undergraduate study they will be considered for admission to the Graduate School and for award of financial aid.

**Honors Program in Engineering and Management**
Students are eligible to participate in a joint program between the McCormick School and the J. L. Kellogg Graduate School of Management. High school students whose scholastic credentials are superior and who are strongly motivated to combine engineering and management expertise in their future careers may be admitted to undergraduate engineering in McCormick and also granted deferred admission to the master of management program in Kellogg.

The program requires eight years, consisting of a combination of undergraduate and graduate study interspersed with related work experience. The initial studies are in a chosen field of engineering, with a schedule of school and work in industry in accordance with the co-op program. The five-year co-op program requires four academic years and 1 1/2 years of industrial work; academic and industrial quarters are alternated during the last three years. Students must maintain a 3.0 grade point average.
After five years, participants receive a bachelor of science degree in the chosen engineering field and are admitted to the Kellogg Graduate School of Management. A condition of admission is one further year of full-time work experience in industry before the two years of full-time study leading to the master of management degree.

**Honors Program in Medical Education**
The Honors Program in Medical Education (HPME) is designed for unusually gifted high school students who seek a career in medicine or medical science. It provides a plan whereby students entering Northwestern are admitted simultaneously to the College of Arts and Sciences, McCormick School, or School of Speech and to the Medical School. HPME students then participate in a challenging program, with the first three years in undergraduate study and the last four years in the Medical School, thus reducing the period of formal training by at least one year.

Students who meet the entrance requirements of the McCormick School may pursue a program leading to the bachelor of science in medical engineering degree after five years and the doctor of medicine degree after seven years.

**Honors Program in Engineering and Education**
The Honors Program in Engineering and Education is designed for students who have strong interest in education and training as well as in science, mathematics, and engineering. The program provides an opportunity to complete a graduate degree in the learning sciences and an undergraduate degree in engineering in five years while gaining industrial or research experience related to a specific expertise in the field.

The program places high value on both academic research and industrial experience. Students may choose industry experience in educational software development through the co-op program, research experience with a faculty member at the Institute for the Learning Sciences, or a selective combination of both during their undergraduate and graduate studies.

Students admitted to the program must maintain a 3.0 grade point average. A one-quarter grace period to bring a lower grade point average up to 3.0 will be granted.

**Honors Program in Engineering and Journalism**
The Honors Program in Engineering and Journalism is intended to prepare exceptional students for communications careers emphasizing engineering, science, and technology. This joint program involves completing a McCormick bachelor’s degree and then a Medill School of Journalism master’s degree. It normally requires five years of study, but unusually capable students may be able to shorten the time through use of advanced placement credits and accelerated scheduling. To be considered for the program, applicants to Northwestern complete an additional questionnaire that is evaluated by a Medill faculty panel. Students are evaluated by the faculty during the program to verify that performance is satisfactory. Part of the engineering humanities requirements must be fulfilled with the Medill courses B01 Editing and Writing the News and B02 History and Issues of Journalism.

**Combined BS/DDS**
A combined BS/DDS program is offered to qualified students in the biomedical engineering curriculum. Application is made for admission to Northwestern University Dental School after three years in the undergraduate program. Upon completion of the first year in Dental School, credits earned are accepted as electives and the BS is awarded by the McCormick School, provided all the requirements for that degree have been met. A number of places in each entering class at the Dental School are reserved for students who qualify for this program.

**Undergraduate Leadership Program**
The Undergraduate Leadership Program, an inter-school certificate program open to all undergraduates, helps students understand the nature of leadership and prepares them to become leaders. (See Undergraduate Leadership Program in the Other Undergraduate Programs section of this catalog.)

**Student Resources**

**Tutorial Program**
The McCormick School conducts a program of guided study and tutorial help for freshmen and sophomores in all the required courses in mathematics, chemistry, physics, and engineering. This program encourages out-of-class work and good study habits and helps provide a full understanding
of the early courses that are the foundation for much that is to follow. The aim is not to displace students in their learning efforts but to provide explanations to bridge the uncertain or unknown and lead to depth of understanding.

**Faculty Advisers**
During the first year, students are assigned a special freshman adviser. At the beginning of the sophomore year, most students will have selected a major field of study and will be reassigned an adviser in that area. The adviser assists in planning the program of study, but students retain the responsibility of meeting overall graduation requirements. Curricular and other advice may be obtained from the school by addressing an e-mail request to mccormick-school@nwu.edu.

**Counseling Office**
The McCormick School employs professional counselors available to give students educational, vocational, academic, and personal counseling. Students may arrange to have interest testing through the Counseling Office. Vocational materials relating to engineering are available.

**Organizations for Engineering Students**
The Northwestern Engineering Student Council is composed of representatives from each class in engineering and from approved McCormick organizations. It is the recognized representative body of undergraduate engineering students and as such serves as a link between the students and faculty and administration. It encourages and coordinates the activities of engineering students and student groups.

The McCormick Undergraduate Research Board is organized to stimulate undergraduate research and to provide financial support for projects begun by individual students.

The following professional societies have established student branches on the campus:
- American Institute of Chemical Engineers
- American Institute of Industrial Engineers
- American Society of Civil Engineers
- American Society of Mechanical Engineers
- ASM International
- Biomedical Engineering Society
- Institute of Electrical and Electronics Engineers
- Institute of Electrical and Electronics Engineers (computer subchapter)

The following honorary societies recognize high-achieving McCormick undergraduates:
- Eta Kappa Nu: open to upperclass students in electrical engineering who demonstrate superior scholarship and ability
- Kappa Theta Epsilon: cooperative engineering education honorary society
- Omega Chi Epsilon: for upperclass students in chemical engineering who demonstrate superior scholarship and leadership ability
- Phi Eta Sigma: for freshmen who make a scholastic average equivalent to a grade of A
- Phi Lambda Upsilon: open to upperclass students in chemistry and chemical engineering who demonstrate superior scholarship and academic ability
- Pi Tau Sigma: for upperclass students in mechanical engineering who demonstrate superior scholarship and leadership ability
- Sigma Xi Society: eligibility for associate membership for seniors who excel in scholarship in at least two departments
- Tau Beta Pi: for upperclass students who have shown superiority in scholarship and ability in engineering work

**Undergraduate Programs of Study**

**Accreditation**
McCormick programs are accredited by the Accreditation Board for Engineering and Technology. National ABET accreditation is important in professional engineering fields. Additional information concerning professional accreditation may be obtained from the office of the associate dean for undergraduate engineering.

**McCormick School Curriculum Requirements**
All curricula leading to the bachelor of science degree in engineering or applied science must have the same basic components—mathematics, engineering analysis and computer proficiency, basic sciences, design and communications, basic engineering, social sciences/humanities, unrestricted electives, and major program. McCormick is making a transition to the requirements...
Design and Communications (3 courses)
- Writing and design
  General Engineering A06-1,2 Engineering Design and Communication
- Speaking, 1 course from
  Speech A01 Interpersonal Communication
  Speech A02 Public Speaking
  Speech A03 Analysis and Performance of Literature
  Higher-level courses may satisfy this requirement; they are approved on an individual basis.

Basic Engineering (5 courses)
5 courses from at least four of the following eight areas:
- Thermodynamics
  Chemistry C42-1 Thermodynamics
  May be taken alone or as prerequisite to ChE B11
  ChE B11 Thermodynamics
  Chemistry C42-1 is prerequisite
  ME B20 Thermodynamics I
  May not be taken with Chemistry C42-1 or ChE B11
  ME C25 Kinetic Theory and Statistical Thermodynamics
  ME C70 Thermodynamics II
  MSc C21 Applications of Thermodynamics
- Fluids and solids
  BM E B70 Introduction to Biomedical Fluid Mechanics
  ChE C21 Fluid Mechanics
  CE B16 M mechanics of Materials I
  CE B19 Continuum Mechanics I
  ME B41 Fluid Mechanics I
- Materials science
  MSc B01 Principles of the Properties of Materials
  or MSc C01 Chemical Aspects of Engineering Materials
  or MSc B03 Microstructure and Engineering Properties of Materials
- Electrical science
  ECE B41 Circuits I
  ECE B42 Circuits II
  ECE B70 Applications of Electronic Devices
  ECE C01 Fundamentals of Electromagnetics
- Systems engineering and analysis
  ChE B10 Analysis of Chemical Process Systems
  IEMS C19 Operations Research
  IEMS C26 Economics for Engineering I
- Computer engineering
  ECE B01 Introduction to Digital Logic Design
  ECE B05 Fundamentals of Computer Systems Software
  ECE B30 Programming for Computer Engineers
  ECE C16 Microcomputers and Real-Time Applications
  ECE C28 Numerical Methods for Engineers
- Computer science
  CS B11 Fundamentals of Computer Programming II
  CS B30 Introduction to Software Engineering
  CS C17 Data Management and Information Processing
• Probability, statistics, and quality control
  BM E B20 Introduction to Biomedical Statistics
  Ch E C12 Process Odes by Statistical Methods
  CE C06 Uncertainty Analysis in Civil Engineering
  ECE C02 Probabilistic Systems and Random Signals
  IEM S B03 Probability
  IEM S C03 Statistics I
  M E C59 Reliability Engineering

Social Sciences/Humanities (7 courses)
7 courses, which must be approved in advance by the McCormick Humanities Panel, chosen according to one of two options in the following three areas:
  Social and behavioral sciences (SBS)
  Historical studies and values (HSV)
  Fine arts, language, and literature (FAL)
• Option A: At least 2 courses must be chosen in each area. Of the 7 courses, only 3 may be A-level introductory courses; 3 courses must be thematically related to provide depth.
• Option B: 5 of the 7 courses must be clearly thematically related. For breadth, no more than 5 courses may come from a single area.

Unrestricted Electives (5 courses)
Students may take any credit course in the University. Course choices are open to students to enable technical or nontechnical exploration or extension.

Major Program (16 courses)
Any program of study finds its depth or concentration in the 16 courses given to the major program of the curriculum. Each engineering curriculum provides considerable elective opportunity within these courses. The intent is to provide opportunity for individualization, but there is the necessity for coherence in the selection of elective courses. In accredited programs, the understanding is that certain criteria will be met, and guidance to this end is necessary. Accordingly, it is required that a plan of study listing intended selections be submitted for approval by the end of the eighth quarter of study (winter quarter of junior year).

Most curricula offer suggested areas of specialization or options that provide excellent guidance in use of electives. These course plans are available in the department or program offices or the McCormick Records Office and can be the basis for course planning. Alternately, self-designed plans may be submitted, but they should be worked out in consultation with a faculty adviser.

Department Curricula
Students must meet not only the McCormick School curriculum requirement but also the specific requirement for the department curriculum being pursued. The following listings of these curricula present additional information or specifics to be used with the basic curriculum.

Some of the listed curricula contain specializations or options within the curriculum. These are for advice and guidance for elective course choice. For further details about the options/specializations within a particular program, consult with the department coordinator sponsoring that curriculum or check with the McCormick Records Office.

Applied Mathematics Curriculum
Total requirement—48 courses
• Mathematics—4 courses
  M athematics B14-1,2,3
  M athematics B15
• Engineering analysis and computer proficiency—4 courses
  General Engineering B05-1,2,3,4
• Basic sciences—4 courses
  Physics A35-2,3; 2 courses in chemistry, biological sciences, and/or earth sciences
• Design and communications—3 courses
• Basic engineering—5 courses
  5 courses from at least four of the following areas: systems engineering and analysis, mechanics, thermodynamics, fluids and solids, materials science, electrical science, computer science
• Social sciences/humanities—7 courses
• Unrestricted electives—5 courses
• Major program—16 courses
  • Required courses—7 courses
    ESAM C11-1,2,3 Methods of Applied Mathematics
    3 courses from ESAM C22 Applied Dynamical Systems, ESAM C99 Projects, and ESAM D21-1,2,3 Models in Applied Mathematics
    ESAM C46 Computation in Science and Engineering
  • Additional courses—3 courses from the following areas, at least 1 in linear algebra and 1 in probability (suggested courses listed):
    Linear algebra: Mathematics C34 or IEM S C11
    Numerical analysis: ECE C28, D70, D71;
    ESAM D46-1,2
    Probability: IEM S C02, IEM S C03 or M athematics C30-1,2,3 or ECE C02
  • Engineering or the sciences—4 courses leading to an in-depth understanding of an area of application
    • Technical electives—2 courses
      Must be C-level or above in engineering, science, or mathematics

Biomedical Engineering Curriculum
Total requirements—48 courses
• Mathematics—4 courses
  M athematics B14-1,2,3
  M athematics B15

Applied Mathematics Curriculums
Total requirements—48 courses
• Mathematics—4 courses
  M athematics B14-1,2,3
  M athematics B15
• Engineering analysis and computer proficiency—4 courses
  General Engineering B05-1,2,3,4
• Basic sciences—4 courses
  Physics A35-2,3; 2 courses in chemistry, biological sciences, and/or earth sciences
• Design and communications—3 courses
• Basic engineering—5 courses
  5 courses from at least four of the following areas: systems engineering and analysis, mechanics, thermodynamics, fluids and solids, materials science, electrical science, computer science
• Social sciences/humanities—7 courses
• Unrestricted electives—5 courses
• Major program—16 courses
  • Required courses—7 courses
    ESAM C11-1,2,3 Methods of Applied Mathematics
    3 courses from ESAM C22 Applied Dynamical Systems, ESAM C99 Projects, and ESAM D21-1,2,3 Models in Applied Mathematics
    ESAM C46 Computation in Science and Engineering
  • Additional courses—3 courses from the following areas, at least 1 in linear algebra and 1 in probability (suggested courses listed):
    Linear algebra: Mathematics C34 or IEM S C11
    Numerical analysis: ECE C28, D70, D71;
    ESAM D46-1,2
    Probability: IEM S C02, IEM S C03 or M athematics C30-1,2,3 or ECE C02
  • Engineering or the sciences—4 courses leading to an in-depth understanding of an area of application
    • Technical electives—2 courses
      Must be C-level or above in engineering, science, or mathematics

Biomedical Engineering Curriculums
Total requirements—48 courses
• Mathematics—4 courses
  M athematics B14-1,2,3
  M athematics B15
Engineering and Applied Science • Undergraduate Programs of Study

**Chemical Engineering Curriculum**

**Total requirements—48 courses**

**Mathematics—4 courses**
- Mathematics B14-1, 2, 3
- Mathematics B15

**Engineering analysis and computer proficiency—4 courses**
- General Engineering B05-1, 2, 3, 4

**Basic sciences—4 courses**
- Physics A35-2, Chemistry A02, A03 or A71, A72
- Chemistry A01, the prerequisite for Chemistry A02, must be taken as an unrestricted elective.

**Design and communications—3 courses**

**Basic engineering—5 courses**
- Thermodynamics: Chemistry C42-1, ChE B11
- Fluids and solids: ChE C21
- Materials science: MSc C01
- Systems engineering analysis: ChE B10

**Social sciences/humanities—7 courses**

**Unrestricted electives—5 courses**

**Major program—16 courses**

- Core—7 courses
  - Chemistry B10-1, 2 Organic Chemistry
  - Biological Sciences B10-2 Biochemistry and Molecular Biology
  - 2 quarters of BM E C01, C02, C03 Systems Physiology or physiology in the Medical or Dental School
  - BM E C08 Biomedical Engineering Laboratory
  - BM E C90 Biomedical Engineering Design

- Areas of specialization—9 courses
  - Students complete a course of study by selecting one of the five areas of specialization listed below or by developing an alternate set of courses with their adviser that is subsequently approved by the BM E Undergraduate Committee. The specialization provides depth in one area of biomedical engineering. Specific course requirements are provided to students when they enter the department or may be obtained from the department office.

  - Electronic instrumentation
  - Mechanics
  - Transport processes
  - Biotechnology
  - Biomedical signals and images

**Civil Engineering Curriculum**

**Total requirements—48 courses**

**Mathematics—4 courses**
- Mathematics B14-1, 2, 3
- Mathematics B15

**Engineering analysis and computer proficiency—4 courses**
- General Engineering B05-1, 2, 3, 4

**Basic sciences—4 courses**
- Physics A35-2; Chemistry A01, A02; Chemistry A03 or Physics A35-3

**Design and communications—3 courses**

**Basic engineering—5 courses**
- Thermodynamics: Chemistry C42-1, ChE B11
- Fluids and solids: ChE C21
- Materials science: MSc C01
- Systems engineering analysis: ChE B10
Basic engineering—5 courses
Fluids and solids: CE B16 and M E B41
Thermodynamics: 1 course
Electrical science: 1 course
M Sc B03 or 1 other course from systems engineering and analysis, computer science, or materials science
Social sciences/humanities—7 courses
Unrestricted electives—5 courses
Major program—16 courses
10 must be CE courses
• Basic civil engineering—6 courses
  CE B21 Theory of Structures I
  CE B22 Structural Steel Design
  CE B60 Fundamentals of Environmental Engineering
  CE C40 Fluid Mechanics II
  CE C71 Introduction to Transportation Planning and Analysis
  or CE C76 Transportation System Operations
• Mathematical techniques and science—2 courses from approved list
• Technical electives—8 courses in mathematics, science, engineering, or other area supporting student’s specialty. Any 2 of the 8 must be from an approved list of design and synthesis courses.

Areas of specialization: Listed below are samples of some traditional areas of specialization, but students are encouraged with the help of their advisers to design a program that meets their own particular interests.
Applied mechanics
Structural engineering
Geotechnical engineering
Environmental engineering
Transportation systems
Construction

Computer Engineering Curriculum
Total requirements—48 courses
Mathematics—4 courses
Mathematics B14-1,2,3
M athematics B15
Engineeringanalysisandcomputerproficiency—4 courses
General Engineering B05-1,2,3,4
Basic sciences—4 courses
Physics A35-2,3; 2 courses from chemistry, biological sciences, or earth sciences.
Design and communications—3 courses
Basic engineering—5 courses
Probability, statistics and quality control: ECE C02
Electrical science: ECE B41
Computer engineering, ECE B01 and B05
1 course from thermodynamics, fluids and solids, systems engineering and analysis, or materials science
Social sciences/humanities—7 courses
Unrestricted electives—5 courses
Major program—16 courses
• Required courses—8 courses
  ECE B30 Programming for Computer Engineers
  ECE B42 Circuits II
  ECE B50 Physical Electronics
  ECE C03 Advanced Digital Logic Design
  ECE C61 Computer Architecture
  CS C10 Mathematical Foundations of Computer Science
  CS C11 Data Structures and Data Management
  CS C43-1 Operating Systems
• Design requirement—1 course from
  ECE C47 Digital Electronic Systems Design Projects
  ECE C62 Computer Architecture Projects
  ECE C92 VLSI Systems Design Projects
  ECE C99 Projects, when C99 is a design project
• Technical electives—7 courses, including 4 from
  ECE C33 Introduction to Communication Networks
  ECE C46 M icroprocessor System Design
  ECE C57 Design Automation in VLSI
  ECE C58 Introduction to Parallel Computing
  ECE C90 Introduction to Robotics
  ECE C91 VLSI Systems Design
  CS C22 Compiler Construction
  CS C94 Software Project Management and Development
Plus 3 courses from the previous group or from
ECE B43 Signals and Systems
ECE C01 Fundamentals of Electromagnetics
ECE C06 Electronic Circuits
ECE C28 Numerical Methods for Engineers
ECE C32 Digital Image Analysis
ECE C33 Digital Electronic Circuits and Systems
ECE C39 Digital Signal Processing
ECE C60 Introduction to Feedback Systems
ECE C74 Introduction to Digital Control
BM E C84 Biomedical Computing
CS C36 Design and Analysis of Algorithms
CS C39 Introduction to Database Systems
CS C51 Introduction to Computer Graphics
A grade of C – or better is required in each of ECE B01, B05, B41, and B42 for continuation in the computer engineering program.

Computer Science Curriculum
Total requirements—48 courses
Mathematics—4 courses
Mathematics B14-1,2,3
1 course from computer science mathematics list
Engineering AnalysisandComputerProficiency—4 courses
General Engineering B05-1,2,3; CS A11
Basic sciences—4 courses, including
Physics A35-2
Design and communications—3 courses
Basic engineering—5 courses, including Computer Science: CS B11
Probability, statistics, and quality control: 1 course
3 other courses chosen from the basic engineering list, excluding computer science courses
Social sciences/humanities—7 courses
Unrestricted electives—5 courses

Major program—16 courses
• Required courses—8 courses
  CS C11 Data Structure and Data Management
7 courses from
  CSB30 Introduction to Software Engineering
  CSC10 Mathematical Foundations of Computer Science
  CSC11 Data Structures and Data Management
  CSC14 Applied Artificial Intelligence
  CSC17 Data Management and Information Processing
  CSC20 Formal Languages and Automata Theory
  CSC22 Compiler Construction
  CSC25 Artificial Intelligence Programming
  CSC27 Intelligent Information Management Systems
  CSC32 Introduction to Computer Vision
  CSC36 Design and Analysis of Algorithms
  CSC37 Natural Language Processing
  CSC39 Introduction to Database Systems
  CSC43 Operating Systems
  CSC44 Design of Computer Problem Solvers
  CSC48 Introduction to Artificial Intelligence
  CSC49 Introduction to Theorem Proving
  CSC50 Introduction to Computational Linguistics
  CSC51 Introduction to Computer Graphics
  CSC52 Applied Combinatorics
  CSC54 Introduction to the Theory of Parallel Computation
  CSC94 Software Project Management and Development
  CSC95 Special Topics in Computer Science
  CSC99 Projects
• Technical electives—8 courses
  4 courses from the advanced computer science list;
  2 from any of the three lists below; and the remaining
  2 unrestricted, subject to the approval of the student's department adviser
• Project work
  The courses above must be chosen to include two quarters of project work, resulting in the construction and demonstration of a proposed solution to some organization's problem. Projects must be approved by a faculty adviser beforehand. Project work will typically occur in independent study projects (CS C99) or in project-oriented courses (e.g., CS C94).
  Courses at the D level are primarily for graduate students but may be open to advanced undergraduate students with permission. CS A10 may be used as an unrestricted technical elective if taken before CS A11. Technical electives may not satisfy other requirements.
  Computer science mathematics list:
  CS C10 Mathematical Foundations of Computer Science
  CS C52 Applied Combinatorics
  Mathematics B15 Multivariable Integration and Vector Calculus
  Mathematics B21 Elementary Differential Equations
  Mathematics C08 Foundations of Higher Mathematics
  Mathematics C10 Introduction to Real Analysis
  Mathematics C35 Introduction to the Theory of Numbers
  Mathematics C37 Introduction to Modern Algebra
  Computer science external technical elective list:
  Mathematics C13 Chaotic Dynamical Systems
  IEMS C13 Deterministic Models and Optimization
  IEMS C15 Stochastic Models and Simulation
  IEMS C19 Operations Research
  IEMS C28 Location Analysis and Spatial Planning
  IEMS C34 Systems Project Management I, II
  IEMS C35 Systems Simulation
  Statistics C20 Statistical Methods
  ESAM C11 Methods of Applied Mathematics
  ECE C13 Telecommunication Networks for Multimedia
  ECE C28 Numerical Methods for Engineers
  ECE C53 Digital Electronic Circuits and Systems
  ECE C57 Design Automation in VLSI
  Advanced computer science list:
  CS C10 Mathematical Foundations of Computer Science
  CS C11 Data Structures and Data Management
  CS C14 Applied Artificial Intelligence
  CS C17 Data Management and Information Processing
  CS C20 Formal Languages and Automata Theory
  CS C22 Compiler Construction
  CS C25 Artificial Intelligence Programming
  CS C27 Intelligent Information Management Systems
  CS C32 Introduction to Computer Vision
  CS C36 Design and Analysis of Algorithms
  CS C37 Natural Language Processing
  CS C39 Introduction to Database Systems
  CS C43 Operating Systems
  CS C44 Design of Computer Problem Solvers
  CS C48 Introduction to Artificial Intelligence
  CS C49 Introduction to Theorem Proving
  CS C50 Introduction to Computational Linguistics
  CS C51 Introduction to Computer Graphics
  CS C52 Applied Combinatorics
  CS C54 Introduction to the Theory of Parallel Computation
  CS C94 Software Project Management and Development
  CS C95 Special Topics in Computer Science
  CS C99 Projects
Electrical Engineering Curriculum

Total requirements—48 courses
Mathematics—4 courses
Mathematics B14-1,2,3
Mathematics B15
Engineering analysis and computer proficiency—4 courses
General Engineering B05-1,2,3,4
Basic sciences—4 courses
Physics A35-2,3; 2 chemistry courses
Design and communications—3 courses
Basic engineering—5 courses
Thermodynamics: ME B20
Electrical science: ECE B41 and C01
A grade of C– or better in ECE B41 required for registration in ECE B42 or ECE B50.
Computer engineering: ECE B01
Probability, statistics, and quality control: ECE C02
Social sciences/humanities—7 courses
Unrestricted electives—5 courses
Major program—16 courses
• Required courses—9 courses
  ECE B42 Circuits II
  A grade of C– or better in ECE B42 required for registration in ECE C06, C60, C65, and C66.
  ECE B43 Signals and Systems
  ECE B50 Physical Electronics
  ECE C06 Electronic Circuits
  ECE C07 Communications
  ECE C08 Applications of Electromagnetic Fields
  ECE C53 Digital Electronic Circuits and Systems
  ECE C60 Introduction to Feedback Systems
  ECE C81 Electrical Materials: Properties and Applications
• Technical electives—6 courses
  A technical elective is any C-level science, mathematics, computer science, or engineering course. The B-level courses ECE B05 Fundamentals of Computer System Software and Chemistry B10-1. Organic Chemistry are accepted also as technical electives. The distribution of such courses must constitute a viable and educationally sound program for electrical engineering. In particular, this means that all students must choose a technical electives program that, with their other course work, satisfies ABET requirements for engineering science and engineering design content. At least 4 of the 6 technical electives must be in ECE.
• Design requirement—1 course from
  ECE C41 Design of Real-Time Digital Systems
  ECE C46 M Microprocessor System Design
  ECE C47 Digital Electronic Systems Design Projects
  ECE C91 VLSI Systems Design
  ECE C96 Engineering Design and Entrepreneurship
  ECE C98 Electrical Engineering Design
  ECE C99 Projects (when C99 is a design project)

Engineering Science Curriculum

Total requirements—48 courses
Mathematics—4 courses
Mathematics B14-1,2,3; B15
Engineering analysis and computer proficiency—4 courses
General Engineering B05-1,2,3,4
Basic sciences—4 courses
Physics A35-2,3; any 2 from Chemistry A01, A02, Biological Sciences B10-1,2
Design and communications—3 courses
Basic engineering—5 courses
Thermodynamics: ChE B11 or ME B20
Fluids and solids: CE B16 and ME B41 or BM E B70
Materials science: MSc B01
Electrical science: ECE C01
Social sciences/humanities—7 courses
Unrestricted electives—5 courses
Major program—16 courses
Required courses—7 courses
ESAM C11-1,2 Methods of Applied Mathematics
3 courses from ESAM C22 Applied Dynamical Systems, ESAM C99 Projects, and ESAM D21-1,2 Models in Applied Mathematics
IEMS C01 Introduction to Statistics and C02 Probability or Mathematics C30-1,2 Probability and Statistics
Areas of specialization—9 courses
Chosen from C- and D-level offerings in engineering, science, or mathematics. Some part of the selection should constitute an area of specialization. Consent of the departmental adviser is required.

Environmental Engineering Curriculum

Total requirements—48 courses
Mathematics—4 courses
Mathematics B14-1,2,3
Mathematics B15
Engineering analysis and computer proficiency—4 courses
General Engineering B05-1,2,3,4
Basic sciences—4 courses
Physics A35-2; Chemistry A01, A02, A03
Design and communications—3 courses
Basic engineering—5 courses
Thermodynamics: Chemistry C42-1
Fluids and solids: ME B41
Electrical science or materials science: 1 course
Probability, statistics, and quality control: 1 course
Systems engineering and analysis: IEMS C26
Social sciences/humanities—7 courses
Unrestricted electives—5 courses
Major program—16 courses
  • Core—11 courses
    Chemistry B10-1 Organic Chemistry
    CE B60 Fundamentals of Environmental Engineering
    CE B61 Environmental Engineering Analysis
    CE B67 Chemistry of the Natural Environment
    CE C40 Fluid Mechanics II
    CE C60 Environmental Impact Evaluation
    CE C61 Public Health Engineering
    CE C63 Community Air Pollution
    CE C64 Sanitary Engineering
    CE C66 Ecosystems and Ecotoxicology
    CE C67 Aquatic Chemistry
  • Design—1 course from
    CE C68 Industrial Hygiene and Environmental Control
    CE C70 Environmental Engineering Design
  • Technical electives—4 courses
    2 courses from approved list
    2 courses, B level or higher, in engineering or CAS mathematics or science

Industrial Engineering Curriculum
Total requirements—48 courses
  Mathematics—4 courses
    M athematics B14-1,2,3
    M athematics B15
  Engineering analysis and computer proficiency—4 courses
    General Engineering B05-1,2,3,4
  Basic sciences—4 courses
    Physics A35-2; Physics A35-3 and 2 other courses or
    Chemistry A01, A02, A03
  Design and communications—3 courses
    Basic engineering—5 courses
    IEMS C19; ECE B30; CS C17 or ECE C28; and 2 courses
    chosen from two of the following areas: fluids and solids,
    thermodynamics, materials science, electrical science
  Social sciences/humanities—7 courses
  Unrestricted electives—5 courses

Major program—16 courses
  • Core—10 courses
    Computerprogramming: ECE A01, CS A10, or ECE B30
    CE B16 Mechanics of Materials I
    IEMS B03 Probability and Statistics for Engineers
    or IEMS C01 Introduction to Statistics
    IEMS C05 Statistical Methods for Quality Improvement
    IEMS C29 Production Planning and Scheduling
    CE B30 Environmental Engineering Analysis
    CE B60 Fundamentals of Environmental Engineering
    CE B61 Environmental Engineering Analysis
    CE B67 Chemistry of the Natural Environment
    CE C40 Fluid Mechanics II
    CE C60 Environmental Impact Evaluation
    CE C61 Public Health Engineering
    CE C63 Community Air Pollution
    CE C64 Sanitary Engineering
    CE C66 Ecosystems and Ecotoxicology
    CE C67 Aquatic Chemistry
  • Design—1 course from
    CE C68 Industrial Hygiene and Environmental Control
    CE C70 Environmental Engineering Design
  • Technical electives—4 courses
    2 courses from approved list
    2 courses, B level or higher, in engineering or CAS
    mathematics or science
Materials Science and Engineering Curriculum

Total requirements—48 courses

Mathematics—4 courses
M mathematics B14-1,2,3
M mathematics B15

Engineering analysis and computer proficiency—4 courses
General Engineering B05-1,2,3,4

Basic sciences—4 courses
Physics A35-2,3; Chemistry A02 and A03 or A71 and A72

Design and communications—3 courses

Basic engineering—5 courses, including
Fluids and solids: CE B16 or CE B19
Thermodynamics: Chemistry C42-1 and M Sc C21
Materials science: M Sc B01

Elective: selected from electrical science, systems engineering and analysis (IEM S C26 recommended), or computer science or computer engineering

Social sciences/humanities—7 courses

Unrestricted electives—5 courses
M Sc A90 recommended

Major program—16 courses

• Required courses—11 courses
M Sc C16-1,2 Microstructural Dynamics I, II
M Sc C31 Physical Properties of Polymers
M Sc C32 M echanical Behavior of Solids
M Sc C51-1,2 Introductory Physics of Materials I, II
M Sc C61 Crystallography and Diffraction
M Sc C90 Materials Design
M Sc C91 Process Design
M Sc C96-1,2 Senior Project I, II

• Technical electives—5 courses
Each student must choose the remaining courses in a consistent manner to fulfill an area of concentration. These courses may be in engineering, natural sciences (usually chemistry or physics), and mathematics. At least 2 of the 5 technical electives must be from materials science and engineering. No more than 2 of the 5 courses may be B-level courses. Advanced mathematics courses such as the following are strongly recommended:
M mathematics C05 Complex Variables for Applications

Basic sciences—4 courses
Physics A35-2,3; Chemistry A01, A02, or A71, A72

Design and communications—3 courses

Basic engineering—5 courses
Thermodynamics: M E B20
Fluids and solids: CE B16, M E B41
Materials science: M Sc B01 or M Sc B03
Electrical science: ECE B70

Students planning to take advanced ECE courses as electives may substitute ECE B41 Circuits I.

Social sciences/humanities—7 courses

Unrestricted electives—5 courses
M Sc A90 recommended

Major program—16 courses

• Required courses—10 courses
M E B02 Mechanics II
M E B24 Experimental Engineering I
M E B40 Introduction to Mechanical Design and Manufacturing
M E C14 Theory of Machines—Dynamics
M E C15 Theory of Machines—Design of Elements
M E C70 Thermodynamics II
M E C73 Engineering Fluid Mechanics
M E C77 Heat Transfer
M E C90 Introduction to Dynamic Systems
M E C91 Fundamentals of Control Systems I

• Options—6 courses
General option:
2 C-level mechanical engineering courses
3 C-level technical electives
1 design course from the following:
M E C40-2 Computer Integrated Manufacturing
M E C66 Finite Elements for Design and Optimization
M E C98 Engineering Design

Options are also available in biomedical engineering, energy, intelligent mechanical systems, manufacturing, solid mechanics, and design. The 6 courses making up each of these options are contained in a listing that may be obtained from the department office.

Combined Studies Program

For students whose particular interests and goals cannot be satisfied by one of the regular programs of study in engineering or applied science, the Combined Studies Program provides an alternative. If endorsed and guided by three faculty members and approved by the McCormick School Curriculum Committee, an ad hoc curriculum leading to the bachelor of science degree may be pursued. Available courses may be combined in a variety of interdisciplinary plans as long as the all-school specification of eight basic components is met. Some examples of combined studies programs entered into in recent years include such titles as public health, engineering physics, biomedical engineering and molecular biology, and computers and mechanical design.
Students interested in the Combined Studies Program should consult with the associate dean for undergraduate engineering.

**General Engineering Courses**

**703-A06-1,2 Engineering Design and Communications**
Integrated introduction to the engineering design process and technical communication. Approaches to unstructured and poorly defined problems; conceptual and detailed design; team structure and teamwork; project planning; written, oral, graphical, and interpersonal communications; use of software tools; discussion of societal and business issues. One lecture, two workshops, lab. Registration for both quarters required.

**703-B05-1,2,3,4 Engineering Analysis**
1. Introduction to linear algebra from computational, mathematical, and applications viewpoints. Computational methods using a higher-level software package, such as Matlab.
3. Dynamic behavior of the elements. Modeling of mechanical (both translational and rotational), electrical, thermal, hydraulic, and chemical systems composed of those elements.
4. Solution methods for ordinary differential equations, including exact, numerical, and qualitative methods. Applications and modeling principles; solution techniques.

**703-A90-0 Engineering Freshman Seminar**
Subjects of current interest in broad engineering or interdisciplinary areas.

**703-B20-0 Analytic and Computer Graphics**
Microcomputer-aided drawing (CAD) for graphical three-dimensional problem solving and presentation.

**Biomedical Engineering**

Biomedical engineers solve problems in the life sciences and clinical medicine by applying engineering and mathematical techniques. This approach has been fruitful where a descriptive approach is no longer adequate for studying complex systems involved in the body's transport, regulation, and information processing. Equally important has been the development of devices used inside or outside the body to replace or supplement physiological functions and to enhance the quality of diagnosis and care. Thus, biomedical engineering refers to the application of engineering techniques to problems in medicine and biology.

The interplay among the physical sciences, engineering, biology, and the medical sciences takes many forms. The traditional study of complex systems, whether for power transmission, communications, or the operation and control of industrial processes, has provided engineers with a number of concepts and techniques that proved valuable in analysis and design. These principles expressed in mathematical form are applicable to a wide range of phenomena, including those in biological processes. Information theory, statistics, and computer technology have opened new areas for exploration of sensory and central nervous activity as well as patient handling and diagnosis. Theories for feedback controls, transport processes, materials science, and mechanics provide new insight into homeostatic physiological processes. Analysis of heat transfer, fluid flow, and chemical-process control in living organisms requires competence in both engineering and the life sciences. Current studies help provide understanding of many physiological processes. This understanding, in turn, leads to improvements in clinical practice, diagnosis, and patient care.

**Undergraduate Program**

Northwestern was among the first schools to recognize the value of a biomedical engineering background, and today the Department of Biomedical Engineering offers, at both the undergraduate and graduate levels, one of the largest and broadest programs in the country. The primary path interested students may follow is the biomedical engineering program administered by the biomedical engineering department. Alternative curricula are the biomedical options in other engineering departments.

The biomedical engineering program provides biomedical training that is quantitative, emphasizes problem solving, and treats phenomena from the molecular to the systems level. This curriculum prepares students for careers in dentistry, medicine, and/or research or with corporations in the health care industry. Required courses in mathematics, engineering, and science establish a strong foundation on which to build a biomedical framework. In addition, each student selects one sequence of courses with which to develop an area of specialization.

**Areas of Specialization**

All areas are suitable for students planning to enter medical school, continue their biomedical engineering education in graduate school, or pursue careers in the biomedical industry or hospitals.

**Electronic Instrumentation**

Electronic instruments are used widely in the diagnosis and treatment of disease and in the study of normal physiological function. Students in this area learn the fundamentals of electronic and computer (hardware and software) instrumentation.

**Mechanics**

Solid (e.g., musculoskeletal) and fluid (e.g., cardiovascular, pulmonary) mechanics are applied to human physiology in the design and manufacture of limb prostheses or artificial organs. Students in this area learn the fundamental engineering principles needed for this work.
Transport Processes
The study of transport processes in living tissue is important in understanding blood flow, lung ventilation, and oxygen transport to and from red blood cells to various tissue beds. Students in this area learn the fundamental principles that relate to these processes.

Biotechnology
Biochemical engineering, biochemistry, molecular biology, and biosensors are components of the broad field that goes under the name biotechnology. Students in this area learn the various aspects of biotechnology from the engineer's perspective.

Biomedical Signals and Images
The applications of imaging, signal processing, and signal analysis to biomedical problems has become an important part of medicine. MRI, CT-imaging, PET, EKG, and EEG are all examples of physiological signals. Students in this area learn the physiology that underlies these signals and the engineering that underlies their recording and analysis.

Curriculum
Students earning a biomedical engineering degree must obtain a minimum of 18 total course credits in engineering design and engineering science and have obtained substantial training in design.

Courses Primarily for Undergraduates
765-A70-0 Introduction to Biomedical Engineering
Emphasis on areas of medicine and physiology where engineering techniques are particularly useful or where a clear need exists for an engineering approach.

765-B01-0 Biology for Engineers
A survey of biological topics relevant to engineering, focusing on cellular and molecular biology, population growth, and species formation. Prerequisites: Mathematics B14-1 and Chemistry A01 or A71.

765-B20-0 Introduction to Biomedical Statistics
Basic statistical concepts presented with emphasis on their relevance to biological and medical investigations.

765-B70-0 Introduction to Biomedical Fluid Mechanics
Fundamentals of fluid mechanics and their applications to biological systems.

765-C01-0 Systems Physiology
Functional/structural aspects of mammalian nervous system. Neural biophysics. Laboratory exercises. Prerequisites: Physics A35-2 and junior standing.

765-C02-0 Systems Physiology
Cardiovascular and respiratory physiology. Human physiology from a quantitative viewpoint. Anatomy and pathology, where appropriate. Prerequisite: Mathematics B14-3.

765-C03-0 Systems Physiology
Cellular mechanisms of and quantitative systems approach to human renal, digestive, endocrine, and metabolic physiology. Prerequisite: Biological Sciences B10-2; junior standing recommended.

765-C08-0 Biomedical Engineering Laboratory
Laboratory and associated lecture concerning quantitative physiology, testing, and evaluation of biomedical apparatus. Prerequisites: At least 2 from C01, C02, and C03; ECE B41 or B70. Preference given to seniors in BM E.

765-C10-0 Molecular and Cellular Aspects of Biotechnology
Molecular/cellular structure and function, mechanical influences on biological systems, molecular/cellular experiments. Prerequisites: Biological Sciences B10-2 and CE B12.

765-C14-0 Models of Biochemistry and Molecular Biology
Mathematical modeling of biochemical and molecular biological problems, such as allosteric enzymes, bacterial transduction, X-ray diffraction, study of DNA.

765-C15-0 Application of Genetic Engineering to Immunochemistry
Recent developments in genetic engineering as applied to the rapidly developing field of immunochemistry for antibodies and related proteins.

765-C17-0 Biochemical Sensors
Theory, design, and applications of chemical sensors used in medical diagnosis and patient monitoring. Electrochemical and optical sensors. Prerequisites: chemistry through B10-2; physics through A35-3.

765-C20-0 Biomedical Signals and Imaging
Fundamentals of signals and systems, time and frequency domain issues. Fourier series and transforms, convolution, frequency response, filtering, and laboratories in biomedical systems and imaging. Prerequisites: Mathematics B21 and Physics A35-3.

765-C21-0 Theory and Control of Biological Systems
Linear control theory, mathematical foundations, transfer functions, modeling of biological systems, stability. Prerequisite: Mathematics B21.

765-C22-0 Mathematical Modeling of Physiological Systems
Analysis and modeling of physiological systems. System identification. Traditional approaches. White noise method. Prerequisites: C01, C02, or C03: C20.

765-C23-0 Visual Science
765-C25-0 Introduction to Medical Imaging
Diagnostic X-rays; X-ray film and radiographic image; computed tomography; ultrasound. Prerequisites: C20 and Physics A35-3 or equivalent.

765-C26-0 Physiological Imaging
Medical images applied to physiological measurement. Tomographic reconstruction. Related digital angiography techniques. Computer exercises in image manipulation.

765-C27-0 Magnetic Resonance Imaging
Nuclear magnetic resonance; two-dimensional Fourier transform, spin-echo and gradient-echo imaging; gradient and RF hardware. Prerequisites: C20 and Physics A35-3.

765-C28-0 Interaction of Laser Radiation with Tissue
Propagation, scattering, and absorption of light in biological materials. Modeling of diagnostic and therapeutic uses of light. Engineering evaluation of laser-based clinical systems. Prerequisite: junior standing or higher.

765-C30-0 Biomedical Devices
Structure-property relationships for biomaterials. Metal, ceramic, and polymeric implant materials and their implant applications. Interactions of materials with the body. Prerequisite: senior standing.

765-C34-0 Biomechanics of Human Limbs and Their Artificial Replacements
Human movement, biomechanics, skeletal and muscular anatomy, comparative anatomy, muscle physiology, and locomotion. Engineering design of artificial limbs. Prerequisite: senior standing with engineering or physical science background.

765-C36-0 Biomechanics of Movement
Engineering mechanics applied to analyze human movement, including models of muscle and tendon, kinematics of joints, and dynamics of multijoint movement. Applications in sports, rehabilitation, and orthopaedics. Prerequisite: ME B02 or consent of instructor.

765-C37-0 Mechanics of Biological Tissues
Stress and strain for small and large deformations. Nonlinear elastic, viscoelastic, pseudoelastic, and bifilar models. Prerequisite: CE B16 or equivalent.

765-C41-0 Biomedical Computing
Principles of modern (computer-based) medical instrumentation, including analog vs. digital design trade-offs, efficient digital filter designs, and algorithms for physiological signal processing, automated event recognition, and classification. Prerequisites: ECE C06, B70, or equivalent and some experience in computer programming or consent of instructor.

765-C42-0 Biomedical Instrumentation
Instrumentation to quantify temperature, displacement, force, pressure, sound, and flow. Optical spectroscopy and electrodes. Prerequisite: senior standing in engineering.

765-C43-0 Biomaterials and Medical Devices
Structure-property relationships of materials, physical chemistry of surfaces and interfaces, materials-tissue interactions, applications to the selection and design of materials for medical implants and devices. Prerequisite: MSc B01.

765-C46-0 Tissue Engineering
In vivo molecular, cellular, and organ engineering, with an emphasis on the foundations, techniques, experiments, and clinical applications of tissue engineering. Prerequisites: Biological Sciences B10-2 or ChE 75, CE B12.

765-C50-0 Transport Fundamentals
Fundamental and biomedical applications of diffusive and convective heat and mass transfer. Prerequisites: B70 and M mathematics B14-3.

765-C52-0 Musculoskeletal Biomechanics
Introductory class presenting the fundamentals of orthopaedic biomechanics. Topics include mechanical properties of bone, cartilage, ligament, tendon, and muscle. Prerequisite: CE B12.

765-C55-0 Control of Human Limbs and Their Artificial Replacements
Human movement, biomechanics, skeletal and muscular anatomy, comparative anatomy, muscle physiology, and locomotion. Engineering design of artificial limbs. Prerequisite: senior standing with engineering or physical science background.

765-C60-0 Biomechanics of Movement
Engineering mechanics applied to analyze human movement, including models of muscle and tendon, kinematics of joints, and dynamics of multijoint movement. Applications in sports, rehabilitation, and orthopaedics. Prerequisite: ME B02 or consent of instructor.

765-C71-0 Mechanics of Biological Tissues
Stress and strain for small and large deformations. Nonlinear elastic, viscoelastic, pseudoelastic, and bifilar models. Prerequisite: CE B16 or equivalent.

765-C72-0 Hemodynamics
Mechanical aspects of the human circulation system. Blood and blood vessel rheology. Prerequisites: B70; C02 or D02 or consent of instructor.

765-C73-0 Cardiac Mechanics
Mechanical behavior of isolated muscle fibers, ventricular walls, and isolated ventricles. Interactions between ventricles and circulation systems. Prerequisite: C71, CE B16, or consent of instructor.

765-C75-0 Pulmonary Mechanics
Basic physiology of lung function and its mechanical aspects, including tissue viscoelasticity, airway instability, mucus transport, interfacial phenomena, gas exchange, cellular biomechanics, air flow and its limitation. Prerequisites: B70 and Mathematics B21.

765-C77-0 Intermediate Fluid Mechanics
Fundamental concepts of fluid dynamics. Kinematics, mass and momentum balances, constitutive relations. Navier-Stokes equations and methods of solution. Sealing techniques. Prerequisite: B70 or consent of instructor.

765-C79-0 Artificial Organs
Basic transport process analyses. Engineering analyses and design of artificial organs: kidneys, lungs, hearts, pancreas, liver. Comparison of natural/artificial organ function. Prerequisites: C02 and C03 or D02 and D03; a heat and/or mass transport course.

765-C80-0 Biomedical Transducers and Instrumentation
Instrumentation to quantify temperature, displacement, force, pressure, sound, and flow. Optical spectroscopy and electrodes. Prerequisite: senior standing in engineering.

765-C83-0 Cardiovascular Instrumentation
Principles of modern (computer-based) medical instrumentation, including analog vs. digital design trade-offs, efficient digital filter designs, and algorithms for physiological signal processing, automated event recognition, and classification. Prerequisites: ECE C06, B70, or equivalent and some experience in computer programming or consent of instructor.
Chemical engineering is concerned primarily with the principles and processes involved in the conversion of raw materials into products vital to modern civilization. The products of the chemical and process industries range from antibiotics to zirconium, from petroleum to plutonium, from agricultural chemicals to plastics and synthetic rubber. The rapid introduction of new products by the chemical process industries gives chemical engineering its characteristic concern with the management and development of innovation. Preparation for careers in chemical engineering requires a comprehension of physical, chemical, and engineering principles. The program aims at developing people who can plan, design, and operate new processes and who may have potential for managerial responsibility in highly technical industrial enterprises.

The Department of Chemical Engineering curriculum provides this broad fundamental training and prepares graduates for the chemical and process industries or advanced study. The first two years are devoted largely to mathematics, physics, and chemistry. After this, the fundamentals of chemical engineering fall into two sequences: the chemical process principles, emphasizing thermodynamics and kinetics of chemical change, and the transport processes, emphasizing the transfer of mass, momentum, and thermal energy in the physical handling of substances and in their heating, cooling, separation, and purification. Theoretical principles and practical applications are then integrated in courses in systems design and control. Supporting courses in allied fields of engineering and the sciences broaden the technical proficiency of chemical engineers, while courses in the social sciences, humanities, and arts deepen their background in the common hopes and problems of humanity.

Areas of Specialization
The curriculum permits students to select an area of specialization and to develop background for further study at the graduate level or for application to specific industries. Students are encouraged to select one of the seven areas listed below or to plan an alternate program with an adviser. There are numerous electives in the basic program, and students are urged to give early consideration to planning for effective use of these opportunities.

### Chemical Process Engineering
The chemical process engineering option is designed to prepare students for many areas, including design, operations, research, and management. Recommended for students who want a broad background in chemical engineering, it provides preparation for employment in many fields, including the chemical process and petroleum industries. It is also good preparation for graduate work in chemical engineering or other areas, both technical and nontechnical.

### Biomedical Engineering
Increasing numbers of chemical engineers enter medical school and work in related areas such as pharmaceutical production, biomedical materials, and artificial organs. The biomedical engineering option satisfies the needs of these students by adding courses in biology, biochemistry, and biomedical engineering to the foundation in chemical engineering. Students therefore can prepare for careers in medicine or biomedical engineering as they obtain a degree in chemical engineering.

### Biotechnology
Biotechnology is the industrial exploitation of biological systems or processes. Microorganisms are employed for production of food, beverages, antibiotics, and solvents as well as for waste treatment. Advances in genetic engineering have led to the production (in animal cells, yeast, and bacteria) of a wide range of enzymes, growth factors, hormones, immunoregulators, and monoclonal antibodies for use in disease diagnosis and therapy. Animal cells and microorganisms produce chemicals via a complex network of tightly regulated chemical reactions, making biotechnology a natural extension of chemical engineering. The biotechnology option provides the background necessary to apply chemical engineering skills in biological systems, especially for process optimization, control, scale-up, and product recovery.

### Environmental Engineering
Means for improving the quality of our environment, disposing of wastes, and devising waste-free processes often involve chemical processing. The development, construction, and operation of these processes increasingly involves chemical engineers in a leading role. The next decade will see the replacement of many present industrial processes by new ones designed to eliminate or minimize waste products, requiring imaginative engineering. The environmental engineering specialization offers students a way to add special competence in environmental and civil engineering concerns to a chemical engineering degree and to prepare for attacking environmental problems.
Polymer Science and Engineering
Synthetic polymers are large molecular substances that now provide the basis for the plastics, fiber, and rubber industries. Synthetic polymers are used in fields as diverse as the automotive industry, pollution abatement, low-cost housing, and biomedical engineering and indeed wherever needs exist for new materials with unique properties. The polymer field requires a knowledge of chemistry and some background in materials science in combination with expertise in chemical engineering, especially in transport processes. The option in polymer science and engineering provides training to undergraduates considering working in the field or going to graduate school.

Process Control and Simulation
The chemical process industries have long been concerned with the optimal design and control of large-scale systems. In recent years, chemical engineers have played a significant role in the continued evolution of control systems theory and applications and have been instrumental in the use of modern computing methods for such tasks. The process control and simulation specialty provides background for immediate applications or graduate study.

General Chemical Engineering
This option provides flexibility for students who desire exposure to a wide range of topics or who wish to specialize in fields of science or engineering not listed above.

Laboratories
The Undergraduate Chemical Engineering Laboratory provides facilities for exploring firsthand the quantitative experimental implications of fundamental laws in their application to practical problems of heat transfer, gas absorption, distillation, and other basic operations. Process dynamics and automatic control principles are studied in the Process Dynamics and Control Laboratory, which is furnished with typical control equipment plus a number of personal computers. A computing laboratory is used in a variety of courses. Chemical laboratory experience is also a part of the polymer course.

Courses Primarily for Undergraduates

710-A90-0 Survey of Chemical Engineering Concepts and Opportunities
Application of chemical engineering principles illustrated by examples from the chemical, petroleum, food processing, pharmaceutical, electronics, and other industries. Impact of economics, ethics, and other nontechnical constraints.

710-B10-0 Analysis of Chemical Process Systems
Introduction to process systems. Material balances and stoichiometry. Analysis of process system flow sheets. Introduction to departmental computing facilities. Basic numerical analysis. Prerequisites: Chemistry A03, ECE A01, and Mathematics B21; may take Mathematics B21 concurrently.

710-B11-0 Thermodynamics

710-B12-0 Equilibrium Separations
Design and analysis of chemical separation processes such as distillation, absorption, extraction, and leaching. Plant equipment and operations. Prerequisite: B11.

710-C07-0 Kinetics and Reactor Engineering
Chemical reaction kinetics with application to the design of chemical reactors. Prerequisites: B10 (C- or better) and Chemistry C43.

710-C12-0 Process Models by Statistical Methods
Statistical methods necessary for building mathematical models of chemical engineering processes, including linear and nonlinear regression analysis, analysis of variance, experimental design, and response surface methods.

710-C21-0 Fluid Mechanics
Derivation and applications of continuity and Navier-Stokes equations. Macroscopic mass, momentum, and energy balance. Dimensional analysis: friction factors in pipes and packed beds; drag coefficients. Prerequisites: completion of mathematics requirements with no grades of D and CE B12.

710-C22-0 Heat Transfer
The differential equations of energy transport. Solutions for various applications. Prerequisite: completion of mathematics requirements with no grades of D.

710-C23-0 Mass Transfer
Diffusion and rate concepts; application to distillation, extraction, absorption, humidification, drying. Prerequisites: C21 and C22.

710-C41-0 Process Dynamics and Control
Dynamic behavior of chemical process components. Feedback control principles. Prerequisite: senior standing; C07 recommended.

710-C42-0 Chemical Engineering Laboratory
Operations and control of process equipment for the determination of operating data. Analysis and written presentation of results. Prerequisites: C07 and C23.

710-C45-0 Process Optimization
Modern techniques and application to the design and operation of chemical process systems. Steady-state and dynamic methods. Experimental search for the optimum. Prerequisite: senior standing.

710-C49-0 Advanced Process Control
Digital sampling; sampled data models; digital controllers; hierarchical, distributed, and advanced regulatory control concepts; plant data and control system tuning; model-based control algorithms; nonlinear consideration; multivariable and noninteracting control systems. Prerequisite: C41.

710-C51-0 Process Economics, Design, and Evaluation
Preliminary design of industrial processes for the production of chemical and allied products by the application
of the engineering sciences and economics. Prerequisites: B12, C07, and C23.

710-C52-0 Chemical Engineering Design Projects
Design of chemical and process plants applying the principles of unit operations, thermodynamics, reaction kinetics, and economics. Mechanical design and selection of chemical process equipment. Prerequisite: C51.

710-C61-0 Introduction to Polymers
Polymerization mechanisms and their relation to molecular structure, polymerization processes, and the mechanical properties of polymers, especially flow behavior. Prerequisites: Chemistry B10-1 and Chemistry C42-1.

710-C64-0 Chemical Processing and the Environment
Application of chemical engineering fundamentals to environmental problems. Chemistry and mechanisms, chemical reaction and rate, and transport emphasized. Risk assessment and analysis revealed through case studies. Prerequisites: B12 and C07.

710-C67-0 Fabrication of Microelectronic Devices
Application of chemical engineering fundamentals to the analysis and design of basic operations in microelectronics manufacturing, including thin film preparation, lithography, and electronic packaging. Prerequisite: C07.

710-C71-0 Transport Phenomena in Living Systems
Application of transport theory, principally diffusion, to movement of molecules in biological systems, including blood, cornea, microcirculation, and lung. Prerequisites: C22 and Mathematics B21 or consent of instructor; C21 and C23 recommended.

710-C75-0 Biochemical Engineering
Modern biochemical engineering. Life sciences: microbiology, biochemistry, and molecular genetics. Metabolic stoichiometry, energetics, growth kinetics, transport phenomena in bioreactors, and product recovery. Prerequisite: C07, C23, or consent of instructor.

710-C77-0 Bioseparations
Downstream process in biotechnology. Separation and lysis of cells. Recovery of organelles and proteins. Protein separation and purification. Prerequisite: C75.

710-C95-0 Special Topics in Chemical Engineering
Topics suggested by students or faculty and approved by the department.

710-C96-0 Focused Topics in Chemical Engineering
(.5 unit) Emerging topics suggested by students or faculty and approved by the department.

710-C99-0 Projects
Supervised investigation of a chemical engineering problem with submission of a final report.

Civil Engineering
Civil engineers plan systems such as transportation networks or procedures for water control and supply, and they design structures such as buildings, bridges, dams, and sewage disposal plants. They work together with ecologists, sociologists, economists, lawyers, and others to plan how to use wisely the human and natural resources of large areas such as river basins and how to redevelop cities. With few exceptions, each planning or design job is one of a kind, as contrasted with more routine solutions to other engineering problems.

Planning, of course, requires abundant data of all sorts—topography, geology, soils, vegetation, weather and climate, stream-flow and lake currents, traffic routes and patterns, pollution, population, cultural background and preferences, skills and ambitions. Many civil engineers collect, analyze, and present the data, developing and improving measuring instruments as part of their job. Others apply probability and statistical methods to the data to forecast such things as population growth, demand for water and transportation, maximum winds and precipitation, height of floods, and air and water quality.

Designing systems and structures requires the planning forecasts plus accurate data on the mechanical properties of materials such as steel, concrete, soils, rocks, and plastics and on the behavior of structural components made from them. Some civil engineers test materials and physical models to obtain such data. Many more use known physical properties and the laws of mechanics—energy, momentum, and conservation of mass—to design structures, foundations, pavements, pipe networks, and treatment plants that will do the job safely and economically.

Civil engineers who design water and waste treatment facilities or set up programs to reduce air and water pollution need to understand certain chemical reactions and biological processes as well as the usual fluid and solid mechanics. Engineers who help to plan and design a system understand how and why it works and what may go wrong with it. Hence, civil engineers may operate treatment facilities or systems of flood control reservoirs or set up and administer traffic control plans. Civil engineers may become city engineers.

Engineers who design structures and know soil mechanics learn the practical difficulties of providing a foundation and erecting the structure. Thus, they become partly qualified to operate construction companies, and some civil engineers enter the construction business.

Administrative and business activities require them also to learn something about accounting, personnel management, and contracts.

Since civil engineering students have such a wide range of career options, the Department of Civil Engineering prescribes a minimum of required courses and required subjects. Students elect the remainder freely or from specified broad categories. The breakdown, from which honors students may deviate with permission, is as follows:

Courses specified by name and number 20
Courses specified by subject 6
Courses required to fit into broad categories 17
Free electives 5

Total 48

For details see the civil engineering curriculum.
Areas of Specialization
Civil engineering students may select a program that fits their needs by choosing courses judiciously. The 5 free electives, the 17 courses required to fit into broad categories, and most of the 8 courses specified by subject only (such as mathematical techniques or electrical engineering science or chemistry) allow students to construct diverse specialized curricula, broadly based study programs, or intermediate combinations. Students are encouraged to discuss with faculty any proposed program that meets a well-defined goal. Examples of courses selected in the areas of specialization most often pursued by students are listed in the civil engineering curriculum.

Laboratories

Environmental Engineering
Facilities are provided for instruction and research in environmental biology and chemistry, industrial hygiene, radiological health, and the unit operations of water and waste treatment. Specialized apparatus and instrumentation are available for studies in each area.

Geotechnical Engineering
This facility has a variety of conventional and special equipment for the testing and evaluation of rocks, soils, and soil-foundation systems—under both static and dynamic loadings—for undergraduate study, graduate study, and research. The laboratory contains many specialized instruments, including consolidation devices and triaxial compression units equipped for computer-controlled stress, strain, and cyclic loading.

Structural Engineering and Structural Mechanics
The department has a large first-class modern laboratory for testing structural materials, especially cement-based materials and composites. The laboratory is equipped with several closed-loop computer-controlled or servo-controlled testing machines capable of static and dynamic loading as well as advanced instrumentation for electron and optical microscopy studies with facilities for image analysis and holographic capabilities, creep testing in programmed environmental chambers, multiaxial or torsional loading, impact testing, acoustic defect detection, and other nondestructive test methods. Basic facilities, including a perforated testing floor, are available also for static and dynamic testing of structural models and structural components. Students conduct experiments using electrical and mechanical strain gauges, structural models, and photoelastic models. A fully equipped shop and technical assistance are available for the design and construction of special loading devices.

Computer Graphics
The computer graphics undergraduate laboratory contains specialized workstations and input-output devices to support computer-aided design, geographical information systems, facility management and scheduling, and scientific visualization software.

Courses Primarily for Undergraduates

720-A90-0 Microcomputer Applications in Civil Engineering Introduction to microcomputer use in civil engineering. Problems from various areas of civil engineering that involve the use of software such as spreadsheets, databases, and word processing for solution.

750-B03-0 Microstructure and Engineering Properties of Materials See Materials Science and Engineering.

720-B06-0 Environmental Literacy Simple concepts from the sciences and engineering applied to specific environmental problems, including the concepts of risk, Understanding of and quantitative facility in multidisciplinary aspects of environmental decisions.

720-B16-0 Mechanics of Materials I Analytical and experimental study of stresses and deformations and their application to the design of machine and structural elements subjected to static, dynamic, and repeated loads. Prerequisites: B12 or M E B01.

720-B19-0 Continuum Mechanics I Introductory concepts of mechanics of continua. Analysis of deformation and stress and the equations of motion, with special emphasis on the elastic solid and Newtonian fluid. Prerequisites: Physics A35-1 and Mathematics B17.

720-B21-0 Theory of Structures I Deflections of structures, energy concepts, idealization of structures, truss analysis, column stability, and influence lines. Introduction to indeterminate truss and frame analyses, slope-deflection analysis, and moment distribution. Portal method. Prerequisite: B16.

720-B22-0 Structural Steel Design Rational basis of structural design. Design approach for structural steel components of a building system. Prerequisite: B21.

740-B41-0 FluidMechanics I See Mechanical Engineering.

720-B50-0 Introductory Soil Mechanics Fundamental properties and behavior of soils as engineering materials. Origin of soils through the properties of soil components to the strength, permeability, and deformation of soil masses. Prerequisite: B16.

720-B60-0 Fundamentals of Environmental Engineering Mass and energy concepts applied to major issues facing environmental engineers: safe drinking water,
surface water quality, ambient air quality, global atmosphere, managing solid and hazardous wastes. Prerequisites: Chemistry A01 and M analytics B14-2 (may be taken concurrently).

720-B61-0 Environmental Engineering Analysis Development of quantitative analytical tools for describing physical, chemical, and microbiological processes in natural and engineering systems relevant to environmental engineering. Prerequisites: B60 and Chemistry A02.

720-B67-0 Chemistry of the Natural Environment Fundamental principles of organic and inorganic chemistry applied to air, water, soil, and river sediments. Focus on problem solving. Laboratory/field projects. Prerequisite: Chemistry A03.

720-C02-0 Engineering Law Relationship between social, political, and economic problems in engineering; contracts; competitive bidding; the engineer’s role in management; liability; insurance; lawsuits; arbitration; legal implications of environmental laws; professional societies; ethics. Prerequisite: junior standing.

720-C06-0 Uncertainty Analysis in Civil Engineering Development and applications of the analysis of uncertainty, including basic probability, statistics, and decision theory, in the civil engineering areas of soil mechanics, structures, transportation, and water resources.

720-C07-0 Microstructure of Cement-Based Materials Chemistry of the principal silicate and aluminate cements used in building and civil engineering. Emphasis on underlying science rather than on practical application. Experimental and theoretical aspects of cement chemistry; relationships between processing, microstructure, and properties.

720-C13-0 Experimental Stress Analysis Study and use of experimental techniques in measuring stress and strain. Strain gauge, photoelastic, brittle coating, and moiré techniques studied and applied with selected laboratory experiments. Prerequisite: B16.

720-C17-0 Mechanics of Continua Introduction to the mechanics of continuous media. Cartesian tensors; kinematics of deformable media; stress; balance laws; constitutive relations for selected solids and fluids. Prerequisites: B12 and M analytics B17 or equivalent.

720-C18-0 Mechanics of Fracture Stress concentration: analysis of the stress field near a crack tip; fracture modes; brittle and ductile fracture; fracture toughness; fracture criteria; fracture-mechanics design; fatigue; dynamic effects. Prerequisites: course in mechanics of materials and M analytics B17.

720-C20-0 Structural Analysis Analysis of deflection and indeterminate structures by the interchange concept. Continuous beams and frames having nonprismatic members. Analysis of vibration characteristics of structures, response of buildings to dynamic loads.

720-C21-0 Properties of Concrete Concrete as a composite material; relationship between constitutive laws and microstructure; failure theories; fracture; fatigue; strain rate effects; destructive and nondestructive testing; creep and shrinkage; chemistry of cement hydration; admixtures; aggregates; proportioning; new materials.

720-C22-0 Structural Design Design criteria; planning and design aspects of structural systems for gravity and lateral loads. A total design project involving the analysis and design of a structure. Prerequisite: B22 or equivalent.

720-C30-0 Construction Management Techniques for coordinating decisions and actions of various parties in the design and construction of civil engineering projects. Delivery systems; preconstruction services; project planning; cost control and value engineering; bidding. Prerequisite: presenior or senior standing.

720-C32-0 Construction Estimating Estimation of cost at different stages of design; conceptual estimating, quantity takeoff of various elements, such as materials, labor, equipment. Prerequisite: senior standing.

720-C34-0 Total Quality Management How to achieve quality through continuous improvement of processes, customer satisfaction, and a team environment. Includes data collection and analysis process improvement. Prerequisite: senior standing.

720-C36-0 Project Scheduling Project planning, scheduling, and control using CPM arrow and precedence
networks; minimum cost scheduling; basic resource allocation and leveling; overlapping networks; PERT charts; hands-on experience in using computer tools. Prerequisite: senior standing.

**720-C38-0 Public Infrastructure Management**
Addresses the complexity of managing public infrastructure facilities by means of a five-part interactive model. Objective is to impart a realistic appreciation of contemporary public infrastructure management policies and practices. Prerequisite: senior standing.

**720-C40-0 Fluid Mechanics II**
Civil engineering applications of fluid mechanics. Turbulent flow in pipes, pipe networks, and open channels.

**720-C42-0 Water Microbiology**
Principles of microbial physiology and biochemistry applied to microorganisms of environmental interest. Prerequisite: C67.

**720-C44-0 Physical Principles in Environmental Engineering**
Fate, transport, and control of chemicals in air, water, and soil environments. Materials balances, suspension phenomena, flow chemical partitioning, mass transfer, filtration and reactor theory. Prerequisites: Physics A35-1,2 and CHE C21, M E B41, or equivalent.

**720-C45-0 Environmental Analytical Chemistry**
Laboratory course in the theory and the applications of analytical chemistry as applied to complex, multiphase environmental systems. Prerequisite: CE C67.

**720-C46-0 Meteorology and Hydrology**

**720-C51-0 Engineering Properties of Soils**
Determination, interpretation, significance, application of index and engineering properties of soils. Laboratory testing procedures, sample handling, reliability of results, methods of evaluation and control. Prerequisite: B50.

**720-C52-0 Foundation Engineering**
Application of soil mechanics to analysis and design. Settlement of structures, bearing capacities of shallow and deep foundations, earth pressures on retaining structures, and slope stability. Prerequisite: B50.

**720-C55-0 Engineering Aspects of Groundwater Flow**
Applied aspects of groundwater flow and seepage, including Darcy’s law, parameter determination, aquifer test analysis, flow-net construction and application, modeling techniques, slope stability analysis, drainage, and filter design. Lecture and laboratory. Prerequisite: fluid mechanics.

**720-C56-0 Transport Processes in Porous Media**
Transport processes in porous media, including unsaturated flow, flow in deformable porous media, convective transport of solutes with hydrodynamic dispersion effects, and coupled flow phenomena with particular emphasis on electrokinetics. Prerequisite: C55.

**720-C58-0 Airphoto Interpretation**
Principles and practice of using aerial photographs to obtain information about natural features of the earth’s surface, with emphasis on earth materials. Landforms, geological processes, rocks, and soils. Stereoscopic photographs, elements of photogrammetry. Prerequisite: junior standing or consent of instructor.

**720-C59-0 Hazardous Waste Management**
Definition and regulation of wastes. Pollutant transport, fate, and toxicology. Management via audits and prevention. Treatment and control. Risk and site assessment and site remediation. Prerequisite: upperclass standing in engineering or science or consent of instructor.

**720-C60-0 Environmental Impact Evaluation**
Methods for evaluating impacts of engineering projects on environmental quality: environmental legislation; environmental quality indices. Participation in a multidisciplinary group project; preparation of impact report. Prerequisite junior standing.

**720-C61-0 Public Health Engineering**
Evaluation of the disease status of a community; elements of vital statistics and epidemiology; etiology of infectious and noninfectious diseases; control of environmentally based health hazards.

**720-C63-0 Community Air Pollution**
Nature and control of community air pollution. Sources, physical and chemical properties, and effects of major air pollutants; analytical measurements and monitoring of air pollutants; engineering and legislative control. Prerequisite: junior standing.

**720-C64-0 Sanitary Engineering**
Engineering elements of water supply and water pollution abatement. Water quality standards, water and wastewater treatment processes, and the management of receiving waters to control pollution. Prerequisite: M E B41 (C40 desirable).

**720-C65-1,2,3 Radiation Health,Radiation Safety Evaluation,and Radiation Health Engineering**
3. Radiation health engineering: shielding design, criticality control, contamination control, waste management, legal controls, administrative procedures.

**720-C66-0 Ecosystems and Ecotoxicology**
Responses of terrestrial and aquatic ecosystems to environmental stress, with emphasis on ecotoxicological effects; ecosystem considerations in engineering problems and solutions. Prerequisite: junior standing in engineering or science.
720-C67-0 Aquatic Chemistry Physical chemistry of the aqueous environment; solution and heterogeneous equilibria; reactions at solid-solution interface. Water and wastewater analyses. Lecture, laboratory. Prerequisite: Chemistry A03.

720-C68-0 Industrial Hygiene and Environmental Control Application of industrial hygiene principles and practice; measurement and control of atmospheric contaminants. Design and evaluation of industrial ventilation systems. Prerequisite: junior standing.

720-C70-0 Environmental Engineering Design Decision making in selection and implementation of environmental control measures. Water supply and wastewater management: quantities to be handled, transportation systems, treatment processes, solid waste management. Prerequisite: C64.

720-C71-0 Introduction to Transportation Planning and Analysis Analysis and design of solutions to transportation problems; introduction to selected operations research and statistical analysis techniques; extensive use of case studies in urban transportation, intercity passenger transport, and freight movements. Prerequisite: junior standing or consent of instructor.

720-C72-0 Transportation System Design and Analysis Integrative design and analysis experience; physical and programmatic problems, including operations, terminals, and management; fundamental concepts of transportation; systematic approaches to creative problem solving.

720-C76-0 Transportation System Operations Characteristics of roadway travel; vehicle and human factors, intersection performance and control; management and control of arterial streets and networks; neighborhood traffic restraint, urban transit operations. Operations concepts and theories applied to actual problems through laboratory practice.

720-C95-0 Special Topics in Civil Engineering Topics suggested by students or faculty and approved by the department.

720-C99-0 Projects Special studies under faculty direction. Credit to be arranged.

Computer Science

The Department of Computer Science offers a wide variety of programs leading to the BS degree. Courses and research focus on software, ranging from theoretical models to practical applications. Particular areas of research include:

- Artificial intelligence, including mobile robots with perceptual systems, models of memory and reasoning, knowledge representation, natural language comprehension, planning, and problem solving
- Software engineering, including the analysis, design, implementation, evaluation, and maintenance of large applications
- Human computer interaction, including interface design, task modeling, intelligent interfaces, authoring tools
- Distributed interactive systems, including client-server and Web-based applications such as heterogeneous databases and multimedia learning environments
- Theoretical computer science, focusing on algorithm design and analysis of algorithms' worst- and average-case behavior

Courses and research are highly interdisciplinary, with particularly strong connections to education and psychology, both in shared faculty and joint research projects. Detailed information on degree requirements and elective courses is available from the department office.

Facilities

Computer science students have access to state-of-the-art facilities, ranging from simple microcomputers to the latest multimedia workstations. The campus, including residence halls, is extensively networked with a 100-megabit FDDI University network backbone. All students have full Internet access. Electronic mail, Web sites, and other computer-based communication facilities are used to increase the bandwidth between students and faculty beyond the classroom.

The computer science department is the home of the Institute for the Learning Sciences, an interdisciplinary research and development center comprising more than 150 people dedicated to building innovative educational software for schools, businesses, government, and the general community. Students often are involved in its research projects through independent study courses, thus gaining valuable experience in a world-class research environment.

Courses Primarily for Undergraduates

725-A10-0 Introduction to Computer Programming
Introduction to programming practice using a modern programming language. Analysis and formulation of problems for computer solution. Systematic design, construction, and testing of programs. Substantial programming assignments.

725-A11-0 Fundamentals of Computer Programming
Introduction to principles of programming and procedural thinking. Procedural abstraction, data abstraction, modularity, object-oriented programming. Uses computer facilities and the Scheme programming language. Substantial programming assignments, including numerical and symbolic programs. Required for computer science majors.

725-A20-0 Introduction to Computers and Information Technology
Basic concepts of computer
systems. Considerable hands-on experience with applications such as word processors, databases, and spreadsheets. Information technology's impact on today's society. No previous experience with computers needed. Not for engineering or computer science majors or students who have taken A10, A11, or ECE A01.

725-B30-0 Introduction to Software Engineering Advanced program design and debugging. Methodologies for design and implementation of larger programs. Object-oriented concepts and programming in C++. Prerequisites: A10, A11, ECE A01, or equivalent.

725-C10-0 Mathematical Foundations of Computer Science Basic concepts of finite and structural mathematics. Sets, axiomatic systems, the propositional and predicate calculi, and graph theory. Application to computer science: sequential machines, formal grammars, and software design. Prerequisites: A10 or A11 and Mathematics B14-3.

725-C11-0 Data Structures and Data Management The design, implementation, and analysis of abstract data types; data structures and their algorithms. Topics include data and procedural abstraction, linked lists, stacks, queues, binary trees, searching, and sorting. Required for computer science majors. Prerequisites: B11 or B30.

725-C14-0 Applied Artificial Intelligence Applications that include intelligent capability for relieving the user of routine aspects of problem solving. Computer-aided design, computer-assisted manufacturing, and design of decision-support systems.

725-C17-0 Data Management and Information Processing Data representation, file and record organization, linear and linked lists, and scatter storage techniques. Sorting and searching algorithms. Solving problems involving large databases. Not for students in computer science. Prerequisites: A10, A11, or programming experience.

725-C20-0 Formal Languages and Automata Theory Regular languages, deterministic and nondeterministic finite automatata, context-free grammars and push-down automata, Turing machines and unsolvability. Prerequisite: C10.

725-C22-1,2 Compiler Construction Overview of compilers and context-free languages, top-down parsing, LL(1) parser construction, translation grammars, implementation of lexical analyzer, parser and translator, compiler optimization, error handling, and recovery. Prerequisite: C11.

725-C25-1,2 Artificial Intelligence Programming Introduction to LISP and programming knowledge-based systems and interfaces. Strong emphasis on writing maintainable, extensible systems. Topics include semantic networks, frames, pattern matching, deductive inference rules, case-based reasoning, discrimination trees. Project driven. Substantial programming assignments. Prerequisites: A10, A11, or programming experience.

725-C27-0 Intelligent Information Management Systems Principles for simplifying human interactions with complex information management systems. Methods from AI applied to the design of interfaces and the redesign of systems to improve performance and simplify training in the use of these systems. Prerequisites: junior standing and permission of instructor.

725-C32-0 Introduction to Computer Vision Introduction to computer and biological vision systems, image formation, edge detection, image segmentation, texture, representation and analysis of two- and three-dimensional structures. Prerequisites: C11 and Mathematics B17.

725-C36-0 Design and Analysis of Algorithms Analysis techniques: solving recurrence equations. Algorithm design techniques: divide and conquer, the greedy method, backtracking, branch-and-bound, and dynamic programming. Sorting and selection algorithms, order statistics, heaps, and priority queues. Prerequisite: C10, C11, or consent of instructor.

725-C37-0 Natural Language Processing Semantics-oriented introduction to natural language processing, broadly construed. Representation of meaning and knowledge inference in story understanding, script/frame theory, plans and plan recognition, counterplanning, and thematic structures. Prerequisite: C48 or consent of instructor.

725-C39-0 Introduction to Database Systems Data models and database design. Modeling the real world: structures, constraints, and operations. The entity relationship to data modeling (including network hierarchical and object-oriented), emphasis on the relational model. Use of existing database systems for the implementation of information systems. Prerequisite: C11.

725-C43-1,2 Operating Systems Fundamental overview of operating systems. 1. Operating system structures, processes, process synchronization, deadlocks, CPU scheduling, and memory management. 2. File systems, secondary storage management, issues in distributed systems, case studies, and special topics. Requires substantial programming projects. Prerequisite: C11.

725-C44-0 Design of Computer Problem Solvers Principles and practice of organizing and building artificial intelligence reasoning systems. Pattern-directed rule systems, truth-maintenance systems, and constraint languages. Prerequisite: C48 and C25-1 or equivalent LISP experience.
### Introduction to Artificial Intelligence

### Introduction to Theorem Proving
First-order logic and normal forms. The resolution principle. Unification. Completeness. Implementation issues. Applications to mathematics, logic, and databases, program verification and generation. Prerequisite: C48 or consent of instructor.

### Introduction to Computational Linguistics

### Introduction to Computer Graphics
Mathematical software and hardware requirements for computer graphics systems. Data structures and programming languages. Random displays. Graphic applications. Prerequisite: C11.

### Applied Combinatorics
Fundamental problems in combinatorics, including selection, arrangements, counting methods, generating functions, and graph theory. Focusing on applications to science and engineering. Prerequisite: C10.

### Introduction to the Theory of Parallel Computation

### Software Project Management and Development
Object-oriented analysis and design, CASE tools, software life cycle. Project management tools, programming teams. Executable specifications, automatic test generation. Prerequisite: C43 or equivalent programming experience.

### Special Topics in Computer Science
Topics suggested by students or faculty and approved by the department.

### Projects
Seminar and projects for advanced undergraduates on subjects of current interest in computer science.

### Electrical and Computer Engineering
The Department of Electrical and Computer Engineering has two distinct curricula, electrical engineering and computer engineering, both of which offer a broad range of programs leading to the BS degree. In addition, the department offers MS and PhD degrees.

Electrical engineering is concerned with the theory, design, implementation, and actual and potential applications of various devices and systems based on electrical phenomena and properties.

Computer engineering is concerned with applying engineering principles to computer hardware design, the relationship between hardware and software in making effective use of computers, the use of embedded microprocessors, and distributed and parallel computing.

Because the disciplines of electrical engineering and computer engineering are very broad, the curricula are designed to appeal to students with various educational and professional goals. By properly selecting elective courses, students can specialize in one or two areas in the department or in an interdisciplinary program. More detailed information on requirements and electives leading to specializations is available from the department office.

### Areas of Specialization

#### Communication Systems
A communication system involves the generation of an electrical signal representing information to be transmitted, its encoding in some form for efficient transmission, its actual transmission, its decoding at the receiving end of the system, and its reconversion into something intelligible to the user. The thorough study of communications systems theory requires knowledge of a broad range of mathematical methods and of the capabilities and limitations of electronic circuits. This subject also covers the design and analysis of communication networks for the transmission of audio, video, and data among many users.

#### Control Systems
The study of control systems deals with the analysis and design of automatic regulators, guidance systems, numerical control of machines, robotics, and computer control of industrial processes. Students are concerned with identifying these systems and with such topics as systems stability, system performance criteria, and optimization. These concepts find application in other fields of engineering and in the development of better understanding of biological, energy, economic, and social systems.

#### Electronic Circuits
This area of study is concerned with the analysis and design of circuits that employ electronic devices such as integrated circuits, transistors, diodes, light-emitting diodes, data storage elements, and image-forming devices.
Important applications include AM and FM radio, television, digital computers, and electronic control and instrumentation systems.

**Electromagnetic Waves and Devices**
This area of study is concerned with the analysis and synthesis of electromagnetic devices, structures, and systems. Transmission lines, waveguides, antennae, resonant structures, diffracting and scattering elements, Impatt and Gunn diodes, and gyrotrons are examples of devices and structures that are electromagnetic in nature. Applications include radar, radio astronomy, microwave radio relaying, satellite relaying for transoceanic communication, space communication, radio and television broadcasting, optical imaging and devices, and the diagnosis and treatment of human disease, including cancer.

**Optoelectronics**
This area includes geometric and wave optics, interference, polarization, diffraction, Fourier transformation by lenses, and holography. Laser sources with appropriate modulation techniques are fabricated and studied. Optical communication systems are analyzed with an emphasis on signal transmission through optical fibers. Other important topics include microelectronics techniques in device fabrication, fiber-optic imaging, integrated and nonlinear optics, solar energy conversion, LED, liquid crystal, and other electro-optic display devices.

**Solid-State Electronics**
This area is concerned with the design, physical principles, and applications of solid-state devices both as discrete units and integrated circuit systems. In addition to the various diode, transistor, and FET devices fabricated from silicon technology, other devices developed from compound semiconductor materials are reviewed. Both analog and digital circuit applications are stressed. Another important topic is the behavior of conductors in the superconducting state, with a stress on applications.

**Biomedical Engineering**
This area combines electrical engineering training with a strong background in the life sciences, which allows students to apply quantitative techniques to the study of living systems. The program offers training in premedical studies, biomedical instrumentation, health care engineering, bioacoustics, and biosciences. Medical schools consider undergraduate engineering an excellent premedical background, filling a strong need for M.D. students with good mathematics, science, and engineering preparation. Other graduates may find rewarding careers with hospitals, industry, and research centers in such diverse fields as hospital and research laboratory instrumentation, patient monitoring, and computerized patient diagnosis.

**Computer Architecture and Systems Design**
This area focuses on the design of computer system hardware. Topics include processor design, computer arithmetic, controller design, instruction set design, memory subsystems, and pipelining. Computer-aided design tools are used for the various levels of the design hierarchy.

**Parallel and Distributed Computing**
This program introduces students to the state-of-the-art field of high-performance computing. In particular, it deals with aspects of computing involving multiple processors working together on a common problem, including issues of computer architectures, parallel programming and algorithms, numerical computing, and computer networking.

**VLSI and Computer-Aided Design**
This area focuses on systematic approaches to designing high-performance integrated circuits consisting of millions of transistors. This specialization includes topics such as low-power, high-speed, and reliable circuit design, hardware-software codesign, design verification, design of multi-FPGA systems, and CAD techniques.

**Embedded Systems Design**
This area focuses on the use of digital hardware to monitor and control physical systems. Topics include discrete-dynamics systems, digital controllers, analog-to-digital converters, microprocessor-based design, and the economic trade-offs of different software and hardware systems.

**Robotics**
This area focuses on computer vision, pattern recognition and robotics. Emphasis is on the software and hardware aspects of robotic design. Topics include robotic control, kinematics, differential relations, dynamic motion, and homogeneous transformations.

**Laboratory and Computer Facilities**
The department has a variety of modern, well-equipped instructional and research laboratories. Facilities primarily for electrical engineering include laboratories for electronic circuits, digital circuits, solid-state electronics, the fabrication of solid-state lasers and other quantum electronic/photonic devices, thin-film device development, biomedical electronics, microwave techniques, holography and coherent light optics, biological and other control systems, and signal, image, and speech processing.

Facilities for electrical and computer engineering include laboratories in digital systems design, microprocessor systems, microprogramming, computer communication networks, robotics, computer-aided design, and computer networking.

The department has major research facilities for work in parallel and distributed computing systems, database systems, computer vision, VLSI design, CAD, robotics,
solid-state devices, fiber optics, lasers, computational electromagnetics, electronic materials, and biomedical engineering. It also has access to the facilities of the Rehabilitation Institute of Chicago and the Materials Research Center at Northwestern. Students working in collaboration with faculty at University laboratories and research centers also have access to appropriate facilities at those laboratories.

The department also maintains the ECE Computing Laboratory, which has many networked workstations and appropriate software to support collaborative work and projects. The machines are connected to external networks, allowing off-campus computing. There are also two parallel machines available at the Center for Parallel and Distributed Computing.

Undergraduate ECE majors are entitled to accounts on departmental computers that are generally more powerful and less heavily used than other University computers.

Courses Primarily for Undergraduates

730-A01-0 Introduction to Scientific Programming and FORTRAN
Introduction to the FORTRAN programming language and methodology for the computer solution of engineering problems. Numerical methods such as root finding and numerical integration. Prerequisite: Mathematics B14-2 or equivalent.

730-A40-0 Introduction to Electrical and Computer Engineering
Introduction to electrical engineering applications to modern technological society. Computer industry, telecommunications and controls, electronic and optical devices, software, and artificial intelligence. Open only to freshmen.

730-A41-0 Introduction to Electrical Engineering via Amateur Radio
Introduction to electrical and computer engineering, applications to modern technological society. Computer industry, telecommunications and controls, electronic and optical devices, software, and artificial intelligence. Open only to freshmen.

730-B01-0 Introduction to Digital Logic Design

730-B05-0 Fundamentals of Computer System Software

730-B30-0 Programming for Computer Engineers
Introduction to computer programming in an object-oriented language. Emphasis on applications to computer systems, computer simulation, and discrete optimization. Basic principles of software engineering. Prerequisite: freshman programming requirement.

730-B41-0 Circuits I
Circuit analysis and network theorems. Transient and sinusoidal steady-state analysis. Students must receive a grade of C- or better to register for B42 and B50. Prerequisites: Physics A35-2 and Mathematics B21.

730-B42-0 Circuits II
Complex frequency, frequency response, parallel and series resonance, Bode diagrams, coupled circuits, two-port networks, Fourier analysis. Students must receive a grade of C- or better to register for B43, C06, C60, C65, C66. Prerequisite: B41 (C- or better).

730-B43-0 Signals and Systems
Comprehensive introduction to analysis of signals in linear systems. Linear time-invariant systems, convolution integral, Fourier and Laplace transform techniques, elements of discrete-time signal and system analysis. Prerequisite: B42 (C- or better).

730-B50-0 Physical Electronics
Electronic conduction in semiconductors; physical principles of p-n junctions; diodes and transistors; device characteristics and models; elementary diode circuits and amplifiers. Prerequisites: Physics A35-2 and concurrent registration in B42.

730-B70-0 Applications of Electronic Devices
DC and AC networks, rectifiers, transistor amplifiers, feedback and operational amplifiers, digital electronics, and microprocessors. Not open to electrical engineering majors. Prerequisites: Mathematics B14-2 and Physics A35-2 or equivalent.

730-C01-0 Fundamentals of Electromagnetics

730-C02-0 Probabilistic Systems and Random Signals
Introduction to analysis of signals in linear systems. Linear time-invariant systems, convolution integral, Fourier and Laplace transform techniques, elements of discrete-time signal and system analysis. Prerequisite: B42 (C- or better).

730-C03-0 Advanced Digital Logic Design
Overview of digital logic design. Technology review. Delay on combinational and sequential circuits, CAD tools, arithmetic units such as ALUs and multipliers. Overview of the computer organization, controller design, and application. Prerequisite: B01.

730-C06-0 Electronic Circuits
Single-stage FET and BJT amplifier configurations; multistage amplifiers and feedback; frequency response; differential amplifiers and active loads; elementary operational amplifier circuits. Prerequisites: B42 (C- or better) and B50.
730-C07-0 Communications  Analysis of analog communications systems, including modulation, transmission, and demodulation of AM, FM, and TV systems. Design issues, channel distortion and loss, bandwidth limitations, additive noise. Prerequisites: B43 and C02.

730-C08-0 Applications of Electromagnetic Fields  Transmission lines, wave equation, Maxwell's equations, plane waves, Poynting theorem, solution of Maxwell's equations for rectangular and circular waveguides, applications. Prerequisite: C01.

730-C12-0 A Journey through the Electronic Age  An examination, in the context of their times, of the lives and accomplishments of the leading contributors to significant developments in electronic and communication technologies. This is a humanities course and may not be used as a technical elective.

730-C13-0 Telecommunication Networks for Multimedia  Modern technologies that represent and transmit multimedia information such as voice, music, documents, still images, and video. Emerging network applications of multimedia in home, academia, and business. Not open to electrical or computer engineering majors.

730-C16-0 Mini/Microcomputers and Real-Time Applications  Basic computer architecture. Low-level program development tools, mini/micro organization, and software development. Laboratory experience to reinforce classroom topics. Not open to electrical or computer engineering or to computer science or computer studies majors. Prerequisite: CS A10 or equivalent.

730-C28-0 Numerical Methods for Engineers  Introduction to numerical methods; numerical differentiation, numerical integration, solution of ordinary and partial differential equations. Students write programs in FORTRAN, C, or Pascal using methods presented in class. Mathematics B21 or General Engineering B05-A may be taken concurrently.

730-C32-0 Digital Image Analysis  Introduction to computer and biological vision systems, image formation, edge detection, image segmentation, texture, representation, analysis of two-dimensional geometric structures, and representation and analysis of three-dimensional structures. Prerequisites: Mathematics B17, CS C11, and IEMS C02.

730-C33-0 Introduction to Communication Networks  Network architectures, models, protocols, routing, flow control, and services. Queuing models for network performance analysis. Prerequisite: C02, IEMS C02, Mathematics C30, or equivalent basic probability theory or consent of instructor.

730-C47-0 Digital Electronic Systems Design Projects  Laboratory project experience in design of electronic systems, with appropriate lectures and discussions. Provides practical experience to supplement C46. Prerequisites: C46 and C03.

730-C53-0 Digital Electronic Circuits and Systems  Logic families, comparators, A/D and D/A converters, combinational systems, sequential systems, solid-state memory, large-scale integrated circuits, and design of electronic systems. Prerequisites: B01 and C06.

730-C57-0 Design Automation in VLSI  VLSI chip design, including logic design, architectural design, and packaging. Develop CAD tools for VLSI physical design. Prerequisites: C03 and CS C11.

730-C58-0 Introduction to Parallel Computing  Introduction to parallel computing for scientists and engineers. Shared memory, parallel architectures and programming, distributed memory, message-passing parallel architectures, and programming. Prerequisites: C61 and B30 or CS B11.

730-C59-0 Digital Signal Processing  Discrete-time signals and systems, the z-transform, discrete Fourier transform, discrete random processes, effects of finite register length, homomorphic signal processing. Prerequisite: B43.

730-C60-0 Introduction to Feedback Systems  Linear feedback control systems, their physical behavior, dynamical analysis, and stability. Laplace transform, frequency spectrum, root locus methods. System design and compensation. Prerequisites: B42 (C– or better) and Mathematics B21.

730-C61-0 Computer Architecture  Understanding of the computer system as a whole unit—instruction set design, data path design, pipeline implementation, pipeline hazards, caches, virtual memory, peripheral devices, I/O. Prerequisites: B05 and C03.

730-C62-0 Computer Architecture Projects  Capstone design course in computer architecture. Extensive design of an entire pipeline processor with a CAD tool. Emphasis on group collaboration and engineering design. Prerequisite: C61.

730-C63-0 Digital Filtering  Recursive and nonrecursive digital filters, decimation and interpolation, A/D and D/A conversion as digital filtering problems. Implementation of nonrecursive filters via FFT, quantization problems, e.g., companding and limit cycles. Prerequisite: C59.

730-C65-0 Communication Filters  Analytical approximations in the design of analog filters. Matched filters and their implementation with surface-acoustic-wave and
charge-coupled devices. Prerequisites: B42 (C- or better) and C07.

730-C66-0 Communication Circuits Advanced treatment stressing methods of analysis and design. Coupling network and narrowband filters. Active device modeling. Oscillator and r-f amplifier design. Amplitude and frequency modulators and demodulators. Prerequisites: B42 (C- or better), C06, and C07.

730-C74-0 Introduction to Digital Control Discrete dynamics systems; discrete models of continuous systems feedback and digital controllers; analog-digital conversion; numerical control with microcomputers. Prerequisite: C60 (C or better).

730-C75-0 Nonlinear Problems in Engineering Analysis of nonlinear circuits and mechanical systems using phase-plane and analytical methods; singularities, stability of equilibrium, periodic solutions and limit cycles, switched circuits, perturbation theory, and numerical solutions.

730-C78-0 Digital Communications Sample and time-division multiplexing baseband digital signals and systems. Coded pulse modulation, error control coding, digital modulation systems, information measure and source encoding, spread spectrum. Prerequisites: C02 and C07.

730-C79-0 Optics and Information Systems Properties of optical fibers and light sources; optical modulation, switching, and receivers; fiber-optic communication systems and networks; optical storage and data processing systems. Prerequisite: C08.

730-C81-0 Electronic Materials: Properties and Applications Quantum physics; energy bands; electronic transport in metals and semiconductors; interfaces; superconductivity; optoelectronic properties and quantum semiconductor devices; magnetic materials. Prerequisite: C08 or consent of instructor.

730-C82-0 Introduction to Applied Optics Wave equation; dipole radiation; reflection, refraction. Lenses, stops, mirrors, prisms. Polarized light, retardation plates. Interferometers, thin films. Prerequisite: C08 or consent of instructor.

730-C84-0 Solid-State Electronic Devices Energy band model for semiconductors; carrier statistics and transport; diodes, bipolar, and field-effect transistors; integrated circuits, optoelectronic and heterojunction devices. Prerequisite: C81 or consent of instructor.

730-C85-0 Solid-State Optoelectronics Introduction to solid-state optoelectronic devices; display devices, laser diodes, photodetectors, and light modulators; optical waveguides and fibers; system application of optoelectronic devices. Prerequisite: C08.

730-C86-0 Computational Electromagnetics Numerical approaches for modeling the interaction of electromagnetic waves with complex structures, differential equation formulation, time-domain solution, integral equation formulation, method of moments, 2-D and 3-D problems. Prerequisites: C08 and C28.

730-C88-0 Microelectronic Technology Physics and fabrication of photonic and electronic devices. Physics of semiconductors: heterojunctions, quantum wells, and superlattices; bulk and epitaxial growth. Device processing techniques: diffusion oxidation, ion implantation, annealing, etching, and photolithography. Prerequisite: concurrent registration in C81 or consent of instructor.

730-C89-0 Introduction to Superconductivity and Its Applications Properties of materials in superconducting state; charge flow dynamics of type II superconductors; high-Tc superconductors; applications for computers and high-frequency devices. Prerequisite: C81 or consent of instructor.

730-C90-0 Introduction to Robotics Basic mathematics of robotic control. Homogeneous transformation, kinematics and kinematic solutions, differential relationships, dynamic motion trajectory, robotic control system, and programming. Prerequisites: vector and matrix operations and high-level language (C or Pascal).

730-C91-0 VLSI Systems Design Design of CMOS digital integrated circuits, concentrating on architectural and topological issues. Trade-offs in custom design, standard cells, gate arrays. Use of VLSI design tools on a small project. Prerequisite: C03.

730-C92-0 VLSI Systems Design Projects Design of a cutting-edge VLSI chip. Teams of 5 to 10 students undertake a large circuit design problem, going from specification to VLSI implementation while optimizing for speed, area, and/or power. Group collaboration and engineering design. Prerequisite: C91.

730-C96-0 Engineering Design and Entrepreneurship Capstone design course. Launching and operating a business producing electronic products and services. Students earn FCC radio licenses. Open to juniors and seniors in engineering and science. May be taken once as an electrical or computer engineering design or technical elective; may be repeated as an unrestricted elective.

730-C97-0 Special Topics in Electrical Engineering Topics suggested by students or faculty and approved by the department.

730-C98-0 Electrical Engineering Design Design of electrical and electronic devices, circuits, and systems by the application of the engineering sciences, economics, and IEEE or other national standards. Prerequisite: senior standing.
730-C99-0 Projects Seminar and projects for advanced undergraduates on subjects of current interest in electrical and computer engineering.

Engineering Sciences and Applied Mathematics

The Department of Engineering Sciences and Applied Mathematics offers course work in applied mathematics and administers an undergraduate program leading to a BS in applied mathematics and a graduate program in applied mathematics.

The applied mathematics program is intended to provide the knowledge necessary for applying mathematical ideas and techniques to the problems that arise in engineering or science. It is expected that a student receiving a BS in applied mathematics would have the background for suitable employment in industry, or for graduate study in either mathematics (pure or applied) or an engineering field, including computer science and operations research. To achieve these goals, the applied mathematics program is designed to be flexible and allow the student to concentrate a substantial part of the course work either in mathematics or one or more areas of application.

Courses Primarily for Undergraduates

760-B52-1,2,3 Honors Calculus for Engineers
Yearlong sequence; alternative to standard calculus sequence. Covers more material at a deeper level, with more applications. Satisfies same requirements as Mathematics B14-3, B15, and B17.

760-C11-1,2 Methods of Applied Mathematics

760-C11-3 Methods of Applied Mathematics: Complex Variables
Imaginary numbers and complex variables, analytic functions, calculus of complex functions, contour integration with application to transform inversion, conformal mapping. May be taken independently of C11-1,2. Prerequisite: Mathematics B21.

760-C22-0 Applied Dynamical Systems
Example-oriented survey of nonlinear dynamical systems, including chaos. Combines numerical exploration of differential equations describing physical problems with analytic methods and geometric concepts. Applications to mechanical, fluid dynamical, electrical, chemical, and biological systems. Prerequisites: C11-1,2 or equivalent or consent of instructor.

760-C46-0 Modeling and Computation in Science and Engineering
Advanced techniques for initial value problems, differential algebraic systems, bifurcations, chaos, and partial differential equations. Applications drawn from different physical areas. Prerequisites: Mathematics B15, B17, and B21 or General Engineering B05-4; Physics A35-1,2 or the equivalent; familiarity with a programming language or consent of instructor.

760-C99-0 Projects
Special studies to be carried out under faculty direction. Credit to be arranged.

Environmental Engineering

Environmental engineering is concerned with the interactions of people and environment, applications of scientific knowledge to the understanding and analyses of these interactions, and the improvement of the quality of our environment. This undergraduate program provides an engineering and scientific basis for the understanding of contemporary environmental problems and approaches to their solutions, an understanding of the natural systems with which human activities must be compatible, and the development of a grasp of engineering analysis and design for environmental control systems, planning and design.

Faculty members of the McCormick School are engaged in research on physical, chemical, and biological processes for water supply, waste treatment, pollution control, and resource recovery; water resources; toxicology; the establishment of quantitative relationships between radiation exposure and biological damage; environmental systems planning and design; chemistry and treatment of industrial wastes; land reclamation and contaminant effects on ecosystems.

Completion of the undergraduate degree program in environmental engineering prepares students to practice engineering at the entry level or to continue their education at the graduate level. It serves as preparation for the Fundamentals of Engineering (FE) examination and, with adequate experience, the Professional Engineer (PE) examination.

Industrial Engineering and Management Sciences

The Department of Industrial Engineering and Management Sciences offers two undergraduate degrees, one in industrial engineering and the other in manufacturing engineering.

The industrial engineering degree provides students with the knowledge, principles, and techniques for analysis, design, and installation of complex systems involving people, materials, and modern technology. Graduates find employment in the private sector; in manufacturing and service firms; in the public sector as professional engineers, technical specialists, and analysts; and in general management. Many students use the degree as the basis for graduate study of law, business, engineering, management science, mathematics, social sciences, and medicine.

The manufacturing engineering degree prepares students for careers as specialists in manufacturing firms. It
also provides a solid technical foundation for a career in manufacturing management.

Course work in industrial engineering and management sciences covers core areas of probability and statistics, operations research, applied behavioral science, and engineering economy. Eight electives may be chosen from a list consisting of methodology areas (statistics and decision analysis, economics and business management, human factors and industrial organization, and mathematics) and application areas (quality control and reliability, production and logistics, manufacturing, transportation, and information and communication systems). Course work in manufacturing engineering is organized into three areas: manufacturing core, probability and statistics, and technical electives. A two-quarter senior capstone design project is required in both the programs.

Courses Primarily for Undergraduates

738-B03-0 Probability and Statistics for Engineers
Elementary probability; standard probability distribution models; descriptive statistics; inferential statistics, including confidence intervals and hypotheses tests; regression and correlation; applications to engineering problems, especially quality control and reliability. Not open to IE majors.

738-C01-0 Introduction to Statistics
Collecting data; summarizing and displaying data; drawing conclusions from data; probability background, confidence intervals, hypotheses tests, regression, correlation. Not open to IE majors.

738-C02-0 Probability

738-C03-0 Statistics I
Descriptive statistics; observational and experimental studies; confidence interval estimation; hypothesis testing; simple linear regression and correlation. Lectures and laboratory. Prerequisite: C02 or equivalent.

738-C04-0 Statistics II
Multiple regression; analysis of variance; design and analysis of single-factor and multifactor experiments; categorical data; nonparametric methods. Prerequisite: C03 or equivalent.

738-C05-0 Statistical Methods for Quality Improvement
Control charts and process capability studies; other graphical methods. Industrial experimentation: multifactor experiments, screening experiments, quality engineering using robust designs. Reliability and life testing. Prerequisite: B03, C03, or equivalent.

738-C06-0 Decision Analysis and Behavioral Decision Theory
Theory of optimal decisions and psychology of human decision making. Probability, utility, risk and uncertainty, rare events, group decision making, probability revision, interpersonal conflict. Background in probability desirable. Prerequisite: C02 or equivalent.

738-C07-0 Quality Improvement by Experimental Design
Methods for designing and analyzing industrial experiments. Planning experiments, blocking and randomization, multiple regression, factorial and fractional factorial experiments, response surface methodology, Taguchi's robust design, split plot experiments. Prerequisite: C03 or equivalent.

738-C11-0 Linear Algebra for Operations Research

738-C13-0 Deterministic Models and Optimization
Formulation and solution of applicable optimization models, including linear, integer, dynamic, and nonlinear programs and network problems. Algorithmic methods and efficient use of computers. Prerequisite: C11 or equivalent course in linear algebra.

738-C15-0 Stochastic Models and Simulation

738-C19-0 Operations Research
One-quarter survey of operations research techniques for nonmajors. Linear programming, decision theory, stochastic processes, game theory. Not open to IE majors.

738-C21-0 Human Factors Engineering
System development, human functions in systems, human capabilities and equipment design, personnel selection and training, human performance assessment, and system evaluation. Human-machine systems design.

738-C22-0 Industrial Psychology
For managers in industry and nonprofit organizations. Human resources (HR) processes that affect productivity, quality of work life, and legal obligations. HR planning, job analysis, recruitment, selection, placement, appraisal, compensation, training, and development. Prerequisite for nonmajors: consent of instructor.

738-C24-1,2 Engineering Management I,II
Two-course introduction to the fundamentals of accounting, finance, and marketing for managers of engineering and other technology-based functions of an organization. Prerequisites: IE junior or senior standing; C24-1 prerequisite for C24-2.

738-C26-0 Economics for Engineering
Financial decisions of firms: investment and capital budgeting under certainty and uncertainty; common evaluation models in terms of applicability; cost-benefit analysis of public sector investment decisions. Prerequisite: Mathematics B15.

738-C27-0 Economics for Engineering II
Economics of firms: demand; cost and production; stock-flow production technologies; equipment investment and replacement
and facility location decisions; behavior under different forms of competition. Prerequisite: Mathematics B15.

738-C28-0 Location Analysis and Spatial Planning Plant layout problems and their solutions. Increasingly complex models of plant location problems. Case studies. Prerequisite: C13 or C19.

738-C29-0 Production Planning and Scheduling Production planning and scheduling under various demand environments. Application of operations research methods to practical problems of production and inventory control. Prerequisites: C02 and C13 or C19.

738-C30-0 Information Technology in Manufacturing An overview of the information technology used in the high-technology manufacturing environment. Integration of people, business processes, manufacturing processes, and information technology.

738-C34-1,2 Systems Project Management I, II
1. Introduction to systems problems and methods, including problem definition, analysis, design, evaluation, proposals, and related areas; preliminary exploration of potential team systems projects. 2. Project management methods applied to the analysis and design of a complex, real-world system. Initiation and planning; organizing and staffing; performance, schedule, and cost control; evaluation, proposals, and implementation. Prerequisites: C21 or C22, C40, and IE senior standing.

738-C35-0 Systems Simulation Discrete event simulation using microcomputers. Generating and testing random deviates, analyzing simulation output, simulating complex systems, and reviewing commonly used simulation languages. Modeling and programming exercises. Prerequisites: C03, C15, and C5A10.

738-C36-1,2 Industrial Engineering Design Project I, II
1. Case studies and small-scale projects involving applications of operations research techniques to complex decisions problems. Mathematical modeling, optimization, and policy analysis in public and private sector systems. Written and oral presentations of analyses. 2. Large-scale, open-ended team projects from selected fields of industrial engineering. Systems approach requiring establishment of objectives and criteria, analysis and synthesis of alternatives, feasibility, trade-offs, testing, and evaluation. Written and oral presentations of reports. Prerequisites: senior standing, C13, and C15 for industrial engineering majors or C19 for manufacturing engineering majors.

738-C40-0 Field Project Methods Bases for theories and practices in organizational behavior and complex systems problem solving. Methods of identifying and defining problems, choosing among methods of data collection and analysis, and designing and carrying out inquiries and related projects. Prerequisite for nonmajors: consent of instructor.

738-C41-0 Introduction to Organizational Design Design of operating organizations or their components. Work in planned change and a field project in an operating organization. Prerequisites: C40 or D10, D11.

738-C95-0 Special Topics in Industrial Engineering
Topics suggested by students or faculty and approved by the department.

738-C99-0 Seminar and Project Comprehensive study by each student of a selected topic. Engineering literature, experiments, field studies, computer programming. Credit to be arranged. Departmental form required before registration.

Materials Science and Engineering
Materials science and engineering is a new discipline that has expanded rapidly in response to growing needs for improved use of existing resources and the development of new, specialized materials for future technologies. The program at Northwestern is broad-based, encompassing solid-state physics, polymer science, ceramics, metallurgy, geophysics, surface science, biomaterials, and electronic materials. Engineers, scientists, and technologists who work on different materials for our modern technology all apply basically the same scientific principles governing the interrelation of processing, structure, properties, and material performance. A key theme of the Northwestern program is the integration of these principles in the systematic design of new materials, exploiting the controlled evolution of multilevel structure.

The Department of Materials Science and Engineering offers an undergraduate program leading to the BS degree as well as programs for the MS and PhD degrees. Preparation for a career in materials science and engineering is founded on engineering principles as well as on thermodynamics and kinetics, chemistry, physics, and mathematics. Students who complete one of the programs described below will be well prepared for professional work or graduate studies in the structural or electronic applications of the materials science and engineering of metals, ceramics, or polymers.

An essential component of the undergraduate program is the senior project, in which each student works with a faculty member on a development or research project. The curriculum provides a fundamental education that prepares students for careers in application, production, processing, or research and development of materials. A student's educational experience is broadened by provision of adequate time for courses in the humanities, arts and sciences, and other areas of engineering.

Areas of Concentration
The undergraduate program at Northwestern offers a close relationship between students and faculty. Every effort is made to tailor specific programs to needs and interests. Several broad areas of concentration are described below. Students are encouraged to create other areas that fit particular interests.
Biomaterials
The growth of biotechnology has stimulated interest in the interface of the life sciences and materials science. The field of biomaterials spans three broad areas: biomedical implant materials to replace natural structures; biomimetic materials applying biological concepts to the design of new engineering materials; and application of materials science principles to the understanding of structure and function in biological systems.

Electronic Materials
As microelectronics enters the era of very large-scale integration, materials scientists face new challenges in developing materials and processes for integrated circuits with components of micrometer dimensions. New scientific principles, materials fabrication techniques, and improved instrumentation will be needed to exploit electronic-level structure/property relations in these devices and their components. New electronic materials must be developed to meet ever-increasing requirements such as the exciting new area of high-Tc superconductivity.

Metals and Ceramics
The ability to design increasingly higher-strength alloys allows for lighter structures, and higher-temperature materials provide energy efficiency. Heat-treatable and toughened ceramics exploit advanced knowledge of solid-state phase transformations and reactions. Exciting developments are taking place in high-performance composite combinations of these and other materials.

Polymeric Materials
Synthetic polymers offer the engineering community an ever-expanding array of materials having properties that are tailored by chemical and physical processing. New developments are opening up applications for polymers as high-strength, low-weight materials; optoelectronic components; and key materials in other revolutionary areas. The basic understanding of engineering properties in terms of multilevel microstructure is essential for the full utilization of polymers.

Surface Science
A solid communicates with the outside world through its surface. Wear, corrosion, and passivation are well-known surface processes. Mechanical properties of materials depend critically on composition at grain boundaries (internal surfaces), surface treatments, and the environment. The surface scientist must not only be able to determine the properties of surfaces or interfaces but also be able to control them.

Laboratories and Facilities
Materials science and engineering demands sophisticated experimental techniques for the preparation and characterization of advanced materials. The undergraduate program makes heavy use of state-of-the-art laboratory facilities in core courses, technical electives, and senior projects.

Material preparation and processing equipment is available for all classes of materials, including an advanced crystal growth facility in a clean room environment for preparing single crystals of metals, oxides, alkali halides, and semiconductors. Investigation of complex microstructures employs a wide array of microscopy, diffraction, and microanalysis techniques. This features a unique combination of instruments (cold field-emission transmission electron microscope, atom-probe field-ion microscopes, scanning tunneling microscopes), providing atomic resolution imaging and chemical analysis, complemented by an extensive surface analytical laboratory.

Characterization of material properties employs an advanced mechanical testing facility featuring static and dynamic loading under controlled temperature and environment. Specialized facilities measure electrical, spectroscopic, magnetic, and photonic properties. Computer laboratories address thermodynamic modeling and simulation of microstructural evolution, with application in materials design.

Courses Primarily for Undergraduates
750-A01-0 Modern Materials and Society Introduction to materials—how they function, how they are made, the devices they enable, and their impact on society. Role of materials developments in technological innovation and global competitiveness. Prerequisites: high school mathematics and science background. Fulfills CAS distribution requirements. Not intended for engineering majors.

750-A02-0 Materials Science and Engineering Freshman Projects Laboratory-oriented, with research projects emphasizing use of the scanning electron microscope and other modern apparatus; correlation of structure with other properties of materials. Lectures, laboratory.

750-B01-0 Principles of the Properties of Materials Introduction to atomic and molecular organization in solids, with emphasis on structure-property relations in ceramics, electronic materials, metals, and polymers. Prerequisite: Chemistry A02.

750-B03-0 Microstructure and Engineering Properties of Materials Processing, microstructure, and properties of engineering materials with emphasis on structural materials such as concrete, steel, wood, glass, and ceramics. Prerequisites: Chemistry A02 and Mathematics B14-3.

750-C16-1,2 Microstructural Dynamics Principles underlying development of microstructures. Defects, diffusion, phase transformations, nucleation and growth, thermal and mechanical treatment of materials. Lectures, laboratory. Prerequisite: C21 or equivalent.

750-C17-0 Materials in Manufacturing Ways in which structure-property relationships of engineering materials determine and are affected by the processes employed in their manufacture. Not open to MSc majors. Prerequisite: B01 or equivalent.

750-C21-0 Applications of Thermodynamics Classical thermodynamics; entropy and energy functions in liquid and solid solutions and their applications to phase equilibria. Lectures, problem solving. Prerequisite: Chemistry C42-1 or equivalent.

750-C22-0 Kinetics of Heterogeneous Reactions Rates and mechanisms of heterogeneous gas-solid, liquid-solid, and solid-solid reactions such as carburization, reduction, oxidation, corrosion, stress-corrosion, and heterogeneous structural transformations. Role of microscopic and macroscopic defects.

750-C31-0 Physical Properties of Polymers Different kinds of polymeric materials. Relationships between structure and physical properties; rubber elasticity, the glassy state, crystallinity in polymers. Lectures, laboratory. Prerequisites: B01 or equivalent and Chemistry C42-1.

750-C32-0 Mechanical Behavior of Solids Plastic deformation and fracture of metals, ceramics, and polymeric materials; structure-property relations. Role of imperfections, state of stress, temperatures, strain-rate. Lectures, laboratory. Prerequisites: C16-1,2; may take C16-2 concurrently.

750-C33-0 Composite Materials Introduction to ceramic-, metal-, polymer-matrix composites for structural applications. Emphasis on structure (reinforcements, architecture), properties, processing, role of interface.

750-C40-0 Ceramic Processing Steps in production of fired ceramic articles. Powder preparation and characterization, compact formation, slip casting, extrusion and injection molding, firing, liquid phase and solid-state sintering. Lectures, laboratory. Prerequisite: C16-1 or equivalent.

750-C41-0 Introduction to Modern Ceramics Applications of ceramic materials, with emphasis on structure (bond, crystal, glass, defect, micro-); properties (thermal, electrical, optical, magnetic, mechanical); and processing (powders, forming, densification). Prerequisites: C16-1,2 or consent of instructor.

750-C51-1,2 Introductory Physics of Materials Quantum mechanics; applications to materials and engineering. Band structures and cohesive energy; thermal behavior; electrical conduction; semiconductors; amorphous semiconductors; magnetic behavior of materials; liquid crystals. Lectures, laboratory, problem solving. Prerequisites: Mathematics B21 and Physics A35-2,3.

750-C60-0 Introduction to Electron Microscopy Theories and practice involved in application of scanning electron microscopy and transmission electron microscopy. Lectures, laboratory. Primarily for undergraduate and non-MSc graduate students. Prerequisites: B01 and Physics A35-2,3 or equivalent.

750-C61-0 Crystallography and Diffraction Elementary crystallography. Basic diffraction theory, reciprocal space. Applications to structure analysis, preferred orientation. Film and counter techniques. Lectures, laboratory. Prerequisites: Mathematics B21 and Physics A35-2,3.

750-C62-0 Point, Line, and Planar Imperfections Introduction to point defects, dislocations, and internal interfaces in crystalline solids. Interactions among point, line, and planar imperfections. Metals, ionic solids, semiconductors. Prerequisite: C21.

750-C80-0 Introduction to Surface Science and Spectroscopy Surface spectroscopy, including Auger spectroscopy, photoemission, and LEED. Surface dynamics and thermodynamics. Electronic properties of surfaces and interfaces. Gas-surface interactions. Prerequisite: C51-1 or equivalent.

750-C85-0 Image Analysis Quantitative analysis of microstructures in materials, from measurements on two-dimensional sections, transmission micrographs, and scanning electron micrographs.

750-C90-0 Materials Design Analysis and control of microstructures. Quantitative process/structure/property/performance relations with case studies. Computer lab for modeling multicomponent thermodynamics and transformation kinetics. Prerequisites: C21 and C16-1,2 or consent of instructor.

750-C91-0 Process Design Processing of materials. Design and analysis of experiments to identify and optimize key parameters to control properties and performance. Solving conflicting requirements. Statistical process control.

750-C94-0 Honors Project in Materials Science Independent study and/or research linked to C96. Comprehensive report on a specific area of modern materials science and engineering. Prerequisite: registration in department honors program.

750-C95-0 Special Topics in Materials Science and Engineering Topics suggested by students or faculty and approved by the department.

750-C96-1,2 Senior Project in Materials Science and Engineering To be taken in two consecutive quarters. Independent basic or applied research project, conceived...
and performed under the direction of a department faculty member. Prerequisite: senior standing in M Sc.

**750-C98-0 Introduction to Plasma Science and Processing Technology**
Plasma production, plasma properties (microscopic and macroscopic); plasma characterization, transport phenomena, plasma processing of powders and advanced materials.

**750-C99-0 Special Problems in Materials Science**
Individual problems including library and design work; comprehensive report on a specific phase of modern materials science. Credit to be arranged.

**Mechanical Engineering**
The Department of Mechanical Engineering offers a broad range of programs leading to the bachelor of science degree in mechanical engineering. Mechanical engineering has always meant engines and machinery, but the character of modern engines and machinery has changed enormously because of the ever-increasing demands of performance, compactness, reliability, and productivity. The early devices were built by ingenious mechanics, individuals possessed with the know-how to reduce these ideas to practice. Today, traditional know-how and creative ability are as necessary as ever but no longer sufficient in an increasingly competitive world. It has become necessary also to know why things occur and, thus, to be able to exert the proper guidance at the earliest stages of planning. Furthermore, in a world of finite resources and in a society increasingly aware of its environment, mechanical engineers must cope with not only the traditional concerns of efficiency and safety but also the undesirable effects of pollution. Clearly, the tools that future mechanical engineers need to possess must be more sophisticated to allow the important but ever-subtle effects to be recognized and controlled.

Mechanical engineering plays a dominant role in a wide spectrum of industries, among them the transportation industry (automotive, rail, air, and marine), heavy machinery (machines producing other machines), the power industry, the environmental industry (heating, ventilation, and air-conditioning), robotics, the light precision-machine enterprises (optical, prosthetic devices, mechanical instruments, and the like), and numerous commercial product industries. Preparation for a career in mechanical engineering requires a basic understanding of the mathematical, physical, and engineering principles essential to planning, designing, and manufacturing new equipment.

The curriculum in mechanical engineering provides a broad fundamental education preparing students for direct entry into industry as well as further professional study. The first part of the curriculum is devoted to mathematics, physics, and chemistry. With this background, fundamental mechanical engineering subjects are studied. These include dynamics, solid mechanics, fluid mechanics, and thermodynamics followed by specialized subjects such as manufacturing, heat transfer, and automatic control. During the final two years, design courses, laboratory courses, and project courses allow students to acquire a taste for the complex task of designing, analyzing, and building a piece of "hardware." In particular, students become aware of the coupling between conceptual design, subsequent analysis (mathematical modeling), manufacturing, systematic experimentation, and final testing. Supporting courses in allied fields of science and engineering broaden the technical proficiency of mechanical engineering, while the elective courses in social sciences, fine arts, history, and philosophy enlarge their background in the problems of humanity.

**Areas of Specialization**
The program in mechanical engineering is designed to appeal to students with a wide variety of interests and professional goals. By an appropriate choice of elective courses, students can develop a highly personalized curriculum.

Some areas of specialization are computer-aided design/computer-aided manufacturing, systems and control, robotics, tribology, and fluid mechanics. In addition, there are special options—energy, intelligent mechanical systems, biomedical engineering, and manufacturing. The energy option emphasizes the mechanical aspects of energy conversion and management. The intelligent mechanical systems option focuses on the design of devices featuring mechanical hardware interfaces to electronic hardware and software. The biomedical engineering option is open to students interested in the biological and medical applications of mechanical engineering procedures. Students in this option can also satisfy the entrance requirements of medical schools. The manufacturing option is directed toward planning and selecting manufacturing methods, design for manufacture, computer-aided flexible automation and robotics, and increasing the efficiency and productivity of current and emerging manufacturing technologies.

**Facilities**
A detailed description of ME facilities in the reconstructed mechanical engineering laboratories is available at the ME department office.

**Courses Primarily for Undergraduates**

**740-B01-0 Mechanics I** Equivalent force systems. Equilibrium of rigid bodies. Distributed forces and centers of gravity. Kinematics of rigid bodies in planar motion. Prerequisites: Physics A35-1 and concurrent registration in Mathematics B15.

**740-B02-0 Mechanics II** Kinetics of rigid bodies in planar motion. Moments of inertia. Energy and momentum methods. Principle of virtual work. Prerequisite: B01.
740-B20-0 Thermodynamics I Basic definitions; Zeroth Law and the meaning of temperature; the First Law applied to flow and nonflow processes; the Second Law and its applications; properties of pure substances; equations of state, the Third Law of Thermodynamics, and introduction to cycles. Prerequisites: Physics A35-1 and concurrent registration in Mathematics B15.

740-B24-0 Experimental Engineering I Modern electronics; analog and digital circuit construction and conversion. Modern data acquisition involving temperature measurements, control of stepper motors, fluid mechanics, deformation of beams. Prerequisites: B20, B41, ECE B70, and CE B16.

740-B40-0 Introduction to Mechanical Design and Manufacturing Introduction to strategy and methods of designing, manufacturing, and testing of mechanical products. Material properties and selection methodology, engineering drawing and CAD, and simple manufacturing processes. Prerequisite: concurrent registration in CE B16.

740-C14-0 Theory of Machines—Dynamics Three-dimensional kinematics: rotation axes and mechanism analysis, rotation matrices and Euler's angles for rigid bodies. Three-dimensional kinematics: dynamics of particles, central force problems, dynamics of rigid bodies, rotational inertia matrices and principal axes, dynamics of mechanisms, the gyroscope and other torque-free problems. Prerequisite: B02.

740-C15-0 Theory of Machines—Design of Elements Factors influencing the proportioning of machine elements—stresses, deformations, and failure criteria as applied to shafts, springs, belts, bearings, gears. Lectures, Laboratory. Prerequisite: CE B16.

740-C25-0 Kinetic Theory and Statistical Thermodynamics Kinetic theory of ideal gas; temperature; Maxwell velocity distribution; transport phenomena, Maxwell-Boltzmann statistics; Bose-Einstein and Fermi-Dirac statistics; partition functions and thermodynamics. Prerequisite: B20 or equivalent.

720-C27-0 Finite Element Methods in Mechanics See Civil Engineering.

740-C40-1,2,3 Computer-Integrated Manufacturing Use of computers to improve productivity and reduce costs in the manufacture of discrete parts and assemblies.
1. Manufacturing processes: Analysis and evaluation of process usage in the contemporary manufacturing environment. Prerequisite: B40 or consent of instructor.
2. CAD/CAM: Geometric modeling, dimensioning systems, tolerances, design for manufacture, programming of machine tools. Prerequisites: C40-1 and CE B16 or consent of instructor.
3. Manufacturing automation: Metrology, machine tool control, forming processes, parts feeding, assembly, robotics, factory control, communications. Prerequisite: C40-2 or consent of instructor.

740-C50-0 Introduction to Nuclear Engineering Energy sources and needs and the interrelationship of nuclear power and the environment. Nuclear physics as it relates to radiation protection and nuclear fission and fusion reactions; nuclear designs, economic and environmental considerations; nuclear reactor types and characteristics. Prerequisites: Physics A35-2,3 and Mathematics B21.

740-C58-0 Experimental Engineering II Optical metrology. Stress analysis, fluid flows, combustion, dynamics, and control. Use of optical interferometry, anemometers and pitot tubes, accelerometers, and other advanced measurement devices.

740-C63-0 Mechanical Vibrations Analysis of vibrations in single- and multidegree-of-freedom systems. Free and forced vibrations with various types of damping. Response to steady-state and transient excitations. Applications to vibration measurement and control systems. Prerequisites: B02 and Mathematics B21.

740-C65-0 Finite Elements for Stress Analysis Application of computer-based modeling techniques to analysis of mechanical systems, databases; computer graphics and their use in analysis. Prerequisites: Mathematics B15, CE B16, and computer programming.

740-C66-0 Finite Elements for Design and Optimization Numerical methods for interaction and optimal CAD. Fully stressed design; design sensitivity analysis and descent methods; optimality criteria to automated design. Prerequisites: senior standing and C65 or consent of instructor.

740-C68-0 Aerodynamics Behavior of lifting surfaces in ideal fluid flows. Two-dimensional airfoil theory;
Joukowski transformation. Finite wing theory; the Prandtl lifting line. Prerequisite: B41.

740-C70-0 Thermodynamics II Elementary classical thermodynamics, application of first and second laws of thermodynamics to power and refrigeration cycles, mixtures and solution, thermodynamic relations, chemical reactions, phase and chemical equilibrium. Prerequisite: B20.

740-C71-0 Combustion Engines Theoretical and actual cycles, combustion, detonation, carburetion, fuels; performance characteristics, fuel-cell power. Prerequisite: B20.

740-C72-0 Introduction to Turbomachinery Application of fluid dynamics and thermodynamics to the analysis and design of steady flow machinery, such as pump, compressor, and turbine. Introduction to aircraft engines. Prerequisites: C70 and C73.

740-C75-0 Air-Conditioning and Refrigeration Heating and cooling requirements for buildings and various technical processes; thermodynamic analysis; heating and refrigeration systems; system design. Prerequisite: B20.

740-C79-0 Elements of Combustion Engineering Introduction to combustion processes, providing an understanding of flame processes as they relate to efficiency and pollution due to propulsion and power generating systems. Diffusion and premixed flames, problems of ignition, quenching, flammability limits, and detonation. Prerequisite: senior standing in ME or consent of instructor.

740-C90-0 Introduction to Dynamic Systems Modeling the dynamic behavior of physical systems. Concepts of causality, dependent and independent storages, and state. Introduction to bond graphs. Generation of state equations; analytical and computer simulation of system behavior. Application to problems of engineering interest. Prerequisite: Mathematics B21.

740-C91-0 Fundamentals of Control Systems I Mathematical modeling of automatic control systems. Open loop and closed loop control. Laplace transform techniques and transfer functions. Stability. Root locus technique. Bode plots, Nyquist criterion. Approaches to control system design, including PID and lead-lag compensation. Prerequisite: C90 or consent of instructor.

740-C95-0 Special Topics in Mechanical Engineering Topics suggested by students or faculty and approved by the department.

740-C98-0 Engineering Design Product or system design projects carried out by small student groups. Project definition, conceptual and detailed design, evaluation, and documentation. Prerequisite: senior standing.

740-C99-0 Projects Special studies to be done under faculty direction. Credit to be arranged.
Medill School of Journalism

Journalists perform a vital function in a democracy whose existence depends on an informed electorate and in a world that depends on effective communication. The Medill School of Journalism seeks to develop professional writers and editors who are broadly educated in the liberal arts and sciences; who are technically skilled; who understand the historical underpinnings of a free press in America; and who appreciate the social, legal, and ethical issues of the news media in modern-day society.

The core journalism courses—which make up 25 percent of the undergraduate curriculum—are designed to prepare students for careers in the mass media, with emphases on writing, reporting, editing, and graphics.

During the junior year, students participate in Teaching Media (the Teaching Newspaper, Teaching Magazine, or Teaching Television program), receiving course credit for an academic internship at 1 of about 50 newspapers located in 25 states or at various magazines or television stations. These programs offer a professional laboratory in which students study under the supervision and guidance of editor-instructors monitored and supervised by Medill faculty. Students who encounter financial hardship while on these programs may apply to the school's Benjamin H. Baldwin Fund for some support.

The nonjournalism courses—about 75 percent of the undergraduate curriculum over four years—include a wide selection of social and natural sciences, arts, and humanities classes, so that students will have the background to understand and communicate the world's events.

Many undergraduates find media jobs in print or broadcast journalism, public relations, or allied fields directly after graduation. Others pursue a Medill master's degree. The graduate program in editorial journalism offers concentrated study in reporting and writing, newspaper management, broadcast journalism, and magazine publishing. The school's other graduate program, integrated marketing communications, has specialized concentrations in advertising, corporate public relations, direct marketing, and interdisciplinary studies. Students are admitted to a graduate program only if their undergraduate course work indicates the aptitude necessary for rigorous, specialized education.

Through the Accelerated Master's Program, Medill allows a few students each year to earn both bachelor's and master's degrees in editorial journalism in less than five years. Students apply to this program in their junior year; those accepted into the highly selective program must show academic excellence and the promise of success in journalism.

Medill has awarded nearly 13,000 degrees since its founding in 1921; the school's graduates stand among the leaders of the profession. Medill's 900 students—600 undergraduates and 300 graduate students representing nearly every state in the union—take pride in the school's ranking as one of the country's preeminent journalism centers.

Academic Policies

Requirements for the Degree of Bachelor of Science in Journalism

1. A minimum of 45 units must be completed on the college level.
2. Students must take the final 23 units (of 45 required for graduation) at Northwestern and complete the last three quarters of work while enrolled at Medill.
3. At least 11 but no more than 12 units in journalism may be counted toward the 45 course units required for graduation; 33 of the 45 must be in areas other than journalism. Students with more than 45 units may take additional journalism units.
4. Required journalism courses:
   Freshman year
   B01 Editing and Writing the News
   B02 History and Issues of Journalism
   Sophomore year
   C01 Newswriting and Reporting (prerequisite: B01)
Students may take both C03 Advertising and C04 Direct Marketing only if 1 of these courses is taken as a 12th journalism unit. Of the 11 required journalism units for the bachelor of science in journalism degree, 10 must be in editorial courses.

Seniors may take courses in any area of journalism, regardless of the Teaching Media program they did in the junior year. For example, a Teaching Television student could take magazine courses, newspaper courses, a new-media course, additional television courses, or a combination of courses.

5. Three units of literature are required. They may be from any department in the University dealing with literature, either in English or in a foreign language. Selected courses in other departments will satisfy the literature requirement.

6. Three units of mathematics/science/logic are required. At least 1 of the required courses must be taken from this list: Anthropology C62-1,2,3 Quantitative Methods of Analysis; Biomedical Engineering B20 Introduction to Biomedical Statistics; Mathematical Methods in the Social Sciences B92-1,2,3 Mathematical Methods in the Social Sciences: First Year; Mathematics B10-1,2 Mathematics for the Behavioral Sciences; Political Science C10 Elementary Statistics for Political Research, C11 M methods of Political Research, C12 Logic of Political Inquiry, and C15 Introduction to Positive Political Theory; Psychology B01 Statistical Methods in Psychology; Sociology C03 Analysis and Interpretation of Social Data; and any course in the Department of Statistics.

7. Three units of history are required. At least 1 course must be in U.S. history, and at least 1 must be in non-U.S. history.

8. Students are required to take 1 American government course in the Department of Political Science and 1 course in international relations or international studies.

9. One unit of religion, philosophy, or ethics is required, not including courses in logic.

10. One unit of art or art history is required.
11. One unit of economics is required.
12. A social science concentration is required:
   • Students must take 3 units in any one of the following departments: anthropology, economics, history, political science, psychology, or sociology. If, for example, the student selects economics, history, or political science, the 3 units taken to fulfill the social science concentration must be in addition to those required of all Medill students (see 7, 8, and 11). At least 1 of the 3 units must be at the C level. Students may apply no more than 1 A-level course toward the social science concentration. International Studies B01-1,2,3 Introduction to the World System may be used toward the 3-unit social science concentration in political science.
   • Students may not apply more than 1 unit of field study credit toward the 3-unit social science concentration. Requests for field study credit must be approved by the director of undergraduate studies.
13. Students are required to complete a 6-unit concentration in any department of the College of Arts and Sciences other than the area selected for the 3-unit social science concentration. For any 6-unit concentration except in astronomy, biological sciences, chemistry, geological sciences, mathematics, physics, or a foreign language, students may apply no more than 1 A-level course and must take at least 2 C-level courses.
   • Students are exempt from this requirement if they (1) complete a minor in the College of Arts and Sciences, (2) complete a second major in any department of CAS, or (3) complete an adjunct major offered through CAS. Permission to pursue a second or adjunct major must be secured from the appropriate CAS department chair.
   • Students may apply not more than 2 units of field study credit toward the 6-unit concentration. Requests for field study credit must be approved by the director of undergraduate studies.
14. First-year students are encouraged to take Communication Studies B72 Communication and American Democracy, normally offered in the winter quarter and cotaught by journalism faculty.
15. No course may count toward more than one requirement.
16. Exceptions to any degree requirements must be approved by the Medill Academic Standards Committee. Petitions and the committee's rules for filing petitions are available in the Medill Office of Student Records and Services or from the chair of the committee.
17. In addition to and independent of the requirements set by Medill, all students must satisfy the University Enrollment Requirement (see Financial Regulations). Also, see the Medill Undergraduate Handbook for a complete list of courses that fulfill the nonjournalism course requirements.

Grade Requirements
1. Students must achieve a 2.00 minimum grade point average in all nonjournalism courses taken for a letter grade and a 2.25 minimum grade point average in journalism courses. In addition, all journalism students are subject to the following grade requirements:
   • The journalism grade point average shall reflect the grades of all required journalism courses attempted (including F's) and of any journalism elective courses applied toward the degree.
   • All Y and X grades, unless made up satisfactorily by the end of the subsequent quarter, shall be counted as F's.
   • A grade of F and/or N earned twice in the same required course shall be grounds for mandatory transfer out of Medill.
   • To be eligible for the junior-year Teaching Media program, students must earn a grade of C or better in Newswriting and Reporting and in the 2 media-specific courses that immediately precede the Teaching Media program and a minimum 2.25 grade point average in those 3 courses plus Editing and Writing the News.
   • A maximum of 2 units of D or below in required journalism courses or 3 units of D or below overall will be permitted. Exceeding these limits shall be grounds for mandatory transfer out of Medill.
   • When journalism courses are repeated, both the previous grade and the subsequent grade are computed in the journalism grade point average. One course does not substitute for the other.
   • Students who do not meet the minimum grade point requirements are placed on academic probation. Continued poor performance will result in a mandatory transfer to another school within Northwestern University or dismissal from the University.
2. Medill undergraduates are required to take these courses for letter grades (A, A–, B+, B, B–, C+, C, C–, D, F):
   • All journalism courses (except those offered by the faculty under the P/N option)
   • All courses in the social science concentration
   • All basic requirements in art/art history, economics, history, literature, mathematics/science/logic, philosophy/religion, and political science

3. Other courses may be taken on the pass/no credit (P/N) option, if that option is available. A total of no more than 6 units of credit shall be taken P/N and counted toward the 45 units required for graduation. (P/N grades from Teaching Newspaper, Teaching Magazine, or Teaching Television are included in these 6.) Only 1 course per quarter may be taken P/N.

Leaves of Absence
Because students often can gain some advantages by taking a leave of absence from their studies, the school generally will approve requests for a leave of absence for a year or less. Leaves of more than a year will be granted only in special circumstances.

Because a leave of absence interrupts the usual academic program, students may require more than four years to complete their degree. Before taking a leave of absence, students should consult with their adviser and with the Medill Office of Student Records and Services. The school cannot guarantee that the student will be able to resume studies precisely at the point at which they were interrupted. The sequence in which various courses are offered may be changed during the student’s absence, and it is the student’s responsibility to adjust to the new course structure on returning to school.

Once a student is accepted by Northwestern University and enrolled in the Medill School of Journalism, all decisions on leaves of absence and readmission to Medill are made not by the University but by Medill. Therefore, all correspondence about requests for leaves of absence or extension of existing leaves should be addressed to Medill’s director of undergraduate studies.

Students who interrupt a degree program by not registering or by withdrawing for one calendar year must apply to the director of undergraduate studies for readmission. There is no fee for this application. In every case, the student’s record is thoroughly reexamined before readmission. When a student has been inactive in a program for longer than a calendar year, readmission will be granted only when persuasive evidence of that student’s preparation and ability to complete a degree program has been supplied.

Requests for a leave of absence must be received by the Medill School of Journalism at least one month before the leave would begin.

Faculty Advisers
When students enter Medill, they are assigned to a faculty adviser who is available to help develop an individual academic program. Medill staff and students also help advise students in such areas as degree requirements, career paths, noncredit internships (especially during the summers), and work on campus media.

Academic Options
Internships
Internship employment by newspapers, magazines, radio and television stations, and advertising agencies may be available to Medill juniors, seniors, and graduate students, particularly during the summer. Many employers look to Medill for talented young people who can be introduced to their organizations through internships. The school encourages these opportunities as a means of enriching students’ education but gives academic credit only for the Teaching Newspaper, Teaching Magazine, and Teaching Television programs.

Other Undergraduate Programs
Students in the Medill School of Journalism also may enroll in courses offered by the Center for the Writing Arts, the interschool Undergraduate Leadership Program, and the international studies adjunct major, among other areas (see the Other Undergraduate Programs section of this catalog).

Activities
Medill students, through student publications and broadcast media, professional organizations, and convocations, have many journalistically related opportunities outside of the classroom.

Students write and edit the independent student newspaper, the Daily Northwestern, published during the academic year, and the Summer Northwestern, a weekly newspaper published during Summer Session.
Also published on campus are the Syllabus, the student yearbook, and a wide variety of other publications. The University gives no academic credit for work on student-run publications. The Daily Northwestern, Summer Northwestern, and Syllabus are published by the Students Publishing Company and have no formal connection with the School of Journalism.

Radio station WNUR-FM provides another outlet for student newswriters, sportswriters, editors, and commentators. Northwestern News Network is a student-produced news program aired on a local cable television channel.

Writing skills help the student in other extracurricular activities such as campus politics, the Waa-Mu Show, student-planned colloquia, and various literary publications.

The Society of Professional Journalists and the National Association of Black Journalists, professional organizations that promote high standards among journalists, have chapters on campus. Other organizations for students interested in journalism include Blackboard and the Communications Residential College. Top scholars in the senior and graduate classes are initiated into Kappa Tau Alpha, a national journalism honorary society.

**ROTC Course Credits**

ROTC course credits may be used as a portion of the 45 units required for graduation. These units may be considered elective courses.

**Accelerated Master’s Program**

Through the Accelerated Master’s Program, the Medill School of Journalism allows a few students each year to earn both the bachelor’s and master’s degrees in editorial journalism in less than five years. Students apply to this program in their junior year; those accepted into the highly selective program must show academic excellence and the promise of success in journalism.

**Early Graduation**

Students who plan to graduate early must notify the school in writing at least three quarters before the expected date of graduation. These students also should check with the Registrar’s Office to make sure they have fulfilled the University Enrollment Requirement.

**Courses**

**Required Courses**

Note: Students select either C40, C41, C45, and C46; C50, C51, C55, and C56; or C60, C61, C65, and C66.

325-B01-0 Editing and Writing the News

The fundamentals of journalistic editing, writing, research, and visual presentation.

325-B02-0 History and Issues of Journalism

The history of print and broadcast journalism, primarily in the United States, as well as the historical development of several contemporary media and ethical issues.

325-C01-0 Newswriting and Reporting

Reporting and writing several types of news stories for print and broadcast media under deadline pressure; exploring the use of graphics. Prerequisites: B01 and sophomore standing.

325-C40-0 Newspaper Editing and Writing

Fundamentals of newspaper editing, including headlines, page layout and design, photo editing, information graphics, and appropriate electronic tools. Prerequisite: C01.

325-C41-0 News and New Media

An exploration of the move of traditional publications into electronic publishing: understanding the journalist’s role in that process and mastering the appropriate electronic tools. Prerequisite: C40, C55, or C65.

325-C45-0 Teaching Newspaper: Reporting

(1 or 2 units) Honing reporting and newswriting skills in a newsroom through practical assignments under deadline pressure and close editorial supervision. Prerequisites: C40 and C41. Taken with C46.

325-C46-0 Teaching Newspaper: Editing

(1 or 2 units) Honing skills in news editing, headline writing, page layout/design, and graphics in a newsroom through practical assignments under deadline pressure and close editorial supervision. Prerequisites: C40 and C41. Taken with C45.

325-C50-0 Magazine Writing

Reporting, writing, and illustrating magazine articles, with emphasis on voice, style, subject matter, and organization; the development of ideas; the marketing of articles. Prerequisite: C01.

325-C51-0 Magazine Editing

Editing magazine copy and graphics, with emphasis on precision, style, and structure; an overview of the magazine industry and the role of magazines in society. Prerequisite: C01.

325-C55-0 Teaching Magazine Writing

(2 units) An exploration of most aspects of magazine writing and reporting. Practical assignments in a magazine office with deadline pressure and close professional supervision. Prerequisites: C50 and C51. Taken with C56.

325-C56-0 Teaching Magazine Editing

An exploration of most aspects of magazine editing, graphics, and publishing. Practical assignments in a magazine office with
deadline pressure and close professional supervision. Prerequisites: C50 and C51. Taken with C55.

**325-C60-0 Broadcast Writing** Writing news scripts for television on an appropriate computer system, editing videotape, and writing stories to coordinate with the video. Prerequisite: C01.

**325-C61-0 Television News Editing** Writing and producing a television news program using the appropriate computer and editing equipment, news wires, and video feeds. Emphasis on the editorial decision-making process. Prerequisite: C60.

**325-C65-0 Teaching Television: Broadcast News** (2 units) Gathering television news from the field; writing scripts, readers, voiceovers, sound bites, and packages. Taken in a television newsroom under close professional supervision. Prerequisite: C61. Taken with C66.

**325-C66-0 Teaching Television: Editing** Gaining exposure to the television assignment process by working with the assignment desk; editing voiceovers, sound bites, and packages. Taken in a television newsroom under close professional supervision. Prerequisite: C61. Taken with C65.

**325-C70-0 Law and Ethics of Journalism** The legal and ethical framework defining media freedoms and constraints in the United States. Historical context and focus on the evolution of constitutional, statutory, judicial, and ethical standards. Prerequisite: senior standing.

**Elective Courses**

Two courses are required from this list. Students may take both C03 and C04 only if one is as an optional 12th journalism unit. Students may take C40, C41, C50, C51, C60, or C61 as electives if they have not taken them as required courses.

**320-C03-0 Advertising** Orientation to advertising in the economy and society. Introduction to theory and practice of marketing, research, copywriting, media planning, direct marketing; how advertising works; advertising agencies and other organizations; role of advertising in the society and economy; legal aspects.

**320-C04-0 Direct Marketing** Fundamental principles of direct marketing, including marketing, promotion, and business considerations; survey of database, media, and creative techniques used by traditional and nontraditional marketers.

**325-C67-0 Broadcast Reporting** Basics of reporting for broadcast and preparation of broadcast stories. Emphasis on interviewing, packaging a story, and analyzing techniques. Prerequisites: senior standing and C60.

**325-C68-0 Television News Documentary** Formats used in documentary production, with emphasis on transforming a major research effort into a half-hour program or a multipart series. Prerequisites: senior standing and C66 or C67.

**325-C73-0 Investigative Journalism** The news media in their adversarial role in public affairs reporting, including investigative and interpretative reporting and advocacy journalism; the impact of the news media on public opinion and policy making. Prerequisite: senior standing.

**325-C74-0 Analytical Reporting** Development of an in-depth reporting/writing project, including researching the subject; analyzing the appropriate interviews, computer data, and/or surveys; writing and editing; and preparing information graphics. Prerequisite: senior standing.

**325-C75-0 Literary Journalism** A survey of the work of several print and broadcast journalists to explore the intersection of journalism and literature; analysis of the relationships between form and content within the historical contexts in which pieces were produced. Prerequisite: senior standing.

**325-C88-0 Internship** (noncredit) Student-initiated internships in journalism. Supervised by Medill faculty. Prerequisites: sophomore standing and consent of instructor.

**325-C90-0 Special Topics** Specialized, experimental courses offered from time to time by faculty. Prerequisites: vary depending on the course.

**325-C99-0 Independent Study** Academic work sponsored and supervised by a faculty member working one-on-one with a student. Prerequisite: consent of Medill Academic Standards Committee.
School of Music

Since its establishment in 1895, the Northwestern University School of Music has ranked among the most prestigious music schools in the nation, providing an environment in which young musicians can dedicate themselves to their art. The school offers students a variety of musical experiences, enabling them to develop into highly proficient performers and scholars. It is a professional school within the University—students accepted into the school are also accepted into the University and consequently have the advantage of academic study in a variety of courses with distinguished faculty. As part of a private institution, the School of Music has developed distinctive programs to meet the artistic and professional needs of its students, preparing them for careers as instrumentlists, singers, teachers, composers, conductors, theorists, historians, critics, managers, and others requiring a specialized knowledge of music. These programs are responsive to new directions, recognizing that a great institution of musical learning preserves the riches of past practices while it encourages its students to explore the practices that will produce the music of the future.

The faculty believe that each undergraduate should be given a comprehensive musical background, that the education should be centered on performance founded on scholarly studies in music theory and history, and that all musical training should be accompanied by a broad cultural background in the humanities. In addition to providing instruction in voice and all principal instruments, composition, and music technology, the school supports orchestras, bands, choral ensembles, opera, and a wide variety of small ensembles that give students experience in all avenues of musical expression.

The graduate division of the School of Music is open to students who are deemed capable of advanced study. Graduate courses emphasize scholarly performance and include concentrated work and research in students’ major fields of interest. The ultimate aim is to develop informed musicians, independent scholars, and inspired teachers.

Although the excellence of any school depends mainly on the quality of its faculty and students and the soundness of its curriculum, distinguished musicians are brought to the campus from time to time to enrich the regular programs and to give a special impetus to study. In past years, guests have included Dmitri Shostakovich, Witold Lutoslawsky, John Cage, Sherrill Milnes, James Galway, Pierre Boulez, Erich Leinsdorf, and Sir Georg Solti. A performing arts series annually presents concert artists in performance and master classes for students.

In addition to outstanding instruction and significant platform experience at the University, the school offers students excellent opportunities for participating in metropolitan Chicago’s rich musical life. While studying toward a degree, students can gain valuable performing experience and enhance their education as developing musicians.

Mission Statement

We affirm that music is a universally treasured art and an essential component of culture.

The mission of the School of Music is to provide the highest order of education in all major aspects of music. We endeavor also to expand the musical experiences and understandings of students throughout the University and to enhance the quality of our community’s musical life. While continuing to animate the vital traditions of music’s past, we encourage creative and dynamic visions of its future.

The School of Music pursues this mission through professional undergraduate and graduate programs for a selective student body of highly qualified musicians who also meet competitive academic standards. We attempt to integrate the artistic and intellectual aspects of our students’ education and to provide a depth and breadth of musical study that equips them with a continuing capacity to grow in their musicianship and to adapt to changing professional demands. Our faculty members strive to be inspiring teachers as well as musical and intellectual leaders. They are actively engaged in expanding knowledge about
music through their research and scholarship; in preparing students to be performers, composers, teachers, scholars, and informed audiences; and in enriching their community’s culture through their own artistry.

**Academic Policies**

**Programs of Study**

The School of Music offers programs leading to the professional degrees of bachelor of music, master of music, graduate certificate in music, and doctor of music. While these programs are designed to prepare the individual for a professional life in music, the setting of the school within a university of Northwestern’s quality provides special benefits to students for broadening their education in related disciplines. The school also offers a nonprofessional degree, the bachelor of arts in music. The School of Music is a founding member of the National Association of Schools of Music, which fully accredits all its degree programs.

The curriculum allows flexibility for students while providing an education that is basic for all musicians. Applicants in all areas who are accepted by the School of Music enter directly into a program of specialization that begins in the freshman year. The core studies, taken by all students, require the acquisition of minimum competencies and provide fundamental and essential experiences that complement the specialized studies in the declared major. Students are also required to complete studies in a number of allied subjects throughout the University and are given significant opportunities to explore other interests with free electives.

**Bachelor of Music**

Courses of study leading to the bachelor of music degree include music theory, music composition, musicology, music education, and performance in piano, organ, string instruments, winds, percussion, and voice.

Through the use of electives, it is possible in the final two years of study leading to the bachelor’s degree, with the adviser’s help and the faculty’s approval, to design an ad hoc program that cuts across specializations to meet a particular student’s needs and career ambitions. Students interested in a specially designed and approved program that most fits their interests and abilities may petition for such a program. The program is designed in consultation with faculty and area professionals with expertise in the particular area of interest. Ad hoc specializations have included arts administration, music criticism, jazz studies, conducting, ethnomusicology, music theater production, and music industry.

Graduates of the bachelor of music with specialization in the music education program meet all requirements for teacher certification in the state of Illinois (and most other states). In addition to the core program common to all School of Music students, music education majors take a structured sequence of courses in general education, a basic set of courses in music education, and special courses in the chosen music education specialization.

**Bachelor of Arts in Music**

In addition to the professional curricula just described, the School of Music offers a nonprofessional degree program leading to the bachelor of arts in music. Featuring an opportunity for substantially wider explorations in the liberal arts and fewer music requirements, the bachelor of arts in music is intended for students who have strong ability in music but are not necessarily interested in a musical vocation. Students who are interested in this program may petition for it at any time after they have been admitted to the School of Music.

**Five-Year BA/BMus**

Students accepted into the combined College of Arts and Sciences-School of Music program may simultaneously earn a BA degree from the College of Arts and Sciences and a BM us degree from the School of Music. They must complete all CAS degree requirements, including at least 30 CAS courses, as well as all School of Music bachelor of music degree requirements, including at least 30 music courses. Fulfilling both music and CAS requirements usually takes five years of full-time study, and a University Enrollment Requirement of 15 quarters is obligatory (see Financial Regulations).

Participants in this combined program must be accepted by both the School of Music and the College of Arts and Sciences. The entrance requirements and structure of the program are currently

  - Mathematics (6 units)
  - Basic sciences (5 units)
  - Basic engineering (6 units)
  - Computer programming (1 unit)
  - Department program (16 units)

undergoing revision; interested students should consult with the associate dean for undergraduate studies in the College of Arts and Sciences and the director of admissions in the School of Music for up-to-date information.

**Five-Year BS/BM us or BS/BAM us**

Students accepted into the combined M cCormick School of Engineering and Applied Science–School of Music program may simultaneously earn a BS degree from the M cCormick School and a BM us or BAM us degree from the School of M usic. They must complete all M cCormick School degree requirements, including at least 36 M cCormick courses, as well as all School of M usic bachelor of music or bachelor of arts in music degree requirements, including at least 32 music courses. Fulfilling both music and engineering requirements usually takes five years of full-time study, and a University Enrollment Requirement of 15 quarters is obligatory (see Financial Regulations). Participants in this combined program must be accepted by both the School of Music and the M cCormick School. The entrance requirements and structure of the program are currently undergoing revision; interested students should consult with the Undergraduate Engineering Office in the M cCormick School and the director of admissions in the School of M usic for up-to-date information.

**Degree Requirements**

Candidates for the degree of bachelor of music in performance, music composition, music theory,
musicology, music technology, or an ad hoc area must complete 49.5 course units. A bachelor of music with specialization in music education may require as many as 53 units but can be completed within four years.

All freshmen in the School of Music must participate in band, choir, or orchestra, as appropriate to their principal auditioned instrument. Freshmen and sophomores may not participate in more than two ensembles. All students in the Department of Music Performance Studies must enroll in 510-C89 Convocation for at least four quarters. For specific requirements, see the Degree Requirements chart and the professional studies requirements of each program.

For their last 24 units, all students must be registered at Northwestern; for their last 12 units, they must be registered in the School of Music. Credit toward graduation is generally not granted for summer work taken at other colleges or universities as part of the last 24 units.

The work offered to meet the requirements for a degree may not average lower than C. Not more than one-fifth of this work may be of grade D. A maximum of six quarter-courses in nonmusic subjects taken under the P/N grade option may be counted toward the degree. Music students may not take music courses under the P/N grade option, except for those courses graded solely with P/N grades.

If students interrupt their program of study for an extended period of time and degree requirements are changed during this period, they will normally be held to the new requirements.

Every candidate for a degree must file an application for the degree a year in advance of the date of graduation.

Students coming to Northwestern University for a second undergraduate degree must transfer at least 9 units of credit in music, audition for admission at the C level, complete the general education distribution requirement with transfer credit, and comply with the 24-unit residency requirement.

In addition to and independent of the requirements set by the School of Music, all students must satisfy the University Enrollment Requirement (see Financial Regulations).

Music Performance Study

The School of Music offers instruction in piano, organ, string instruments, winds, percussion, and voice. Students should consult their adviser or program coordinator for the assignment of an instructor. Consent of the instructor and department chair as well as concurrent registration in ensemble are required.

Elective performance study assignments are made by the appropriate department chair as space is available.

Faculty Advisers

Each student is assigned to an adviser who approves the student’s program each quarter. Each student has a conference with the adviser during each quarter. Students may not make a change of registration without their adviser’s approval.

Attendance Policy

Students are expected to attend all sessions of courses and ensembles for which they are registered. It is the responsibility of students enrolled in the School of Music to acquaint themselves and comply with the attendance policy of their departments, class instructors, and ensemble conductors.

In addition, students who are absent from classes for three or more consecutive days because of illness are required to notify the Office of the Associate Dean. Students who know they will be absent from classes or performing organizations for three or more consecutive days for such professional or personal commitments as auditions or off-campus performances or for any other nonemergency reasons are required to prepare a petition requesting permission to be absent from their academic and performance responsibilities in the School of Music. This petition must be submitted to the Office of the Associate Dean for approval.

Failure to comply with these regulations can be cause for failure in the courses or ensembles for which a student is registered during that quarter.

Academic Options

Double Major

Students may earn a double major in four years with proper academic planning and by fulfilling the requirements of both majors.
Bachelor of music candidates may double major only within the School of Music. In certain cases the curriculum may require enrolling in more than four courses per quarter. Typically, the double major combines a specialization in a performance area with one in the academic area or composition, although double majors within the academic area are possible also. A double major in two performance areas is generally not permitted.

Bachelor of arts in music candidates may double major with any major offered in the College of Arts and Sciences.

**Interdisciplinary Certificates**

School of Music students may elect to complete one of the interdisciplinary certificates developed by the School of Music faculty and representing disciplines often used in the music profession. These certificates cross the normally established disciplines to enable students to combine the study of music with another area in an interdisciplinary fashion. Each includes a minimum of six and a maximum of nine courses. Students applying for School of Music interdisciplinary certificates must present records showing a minimum of five courses not double-counted in their specializations.

Students who complete all required courses will receive a notation on their Northwestern transcripts. Applications to receive the certificate are available from the Office of Undergraduate Studies and should be completed along with the Application for a Bachelor’s Degree.

**Commercial Music**
The Certificate in Commercial Music requires nine courses:
- Conducting C26 Conducting and Score Reading
- Conducting C30 Writing for Jazz Ensembles
- Music C98 Internship
- Radio/Television/Film C83 Radio/Audio Production
- Two courses chosen from Conducting C20 Band Arranging
- Conducting C21 Writing for Choral Ensembles
- Conducting C31 Advanced Jazz Writing
- Composition C14-2 Orchestration
- Composition C14-3 Advanced Orchestration
- Two courses chosen from music technology
- One elective in a related area

**Jazz Studies**
The Certificate in Jazz Studies requires six courses:
- One improvisation course chosen from Conducting C36 Jazz Improvisation
- Conducting C37 Advanced Jazz Improvisation
- Musicology C37 Improvisation and World Musicianship
- One jazz writing course chosen from Conducting C30 Writing for Jazz Ensembles
- Conducting C31 Advanced Jazz Writing
- One jazz history, theory, or literature course chosen from African American Studies B40 Survey of African American Music (spring quarter)
- Musicology C34 Jazz: Its Roots and Elements
- Three electives chosen from improvisation; jazz writing; jazz history, theory, or literature; or jazz piano for the nonkeyboard player courses
- Jazz performance (no credit)
- Large ensemble (University Jazz Ensemble, University Jazz Lab Band, Vocal Jazz Ensemble) and chamber ensemble (Chamber Jazz Ensemble) for six quarters.

**Music Business**
The Certificate in Music Business requires eight courses:
- Advertising B03 Basic Advertising (University College)
- Economics B60 Accounting and Business Finance (prerequisites: Economics B01, B02)
- Marketing B01 Marketing I: Principles of Marketing (University College)
- Music C35 Selected Topics: Entrepreneurship for the Performing Artist
- Business-related elective
- Music C98 Internship

**Music Criticism**
The Certificate in Music Criticism requires nine courses:
- Musicology C24 History and Practice of Criticism
- Musicology C99 Independent Study (with Professor Willis)
- Three musicology electives
• Journalism B01 Editing and Writing the News
• Journalism C01 Newswriting and Reporting (prerequisite: B01)
• Journalism C40 Newspaper Editing and Writing (prerequisite: C01)
or C70 Law and Ethics of Journalism
• Journalism C41 News and New Media (prerequisite: C40, C55, or C65)
or C50 Magazine Writing (prerequisite: C01)

Interschool Programs
For information about the interschool programs listed below, see the Other Undergraduate Programs section of this catalog.

Integrated Arts Program
The interschool Integrated Arts Program offers courses leading to a minor that explore the creative process from the perspective of the artist in the disciplines of theater, visual arts, music, dance, and media arts.

International Studies Program
International studies, an undergraduate interschool adjunct major that is taken in conjunction with a traditional major, is open to students in the School of Music.

Music Theatre Program
The Certificate in Music Theatre provides the opportunity for School of Music students majoring in voice and School of Speech students majoring in theater to create a second area of specialization.

Undergraduate Leadership Program
The Undergraduate Leadership Program, an interschool certificate program open to all undergraduates, helps students understand the nature of leadership and prepares them to become leaders.

Graduate Studies
The Graduate Division of the School of Music offers programs of study leading to the master of music degree, the graduate certificate in performance, and the doctor of music degree. Information concerning these programs is available from the Office of the Associate Dean for Academic Affairs, School of Music. For information about the requirements for the doctor of philosophy degree in music, write to the Graduate School.

Resources

Musical Organizations
Music majors are required to participate in those musical organizations for which they are qualified as a part of their program of study. Students from all other schools of the University are encouraged to participate in any organizations for which they qualify.

Symphony Orchestra
This large ensemble provides experience in the concert presentation of representative symphonic repertoire as well as operas and concertos.

Chamber Orchestra
The Chamber Orchestra performs works of all periods. Repertoire is limited to the music of chamber and small symphony orchestras.

Philharmonia
This orchestra is open upon audition to interested and qualified students from any school in the University and performs a wide-ranging repertoire.

Symphonic Wind Ensemble
Flexibility and thorough musicianship mark the programs of the Symphonic Wind Ensemble. This is the smallest and most select of the University wind ensembles. Its objectives are to perform literature of the highest aesthetic value with emphasis on major original works for band and to attain perfection in balanced performance through rigid requirements for individual musicianship and advanced playing technique.

Symphonic Band
Made up of 85 outstanding wind and percussion performers, the Symphonic Band seeks to perform the finest works available for large band or wind orchestra at the highest possible level.

Concert Band
The 90-member Concert Band provides an excellent performing experience for interested and qualified students from any school in the University. The Concert Band performs fine literature, including both original and transcribed works.
Wildcat Marching Band
The Wildcat Marching Band is a 150-piece all-
University organization that combines marching
precision and exceptional playing ability in a finely
polished and spirited unit. The band performs for all
football games at home and one or more out-of-town
games each season.

University Chorus
The University Chorus is made up of singers from
the School of Music, other qualified students, Univer-
sity faculty and staff, and interested residents of the
community. It is organized for the purpose of per-
forming large-scale choral works.

Vocal Jazz Ensemble
The Vocal Jazz Ensemble is a select 12- to 16-
voice ensemble that provides an excellent opportunity for
singers to perform jazz and commercial music. Spe-
cial emphasis is placed on sound-reinforcement tech-
niques, scat singing, improvisation, and the creation
of new works.

Jazz Groups
The Jazz Ensemble, Jazz Band, Jazz Lab, and a vari-
ety of small combo groups enable students to gain
experience in the jazz idiom and to improve improvi-
sation skills. They also offer student composers and
arrangers the chance to write for various jazz instru-
mental combinations.

Chapel Choir
School of Music students participate in the Chapel
Choir at the weekly worship services held in the
Alice Millar Chapel. This choir also presents at least
three evening concerts during the year.

Early Music Ensemble
The Early Music Ensemble provides study and per-
formance of music written before 1800. Workshops
are conducted in early instruments, including record-
ers, crumhorns, sackbuts, viols, and continuo, and in
vocal genres. Any student may request an interview/audition for this ensemble. At least one performance
is given each quarter.

Chamber Music Ensembles
Chamber ensembles include piano trio; string trio,
quartet, quintet, sextet, and octet; harp ensemble;
brass quintet, choir, and band; woodwind quintet;
trombone quartet and ensemble; and tuba, saxo-
phone, mixed winds, trumpet, horn, and flute
ensembles.

University Chorale
The University Chorale is a 40-voice ensemble that is
the most select of the University choruses. Its person-
nel are chosen on the basis of their musicianship and
their interest in the performance of both a cappella
and accompanied literature.

University Singers
The University Singers is a larger choral ensemble of
60 to 80 singers with high performance standards.
This ensemble frequently combines with other choral
organizations in the performance of important
choral-orchestral works.
and studios for faculty of the Conducting and Ensembles, String Instruments, and Wind and Percussion Instruments Programs also are located in Regenstein Hall. Practice Hall contains 35 practice rooms. Lutkin Hall, seating 400, is used for student and faculty recitals and lecture classes. Pick-Staiger Concert Hall provides a 1,000-seat concert hall, rehearsal facilities, and offices and library for the University Symphony Orchestra. The School of Music maintains two computer labs and an electronic music studio.

Music Library
The Music Library, internationally recognized for its collection of contemporary music, is one of the country's finest academic music libraries. It has spacious, aesthetically pleasing facilities, including a multidimensional listening center. Holdings include 149,000 books, music, journals, and microforms and the Recorded Sound Collection, consisting of 56,000 disks and tapes. The library's special collections include a manuscript collection documenting contemporary notation compiled by John Cage for use in his book, *Notations*; additional holograph scores, sketches, and letters of musicians; the Fritz Reiner Library; rare printed resources; and a portion of the Moldenhauer Archive. The Music Library is also a leader in library automation.

Eckstein Bequest
The School of Music is the beneficiary of an endowment from the estate of Mrs. Louis Eckstein, the Chicago arts patron whose husband founded the Ravinia Music Festival. The Eckstein bequest is used to support all facets of the School of Music, particularly its financial aid and scholarship programs. The Eckstein Endowment has provided the financial resources to support the school's pursuit of excellence.

In recognition of the Eckstein bequest, the school has established the Eckstein Scholars Program for outstanding entering freshmen.

Collection of Artist Instruments
The Northwestern University special collection of string instruments provides an exposure to a concept of sound available only through instruments with special resources of beauty and sonority. It has been formed over a period of years through the generosity of many friends. Seniors and graduate students may use these instruments when they appear as recitalists or soloists with University orchestras.

Pi Kappa Lambda
Pi Kappa Lambda, national music honor society, was founded at Northwestern University in 1918 for the recognition and encouragement of the highest level of musical achievement and academic scholarship among music majors not eligible for Phi Beta Kappa. Alpha chapter elected as its first member Peter Christian Lutkin, the first dean of the School of Music, and his initials in their Greek equivalents were adopted for the name of the society. The national office has been housed in the Northwestern University School of Music since 1984. Two deans and one faculty member from Northwestern have served as national president, and the society has grown to 176 chapters in colleges, conservatories, and university schools of music.

Music Studies for Nonmajors
Students registered in other schools of the University are encouraged to continue their development as instrumentalists or vocalists through ensemble participation, class instruction, or private study. Ensembles and music performance instruction require an audition. Information about auditions is available in the Class Schedule and in the School of Music office of undergraduate music studies. For additional information about instruction, inquire in person at the office of undergraduate music studies.

University Ensembles
Students from all schools of the University are encouraged to audition for the following ensembles: Philharmonia, Concert Band, Wildcat Marching Band, University Chorus, and Early Music Ensemble. Nonmusic majors may occasionally be placed in other ensembles based on their audition.

Class Instruction
Any Northwestern student may take 570-A02 Beginning Voice (class instruction in voice) for course credit. A limited number of students in any Northwestern school may take class instruction in beginning piano without credit.

Private Lessons for Credit
Nonmusic majors may take half-hour private music lessons once a week for .5 course credit in P01-0. Students are accepted for private lessons based on an audition and the availability of an instructor; a $100 registration fee is billed to the student's tuition and fees account.
Courses Open to Undergraduates

The following courses were designed to meet the needs of any students interested in studying music. Students with a basic music foundation are encouraged to register for Harmony, followed by Form and Analysis and/or Composition. The music literature sequence is designed to permit students with limited background to start with A70. Students may then enroll in certain C-level musicology and music theory courses when space is available.

501-A70-0 Introduction to Music Principles of musical organization through the conceptual understanding of the elements of music. Score study and recognition of what is heard in all music, including classic, jazz, rock, and popular. (VI. Literature and fine arts)

501-A75-0 Selected Topics Topics vary; announced before registration. May be repeated.

482-A90-0 Art Process See Integrated Arts Program in Other Undergraduate Programs. (VI. Literature and fine arts)

501-B20-0 History of the Symphony History of music written for the symphony orchestra from the 17th century to the modern period. Instrumentation, development of the orchestra as an institution, court and public ensembles, associated musical forms. Focus on representative works from the standard repertoire by composers such as Mozart, Beethoven, Brahms, Strauss, Mahler, and Shostakovich. (VI. Literature and fine arts)

501-B30-0 Masterpieces of Opera History of opera from its origins in Italy at the end of the 16th century to the modern period. Focus on representative works by composers such as Monteverdi, Handel, Mozart, Rossini, Wagner, Verdi, and Strauss. Dramatic and musical elements common to the genre. (VI. Literature and fine arts)

501-B41-0 Beginning Guitar Group lessons in guitar techniques for beginners.

501-B52-0 Harmony Harmonic materials and tonal structures. Analysis of harmonic structures; harmonization of melodies. Musical materials from pieces employing tertian harmonies. Prerequisite: A70 or consent of instructor. (II. Formal studies)

501-B53-0 Form and Analysis Nature of musical form; typical forms found in musical literature from the Renaissance to the present; analysis of aural examples and musical scores. Prerequisite: B52 or music-reading skills and some understanding of harmony.

501-B70-1 The Western Musical Tradition Baroque, classic, and early romantic periods; major genres and composers from 1600 to 1825. Brief background of 17th-century music by composers such as Monteverdi, Schütz, Lully, and Purcell. Primary emphasis on composers of the generations of Bach and Handel, Haydn and Mozart, Beethoven and Schubert. Prerequisite: A70 or equivalent. (VI. Literature and fine arts)

501-B70-2 The Western Musical Tradition Romantic and modern periods; major genres and composers from 1825 to the present. Figures such as Schumann, Chopin, Liszt, Wagner, Brahms, Verdi, Mahler, Bruckner, Strauss, Wolf, Stravinsky, Schoenberg, Berg, Webern, Debussy, Ravel. Prerequisite: A70 or equivalent. (VI. Literature and fine arts)

482-B91-3 Modes of Music See Integrated Arts Program in Other Undergraduate Programs. This course will not satisfy the distribution requirement for music majors. (VI. Literature and fine arts)

482-C90-1 Performance Seminar See Integrated Arts Program in Other Undergraduate Programs. (VI. Literature and fine arts)

482-C90-2 Toward a Theory of the Arts See Integrated Arts Program in Other Undergraduate Programs. (VI. Literature and fine arts)

Interdepartmental Courses for Majors

The music theory, musicology, aural skills, keyboard skills, and ensembles sequences are required for all undergraduates in the School of Music. Ensembles listed in 540 are available by audition to all students in the University.

Courses Open to Undergraduates

510-A10-0 Introduction to Theory (.5)

510-A11-1,2,3 Music Theory I (.5) Music as sound in time. Analytical studies in forms, media, textures, and harmonic and melodic materials. Prerequisite: preceding quarters of A11.

510-A26-1,2,3 Aural Skills I,II,III (.33) Sight-singing and ear-training; drill in recognition of melodic, rhythmic, and harmonic patterns and aural analysis through listening and dictation. Progresses through six levels of proficiency.

510-A27-0 Keyboard Skills (.33) Class instruction, in electronic piano classroom; six levels of proficiency. Separate sections for pianists and nonpianists.

510-B11-1,2,3 Music Theory II (.5) Continuation of A11. Prerequisite: A11-1,2,3 or consent of instructor.

510-B15-1,2,3 Music History Principles, materials, and concepts of the historical study of Western art traditions. Continuation of A26.

510-B26-1,2,3 Aural Skills IV,V,VI (.33) Continuation of A26.

510-B27-0 Keyboard Skills (.33) Continuation of A27.

510-C15-0 Ethnomusicology (.5) Methods and principles of ethnomusicology and study of popular music. Prerequisite: B15-1,2,3.

510-C26-0 Advanced Aural Skills (.5) Advanced literature-based aural skills using materials from Western art music of all style periods, world music, and popular musics. Error detection, rhythmic skills, aural analysis of harmony and form, refinement of other listening skills.
Music Composition Program

Composers students pursue a course of study that develops analytical and creative skills and enjoy many opportunities to hear their works performed. Students have access to the electronic and computer music studios, which provide the latest technology for experimentation and experience with 20th-century compositional materials. Students intending to major in composition may substitute composition for applied studies during their freshman and sophomore years.

Major Studies Requirement

For a major in composition, 19.5 course units are required:

- A12, B12 Composition (6 units) (some credit may be given for applied instrument or voice lessons)
- C12 Composition (6 units)
- C14-1 Instrumentation (1 unit)
- C14-2 Orchestration (1 unit)
- C16 Baroque Counterpoint (1 unit)
- C17 Renaissance Counterpoint (1 unit)
- C22-1,2,3 Materials of Modern Music (1 unit)
- Music theory courses in analysis (2 units) (1 unit must be in 20th-century analysis)
- Keyboard skills (5 unit)
- C90 Composition Colloquium (0 units)

Courses Open to Undergraduates

537-A12-0, B12-0, C12-0 Composition Original composition; individual instruction.
537-B78-0 Contemporary Music Ensemble Performance of contemporary works: avant-garde music, new notation systems, electronic music.
537-C11-1,2,3 Class Composition Class instruction in techniques of composition. Open to nonmusic majors. 1. Writing for solo instruments. 2. Writing for two to four instruments. 3. Writing for instruments and/or voices. Prerequisite: preceding quarters of C11 or consent of instructor.
537-C14-1 Instrumentation Instruments of the orchestra; scoring techniques; analysis of instrumental combinations. Prerequisite: 510-B11-3 or consent of instructor.
537-C14-2 Orchestration Stylistic scoring projects; analysis of orchestral and chamber scores. Prerequisite: C14-1 or consent of instructor.
537-C14-3 Advanced Orchestration Contemporary scoring techniques; creative projects; analysis of orchestral and chamber scores. Prerequisite: C14-2, graduate standing, or consent of instructor.
537-C16-0 Baroque Counterpoint Baroque dance suite, chorale prelude, invention, fugue, chiefly involving the music of J. S. Bach. Melodic, harmonic, structural characteristics; contrapuntal techniques.
537-C17-0 Renaissance Counterpoint Contrapuntal textures from two to four voices. Cadence and form, melodic line and motive, rhythm, simple and complex imitation, and treatment of dissonance in the sacred music of Lassus, Josquin, and Palestrina.
537-C22-1,2,3 Materials of Modern Music Writing projects; analysis of scores. 1. Pre-1950 20th-century stylistic techniques. 2. Post-1950 20th-century stylistic techniques. 3. Performers and composers. Contemporary materials; original writing projects; in-class performances of original work. Prerequisite: preceding quarters of C22 or consent of instructor.
537-C35-0 Selected Topics in Music Composition Topics vary; announced before registration. May be repeated for credit.
537-C40-0 Composing with Computers Development of techniques for composing with computers through hands-on experience and analysis. New technologies for real-time interactive music and nonreal-time synthesis. Computer music repertoire. Prerequisite: entry-level course or equivalent experience.

537-C41-0 Advanced Computer Composition Advanced instruction in the use of computers to create musical compositions. Composition projects of several studies and at least one larger composition. Prerequisite: C38.

537-C90-0 Composition Colloquium (0) Discussion of contemporary compositional techniques.

537-C99-0 Independent Study (.5–1)

Music Education Program

Graduates with a major in music education meet all requirements for teacher certification in the state of Illinois as well as most other states. Students take the core program required of all music students, a structured sequence of courses in general education, a basic set of courses in music education, and special courses in the chosen music education specialization. The combination results in a program that prepares professionals with a broad understanding of music and education as well as the skills to be effective music teachers.

Students in the undergraduate music education program must take all the core studies in music and music education, general education, and electives. They must also choose one of the three specialization tracks: instrumental, choral, or general.

Core Studies in Music Education (22–28 units)
- Private lessons (6–9 units)
- Additional keyboard skills (as needed by track) (0–3 units)
- Additional large ensemble (eight quarters) (4 units)
- B58 Problems in the Philosophy of Education: Aesthetic Education
- B60 The Music Teacher as Communicator
- B79 Clinical Experience (2 units)
- 533-C35 Selected Topics in Music Technology: Physics of Sound
- 540-C26 Conducting and Score Reading
- C68 Teaching Composition in the Schools
- C69 Research and Evaluation in Music
- C80–87 Student Teaching (3 units)

Instrumental Track (8 units)
- B30 Flute Class (.5 unit)
- B33 Clarinet Class (.5 unit)
- B34 Woodwinds Class (.5 unit)
- B35 Trumpet Class (.5 unit)
- B36 Brass Class (.5 unit)
- B37 Violin Class (.5 unit)
- B38 Strings Class (.5 unit)
- B39 Percussion Class (.5 unit)
- 540-C40-1 Advanced Conducting
- C33 Teaching High School Nonperformance Courses
- C64 Teaching Instrumental Music I
- C65 Teaching Instrumental Music II

Choral Track (5.5 units)
- B32 Voice Class (.5 unit)
- 540-C40-2 Advanced Conducting
- C33 Teaching High School Nonperformance Courses
- C62 Teaching General Music II
- C66 Teaching Choral Music I
- C67 Teaching Choral Music II

General Track (5 units)
- B31-1,2 Guitar Class I, II
- B32 Voice Class (.5 unit)
- B40 Recorder Class (.5 unit)
- C61 Teaching General Music I
- C62 Teaching General Music II
- C66 Teaching Choral Music I

General Education (7 units)
- English A05 Expository Writing or B05 Intermediate Composition
- History B10 History of the United States (may not be taken P/N)
- Political Science B20 American Government and Politics (may not be taken P/N)
- Psychology A10 Introduction to Psychology
- Counseling Psychology C90 Health and Physical Development
- Human Development and Social Policy C01 Human Development: Childhood and Adolescence
- Teacher Education C27 Educating Exceptional Children or Speech and Language Pathology C36 The Field of Special Education

General Electives (4 units)
- Biological sciences
- Additional science
- Additional social science
- English literature

Courses Open to Undergraduates

525-B30-0 Flute Class (.5)
525-B31-1,2 Guitar Class I, II (.5)
525-B32-0 Voice Class (.5)
525-B33-0 Clarinet Class (.5)
525-B34-0 Woodwinds Class (.5)
Performance characteristics and pedagogical strategies most strongly associated with teaching flute, saxophone, oboe, and bassoon to beginning and intermediate instrumentalists. Prerequisite: B33.

525-B35-0 Trumpet Class (.5)
525-B36-0 Brass Class (.5)
Performance characteristics and pedagogical strategies most strongly associated with
teaching horn, trombone, euphonium, and tuba to beginning and intermediate instrumentalists. Prerequisite: B35.

525-B37-0 Violin Class (.5)
525-B38-0 Strings Class (.5) Performance characteristics and pedagogical strategies most strongly associated with teaching viola, cello, and string bass to beginning and intermediate instrumentalists. Prerequisite: B37.

525-B39-0 Percussion Class (.5)
525-B40-0 Recorder Class (.5)
525-B41-0 Guitar Techniques (.5)

525-C68-0 Teaching Composition in the Schools Practical and research literature in teaching composition in the classroom. Design of curricular materials for teaching sequences with composition. Hardware and software in school settings.

525-C69-0 Research and Evaluation in Music Education Various procedures and issues associated with excellence in research and evaluation in music teaching. Practical application of research findings to decision making in music teaching and learning.

525-C99-0 Independent Study (.5–1)

Student Teaching Courses
Students are assigned to specific classes in cooperating schools under joint University/school supervision.

525-C80-0 Student Teaching in the Elementary School: General Music (1–4 units)
525-C81-0 Student Teaching in the Middle School/ Junior High School: General Music, Choral (1–4 units)
525-C83-0 Student Teaching in the Senior High School: Choral and Nonperformance Courses (1–4 units)
525-C85-0 Student Teaching in the Elementary School: Instrumental (1–4 units)
525-C86-0 Student Teaching in the Middle School/ Junior High School: Instrumental (1–4 units)
525-C87-0 Student Teaching in the Senior High School: Instrumental and Nonperformance Courses (1–4 units)

Musicology Program
An undergraduate major in musicology is available within the bachelor of music degree or as a concentration within the bachelor of arts. The 12 courses required for this specialization are selected from musicology, analysis, and the departmental core. As some of the courses are offered on a two-year alternating schedule, certain courses may not be available during a given academic year.

Major Studies Requirement
For a major in musicology, 19.5 course units are required:
• Musicology (6 units) selected from C50–C55
• Music theory (3 units) selected from 535-C21, C31, C52
• Keyboard skills (3 units)
• S10-C26 Advanced Aural Skills (.5 unit)
• German (3 units)
• Instrumental or vocal applied lessons (3 units)
• Senior project or thesis (1 unit) by fall quarter of senior year
Courses Open to Undergraduates
530-B99-0 Early Music Ensemble Performance of choral, solo, and instrumental music of the Middle Ages through the early baroque.

530-C23-0 Proseminar in Ethnomusicology Ethnomusicology; its history, bibliographical resources, methods, and theories.

530-C24-0 History and Practice of Criticism Concepts and practice of present-day critical and descriptive writing about music; aesthetics and technique. Open to nonmusic students with consent of instructor.

530-C34-0 Jazz: Its Roots and Elements The basic elements of jazz from its roots in African and early African American music to the present. Emphasis on the music’s social and historical aspects as well as stylistic analysis. Prerequisite: consent of instructor.

530-C35-0 Selected Topics in Musicology Topics vary; announced before registration. May be repeated. 530-C36-0 Learning and Creativity among Improviser/Composer Interdisciplinary and cross-cultural perspective of the American jazz community. Analysis of improvisation as a compositional process. Prerequisites: Integrated Arts A90 and B91-3 or consent of instructor.

530-C37-0 Improvisation and World Musicianship Improvisation in music systems such as Western art music, jazz, Indian, and African music; performance workshops in African drumming, Indian solfeggio, and rhythmic mnemonics.

530-C38-0 African Mbira Music The mbira, one of the most popular and ancient melodic instruments in black Africa. Construction; development of basic playing skills. Prerequisite: consent of instructor.

530-C50-0 History of Music—Middle Ages Gregorian and medieval chant, secular monophony, and the development of polyphony from the earliest records through the music of Ockeghem and Busnois.

530-C51-0 History of Music—Renaissance Middle and late Renaissance and early manifestations of the baroque, from Josquin through the Gabriels.

530-C52-0 History of Music—Baroque The baroque from Monteverdi through Bach and Handel.

530-C53-0 History of Music—Classic Classic period from the early Italian symphonists through Beethoven.

530-C54-0 History of Music—Romantic Romantic period from Schubert through Wolf and other late romantics.

530-C55-0 History of Music—20th Century The 20th century from its roots in late romanticism to the present.

530-C99-0 Independent Study (.5–1)

Music Technology Program
The major in music technology offers a unique professional preparation for a career combining music and technology. Students engage in creating and using technology for artistic purposes. They develop skills in applying technology to musical tasks and acquire knowledge of the technical and musical foundations of the field.

Major Studies Requirement
For a major in music technology, 19.5 course units are required:
• 525-B59 Introduction to Music Technology (1 unit)
• C25 Introduction to MIDI Music Systems (1 unit)
• C38 Programming I (1 unit)
• C40 Composing with Computers (1 unit)
• C-level courses in music technology (4 units)
• C75 Terminal Project (1 unit)
• Courses related to terminal project (3 units)
• Departmental distribution (3 units)

One C-level course from three of the following programs: 525, 530, 535, 537
• Instrumental, vocal, and/or composition lessons and/or additional ensemble (4.5 units)

Courses Open to Undergraduates
533-B59-0 Introduction to Music Technology Computers and the music experience. Computer-aided instruction; music printing; MIDI sequencing; software development; word processing and other nonmusic topics.

533-C25-0 Introduction to MIDI Music Systems Theory and practical application of MIDI synthesizer and recording systems. Creative use of MIDI music systems. Prerequisite: consent of instructor.

533-C26-0 Advanced MIDI Systems and Composition Theory and practical application of advanced MIDI systems, including various synthesizers/samplers, computers, and MIDI programs. Composition, analysis, and creative use of the equipment. Prerequisite: entry-level course or equivalent experience.

533-C27-0 Advanced MIDI Systems and Composition II Theory and practical application of advanced MIDI equipment used to control analog and digital devices. Individual composition instruction. Prerequisite: C26.

533-C35-0 Selected Topics in Music Technology Topics vary; announced before registration. May be repeated with change of topic.
533-C37-0 Multimedia Software Development
Software design in scripting languages such as HyperCard and other multimedia support systems. Extensive integration of CD-ROM, MIDI, music printing, digitized video and sound. Prerequisite: entry-level courses or equivalent experience.

533-C38-0 Programming I
Programming of musical applications. Syntax of programming language, program development, user interfaces, and music-specific algorithms. May be repeated when programming language changes. Prerequisite: entry-level course or equivalent experience.

533-C39-0 Programming II
Music programming techniques for creating musical applications; music-specific algorithms and programming techniques, music and sound representation. May be repeated when programming language changes. Prerequisite: C38.

537-C40-0 Composing with Computers
See Music Composition Program.

537-C41-0 Advanced Computer Composition
See Music Composition Program.

533-C42-0 Computer Sound Processing
Techniques of computer sound synthesis: simulation of musical instruments, the voice, room acoustics, digital filtering, effects processing; digital recording, mixing, editing. Prerequisite: entry-level course or equivalent experience.

533-C44-0 Advanced Projects in Music Technology
Individual instruction in projects related to music technology. Prerequisite: consent of instructor.

533-C75-0 Terminal Project
Independent project in music technology. Prerequisite: consent of program director.

533-C99-0 Independent Study (.5–1)

Music Theory Program
Undergraduates majoring in theory receive training in a variety of advanced analytical methods, including rhythmic analysis, tonal and atonal analysis, and Schenkerian analysis. Courses in perception and music technology are encouraged.

Major Studies Requirement
For a major in music theory, 19.5 course units are required:
- 537-C16 Baroque Counterpoint (1 unit)
- 537-C17 Renaissance Counterpoint (1 unit)
- C53 Schenkerian Analysis (1 unit)
- C56 Atonal Analysis (1 unit)
- D32 Rhythmic Analysis (1 unit)
- S10-C27-1,2,3 Advanced Keyboard Skills (1 unit)
- Instrumental, vocal, and/or composition lessons (6 units)
- Music technology (1 unit)
- Senior document (1.5 units)
- Departmental distribution (2 units)
One C-level course from two of the following programs:
- 525, 530, 533, 537
- Cognate areas (3 units)
- C90 Theory Colloquium (0 units)

Courses Open to Undergraduates

535-C21-1,2 Analytical Techniques
Detailed analysis of all parameters of selected musical examples; compositional procedures as a means of developing an intelligent rationale for interpretation. Prerequisite: 510-B15 or consent of instructor.

535-C31-0 Analytical Studies
Extension and refinement of concepts and techniques acquired in 510-A15, B15.

535-C35-0 Selected Topics in Music Theory
Topics vary; announced before registration. May be repeated.

535-C51-0 Music Cognition
Survey of issues and research methods in music cognition. M usic listening, memory for music, development of skills.

535-C52-0 Score Analysis Skills
Development of facility for recognizing quickly the character and succession of tonalities in compositions for a variety of media. Exploration of the expressive potentials residing in the conventional tonal system.

535-C53-1,2 Schenkerian Analysis
Heinrich Schenker’s theories of musical structure and analysis of musical works. 1. Techniques of Schenkerian analysis applied to compositions by Bach, Beethoven, Chopin, Mozart, Schubert, and others. Prerequisite: 510-B11 or equivalent.
2. Advanced study in Schenkerian analysis focusing both on techniques of graphic analysis and on large-scale compositions. Extensions of Schenker’s theories by post-Schenkerian theorists. Prerequisite: C53-1 or equivalent.

535-C54-0 Music Perception
Literature and methods of research in the perception of musical sound. Fundamentals of acoustics and psychoacoustics, timbre of musical instruments, singing voice, spatial hearing and room acoustics, organization of hearing systems, formation of auditory images, musical pitch, consonance and dissonance, scales, tuning.

535-C56-1,2 Atonal Analysis
Techniques for analysis of atonal and nonfunctional tonal music, including set-theoretic, serial, and parametric approaches. 1. Emphasis on music of Schoenberg, Webern, Berg, Stravinsky, and Debussy. Selected readings in analytic literature. Prerequisite: 510-B11 or equivalent. 2. Advanced atonal analysis. Analysis of coherent posttonal repertoire; readings in analytic literature. Prerequisite: C56-1 or equivalent.

535-C85-0 Senior Project (1)

535-C90-0 Theory Colloquium (0)
Discussion of current research in music theory.

535-C99-0 Independent Study (.5–1)
535-D32-0 Rhythmic Analysis

Designed for theory or composition majors. Recent theoretical work on rhythm; analytical methodologies dealing with music primarily as a temporal process. Prerequisite: consent of instructor.

Music Performance Studies

This department consists of the Conducting and Ensembles; Piano, Organ, and Church Music; String Instruments; Voice and Opera; and Wind and Percussion Instruments Programs.

Conducting and Ensembles Program

Courses in the Conducting and Ensembles Program are available to all majors. While an ad hoc major in conducting is available to undergraduates, students are urged to consider majoring in conducting at the graduate level. Courses for the ad hoc major are selected in consultation with the department chair.

Courses Open to Undergraduates

540-C20-0 Band Arranging

Transcriptions, arrangements, and composition for concert and symphonic bands. Editing, rescoring, and arranging for performance, at various levels and from both keyboard and instrumental resources.

540-C21-0 Writing for Choral Ensembles

Composing and arranging for choral ensembles; selected choral repertoire; techniques and resources.

540-C23-0 Marching Band Techniques

Writing for marching and pep bands; rehearsing for the marching band.

540-C26-0 Conducting and Score Reading

Team-taught minisubjects in conducting; fundamentals in both instrumental and choral conducting; transpositions, ranges, and podium technique. Extensive laboratory experience with videotaped evaluation.

540-C30-0 Writing for Jazz Ensembles

Composing and arranging for jazz ensemble. Score study and rehearsal techniques with jazz groups and stage bands.

540-C31-0 Advanced Jazz Writing

Continuation of C30. Emphasis on creative scoring, composition, and commercial writing.

540-C35-0 Selected Topics in Conducting

Topics relevant to the professional needs of conducting majors.

540-C36-0 Jazz Improvisation

Basic elements of jazz improvisation, including harmony, modes, and basic progressions.

540-C37-0 Advanced Jazz Improvisation

Continuation of development of jazz improvisation skills. Prerequisite: C36 or consent of instructor.

540-C40-1,2,3 Advanced Conducting

Separate quarters of band, orchestral, and choral conducting that emphasize the techniques of score preparation and analysis, repertoire, and rehearsal methods. Prerequisite: C26 or equivalent. May be repeated.

540-C41-0 Advanced Choral Literature I

A comprehensive knowledge of choral music literature from the Renaissance, baroque, and classical periods.

540-C42-0 Advanced Choral Literature II

A comprehensive knowledge of choral music literature from the 19th and 20th centuries.

540-C64-0 Choral Organizations

University Chorale, University Singers, University Chorus, Vocal Jazz Ensemble, and Women’s Chorus. Open to all qualified students.

540-C68-0 Chapel Choir

Open to all qualified students.

540-C74-0 Band Organizations

Marching Band, Concert Band, Symphonic Band, Symphonic Wind Ensemble. Open to all qualified students.

540-C77-0 Jazz Ensembles

Membership by audition in jazz ensembles.

540-C80-0 Senior Recital (0)

540-C93-0 Orchestral Organizations

Membership by audition in Symphony Orchestra, Chamber Orchestra, or Philharmonia.

540-C99-0 Independent Study (.5–1)

Piano, Organ, and Church Music Program

A major in piano performance combines a strong musical basis for a professional career with the broad humanistic interests embodied in a liberal arts education. The course of instruction focuses on the studio and includes private lessons, studio classes, a thorough course in piano repertoire, piano pedagogy, and accompanying classes. Electives are available in chamber music and other areas, allowing students to tailor a program to their individual needs. Frequent performances as a soloist and as an assisting musician develop skills in public presentation. Solo recitals, required in both the junior and senior years, are considered an integral part of the programs.

For a major in organ performance or a concentration in church music, consult the department cochair.

Major Studies Requirement

For a major in piano performance, 20 course units are required:

- 555-A61 Piano Performance (3 units)
- 555-B61 Piano Performance (3 units)
- 555-C61 Piano Performance (6 units)
- 555-C13 Piano Repertoire (3 units)
- 555-C15 Piano Pedagogy (3 units)
- 555-C91 or C92 Chamber Music (.5 unit)
- 510-C89 Convocation (4 quarters) (0 units)
- 555-C28 Accompanying/Recital Preparation (1.5 units)
- Junior Recital (0 units)
- 555-C80 Senior Recital (0 units)

Students enrolled in a five-year double-degree program may substitute three C-level musicology or theory electives for the pedagogy requirement.
For a major in organ performance or a concentration in church music, consult the department cochair.

Courses Open to Undergraduates
555-A61-0,B61-0,C61-0 Piano Performance
539-A63-0,B63-0,C63-0,D63-0 Organ Performance
555-B30-0 Class Organ (0) Primarily for sophomore pianists.
539-C10-0 Keyboard Harmony/Improvisation I,II,III
539-C11-0 Professional Concerns (.5)
539-C12-0 Voice
539-C13-0 Harpsichord
555-C13-1,2,3 Piano Repertoire Analytical and historical study of piano solo and concerto repertoire from early keyboard literature to the present.
539-C15-0 Organ Maintenance
555-C15-1,2,3 Piano Pedagogy Lecture/demonstration/laboratory course in piano teaching at all levels. Principles and techniques of group and individual instruction; survey of teaching materials. Seniors and graduate students.
539-C16-0 Organ Pedagogy (.5) Comparative methods, practice techniques; repertoire for various levels.
555-C28-0 Accompanying/Recital Preparation (.5) Piano students work with a singer and instrumentalist in the preparation and performance of mainstream recital repertoire.
539-C35-0 Selected Topics in Organ and Church Music Topics vary; announced before registration. May be repeated.
555-C35-0 Selected Topics in Piano Topics vary; announced before registration. May be repeated.
539-C71-0 German Organ Literature The German organ school pre-J. S. Bach to present.
539-C72-0 French Organ Literature The French organ school from 1600 to present.
539-C80-0 Senior Recital (0) For organists.
539-C80-0 Senior Recital (0) For pianists.
555-C91-0 Chamber Music (.5) For juniors and seniors.
555-C92-0 Chamber Music: Trios
555-C99-0 Independent Study (.5-1)

String Instruments Program
Majors in string instruments prepare for professional performance and teaching as well as for advanced study. The curriculum is built around individual performance study and ensemble participation, including chamber music and orchestra, with orchestral studies and string pedagogy available to qualified juniors and seniors. A junior recital and a senior recital are required. Students in this program may major in violin, viola, cello, string bass, harp, or classical guitar.

Major Studies Requirement
For a major in string performance, 19.5 to 21 course units are required:

Violin, viola, cello, string bass performance
- A-level performance study (3 units)
- B-level performance study (3 units)
- C-level performance study (6 units)
- C91 Chamber Music (1.5 units)
- C19-1,2,3 Orchestral Studies (1.5 units)
- C-level string pedagogy (1.5 units)
- C80 Senior Recital (0 units)
- 540-C93 Orchestral Organizations (nine quarters) (4.5 units)
- 510-C89 Convocation (4 quarters) (0 units)

Harp Performance
- A-level performance study (3 units)
- B-level performance study (3 units)
- C-level performance study (6 units)
- Additional large ensemble (nine quarters) (4.5 units)
- C18-1,2,3 Harp Pedagogy and Maintenance (1.5 units)
- C19-1,2,3 Orchestral Studies (1.5 units)
- C80 Senior Recital (0 units)
- 510-C89 Convocation (4 quarters) (0 units)

Guitar Performance
- A-level performance study (3 units)
- B-level performance study (3 units)
- C-level performance study (6 units)
- C74 Guitar Ensemble (nine quarters) (4.5 units)
- C75-1,2,3 Lute and Guitar Literature (1.5 units)
- C76-1,2,3 Guitar Pedagogy (1.5 units)
- C80 Senior Recital (0 units)
- 510-C89 Convocation (4 quarters) (0 units)

Courses Open to Undergraduates
560-A41-0,B41-0,C41-0 Violin Performance
560-A42-0,B42-0,C42-0 Viola Performance
560-A43-0,B43-0,C43-0 Cello Performance
560-A44-0,B44-0,C44-0 String Bass Performance
560-A51-0,B51-0,C51-0 Harp Performance
560-A71-0,B71-0,C71-0 Classical Guitar Performance
560-C11-0 Suzuki Pedagogy Introduction and detailed study of fundamental principles of Suzuki philosophy and materials. Available to violin, viola, cello, and double bass players with emphasis on application to violin and cello.
560-C12-0 String Class Pedagogy Teaching strings in heterogeneous groups. Group teaching strategies, program administration, materials and techniques, and pedagogy for violin, viola, cello, and double bass. Offered for performance and pedagogy majors to learn about secondary instruments and pedagogical applications to school settings and/or college-level techniques classes.
560-C13-0 History of String Pedagogy Historical survey of the major violin, viola, cello, and double bass
pedagogues from the early baroque through the 20th century; study of publications and contributions of contemporary schools. Lecture and seminar format.

**560-C14-0 Comprehensive String Pedagogy** Comparative study and application of the principles of successful string teaching. Communication skills, observations, comparison of contemporary approaches of Suzuki, Rolland, Havas, et al. Lecture, discussion, and demonstration format. Open to violin, viola, cello, and double bass players.

**560-C15-1,2,3 Beginning Violin and Viola Pedagogy** Developmental approach to individual and group teaching of elementary-level violin and viola students. Includes Rolland and Suzuki approaches, apprenticeship teaching, and observations. Open to all string players.

**560-C16-1,2,3 Beginning Cello and Double Bass Pedagogy** Developmental approach to individual and group teaching of elementary-level cello and double bass students. Open to all string players.

**560-C17-0 Principles of Studio and Master Class Teaching** Principles of advanced and college-level studio teaching. Observation and interview format individually scheduled with artist faculty. Preparation of a journal and annotated bibliography of recommended technical, etude, and performance repertoires for the major instrument.

**560-C18-1,2,3 Harp Pedagogy and Maintenance** 1. Guests and master classes related to playing and teaching. 2. Instrument maintenance and repair clinic with hands-on experience in routine maintenance and common repairs. 3. Pedagogical instruction and demonstration of teaching techniques for all levels and ages.

**560-C19-1,2,3 Orchestral Studies (Violin, Viola, Cello, String Bass, Harp)**

**555-C35-0 Selected Topics in Strings** Topics vary; announced before registration. May be repeated.

**560-C72-0 Guitar Literature and Ensemble** Concurrent registration in C74 and C75-1,2,3 required for three consecutive quarters. Alternates yearly with C73.

**560-C73-0 Guitar Pedagogy and Ensemble** Concurrent registration in C74 and C76-1,2,3 required for three consecutive quarters. Alternates yearly with C72.

**560-C74-0 Guitar Ensemble** Performance of the chamber literature for guitar: guitar duos, trios, and quartets; flute and guitar; voice and guitar; chamber works with strings; other instrumental combinations.

**560-C75-1,2,3 Lute and Guitar Literature** Analytical and historical survey of the literature for plucked instruments from the 16th through the 20th centuries. The study of tablatures, instrument construction and tuning, performance practice, and style.

**560-C76-1,2,3 Guitar Pedagogy** Principles of individual and group study. Survey of development of right- and left-hand technique from 16th-century lute and vihuela tutors through modern classical guitar methods. Interaction between musical texture and technical innovations; influence of fingering on stylistic inflection and ornamentation.

**560-C80-0 Senior Recital (0)**

**560-C91-0 Chamber Music** Performance of string quartet literature with the addition of some works for piano and strings. For freshmen and sophomores.

**560-C99-0 Independent Study (.5-1)**

### Voice and Opera Program

Students majoring in voice take a concentrated program of courses designed to prepare them for professional performance. In addition to individual instruction, students take courses in musicology, vocal science, conducting, opera workshop, repertoire, and foreign language. A senior recital is required, and students are urged to take advantage of the numerous other performance opportunities offered by the school.

The Northwestern Opera Center is supported by a generous endowment in memory of the famous American soprano Edith Mason Ragland. The internationally acclaimed Edith Mason and William E. Ragland Opra Theater presents scene recitals and full-scale productions.

### Major Studies Requirement

For a major in voice performance, 21 course units are required:

- **A10 Voice Performance** (3 units)
- **B10 Voice Performance** (3 units)
- **C10 Voice Performance** (6 units)
- **M major choral ensemble** (nine quarters) (4.5 units)
- **C23 Study of the Vocal Mechanism** (0.5 unit)
- **S40-C26 Conducting and Score Reading** (1 unit)
- **C51-1,2,3 Acting Techniques for the Singer** (1.5 units)
- **C52-1,2,3 Opera Laboratory** (1.5 units)
- **A11-1,2,3 Phonetics and Diction** (0 units)
- **B11-1,2,3 Introduction to Acting for the Singer** (0 units)
- **N nine quarters of vocal solo class** (0 units)
- **S10-C89 Convocation** (4 quarters) (0 units)
- **C80 Senior Recital** (0 units)

It is recommended that voice performance majors take three units of one foreign language and achieve a level-five competency in Keyboard Skills. See the voice coordinator concerning the honors program in voice performance.

### Courses Open to Undergraduates

**570-A02-0 Beginning Voice** Class instruction for non-music majors. Basic music skills required. Consult self-evaluation questionnaire in Undergraduate Music Office before registration.

**570-A10-0, B10-0, C10-0 Voice Performance** Lessons consist of private and group instruction (studio class), with each student receiving the equivalent of 50 minutes of instruction weekly.
570-A11-1,2,3 Phonetics and Diction (0) Required of freshman and transfer students majoring in voice. Three quarters: Italian, German, French.

570-B02-0 Voice Performance Musical Theatre Private instruction for theater majors seeking a Certificate in Musical Theatre. Prerequisite: admission to the Musical Theatre Program and A02 or equivalent.

570-B11-1,2,3 Introduction to Acting for the Singer (0) 1. Basics of stage movement, relaxation and focusing techniques, creativity and imagination exercises, exercises in physicalizing a character. 2. Backstage production elements, including set, costume, lighting, and sound design; crew requirement. 3. Movement and improvisation. Sophomores only. Must be taken sequentially.

570-C23-0 Study of the Vocal Mechanism Lectures, readings, discussions, and demonstrations of basic vocal physiology, common vocal problems, and use of exercises and songs for vocal improvement. For junior or senior voice students. Prerequisite for other students: consent of instructor.

570-C35-0 Selected Topics in Voice (.5–1) Topics vary; announced before registration. May be repeated.

570-C51-1,2,3 Acting Techniques for the Opera Singer (.5) Advanced techniques for the performance of arias and songs; methods of text and character analysis; audition techniques; study of opera and musical theater repertoire. Juniors only. Must be taken sequentially.

570-C52-1,2,3 Opera Laboratory (.5) Performance and audition techniques of operatic repertoire; character analysis and scene study. Repertoire ranges from baroque opera through contemporary opera and musical theater. Seniors and graduate students only. Prerequisite: C51-1,2,3, or consent of instructor. Must be taken sequentially.

570-C57-0 The German Lied (.5) Study and singing of Schubert and Schumann song cycles and Brahms, Berg, Mahler, Strauss, and Wagner songs. Incorporation of chamber music and study of original poetry.

570-C63-0 Opera Performance Preparation and performance of a major operatic role.

570-C80-0 Senior Recital (0)

570-C99-0 Independent Study (.5–1) Permission of instructor and department required.

Wind and Percussion Instruments Program

Designed to prepare students for professional performance and teaching as well as for advanced study, the major in wind and percussion instruments offers a concentrated curriculum emphasizing performance studies, frequent master classes, required participation in large and small ensembles, and a required senior recital. Students anticipating graduate study in wind or percussion performance are advised to elect additional courses in C-level theory and history.

Major Studies Requirement

For a major in wind and percussion performance, 19.5 course units are required:

- A11–31 Performance study (3 units)
- B11–31 Performance study (3 units)
- C11–31 Performance study (6 units)
- Additional large ensemble (nine quarters) (4.5 units)
- C91 Chamber Music (3 units)
- C80 Senior Recital (0)

Courses Open to Undergraduates

565-A11-0, B11-0, C11-0 Flute Performance
565-A12-0, B12-0, C12-0 Oboe Performance
565-A13-0, B13-0, C13-0 Clarinet Performance
565-A14-0, B14-0, C14-0 Saxophone Performance
565-A15-0, B15-0, C15-0 Bassoon Performance
565-A21-0, B21-0, C21-0 Trumpet Performance
565-A22-0, B22-0, C22-0 French Horn Performance
565-A23-0, B23-0, C23-0 Euphonium Performance
565-A24-0, B24-0, C24-0 Trombone Performance
565-A25-0, B25-0, C25-0 Tuba Performance
565-A31-0, B31-0, C31-0 Percussion Performance
565-C35-0 Selected Topics in Winds and Percussion Topics vary; announced before registration. May be repeated.

565-C36-0 Woodwind Orchestral Repertoire Wind section performance practices and performance techniques in the standard orchestra literature.

565-C37-0 Interpretation of Instrumental Chamber Music Coaching in the preparation and rehearsal of chamber music for strings, winds, keyboard, and voice.

565-C38-0 Brass Orchestral Repertoire Study of brass section performance practice and performance techniques in the 19th- and 20th-century orchestral repertoire. Limited to junior, senior, and graduate students. May be repeated once.

565-C39-0 Performance Practices and Criticism Performance and criticism of woodwind, brass, and percussion repertoire in a master class setting. Team-taught.

565-C42-0 Brass Instrument Repertoire Brass literature and performance practices; solos, pedagogical materials, and chamber music for various levels of performance.

565-C47-0 Percussion Pedagogy and Performance Methods, materials, and writings related to percussion playing and teaching. Prerequisite: C-level standing in percussion performance or consent of instructor.
565-C52-0 Preparing for an Audition
565-C53-0 Introduction to the Harp
565-C54-0 Woodwind Instrument Repair
565-C55-0 Freelance Musician
565-C56-0 Making Musicianship Audible
565-C57-0 Reedmaking for Single Reed Instruments
565-C59-0 Brass Teaching Techniques
565-C61-0 Jazz Piano for the Nonkeyboard Player Jazz voicing, harmonization, analysis, and technique through keyboard instruction. Prerequisite: basic keyboard proficiency, jazz performance and harmonic background.
565-C80-0 Senior Recital (0)
565-C91-0 Chamber Music Percussion and mallet ensembles, brass ensembles, woodwind quintets, saxophone quartets, and clarinet quartets.
565-C99-0 Independent Study (.5-1)
School of Speech

Speech is the primary mode of communication, the principal means by which people exchange ideas and feelings. It is a means of inquiry and reporting. It is a means of persuasion. And it is a means of appreciation, inspiration, and entertainment. Students of speech study the nature of such communication and the conditions, circumstances, and properties affecting it. They may concentrate on speech as a scientific phenomenon, as a fine art, or as a rhetorical art.

Speech is conversation, discussion, debate, and public address. It is the performance of prose, poetry, and dramatic literature. It is theatre—acting, directing, and exploring the many facets of the physical theatre and dramatic production. It is radio, television, and film—the media of mass communication. It is the study of language and the analysis and improvement of speech and hearing disabilities. And it is the preparation of teachers, directors, clinicians, and other professionals in these fields. It is study and research in all these areas.

Founded by Robert Cumnock in 1878, the School of Speech is now the third largest of Northwestern’s six undergraduate divisions. It annually enrolls more than 1,100 undergraduate majors and 300 graduate students.

Originally, the curriculum and its related activities were concerned with public speaking and interpretative reading as performing arts. As the field and the school grew, the faculty added instruction in theatre, speech pathology, audiology, radio, television, film, and other specialties in oral communication. The five departments of instruction indicate the scope of the modern curriculum: performance studies; communication studies; radio/television/film; communication sciences and disorders; and theatre (including dance). In addition to the specialized program presented by each department, the five departments of the School of Speech combine to offer the undergraduate degree program in interdepartmental studies. All departments offer graduate courses. The School of Speech sponsors six divisions of Northwestern’s National High School Institute: creative media writing, dance, debate, Lincoln-Douglas debate, radio/television/film, and theatre arts.

This wide range of educational activities is currently housed not only in the school’s original building, Annie May Swift Hall, but also in Harris Hall; two former residences on Chicago Avenue; the Communication Sciences and Disorders complex, which includes the Frances Searle Building and the medical and dental clinical facilities in Chicago; the Theatre and Interpretation Center; and John J. Louis Hall, a state-of-the-art studio production facility.

Academic Policies

Requirements for the Degree of Bachelor of Science in Speech

The School of Speech grants the degree of bachelor of science in speech upon (1) the satisfactory completion of 45 course units; (2) the fulfillment of the distribution requirement of the student’s major department; and (3) the completion of an approved program of study in speech and related fields suited to the student’s special interests and needs. If students interrupt the program of study for an extended period of time and degree requirements are changed during this period, they are normally held to the new requirements.

In addition to and independent of the requirements set by the School of Speech, students must satisfy the University Enrollment Requirement (see Financial Regulations).

General Requirements

Of the required 45 courses, the last 23 courses must be taken while the student is enrolled as an undergraduate in Northwestern University, and the student must be enrolled in the School of Speech for the last three quarters preceding the granting of the degree. Credit for summer work taken at other colleges or universities as part of the last 23 courses requires approval by petition.
Thirty-five of the required 45 units must be completed with grades of A, B, or C. A minimum of 18 courses must be taken outside the School of Speech. No more than 18 of the 45 courses offered for the degree may be taken in the major department.

A transfer student will be required to complete at least 11 courses in the School of Speech at Northwestern. A speech placement interview is required at the time of first registration for all transfer students.

Distribution Requirements
All major programs in speech require 18 courses outside the major department in the following areas:
- Science, mathematics, and technology
- Individual and social behavior
- Humanities and fine arts

Students should consult the department concerned for the range of disciplines within each category and the number of courses required.

Major Programs in Speech and Related Requirements
All students in the School of Speech must meet the requirements of one of the following major programs: interdepartmental studies, performance studies, communication studies, radio/television/film, communication sciences and disorders, or theatre (including dance). Basic speech courses are required in all programs, and provisions are made for study in other divisions of the University to complement the major program.

Student Conduct in Speech Courses
All undergraduate students enrolled in School of Speech courses are held accountable to the University's standards of academic integrity (see Academic Regulations in the Undergraduate Education section of this catalog). They also are responsible for compliance with the following standards:
- Attendance is required in all courses, and excessive absence is cause for failure
- Credit will not be given for two courses that meet at the same time
- All assigned work must be completed to receive course credit
- Assignments must be turned in on time, and examinations must be taken as scheduled; assignments cannot be made up or grades of incomplete given without prior approval from the instructor

Teaching Certification
The Department of Communication Sciences and Disorders offers a program leading to public school certification.

Faculty Advisers
Each new student is assigned a faculty adviser in the chosen major field within speech. This adviser is available for consultation, especially for the purpose of planning for the next registration. Freshmen have a separate advising period before the fall registration. Ultimate responsibility for meeting degree requirements rests with the student.

Academic Options

Interdepartmental Studies
This program provides an interdisciplinary opportunity within speech for students whose special interests are not satisfied by one of the established programs. Majors in interdepartmental studies may seek a general education with exposure to a broad range of disciplines or a professional preparation from two closely related areas of speech.

Requirements for a Major in Interdepartmental Studies
- A minimum of 3 courses distributed among at least three departments and selected from the following: 601-A01, A02, A03, A08; 630-A40-1, A40-2
- A minimum of 3 courses at the B level distributed among at least three departments
- An additional 10 courses in speech distributed among at least two departments, including at least 8 courses at the C or D level. It is the student's responsibility to take all courses prerequisite for C- and D-level courses. Eligible students are urged to elect C99 during their senior year; this independent study should be arranged to correlate two of the speech areas the student has studied.
- Six courses at the B level or above outside speech, including at least three C-level courses. If they apply, courses taken to meet the distribution requirement may be used to satisfy this requirement.
- Major programs for undergraduate work must be approved by the associate dean for undergraduate affairs.
Interschool Certificates and Adjunct Major
For information about the interschool programs listed below, see the Other Undergraduate Programs section of this catalog.

Integrated Arts Program
The interschool Integrated Arts Program offers courses leading to a minor that explore the creative process from the perspective of the artist in the disciplines of theatre, visual arts, music, dance, and media arts.

International Studies Program
International studies, an undergraduate interschool adjunct major that is taken in conjunction with a traditional major, is open to School of Speech students.

Music Theatre Program
The Certificate in Music Theatre provides the opportunity for School of Music students majoring in voice and School of Speech students majoring in theatre to create a second area of specialization.

Undergraduate Leadership Program
The Undergraduate Leadership Program, an interschool certificate program open to all undergraduates, helps students understand the nature of leadership and prepares them to become leaders.

Graduate Study
The School of Speech has been a national center for graduate study and research in the field of speech for many years. Programs for the master of arts, master of fine arts, and doctor of philosophy degrees with majors in speech are administered by the Graduate School of Northwestern University. All candidates for these degrees must satisfy the Graduate School requirements. The school itself offers a master of science in communication.

The School of Speech offers departmental and thesis sequences leading to the master’s degree as well as a program leading to the degree of master of science in communication with emphasis in communication management or communication systems. Requirements for the departmental and thesis master’s degrees, the master of fine arts, and the doctor of philosophy degrees in any division of the School of Speech are described in the Graduate School catalog. Requirements for the master of science in communication degree are available from the School of Speech.

All departments of the School of Speech participate in graduate studies and research. Graduate programs may be relatively specialized in the offerings of one department or arranged to represent the offerings of two or more departments.

Introductory and Related Courses
601-A01-0 Interpersonal Communication Laboratory experience in human interaction. Analysis of communication within groups.
601-A02-0 Public Speaking Theory, composition, delivery, and criticism of public speeches.
601-A04-0 Argumentation and Debate Theories of argumentation and debate, with many opportunities for practice. Analysis and evaluation of the discourse related to public controversies. Recommended for students planning to participate in intercollegiate debate.
601-A05-0 Improving Voice and Articulation Study of basic communication processes for students wishing to improve their own speaking skills. Self-evaluation of articulation and voice; directed practice based on principles of normal speech production and elementary phonetics. Prerequisite: consent of instructor.
601-A10-0 Voice for Performance Intensive individual development and use of voice for performance.
601-B04-0 Paradigms and Strategies of Leadership Theoretical models of leadership. Group vision, change, and decision making. Weekly student-led small groups discuss case studies. Meetings videotaped, followed by feedback sessions.

Communication Sciences and Disorders
The Department of Communication Sciences and Disorders is the locus at Northwestern of basic science and research in human communication and its disorders. It offers clinical training programs in audiology and hearing sciences, learning disabilities, and speech and language pathology. Undergraduate and graduate curricula emphasize the study of normal human communication and cognition, thereby providing a foundation for the study of disorders of hearing, speech, language, and learning. Classroom, clinical, and research facilities of the department are located in the Frances Searle Building on the Evanston campus, with the opportunity to do further clinical work at the Medical School on the Chicago campus.
Programs of Study for Departmental Majors

The undergraduate program in communication sciences and disorders is designed to provide a thorough background of information about human communication and its disorders. Basic science principles that underlie all human communication and cognition are emphasized. Students also are introduced to clinical issues that pertain to disorders of communication and learning.

Undergraduate majors in communication sciences and disorders may choose among four areas of concentration: human communication sciences,audiology and hearing sciences, learning disabilities, and speech and language pathology. Any courses in the department are taken as electives by students from many departments and schools of the University. Undergraduates may select their area of concentration any time after entering the department. However, they are encouraged to make this decision by the spring quarter of their sophomore year and are required to decide no later than the beginning of their junior year. (Students may always petition to change the area of concentration.)

An honors program is also available for students in their senior year who have maintained an outstanding undergraduate record through their junior year. Upon successful completion of an honors project, they will graduate with honors in communication sciences and disorders. Also see Honors and Prizes in the Undergraduate Education section of this catalog.

Upperclass students in the department may register for units of independent study, in which they work closely with a faculty member on a topic of mutual interest. Students interested in independent study should select courses that may lead to more advanced library or laboratory research.

Human Communication Sciences

This area of concentration is particularly well suited to students who plan to attend graduate or professional school in fields such as medicine, dentistry, psychology, biomedical engineering, or neuroscience. It also provides excellent preparation for students who plan to pursue graduate study in audiology and hearing sciences, learning disabilities, or speech and language pathology to conduct research in these areas or to engage in professional practice. In addition to taking a number of basic science courses in the Department of Communication Sciences and Disorders, students in this program take a minimum of 12 science, mathematics, engineering, and/or psychology courses outside the department.

Students admitted to the seven-year Honors Program in Medical Education with an emphasis in human communication sciences meet the C- and D-level course requirements of the department (see following description). However, because they spend only three years on the Evanston campus, they take fewer A- and B-level courses in the department and the School of Speech than some four-year undergraduates.

Audiology and Hearing Sciences

This area of concentration encompasses the study of hearing, hearing disorders, and the treatment of hearing disorders. Undergraduate course work in this program provides the scientific undergirding necessary for clinical practice and/or auditory research. Emphasis is on basic communication science, including study of the anatomical, physiological, and physical bases of hearing. Information on normal communication processes is presented. An introduction to audiologic assessment and hearing loss management is provided, with the opportunity for supervised clinical experience for advanced undergraduate students.

The master's degree program in audiology and hearing sciences is a professional program designed to prepare students for the clinical practice of audiology. Students interested in careers in auditory research may emphasize the development of research skills in the master's program to prepare for continued study at the doctoral level.

Students completing master's study in audiology and hearing sciences may qualify for clinical certification by the American Speech-Language-Hearing Association (ASHA), Illinois state licensure in audiology, and registration with the Illinois Department of Public Health in the area of hearing aid dispensing. Audiology professionals may be employed in hospitals, community and university clinics, industry, schools, rehabilitation centers, and research laboratories. Advanced professionals may be self-employed in private practice.

Learning Disabilities

The undergraduate concentration in learning disabilities provides academic preparation for graduate study leading to the M.A. and Ph.D. degrees in learning disabilities and related fields. The field of learning disabilities is concerned with learning processes and their dysfunctions, including disorders of perception, memory, language, and conceptualization. Such disorders lead to problems in the acquisition and use of oral language, reading, writing, and math skills that require specialized remediation. Undergraduate course work stresses theoretical, scientific, clinical, and educational issues as a foundation for advanced training. Students also may create an interdisciplinary program by combining learning disabilities with such ancillary fields as audiology, education, linguistics, neuroscience, psychology, or speech and language pathology.

The first two years of the undergraduate curriculum emphasize the psychological, linguistic, and biological bases of normal language and cognitive development. Clinical examples and observations in the program's clinics and in area schools are incorporated into these courses. Advanced undergraduate courses are focused more directly on disorders in basic processes and on clinical applications of basic theory, including some supervised clinical teaching.

Graduates of the program may enter M.A. or M.A./Ph.D. programs at Northwestern or elsewhere to pursue
advanced work and certification as a specialist in learning disabilities or as a researcher. Learning disabilities specialists with master's or PhD degrees may work in public or private schools, universities, hospitals, or private practice.

Speech and Language Pathology
The undergraduate emphasis in speech and language pathology combines academic instruction with laboratory activities and supervised clinical experiences to give students a background for graduate study in the field. The first two years of the undergraduate curriculum emphasize the psychological, linguistic, neuroanatomical, acoustical, anatomical, and physiological bases of normal auditory and oral language behavior. As knowledge of normal speech, language, learning, and hearing processes increases, students are introduced to the communicative disorders that result from the disruption of these processes.

Advanced undergraduate courses are concerned with the nature, recognition, and management of common communicative disorders, such as problems of speech sound production, language development, fluency, and voice. This program also offers courses of study leading to the MA and PhD degrees as well as postdoctoral study in speech and language pathology. Graduate courses are concerned with the neurophysiologic and structural disorders affecting communication and with a more detailed study of disorders of language, fluency, articulation, and voice. Students study the theory, evaluation, and management of aphasia, cerebral palsy, cleft palate, laryngeal pathologies including laryngectomy, and other complex disorders.

Students completing graduate programs of study in speech and language pathology may qualify for teaching certification by the Illinois State Board of Education, Illinois state licensure, and certification by the American Speech-Language-Hearing Association (ASHA). Professional speech and language pathologists work in schools, child development programs, specialized educational settings, universities, hospital clinics, rehabilitation centers, and private practice.

Requirements for a Major in Communication Sciences and Disorders
- Introductory courses: 601-A08 or 620-A01 and at least 2 of the following: 601-A01, A02, A03
- B-level courses: B01, B02, B03, B-level statistics course in psychology or education
- C- and D-level courses in communicative disorders: 9 courses (excluding practicum courses), including at least 1 in audiology and hearing sciences, learning disabilities, and speech and language pathology
- Electives: 14 courses, at least 8 of which must be outside the department

(Students who plan to work at the elementary or secondary level are advised to include courses in education and other areas that apply toward the requirements for a teaching certificate in their special field.)

- Courses taken in the department: 22 are the maximum number that can be counted toward the BSSp degree
- Writing proficiency requirement: All students must meet the writing proficiency requirement as described under Academic Policies in the CAS section of this catalog
- Residence requirement: enrollment in the department for the last five quarters preceding the granting of the degree

Also see the description of requirements for students admitted to the seven-year Honors Program in Medical Education under Programs of Study for Departmental Majors, Human Communication Sciences, earlier in this section.

Basic Science

Courses Primarily for Undergraduates
620-A01-0 Seminar in Communication Sciences and Disorders Major topics of research interest in communicative disorders. Principles of research in communicative disorders.
601-A05-0 Improving Voice and Articulation See Introductory and Related Courses.
601-A08-0 Processes and Pathologies of Human Communication See Introductory and Related Courses.
620-B01-0 Phonetics Training in transcription of English speech sounds. Introduction to distinctive feature analysis, phonological rules, prosodic features, dynamics of articulation, American dialectal variants.
620-B02-0 Biological Foundations of Human Communication Human anatomy, physiology, and neurology in relation to communicative behavior. Sensory, perceptual, cognitive, and motor processes.
620-B03-0 Acoustics of Speech Nature of sound, acoustics, and acoustic composition of speech. Contributions of acoustical research to the theory of speech production and perception.
620-B05-0 Introduction to the Study of Learning and Learning Problems in Children Application of three theories—stimulus-response, cognitive development, and psychoanalytic—to learning and learning problems in classrooms. Field placement in a classroom; supervised observations of a child with learning problems and a normal achieving classmate.
620-C01-0 Anatomy and Physiology of the Vocal Mechanism Lectures, readings, and laboratory dissections presenting the structure and function of the neuromuscular system involved in breathing, phonation, and articulation. Prerequisite: junior standing or above.
620-C02-0 Anatomy and Physiology of the Hearing Mechanism Gross and fine structure, development, and function of the peripheral and central auditory system. Prerequisites: junior standing or above, B02 and B03, or consent of instructor.
620-C03-0 **Brain and Cognition**

Brain anatomy and physiology, neuropsychological techniques, sensory physiology, and neural development. The brain's role in language, attention, learning and memory, thinking, intelligence, and reading.

620-C04-0 **Introduction to Research Methods**

Introduction to research design and data analysis in communication sciences and disorders; statistical inference.

620-C05-1 **Electronic Laboratory Instrumentation**

Basic analog and digital electronic theory for the use, modification, and design of behavioral laboratory equipment. Applications in speech and hearing.

620-C05-2 **Computer Laboratory Instrumentation**

Computer use in the laboratory for equipment control and data acquisition. Real-time programming and networking between computers and laboratory equipment. Prerequisites: C05-1 and proficiency in any computer language.

620-C06-0 **Introduction to Psychoacoustics**

Introduction to principles underlying perception of pitch, loudness, auditory space, speech; psychophysical procedures for studying psychoacoustics.

620-C09-0 **Culture, Language, and Learning**

Language and culture; transmission of culture through language; effects of cultural variety on perception, cognition, and learning; implications of cultural and linguistic diversity in communicative disorders.

620-C11-0 **Principles of Electronics and Acoustics**

Parallel development of concepts in electronics and acoustics that are useful for advanced laboratory research in communicative disorders and related fields.

620-C12-0 **Applied Research Methods in Human Communication Science**

Survey, experimental, and clinical case-review methods pertinent to hearing, speech, language, and learning; discussion of research strategies. Laboratory.

620-C20-0 **Physiologic Instrumentation**

Fundamentals of physiological measurement and analysis. Use of physiological instrumentation for the transduction and measurement of speech articulator movement. Design of experiments and interpretation of data. Prerequisite: C01.

620-C50-0 **Cognitive Development in Atypical Learners**

Introduction to theories of cognitive development; implications for the study of atypical learners; review of research on the impact of perceptual and language impairments on cognitive growth. Laboratory, with cognitive assessment procedures.

620-C51-0 **Development and Disorders of Memory**

Scientific models and evidence for the development of memory. Memory disorders in relation to developmental and life span issues.

620-C99-0 **Independent Study**

Prerequisite: consent of associate dean after submission of petition.

---

**Audiology and Hearing Sciences**

**Courses for Undergraduates and Graduates**

621-C18-0 **Introduction to Audiology**

Introduction to the measurement of hearing in humans. Basic anatomy of the ear, measurement of hearing, potential disorders of hearing. Lecture/laboratory.

621-C19-0 **Pediatric Audiology**

Etiological factors, assessment, and implications of hearing impairment, selection of hearing aids, remedial programs, counseling of parents. Emphasis on hard-of-hearing infants and children. Prerequisite: C23 or consent of instructor.

621-C20-0 **Pathologies of the Auditory System**

Physiologic abnormalities of the auditory system that result in hearing impairments. Prerequisite: C02, C23, or equivalent.

621-C21-0 **Evaluation and Use of Amplification Systems**

Electroacoustic characteristics of the hearing aid, clinical selection of wearable amplification and group auditory training systems, and patient management. Lecture/laboratory. Prerequisite: C23 or consent of instructor.

621-C23-0 **Measurement of Hearing I**

Basic audiometric and immittance techniques; interpretation of test results. Introduction to amplification systems. Lectures/laboratories. Prerequisite: junior standing or above.

621-C24-0 **Measurement of Hearing II**

Audiometric techniques used in differential evaluation of cochlear, retrocochlear, and functional hearing loss. Calibration techniques. Prerequisite: C23 or equivalent.

621-C25-0 **Central Auditory Neurophysiology: Evoked Potentials**

Electrophysiologic evaluation of auditory, visual, and somatosensory systems, emphasizing electric response measures. Theoretical and practical considerations in clinical application; interpretation of test results. Prerequisite: C24 or equivalent.

621-C26-0 **Vestibular Evaluation**

Electrophysiological evaluation of the auditory system; consideration in the measurement of caloric nystagmus. Integration of electrophysiologic test findings with audiometric and immittance test results in clinical case studies of auditory and vestibular disorders. Prerequisite: C25 or consent of instructor.

621-C66-0 **Introduction to Aural Rehabilitation**

Principles and strategies in hearing loss management in children and adults. Information about speech reading and auditory training. Prerequisite: C23 or equivalent.

621-C67-0 **Advanced Aural Rehabilitation**

Current research and theory in aural rehabilitation.

621-C68-0 **Theory and Practice in Rehabilitation of Hearing-Impaired Children and Adults**

Theories of methods of designing and implementing individual and group rehabilitation programs for the hearing-impaired. Lectures, discussions, demonstrations relating to clinical practice. Prerequisites: C66 and consent of instructor.
Learning Disabilities

Courses Primarily for Undergraduates
623-C69-0 Special Topics in Learning Disabilities
Current scientific and professional problems in learning disabilities.

623-C73-0 Introduction to Learning Disabilities
Psychological, neurological, and linguistic theories of language and learning as related to learning disabilities. Prerequisite: junior standing or above.

623-C75-0 Diagnostic Procedures for Exceptional Children
Principles and procedures for differential diagnosis. Characteristics of children with major disabling conditions.

623-C76-0 Remedial Education for Children with Learning Disabilities
Remedial programs for children with learning disabilities. Teaching techniques for aphasia, dyslexia, and related disorders. Educational planning and placement. Prerequisite: junior standing or above or consent of instructor.

623-C77-0 Learning Disabilities in Early Childhood

623-C80-0 Introduction to Clinical Procedures in Learning Disabilities
Practicum experience in clinical settings. Learning processes and application of instructional approaches. Field studies, reading, and weekly seminars. Prerequisites: C75, C76.

623-C81-0 Social Development in Normal and Learning-Disabled Children
Current theories of and empirical research on social-emotional development from infancy through adolescence; identification and treatment of social deficits in learning-disabled children.

Speech and Language Pathology

Courses Primarily for Undergraduates
624-C30-0 Multicultural Perspectives on Speech and Language Disorders
Nonbiased diagnosis and remediation of language, fluency, voice, and neurogenic disorders among culturally and linguistically diverse groups.

624-C34-0 Delivery Systems in Speech and Language Pathology
Organization, administration, and implementation of speech-language pathology services in public, private, and special schools; clinics, rehabilitation agencies, hospitals; private practice.

624-C36-0 The Field of Special Education
Organization of special education programs; criteria for selection and educational management of pupils in special programs. Prerequisite: junior standing or above or consent of instructor.

624-C69-0 Special Topics in Speech and Language Pathology
Summer only.

624-C91-0 Speech Sound Learning and the Modification of Articulation
Development of speech production skills in children. Factors affecting phonological development. Assessment and modification of atypical articulatory patterns. Prerequisite: B01 or equivalent.

624-C92-0 Language Development and Usage
Language learning and its relation to other aspects of child development. Patterns of normal language development as a guide for evaluation and treatment of developmental language disorders. Prerequisite: junior standing or above or consent of instructor.

624-C93-0 Vocal Physiology and Pathology
Normal and abnormal adaptations of respiration, phonation, and resonance to production of voice in speech. Techniques, materials, and instrumentation for voice diagnostics and therapy applicable to children and adults. Prerequisites: B02, C01.

624-C94-0 Fluency, Disfluency, and Stuttering
Normal development of fluency and factors that may disrupt it. Introduction to the nature, etiologies, development, and treatment of stuttering. Prerequisite: B01 or consent of instructor.

624-C95-0 Introduction to Neurogenic Communication Disorders
Neurological correlates and behavioral symptomatology associated with developmental and acquired neurogenic communication disorders. Clinical observation required.

624-C96-0 Diagnostic Procedures in Speech and Language Pathology
Clinical examination of persons with oral language problems; evaluation of sensory and motor processes of speech; assessment of speech and language maturity levels. Prerequisites: senior standing or above, C91 and C92, or consent of instructor.

624-C97-0 Introduction to Clinical Procedures in Speech and Language Pathology
Beginning practicum experience in a clinical setting. Emphasis on planning and executing a remedial program for individuals with problems of speech sound production and language usage. Prerequisite: consent of instructor.

624-C98-1,2 School Practicum in Speech and Language Pathology
1. Application of academic background to clinical teaching in the schools. Organizing, executing, evaluating a speech and language pathology program. For each course unit, 50 hours of supervised teaching. 2. Continuation of C98-1. Prerequisites: C34, C91, C92, C94, and consent of instructor.
Communication Studies
The Department of Communication Studies offers liberal arts-oriented course work focused on the most fundamental and pervasive of human activities. The study of human communication ranges from interpersonal processes such as persuasion and relationship formation to organizational processes such as group leadership and dispute resolution, as well as to the strategies and styles of public deliberation and debate and the political and cultural processes involving mass media and telecommunications systems. At the same time, the study of human communication encompasses the scholarly traditions of both the humanities and social sciences. The intellectual foundations for this study range from classical rhetoric to cognitive science, from the economics of computer-mediated communication networks to the ethics of public argument.

Course Concentrations for Departmental Majors
The department has organized the wealth of theory and research on human communication—as well as the real-world applications of that theory and research—into six course concentrations. These are interrelated sets of courses that can help students coordinate their choice of classes with their intellectual interests, postgraduate educational plans, and career goals. Students who major in communication studies are encouraged, though not required, to organize their course work within one or two of these concentrations as described below.

Organizational Communication
The success of all organizations—whether small neighborhood groups or giant multinational corporations—depends on effective communication. Organizations must have members who are skilled in the basic communication activities of persuasion, group leadership and decision making, bargaining and negotiation, and team problem solving. And in the contemporary world, organizations also demand the knowledge necessary to analyze and act on information gathered from surveys and other research methods, to harness the resources of communication technology, and to thrive in an environment of diverse individuals. This concentration includes courses that develop basic communication skills as well as courses that examine communication processes in such contexts as task-oriented groups and professional-client relationships. It also includes courses that focus on the organizational challenges associated with technology, information management, cultural diversity, and image building. This concentration will be of interest to students who wish to work—and who will seek to lead—in either business or not-for-profit organizations. To complete this concentration, students must take B01 and B60 and choose a minimum of four courses from the following: B05, B29, B50, B75, C29, C41, C50, C61, C62, C63, C64, C65, C71, C91, C92, and C93.

Communication Industries and Technologies
Mass communication and telecommunications are reshaping the culture, commerce, and politics of the United States and the world. Media firms are merging into ever-larger organizations that produce film, television, music, books, magazines, newspapers, and software for audiences worldwide. At the same time, technology is breaking down the old distinctions among computers, telephones, video, and print to create new networks that integrate video, voice, and data. These changes present new and sometimes unanticipated challenges to managers in business as well as to leaders in government, education, the arts, and the professions. This course concentration is intended for students who wish to prepare for these challenges by developing an understanding of the social, economic, legal, and technical aspects of mass communication and telecommunications. It will be of interest to students who seek careers in such communication fields as advertising and public relations, management of entertainment and information industries, and public policy making. To complete this concentration, students must select a minimum of six courses from the following: B01, B29, B75, B87, C30, C50, C70, C76, C77, C85, and C93.

Rhetoric, Media, and Public Culture
Citizens of the 21st century must understand the communication opportunities, obligations, and risks that emerge in an era of cultural diversification and conflict. This course concentration examines the relationship between communication and culture from a rhetorical and critical perspective—that is, from a point of view emphasizing the use of language and image to characterize social reality, create forums for deliberation and debate, and confront controversial issues and cultural differences. The concentration includes courses that engage the issues raised by differences of race, class, gender, nationality, and political conviction. It also includes courses that examine such cultural processes as the legitimation of social authority, the construction of personal as well as national identity, and the articulation of national purpose and international obligation. The role of the mass media in these issues and processes is of particular concern. This course concentration is intended for students interested in positions of civic leadership, such as in community-based organizations, social reform movements, and cultural, political, and educational institutions. To complete this concentration, students must take B10 and one other B-level course from the following: B25, B71, and B75. They must also select a minimum of four C-level courses from the following: C10, C11, C15, C20, C25, C27, C28, C29, C30, C70, C71, C75, C76, C77, C78, and C92.

Relational Communication
Our lives are spent in relationships with others. Most people are born into a family, form friendships, join work groups, and begin romantic attachments that sometimes
turn into new family units. Interpersonal communication is the means by which we develop, maintain, and terminate these relationships. The relational communication concentration focuses on these processes. It has four components: courses examining the psychological variables that affect how people create and interpret the communication behaviors that occur during social interaction; courses examining the contexts in which relational communication occurs, such as the family and the work group; courses focusing on strategies and processes of interpersonal influence; and courses focusing on the impact of gender, culture, and other factors on the processes of relational communication. This concentration is intended for students interested in the psychological foundations of human communication as well as students interested in the helping professions (e.g., therapy, counseling). To complete this concentration, students must take two core courses, B01 and B41, and select a minimum of four courses from the following: B05, B40, B50, B60, C40, C41, C43, C44, C45, C50, and C82.

Media and Politics
Communication is essential to both effective leadership and citizen participation. Leaders must employ the arts and sciences of communication to negotiate policy, move public opinion, maintain relations with other nations, and, of course, win votes. Citizens must understand these arts and sciences if they are to maintain self-government. This course concentration focuses on the role of communication in the political processes of modern democracies, especially on how government officials, candidates, and citizens interact with the mass media in the realm of public affairs. The concentration is intended for students interested in political organizing and consulting, opinion polling, policy analysis, and research work in public interest groups and other not-for-profit organizations. To complete this concentration, students must take B-72 and a minimum of three courses from each of two groups: the political leadership group, focusing on the rhetoric and strategies of political persuasion, consisting of C15, C21, C25, C28, C80, and C91; and the citizen participation group, concerning Americans' beliefs and the ways they respond to political information, consisting of B01, B05, B71, C70, C71, C72, C80, and C93.

Argumentation and Advocacy
Lawyers, policy makers, and indeed all citizens must be able to put forward and defend their views when matters of common concern are debated. This course concentration is based on the conviction that the skills of advocacy can best be cultivated in the liberal arts tradition by uniting intensive practice in the arts of argumentation with theory-based understanding of advocacy and deliberation. In this concentration, courses emphasizing practice require students to think critically about their positions, plan their communicative strategies effectively, and argue their cases forcefully. Courses emphasizing understanding enlarge students' views of the traditions and institutions—especially the law—that shape the processes of advocacy and deliberation on vital issues. Thus prepared, students can take their places as articulate citizens in the various communities to which they belong. The perspectives and skills offered in this concentration are particularly appropriate for students interested in law careers. To complete this concentration, students must select three practice-oriented courses from B14, B20, B21, and B50 as well as three theory-oriented courses from B05, B10, C21, C25, C30-1, C63, C64, C72, C91, and C93.

General Requirements for a Major in Communication Studies
• Two of the following: 601-A01, A02, A03, A04
• An additional 12 courses in speech, at least 9 of which must be in the department. At least 5 courses within the department must be at the C level. Not more than one unit of C93 Field Study in Communication and not more than two units of C99 Independent Study may be applied toward the total of 12 courses in speech.
• A field of concentration in an area other than speech (normally one of the disciplines of the College of Arts and Sciences), consisting of at least 6 courses with half or more of this study at the C or D level. Courses taken to satisfy the distribution requirement may be applied to the field of concentration if they fall within the discipline in which the student chooses to concentrate.
• Electives in speech and other areas

Four-Year BSSp/MA
The department offers a four-year BSSp/MA program for outstanding undergraduate majors. Departmental approval is required before application to the Graduate School, which should be made during the junior year. By the end of the junior year, students should have completed all requirements for the undergraduate major, the field of concentration, and the distribution requirements, with a total of at least 38 units of credit. During the fourth year, students enroll in 9 graduate-level courses to complete work on the master's degree and 3 undergraduate electives to complete work on the bachelor's degree. See Four-Year Master's Programs in the Undergraduate Education section of this catalog.

Departmental Honors Program
The Undergraduate Honors Program in Communication Studies offers an opportunity for highly motivated students to conduct original scholarly research. Selected on the basis of overall grade point average, a small number of students in the department are invited to apply for the program at the end of winter quarter of their junior year. Through the senior year, each student works closely with faculty to produce an original research project in an interest area determined by the student. Seniors who complete
the program graduate with departmental honors. Also see Honors and Prizes in the Undergraduate Education section of this catalog.

**Courses Primarily for Freshmen and Sophomores**

610-A01-0 Interpersonal Communication  See Introductory and Related Courses.

610-A02-0 Public Speaking  See Introductory and Related Courses.

610-A04-0 Argumentation and Debate  See Introductory and Related Courses.

610-B01-0 Research Methods in Communication Studies  Foundations of knowledge in many areas of the field, including the nature of interpersonal interaction and the impact of mass media. How communication researchers do their work; how to judge the quality of research products. Prerequisite for many other courses in the department.

610-B05-0 Theories of Persuasion  Survey of major theories that explain how to change another person’s attitudes and behaviors. Applications to persuasion within a variety of contexts, including relationships, organizations, legal campaigns, and the mass culture.

610-B10-0 The Arts of Controversy: An Introduction to Rhetorical Thinking  Controversy as a rhetorical practice essential to healthy political culture. Use of rhetoric to appreciate different (and frequently conflicting) approaches to issues. Examination of real-life controversies.

610-B14-0 Legal Argumentation  Argumentation practices in the legal forum. Nature and procedures of legal controversies about what is just; modes of reasoning about fact and law; history and ethics of legal advocacy.

610-B15-0 Principles of Rhetorical Criticism  Introduction to the critical study of political, legal, and ceremonial rhetoric. Development of skills in analyzing and assessing such rhetoric and appreciating how it reflects and shapes basic social and cultural values.

605-B16-0 Performance and Culture  See Performance Studies.

610-B20-0 Theories of Argumentation  Fundamental principles and practice of critical reasoning and public argument. For students interested in legal, academic, or political realms of communication and advocacy.

610-B21-0 Speech Writing  Theory and practice in the principles of composition and in the preparation and delivery of manuscript speeches.

610-B25-0 Forms of Public Address  Selected genres of public address, including the eulogy, the censure, the inaugural, the apology, and the dedication.

610-B29-0 Communication Technology, Community, and Personal Identity  Philosophical, critical, and scientific analysis of how the intensification of technology in cultural, professional, and recreational domains is affecting our social relations and personal identities.

610-B35-0 Philosophy of Language and Communication  Relationship between language and human communication behavior. How language structures individual world views; the process of meaning formation; therapeutic communication; the experience of creativity.

610-B40-0 Theories of Interpersonal Communication  Introduction to the major theories about what goes on in conversations. Message interpretation, conversational management, nonverbal communication.

610-B41-0 Theories of Relational Communication  An overview of communication theories and research dealing with developing, sustaining, and terminating interpersonal relationships. Direct application to friendship, work, and romantic relationships.

610-B50-0 Small Group Processes  Theories and research relating to communication in small groups and group decision making.

610-B60-0 Theories of Organizational Communication  Theories and research dealing with communication in formal organizations and institutions.

610-B70-0 Theories of Mass Communication  Introductory survey of current issues in mass communication research. Workings and effects of media industries. Impact of media violence, effect of political news coverage and advertising, media effectiveness in public education.

610-B71-0 Race, Gender, and the Mass Media  How race and gender are constructed by the American mass media; how social groups use the media for their own purposes. News coverage of minorities, images of women and minorities in advertising, social effects of pornography.

610-B72-0 Communication and American Democracy  Central role of communication processes in democratic governance. Importance of communication in civic life (voter participation, deliberation, conflict resolution, social movements) as illustrated in survey of democracies worldwide. Multiple forms of communication, including speeches, debates, negotiation, news coverage, and computer-mediated interaction. Lecture/laboratory.

610-B75-0 Persuasive Images: Rhetoric of Contemporary Culture  Analysis of image-making in all forms of popular culture—in film and television but also shopping malls, supermarkets, car dealers, and doctors’ offices. Images in situations ranging from corporate crises to buying an ice cream cone.

610-B87-0 Communication Technology and Society  Basic introduction to communication technologies, both new and old. Societal and economic issues they raise, examined from a variety of disciplinary perspectives.

610-B90-0 Forensics  Independent research and analysis in conjunction with participation in intercollegiate forensics. Credit may not be earned for B90 more than once.
Courses Primarily for Juniors, Seniors, and Graduates

610-C10-0 Greek Rhetorical Theory Survey of the history of Greek rhetoric from its origins in the fifth century BC through the Byzantine period. The main concentration is the classical period, with special attention to Gorgias, Protagoras, Isocrates, Plato, and Aristotle.

605-C11-0 Performance in Everyday Life See Performance Studies.

610-C11-0 Latin Rhetorical Theory Survey of the history of Latin rhetoric from Cicero through Bacon. Cicero’s rhetorical works serve as the foundation, but attention is also paid to Quintilian and Augustine’s major work on rhetoric.

610-C12-0 Modern Rhetorical Theory Survey of the history and fate of late-Enlightenment rhetorical theory, ranging from the works of Campbell and W. Hately to 20th-century rhetoricians, such as Richards, Weaver, and Burke, and the rebirth of rhetorical studies.

610-C15-0 Rhetoric of Social Movements Study of traditional theories of opposition derived from sociological and rhetorical analyses of mass movements. Examines new social movements as groups contesting abortion, animal rights, feminism, and other local and national issues.

605-C16-0 Folklore and Oral Traditions See Performance Studies.

610-C20-0 Advanced Argumentation Theories of argument drawn from classical and contemporary sources, with application to practice; making, judging, and appreciating forms of argument; consideration of their logical, ethical, and persuasive force. Prerequisite: B14 or B20.

610-C21-0 Public Argumentation Training in the arts of public argument through examination of contemporary controversies over social policies, foreign affairs, cultural events, and trials of public character. Enables students to become more effective civic advocates. Sequel to B10.

610-C25-1,2,3 Rhetorical History of the United States History of the United States, as studied through key rhetorical texts. Focus on moments of political crisis and cultural change. 1. Colonial period to the outbreak of the Civil War. 2. Civil War to World War I. 3. World War I to the present.

610-C27-0 Contemporary Rhetorical Practice Contemporary history from a rhetorical perspective. Analysis of public communications and rhetorical study of nonrhetorical events; emphasis on social movements and political controversy in the United States since 1960.

610-C28-0 The Rhetoric of War The genre of war rhetoric. Examination of the American experience in the 20th century using speeches, diaries, newspaper reports, government documents, films, and poetry.

610-C29-0 Rhetoric, Science, and Technology Contemporary debates on the standing and production of scientific argument. Current controversies over the social constitution and consequences of science and technology.

610-C30-1,2 Contemporary Problems in Freedom of Speech Personal freedom and public communication under the U.S. Constitution. 1. Principles, forms of reasoning, and court decisions governing conflicts between freedom of speech and public order, property rights, personal security, morality, and racial and gender equality in traditional, mass, and new electronic media. 2. Analysis of selected issues introduced in C30-1. Prerequisite: C30-1.

610-C40-0 Communication and Socialization Communication processes involved in the socialization of children. Communication with major socializing agencies. Prerequisites: B01 and B70.

610-C41-0 Communication and Aging Relationship between adult developmental processes and changes in communication behavior. Prerequisite: B01.

610-C43-0 Social Cognition and Communication In-depth analysis of theories examining the cognitive processes that occur before, during, and after interactions. Issues related to person perception, self-presentation, scripts, and schemas. Prerequisites: B01 and B40.

610-C44-0 Interpersonal Conflict In-depth analysis of theories and research examining conflict within relationships. Special emphasis on conflict within friendships, dating relationships, and family. Prerequisites: B01 and B41.

610-C45-0 Theories of Nonverbal Communication In-depth analysis of theories explaining the enactment and interpretation of nonverbal cues within interpersonal communication. Prerequisites: B01 and B40.

610-C50-0 Computer-Mediated Communication and Information Systems Examination and analysis of the tools and issues in computer-mediated communication and networked information systems; effects of new communication technologies at the interpersonal, group, organizational, and societal levels.

610-C60-0 Current Perspectives in Organizational Communication Research Selected micro- and macro-level theories of communication behavior in organizational settings. Prerequisites: B01 and B60.

610-C61-0 Intergroup Communication and Urban Change The small group as an agent of social change in urban society; internal and external communication in such change. Prerequisites: any two of B50, B60, and B70.

610-C62-0 Professional-Client Communication Communication between professionals and clients in medicine, law, education, psychotherapy, and social services. Alternatives to the professional-client model of problem solving. Prerequisites: B01 and B60.

610-C63-0 Bargaining and Negotiation Communication in bargaining and negotiation in organizational settings. Cognitive and motivational theories emphasizing bargaining and negotiation strategies. Prerequisites: B01, B05, and B60.
610-C64-0 Collective Decision Making and Communication in Organizations
Research on how organizations make, communicate, and implement collective decisions. Assessing decision effectiveness, group decision making, leadership in organizations, and organizational design. Prerequisite: B60 or equivalent.

610-C65-0 Solving Problems in Applied Organizational Communication
Advanced concepts and techniques for defining and analyzing organizational problems. Preparation for recognizing and working with problems in business organizations. Prerequisites: B01 and B60.

610-C70-0 Current Perspectives in Mass Communication Research
In-depth study of theories currently applied to the study of mass communication. Prerequisites: B01 and B70.

610-C71-0 Public Opinion
Nature of public opinion; history of techniques for expressing and assessing public opinion. Theories about the relationships among media, public opinion, and policy. Prerequisites: B01 and B70.

610-C72-0 Mass Communication and Campaign Strategies
Communication components of political campaigns, including broadcast advertising, direct mail, candidate speeches, debates, and news coverage. Campaign professionals share their expertise; students critically examine the effectiveness and appropriateness of campaign strategies and tactics. Prerequisites: B01 and B72.

610-C75-0 Rhetoric and the Arts
Public impact of art forms such as theatre, music, dance, film, and television. Critiquing of guest artists by students. Prerequisite: B75.

610-C76-0 The Rhetoric of Popular Criticism
How critics communicate their ideas and values to the public. Prerequisite: B75.

610-C77-0 Marketing Popular Culture
The invention and packaging of popular culture products, including film, music, television, and celebrities. Prerequisite: B75.

610-C78-0 Rhetoric and Aesthetic Theory
Interpretation and critique of the impact of major movements in aesthetic theory on the theory and practice of rhetorical communication. Prerequisite: B10, B15, or an equivalent course in interpretation or criticism.

610-C80-0 Political Communication
Nature and functions of communication within established political institutions; decision-making strategies, deliberative discourse, and electoral campaigns; field study of advocacy and interest groups. Prerequisite: B05, B10, or B70.

610-C81-0 Classroom Communication Behavior
The classroom as a communication system; verbal and nonverbal patterns of interaction. Systematic analysis of teacher-student behavior according to interpersonal and group processes.

610-C82-0 Family Communication Behavior
An overview of the family as a communication system. Intergenerational interaction patterns, intimacy and conflict patterns, decision making, environmental and cultural factors, and enrichment efforts. A wide range of family types and research methods are considered.

610-C85-0 Mass Media Economics
An economic framework for analyzing factors influencing economic organization of media industries and behavior of media firms. Framework applied to policy issues such as network regulations and limits to First Amendment freedoms.

610-C89-0 Practicum in Mass Communication Research
Collaboration with a faculty member on design and execution of a communication research project. Students learn how to complete a research project and write a report. Prerequisite: B01.

610-C91-0 Ethical Issues in Communication
Ethical problems in public, group, and interpersonal communication; criteria for their resolution.

610-C92-0 Intercultural Communication
Designed to integrate theory and practice in heightening student's awareness of the impact of culture on one's perception, beliefs, meanings, and verbal/nonverbal communication.

610-C93-0 Field Study in Communication
Enrollment only by petition in advance. Arrangements for winter quarter must be made by November 1 and for spring quarter by February 1.

610-C95-0 Topics in Communication Studies
Reading, research, and discussion in areas of significance. Topics vary.

610-C98-0 Undergraduate Seminar
Student- or faculty-initiated seminars to consider special topics. Credit for C98 may be earned more than once. No more than two units of such credit may be applied toward fulfillment of the major requirements.

610-C99-0 Independent Study
Enrollment only by petition in advance.

Performance Studies
The Department of Performance Studies integrates artistic and analytical approaches to a wide range of performance texts, events, and processes. The courses explore an interdisciplinary range of literary, cultural, and personal texts in performance. The department has particular strengths in the study of literature through solo performance; the ensemble adaptation and staging of poetic, narrative, and nonfictional texts; intercultural performance; performance art; cultural studies and the ethnography of performance; performance theory and criticism. Internships and field study for performance studies majors extend and deepen their classroom work with experiential learning. Extracurricular work provides students with a variety of opportunities to perform, adapt, and direct, enabling their creative work to reach an audience outside the classroom.

Performance studies majors have been successful in many professions that require intelligence and imagination.
as well as critical and creative skills. In addition to pursuing careers in professional theatre and arts development, many graduates teach literature, theatre, humanities, and performance studies. Majors have found performance studies an excellent preparation for law school and complementary to their interests in creative writing, communication, media, anthropology, dance, literature, or social work. Performance studies can be thought of as a major that bridges artistic expression and conceptual analysis, theory and practice. Performance, in its manifold forms, is the subject and the method of study.

Requirements for a Major in Performance Studies

- Introductory courses: one quarter of either 601-A01 or A02; 601-A03
- B-level courses: a minimum of 3 courses in speech, including at least two quarters of B-level courses in the department
- Production courses in theatre: two units selected from 630-A40-1,2; 630-B40-1,2,3; 630-B41-1,2,3; or one unit selected from preceding courses and one registration for 630-A19
- An additional 10 courses in speech, including at least 6 courses at the C level or above in the department; courses should be distributed among the various forms and media
- Six courses at the B level or above outside speech, including at least 3 C-level courses in literature; if they apply, courses taken to meet the distribution requirement may be used to satisfy this requirement
- Electives in speech and other areas

Courses Primarily for Freshmen and Sophomores

**601-A03-0 Analysis and Performance of Literature** See Introductory and Related Courses.

**605-B10-1 Performance of Poetry** Introduction to the analysis and performance of poetry. Prerequisite: 601-A03 or equivalent.

**605-B10-2 Performance of Narrative Fiction** Introduction to the study of narrative performance. Prerequisite: 601-A03 or equivalent.

**605-B10-3 Performance of Drama** Introduction to the analysis and performance of dramatic literature. Prerequisite: 601-A03 or equivalent.

**605-B16-0 Performance and Culture** Performative bases of culture, ritual, festival, and ceremony.

**605-B24-0 Adapting Narrative for Group Performance** Introduction to theories and methods of adapting narrative for the stage, with special emphasis on chamber theatre. Prerequisite: 601-A03 or equivalent.

Courses Primarily for Juniors, Seniors, and Graduates

Unless otherwise indicated, one B-level course in the department is a prerequisite.

**605-C07-1,2 Studies in Gender and Performance** Exploration of recent research on the social and political background of gender, particularly women’s access to performative expressions. 1. Women in the interstices of culture: evidence of women’s performance traditions in paratheatrical cultural practices. 2. Feminist theories of performance: feminist critiques of performance and production in the contemporary context. 630-C07 is the third course in this series.

**605-C08-0 Performing Modern and Contemporary Poetry** Use of performance in the analysis and criticism of modern and contemporary poetry.

**605-C09-1,2,3 Performance of Black Literature** Exploration and performance of contemporary literature by black writers in three major genres. 1. Drama. 2. Novel. 3. Poetry.

**605-C11-0 Performance in Everyday Life** Conceptual view of human beings as actors. Dramatism and the perspective of life as theatre.

**605-C15-0 Nonfiction Studies** Exploration of the dramatic impulse in nonfiction texts. Emphasis on autobiographical one-person shows.

**605-C16-0 Folklore and Oral Traditions** Genres of oral literature and an introduction to the methods and aims of folklore research. The nature of verbal art as performance and the importance of cultural context.

**605-C18-0 Shakespeare: Performance and Criticism** Use of performance in the analysis and criticism of selected plays by Shakespeare.

**605-C20-0 Languages of the Body** Exploration of nonverbal body movement and gestural vocabularies in theatre, dance, and performance art, with reference to television and film and productions of the body in visual and commercial media and popular cultural styles.

**605-C21-0 Performing the American ’50s** Use of performance in the analysis and criticism of selected postwar American literature.

**605-C22-0 Performing the Psychological Novel** Use of performance in the analysis and criticism of selected 19th- and 20th-century novels.

**605-C24-1,2 Presentational Aesthetics** 1. Theatrical convention, presentational mode, and conscious artifice in the performance of dramatic literature, poetry, and nonfiction. 2. Theory and practice of chamber theatre, its conventions and presentational modes; adaptation, staging, and performance of prose fiction. Choice of performer’s or director’s perspective. Prerequisite: B24-0.
605-C26-1,2 Performance Art 1. History, development, and theories of performance art as a live-art genre from the modernist avant-garde to contemporary cross-cultural forms. Media in all forms, with emphasis on performance process and audience relationship. 2. Further theoretical and laboratory exploration of compositional processes and political strategies of performance, media, and event/audience contexts.

605-C27-0 Field Methods in Performance Studies Theory and practice of fieldwork on performance; practical fieldwork experience.

605-C28-0 Studies in James Joyce Primary emphasis on extensive critical study and performance of Joyce's Ulysses, resulting in either a lecture-performance, a recital, or a research paper.

605-C29-0 Performing Individual Poetic Styles Content varies. Major poems of a significant writer or writers, permitting in-depth encounter with the writer, cultural context, and performance-related issues.

605-C30-0 Topics in Performance Studies Readings, discussion, and creative work in performance studies research and artistic practice. Topics vary. May be repeated for credit.

605-C31-0 Field Study/Internship in Performance Studies Intensive participation in off-campus production and/or field research experience. Departmental approval required.

605-C32-0 Urban Festivity Ethnographic study of festival, parades, exhibitions, civic celebrations, and other genres of urban cultural performance. Multiethnic expressions of Chicago identity. Field research methods.

605-C39-0 Independent Study Prerequisite: consent of associate dean after submission of petition.

Radio/Television/Film

The Department of Radio/Television/Film takes a broad-based approach to the study of modern media, encompassing their function both as modes of social communication and as artistic, expressive forms. The department is committed to the integration of theory and practice in both its undergraduate and graduate curriculum. All students take courses covering media history, theory, and criticism; media policy; and the techniques of media production.

The scholarly and critical side of the curriculum investigates the historical, social, political, and aesthetic aspects of modern media, including their intersection with economic, industrial, legal, and governmental institutions. On the production side, students are encouraged to work within a range of genres (narrative, documentary, and experimental work), all supported by the curriculum. Production courses also include conceptual, aesthetic, and ethical issues as well as the integration of material from scholarly and critical courses whenever possible.

Production facilities include 16mm film equipment, sound stage, and editing; field video and multiple-camera television studio facilities; linear and nonlinear video editing; advanced audio postproduction; and state-of-the-art computer graphics. Students operate the 7200-watt FM radio station WNUR, which serves the Chicago area. The School of Speech funds three active student-run co-curricular production groups and offers juniors and seniors numerous opportunities for internships at Chicago-area television and radio station and production companies. Frequent guest lectures are offered by alumni with careers in media and other well-known professionals.

Requirements for a Major in Radio/Television/Film

- Introductory courses: A12; a minimum of 3 courses at the A or B level in speech outside the department
- B-level courses: B01; B20; B80-1,2; B80-3 is prerequisite for all C-level production courses
- An additional 8 courses in speech at the C and D levels, including at least 6 courses in the department at the C and D levels; not more than one unit of C49 Internship in Radio/Television/Film and C99 Independent Study may be applied toward the 6 courses required in the department; the remaining internship and C99 units count as elective credits
- Six courses at the B level or above outside speech, including at least 3 courses at the C level or above, courses taken to meet the distribution requirement may be used to fulfill this requirement
- Language requirement: proficiency in a modern foreign language equal to four quarters of college study; proficiency may be established by placement exam or by completion of the fourth quarter
- Electives in speech and other areas

Courses Primarily for Freshmen and Sophomores

615-A12-0 Creative Processes in Sight and Sound Introduction to media production and aesthetics, examining concepts of media literacy through the analysis and production of images.

615-B01-0 Mass Media and Society Media industries as social and cultural forces; economic and political dimensions of the global media. Prerequisite for all C-level courses in the department.

615-B02-0 Introduction to Popular Culture: The Mass Media Cultural meanings of narrative and commercial forms in radio, television, and film. Historical and contemporary theories of popular culture.

615-B15-0 Media Literacy Production/criticism for non-majors; new radio/television/film majors may enroll. Grammar of still and moving images: photography, television, film, radio, computer graphics.
615-B20-0 Introduction to Film  Film as art, entertainment, and industry; focus on the narrative fiction film but also attention to documentary and experimental traditions. Film criticism, authorship, genre, film theory. Prerequisite to all C-level courses in the department.

615-B80-1,2,3 Production Arts  Media production practices in audio, writing, film, television, video, and computer graphics. B80-1,2 are major requirements; B80-3 is prerequisite for all C-level production courses.

615-B98-0 Studies in Media Topics  Theoretical or practical or both; emphasis on evolving trends.

Courses Primarily for Juniors, Seniors, and Graduates

615-C01-0 Broadcast News  Survey of existing research and critical analysis of the process, content, impact, and utilization of broadcast news.

615-C10-0 History of Broadcasting  Global evolution of radio and television, with events in United States as a central historical factor; programming and audiences, trends, cultural influences, issues. Survey of literature and research.

615-C12-1,2 History of Film  International survey of motion pictures as a distinctive medium of expression from its prehistory to the present.

615-C13-1 Documentary Film: History and Criticism  Survey of the schools, styles, and purposes of documentary film as a unique form of artistic expression and socio-political persuasion.

615-C13-2 Documentary Film and Video  Contemporary work and issues in documentary film and video.

615-C21-0 Radio/Television/Film Authorship  Idea of authorship in the media and an examination of different uses of author theory related to the work of particular artists.

615-C22-0 Radio/Television/Film Genre  Concept of genre in the media, with reference to popular American forms.

615-C23-1 Experimental Film: History and Criticism  Films and theories of experimentalists since the 1920s; contemporary underground movement.

615-C23-2 Experimental Film and Video  Contemporary work in experimental film and video.

615-C25-0 Feminism and Film/Video  Introduction to feminist film theory, the feminist critique of mainstream cinema, and film and video work by women offering alternatives to the mainstream.

615-C26-0 Mass Media Criticism  Contemporary critical methods applied to mass communication media. Critical literature supplemented by written analyses of selected films, television programs, and other appropriate material.

615-C30-0 Electronic Media Management  Organization and management of the television station and other electronic media organizations and facilities; functions and interrelationships of various departments.

615-C31-0 Regulation of Broadcasting  Government regulation and industry self-regulation; historical perspective and examination of current issues.

615-C33-0 Cable Communications  Legal, technical, and programming aspects of cable and satellite communications. Services offered by existing systems and the complexities of developing systems.

615-C34-0 Television in Education  Uses, potentialities, current developments in educational media, including noncommercial educational media stations and media in the schools.

615-C41-0 Technological Innovations  How technology develops and is assimilated into mass media.

615-C42-0 Program Planning and Programming  Programming the broadcast station in relation to audiences, markets, coverage, station policies, facilities.

615-C43-0 Political Economy of Mass Media  Issues related to media industries, market structure and power, ownership and control, global dimensions and public policy.

615-C44-0 Program Distribution and Promotion  Analysis of network program distribution, syndication, cable distribution, and how series are promoted; how a station programmer makes decisions.

615-C45-0 Film As Business  American film industry’s structure, policies, and relations with foreign governments and other segments of the entertainment business, including financing, distribution, and exhibition.

615-C49-1,2 Internship in Radio/Television/Film  1-3 units) Selected students work in production departments of radio and television stations and film studios. Guided research and reading.

615-C51-0 National Cinema  Historical aspects of cinema in a culture outside the United States or a social/cultural/intellectual movement within the general evolution of cinema.

615-C53-0 National Mass Media  The problem of creating a distinct national cultural identity through mass media; specific nations as case studies.

615-C55-0 Audience Analysis  Methods used to analyze electronic media audiences, with emphasis on quantitative research techniques.

615-C60-0 Radio/Television/Film Dramatic Writing I  Introduction to forms, techniques, and types of dramatic screenplay and television writing. Lecture/Workshop.

615-C61-0 Radio/Television/Film Dramatic Writing II  Workshop in dramatic writing for the media, culminating in completion of full-length script. Prerequisite: C60.
615-C79-0 Topics in Film/Video/Audio Production
In-depth study and practice of one area of film, video, or television. May be taken more than once for credit, depending on changes in topic. Prerequisites: C80 and C81.

615-C80-0 Film Production
Techniques and technologies of 16mm filmmaking from initial conception to completed motion picture. Lecture/laboratory.

615-C81-0 Video Production
Techniques and technologies of professional video; single-camera shooting and multisource editing. Lecture/laboratory.

615-C83-0 Radio/Audio Production
Techniques and technologies of audio production, emphasizing location recording. Survey of techniques used for film, video, experimental audio, and radio production. Postproduction includes work with a digital audio workstation. Lecture/laboratory.

615-C85-0 Integrated Media Arts
Introduction to theory and practice of media using microcomputers. For non-majors; an elective in the Integrated Arts Program.

615-C90-0 Dramatic Directing
Introduction to film and video single camera directing techniques. Emphasis on the technical aspects of directing. Prerequisites: C80 and C81.

615-C91-0 Television Studio Directing
Directing, crewing, and technical skills for multiple camera live-on-tape television production in narrative and non-narrative genres; preproduction, directorial communication, blocking, pacing, visualization. Prerequisite: C80 or C81.

615-C92-0 Documentary Production
Techniques for film and video, emphasizing preproduction planning, documentary techniques, and ethics. Prerequisites: C13-1 and C80 or C81.

615-C93-0 Computer Animation
Study and practice of two-dimensional computer graphics and animation.

615-C94-0 Experimental Film and Video Production
Production experience in the making of art film or video; tapes, films, or installations that work outside established genres. Prerequisites: C23-2 and C80 or C81.

615-C98-0 Symposium: Issues in Radio/Television/Film
Special issues and topics in the analysis of radio, television, film, and popular culture.

615-C99-0 Independent Study
Prerequisite: consent of associate dean after submission of petition.

Theatre
Students who major in theatre at Northwestern combine a liberal arts education with intensive training in the theories and arts of the theatre. At the heart of the theatre program lies the idea that the best theatre artist is the one who combines a broad knowledge of the literature and theory of the field with highly developed skills in its practice. With the aid of an adviser, theatre majors select courses from three general areas of theatrical training: acting/directing/dance, design/technical, and history/literature/criticism. On completion of the introductory courses, students proceed to more intensive and more highly specialized courses, continually supplementing scholarly training with the discipline and challenge of performance.

The principal laboratories for student work are the Theatre and Interpretation Center presentations during the academic year and the Summer Theatre Festival. Both offer subscription seasons to a large and demanding audience. The Theatre and Interpretation Center mounts a series of plays, usually three each quarter, during the regular term. Children’s Theatre productions are offered also during the academic year and in the summer. Many plays, including studio theatre productions, are produced each quarter—directed, designed, and performed by students.

A major in dance is also available within the Department of Theatre. The dance major prepares students for further advanced academic work or apprentice-level positions in professional dance. The major’s comprehensive curriculum emphasizes the study of dance as well as the art of dancing. Students are prepared for lifetime involvement in dance and for continued development intellectually, artistically, and professionally within the dance world. The program provides students with opportunities to write about, research, and analyze the field and to study choreography and technique. The major presents a well-integrated view of dance while also providing sound technical training. The students are exposed to a variety of forms, with modern dance and jazz as the foundation techniques. The department supports the Dance Ensemble and DanceWorks as well as self-produced dance concerts.

Requirements for a Major in Theatre

- Introductory courses
  630-A40-1,2; 630-A19 (three quarters, no credit);
  2 courses from the following: 601-A01, 601-A02, 601-A03, 601-A10
- Noncredit dance or physical education courses: three quarters from a selected list
- B- and C-level courses: a minimum of 5 courses at the B level and 5 courses at the C level or above in theatre, with at least 3 courses from each of the following groups:

  **Performance**
  630-B10 Training the Actor’s Voice
  630-B43-1,2,3 Acting I: Principles of Characterization
  630-C39 Advanced Acting (see Summer Session catalog)
  630-C40-1,2 Stage Directing
  630-C41-1,2,3 Acting II: Analysis and Performance
  630-C59 Directing for the Open Stage (see Summer Session catalog)

  **Design/Technology**
  630-B40-1,2,3 Stagecraft
  630-B41-1,2,3 Design Process
  630-B49 Stage M anagement
  630-C53 Topics in Stagecraft
630-C54-1,2,3 History of Costume and Decor (1 unit only)
630-C55 Scene Painting
630-C63 Theatre Sound

**History, Literature, and Criticism**
Two courses from the following sequences:
- 630-B44-1,2 Development of Contemporary Theatre
- 630-C45-1,2,3 History of Western Theatrical Practice
- Comparative Literary Studies C62-1,2,3 Modern Drama
- 630-C67 History of the Lyric Theatre
- 631-B30 History of the Dance
- 631-C30 Dance Criticism
- 630-C65 American Theatre and Drama
- 630-C07-1,2 Studies in Gender and Performance
- 630-C07 Studies in Gender and Performance
- One additional course from the following:
  - 630-C66; Comparative Literary Studies B03, C12;
  - Hispanic Studies 463-C21, C42; German B10-1;
  - Slavic Languages and Literatures C18
- Courses outside speech: 6 courses at the B level or above, including at least 3 courses at the C level or above (courses taken to meet the distribution requirement may be used)
- Electives: note the School of Speech 18-unit requirement (see General Requirements)

**Requirements for a Major in Dance**
- Introductory courses: A30-1,2,3; A19 (two quarters, no credit); 1 course from the following: 601-A01, A02, A03, A10
- B- or C-level Speech courses: 3 courses
- Noncredit technique course: at least 1 course/quarter
- At least 9 courses chosen from the following categories, with a minimum of 3 courses from each category:
  **Performance**
  - 631-A33 Movement for the Stage
  - 631-B32 Dance Composition
  - 631-B33 Choreography for the Musical Stage
  - 631-C32 Improvisation for Dance, Music, and Theatre
  - 631-C33 Dance and Music: Studies in Collaboration
  - 631-C34 Advanced Choreographic Study
  **History, Theory, and Criticism**
  - 631-B30 History of the Dance
  - 631-B31 Period Dance and Historical Movement Styles
  - 631-C30 Dance Criticism
  - 631-C35 Special Topics in Dance Research (methods or history topics)
  - CAS dance history/theory courses
  **Professional Studies**
  - 631-C31 Summer Dance Institute (see Summer Session catalog)
  - 631-C35 Special Topics in Dance Research (dance science/medicine, design for dance)
  - 631-C36 Labanotation, Elementary Level

631-C37 Dance and Expressive Arts Therapies
631-C71 Dance in Education
Crew: three units following A19

**Theatre**

**Courses Primarily for Freshmen and Sophomores**
630-A19-0 Production Laboratory Registration for students fulfilling production requirements.
630-A40-1,2 Theatre in Context
1. Combination of lecture, discussion, workshop, assignments, production lab, and play viewing. Text analysis taught with a view toward stage production. Opportunities for students to try different roles (acting, directing, technical).
2. Seminar in three sections emphasizing theatre history, literature, and criticism; research; and writing skills.
630-A43-0 Acting Basic Techniques For nonmajors.
Sensory and spatial awareness, concentration, relaxation, basic stage action. Prerequisite: consent of instructor.
630-B10-0 Training the Actor’s Voice Three actions—structural, tonal, and consonant. Individual practice sessions. Script analysis and discovery of subtext through use of actions. Prerequisites: A40-1,2 or equivalent.
630-B40-1,2,3 Stagecraft Craft and technology used in mounting a theatrical production. Participation in department productions.
1. Lighting: mechanics, physics, and practices of the stage lighting technician.
2. Scenery: construction, rigging, and handling.
3. Costumes: sewing techniques, fitting, tools, and fabrics. Prerequisite: sophomore standing or consent of instructor.
630-B41-1,2,3 Design Process Responsibilities of the theatrical designer, from initial reading of the script to production realization. Participation in department productions.
1. Scene design I.
2. Costume design I.
3. Lighting design I. Prerequisite: sophomore standing or consent of instructor.
630-B42-0 Stage Makeup Theory and practice of stage makeup. Lecture/laboratory. Prerequisite: consent of instructor.
630-B43-1,2,3 Acting I: Principles of Characterization
1. Basic concepts.
2. Characterization in scene study.
3. Ensemble and advanced scene study. Prerequisites: A40-1,2 or equivalent; consent of instructor.
630-B44-1,2 Development of Contemporary Theatre Critical study of major dramatists, theories, and production styles.
1. 1870–1920.
2. 1920–present.
630-B49-0 Stage Management Organization and coordination of the theatrical production; role of the stage manager.
630-B53-0 Mime Art of mime: theory and practice. Physical and mental conditioning of the performer, progressing to intensive work in performance concepts. Summer only.
Courses Primarily for Juniors, Seniors, and Graduates

Unless otherwise noted, these courses are open only to students who have completed the departmental B-level requirements or their equivalents.

630-C47-0 Children's Theatre Selection, direction, and production of plays for children.

630-C48-1,2 Creative Drama Principles and practices of improvised drama as a teaching method and a means of learning for the elementary school child. 1. Basic theory through reading, discussion, film, observation, and team-teaching project. 2. Comparison of philosophies and practices of creative drama teachers in England and the United States. Culminates in teaching project. Prerequisite: consent of instructor; C48-1 prerequisite for C48-2.

630-C49-1,2,3 Acting III: Problems in Style Advanced problems in acting theories and styles. 1. Modern technique. 2. Contemporary drama. 3. Special projects in scene study. Prerequisite: consent of instructor.

630-C50-1,2,3 Problems in Advanced Technical Planning Planning, organization, and materials in mounting productions based on contemporary theatrical practice. 1. Engineering drawing techniques; skill development for technicians and designers. 2. Coordination of personnel and material in production. 3. Materials, methods, and equipment employed in contemporary scenic construction. Participation in departmental productions. Prerequisite: junior standing or consent of instructor.

630-C51-0 Staging of Contemporary Drama Production problems peculiar to directing of plays for contemporary theatre. Prerequisite: C40 or equivalent.

630-C52-1,2 Music Theatre Techniques Various performance styles of musical theatre. 1. Early works from the turn of the century through the classical musicals of Rodgers and Hammerstein. 2. Integrated musicals through the development of concept and rock musicals. Prerequisites: junior standing; B43-1,2,3.

630-C53-0 Topics in Stagecraft Seminars with guest or resident faculty on topics in stagecraft.

630-C54-1,2,3 History of Costume and Decor History of costume, accessory, architecture, furniture, and ornamentation. 1. Ancient times to Renaissance. 2. Renaissance to 19th century. 3. 19th century. Participation in departmental productions. Prerequisite: junior standing or consent of instructor.

630-C55-0 Scene Painting Advanced scenic artists' techniques and procedures. Color use for the stage. Approaches established by professional scenic artists. Lab fee; students supply own brushes. Prerequisite: consent of instructor.

630-C56-1,2,3 Graphic Arts for the Stage Designer Projects in the use of calligraphy, color, and styles for
the theatre artist. 1. Drawing and painting. 2. Color, calligraphy, model making; art techniques and practical application of color and material theories. 3. Scene painting; traditional and contemporary theory. Participation in departmental productions. Prerequisite: junior standing or consent of instructor.

630-C57-1,2 Freehand Drawing for the Stage Designer Drawing for scenery, costume, and lighting designers; principles of drawing and composition using a variety of drawing materials. Lecture and studio. Prerequisite: consent of instructor.

630-C61-0 Makeup, Masks, and Wigs Design principles and construction methods used in creating visual accessories to costume design. Participation in departmental productions. Prerequisite: B44-1 or equivalent.

630-C62-0 20th-Century Stage Design Major stylistic developments in 20th-century scenography and scene, costume, and lighting design. Emphasis on the American artist in context of the major influences that have shaped the craft.

630-C63-0 Theatre Sound Planning and execution of sound for the theatrical production; design of the actor’s acoustical environment. Prerequisite: junior standing or consent of instructor.

630-C64-0 Period Pattern Drafting and Draping Techniques of flat pattern drafting and advanced construction required for creating historical garment patterns for the stage. Participation in departmental productions. Prerequisite: junior standing or consent of instructor.

630-C65-0 American Theatre and Drama Major movements and significant dramatists in the history, form, and practice of the American theatre.

630-C66-0 Studies in Individual Dramatic Styles Intensive reading and discussion of selected works of major dramatists; the work’s unique character, imparted by the dramatist’s personal style. Prerequisites: two units of either B44 or C45.

630-C67-0 History of the Lyric Theatre Three-part course, covering the major movements in the histories of dance, opera, and musical comedy. Examination of artists and their works.

630-C68-0 African Theatre and Drama Theatrical and dramaturgic practices outside Western canon; reinterpretations of that canon by African playwrights. Major practices in African theatre and drama, with focus on Nigerian and South African artists. Festival practices, traveling and popular theatres, drama in English, development of appropriate terminology. Prerequisite: C45-1, 2, or 3 or African American Studies B59 or consent of instructor.

630-C74-0 Text Analysis for Theatrical Production Seminar in analysis of dramatic and nondramatic texts as it relates to the problems of realized theatrical production.

630-C76-0 Participation Theatre for Young Audiences Participation and story theatre, incorporating improvisation into the structure of a scripted play for the child audience. Prerequisite: consent of instructor.

630-C80-0 Internship in Theatre Practice (3 units for undergraduates; 2 units for graduates) Full-time participation in production and/or management activities in a theatre company. Prerequisite: consent of department.

630-C99-0 Independent Study Prerequisite: consent of associate dean after submission of petition.

Dance

Courses Primarily for Freshmen and Sophomores

631-A30-1,2,3 Introduction to the Dance Experience Technique, improvisation, lecture, and discussion on dance history and cultural studies. 1. Movement analysis and theories of dance. 2. Studies in dance. 3. Anatomy and kinesiology. Prerequisite: consent of instructor.

631-A33-0 Movement for the Stage Movement/body awareness. Improvisational techniques using time, space, weight, and effort as the performer’s instrument of expression.

631-B30-0 History of the Dance Movement concepts in the major developmental periods of Western ballet and modern dance.

631-B31-0 Period Dance and Historical Movement Movement analysis of Western dance and dance of the pre-classic period. Practical and theoretical understanding of movement styles of the Middle Ages and Renaissance and Baroque periods.

631-B32-0 Dance Composition The choreographic process. Fundamental choreographic elements: time, space, shape, form, dynamics, and design.

631-B33-0 Choreography for the Musical Stage Setting movement/dance for vocalists and actors. Teaching choreography to nondancers and working with large numbers (chorus) on stage.

Courses Primarily for Juniors, Seniors, and Graduates

Unless otherwise noted, these courses are open only to students who have completed the departmental B-level requirements or their equivalents.

631-C30-0 Dance Criticism Critical and theoretical thought of writers on Western theatrical dance.
631-C31-0 Summer Dance Institute  Choreography workshop exploring various dance forms with guest artists. Summer only.

631-C32-0 Improvisation for Dance, Music, and Theatre  Improvisation as a source for performance and composition. Interrelationships of the performing arts. For musicians and actors to expand their knowledge of the vocabulary of dance and for dancers to investigate the musical and theatrical dimensions of their art. Prerequisite: consent of instructor.

631-C34-0 Advanced Choreographic Study  Lecture-laboratory investigation of advanced choreographic concepts; abstraction, style, use of music, group work, humor in dance. Prerequisite: B32 or consent of instructor.

631-C35-0 Special Topics in Dance Research  Research methodologies, dance scholarship, criticism, historical reconstruction. Critical issues and contemporary problems. Content varies. Prerequisite: consent of instructor.

631-C36-0 Labanotation, Elementary Level  Scientific system of notating movement; observation, analysis, accurate recording.

631-C37-0 Dance and Expressive Arts Therapies  Dance and the creative arts therapies in the treatment of the disabled and emotionally ill. Symbolic meaning, group dynamics, and the language of movement as it relates to personality, body image, and expression. Prerequisite: consent of instructor.

631-C71-0 Dance in Education  Organizing and teaching dance for children and adolescents. Creative play, movement exploration, acquisition of basic motor skills. Lecture, laboratory, field experiences.
Other Undergraduate Programs

Integrated Arts Program
The interschool Integrated Arts Program offers courses that explore the creative process from the perspective of the artist in the disciplines of theater, visual arts, music, dance, and media arts. Students participate in lecture/discussion and studio courses crossing the boundaries of the traditional arts and involving collaboration between different art forms. They work in this program with a faculty of artists and scholars from the College of Arts and Sciences, the School of Music, and the School of Speech.

The curriculum also features courses in different disciplines that take art as their subject, e.g., sociology and the arts, philosophy and the arts, communication studies and the arts. Many courses are team-taught to provide the double perspective of practitioner and scholar. Integrated arts courses examine the creative process in relation to the artist, media, artwork, and audience. The program’s goals are to create a climate conducive to the making and understanding of art and to enhance the general liberal arts education of its students.

Additional information about the Integrated Arts Program is available from the office of the Integrated Arts Program, the CAS Office of Studies, and the dean’s offices in the Schools of Music and Speech.

Minor in Integrated Arts
Students who satisfactorily complete seven courses qualify for the minor in integrated arts. Five of the seven are the program’s core courses; two are drawn from a list of electives. Core courses cannot be taken for P/N credit. No background in visual arts, music, theater, or dance is required. Some Integrated Arts Program courses satisfy distribution requirements of the College of Arts and Sciences, the School of Music, and the School of Speech. Students applying for the minor in integrated arts must show a minimum of five courses not double-counted in any other major(s).

Core courses: A90; two chosen from B91-1, B91-2, B91-3, B91-4; and (to be taken after completing two C-level electives) C90-1 and C90-2.

Elective courses: Art History C95; Art Theory and Practice C72; Communication Studies C78; Comparative Literary Studies C65; English C12; Musicology C36; Performance Studies C26-1,2; Radio/Television/Film C85; Sociology C50; Dance C32, C33. A list of other approved elective courses is available in the program office.

Courses
482-A90-0 Art Process Team-taught foundational introduction to common concerns in the arts (theater, art, music), using the analytic paradigm of artist/media/artwork/audience to understand the creative process. Lecture/discussion and studio format. Visits to theaters, concerts, and galleries.

482-B91-1 Modes of Theater Introduces the modes of theater and tools for their analysis through studio exercises and assignments. Performance from dramatic and nondramatic texts. Lecture/studio format. Prerequisite: A90 or permission of instructor.

482-B91-2 Modes of Art Team-taught. Introduces the elements of visual perception through thematic study of important examples of world art combined with related creative work in varied media. Lecture/studio format. Prerequisite: A90 or permission of instructor.

482-B91-3 Modes of Music Introduces the basic vocabulary of music so that students can analyze, create, and compose music in significant musical forms. Prerequisite: A90 or permission of instructor.

482-B91-4 Modes of Dance Team-taught. Introduces dance, the elements of choreography, and dance literacy; develops skills in oral and written communication about dance; and analyzes dance works in their unique contexts. Lecture/discussion and studio format with readings, videos, and films. Prerequisite: A90 or permission of instructor.

482-C90-1 Performance Seminar Team-taught. Culmination of experiences and study of the previous courses in the Integrated Arts Program. Creates a final ensemble presentation integrating theater, art, and music and examines its design, direction, and production outside conventional institutional boundaries. Prerequisites: two B91 courses and two C-level electives or permission of instructor.

482-C90-2 Toward a Theory of the Arts Investigates the theoretical implication of the Integrated Arts Program paradigm of artist/media/artwork/audience. Examines fundamental texts and aesthetic issues; the arts and symbolic structures; and art and audience. Prerequisite: C90-1 or permission of instructor.
International Studies Program

International studies is an undergraduate major with two special features: it is not situated in any one school but is open to students in all schools, and it does not replace any other major but complements it as an adjunct major that may be taken only in conjunction with a departmental major.

Through an integrated combination of area studies, comparative studies, and international relations, the international studies major describes our interconnected world system and addresses such issues as how the contemporary world is politically structured and economically organized; what social problems, policy issues, and ethical choices confront us as individual and collective participants in the world system; and how cultural diversity, conflict, diffusion, and exchange characterize the world system and shape responses to it. In addition to inquiring into larger conceptual issues, students focus on the history, art, literature, music, beliefs, and social systems of one particular geographical/cultural region.

Program of Study

Eleven quarter-courses are required for the major as well as proficiency in a language other than English at a level equivalent to two full years of instruction. Three of the courses are a yearlong core sequence; three are core electives; four are regional (area studies) electives; and one is an upper-level seminar or research project.

Core sequence: B01-1,2,3

Core electives (one from each of the following three groups):

• International politics and economics: Political Science B40, C40, C42, C45, C72; Economics C05, C06, C25
• Approaches to culture: Anthropology B11, B15; Performance Studies B16; Linguistics B09, C10; Religion A10
• Approaches to international ethics and cooperation: B02

Regional electives: four quarter-courses concerning either one geographical area listed below or a comparative category with designated courses. Students choose one course from each of the thematic groups, also listed below; if no course is available for a combination of area and group, students may, in consultation with a program adviser, substitute a course from another thematic group. Advisers have the lists of appropriate courses.

• Geographical areas: Africa, Asia, Europe, Latin America, Mideast East, and the nongeographical comparative area
• Thematic groups: historical studies, literature, the arts, and beliefs and social systems

Upper-level seminar or research project: Each year several options are offered through International Studies or other departments. Students may do an independent research project (C99) based on a proposal approved in advance by their international studies adviser.

Advising: Each student’s major has a different combination of courses. Because international studies majors must show a minimum of nine courses not double counted in any other major(s), students should see an international studies adviser when designing their program.

Courses

495-B01-1,2,3 Introduction to the World System

Three-quarter sequence investigating the origins and nature of contemporary global economic, political, and cultural interdependence. The first two quarters concern the historical evolution of the international system with focus on state formation, the rise of markets, and the creation of the interstate system. The third quarter highlights 20th-century problems. 1. Origins of the global system.
2. International system in the 18th and 19th centuries.

495-B02-0 International Ethics Components of the naval organization, its use and function in the Department of the Navy and Armed Forces of the United States.

495-C99-0 Independent Research Advanced research carried out under the supervision of a professor in a department related to the area of study. Consent of the director of the undergraduate’s major required, following submission of a written proposal.

Military Studies Programs

The military studies programs are not departments of any school; they are administered by the Office of the Provost.

Naval Science

The Northwestern University Naval Reserve Officers Training Corps (NROTC) Unit was established in 1926 by congressional authorization when Northwestern became one of the original six universities to create a naval science department. The professor of naval science (PNS), who chairs Northwestern’s Department of Naval Science, and department faculty members are commissioned officers serving on active duty in the United States Navy or Marine Corps. They are selected and nominated by their respective services and screened and approved by the University. The unit is located at 617 Haven Street, Evanston, Illinois 60208-4140, phone 847/491-3324.

Naval ROTC Programs

The Naval Reserve Officers Training Corps offers young men and women the opportunity to obtain leadership and management experience as commissioned officers in the United States Navy (Navy option) or Marine Corps (Marine Corps option) after graduation from Northwestern, through either the Scholarship Program or the non-scholarship College Program.

At Northwestern, NROTC midshipmen lead essentially the same campus life as other students. They make
their own arrangements for room and board and participate in campus activities of their choice. There are no prescribed academic majors for NROTC students, although scientific and technical studies are encouraged. NROTC students are required to complete the naval science curriculum, attend a weekly two-hour laboratory, and participate in four to six weeks of active duty for summer training at sea or ashore. NROTC students are required to abide by the Midshipmen Regulations issued by the unit. Under certain conditions, students may enroll in the NROTC Program at any time from the beginning of their freshman year until the end of their sophomore year.

Courses
In addition to the required courses listed below, participants in the NROTC program must satisfactorily complete a number of other courses prescribed by the Department of the Navy, which are offered by other departments of the University. Current information on those course requirements is available from the NROTC unit.

With the exception of A10, Northwestern credit is granted for the successful completion of naval science courses subject to limitations imposed by the responsible University faculty committee and by the undergraduate schools. For more information on credit availability, consult the dean of each school. Naval science courses are open to non-NROTC students with department approval. Courses with an asterisk (*) are not required for Marine Corps option students.

937-A10-0 Introduction to Naval Science Components of the naval organization, its use and function in the Department of the Navy and Armed Forces of the United States.

937-A20-0 Seapower and Maritime Affairs A survey of U.S. naval and maritime history in the context of world maritime development, including the historical evolution of sea power and the role of U.S. naval forces in an era of geopolitical change.

937-B10-0 Marine Navigation The theory underlying marine navigation. Basic piloting; dead reckoning, terrestrial lines of position, set and drift, extensive chart work; elements of celestial navigation; solution of the navigational triangle; use of the sun, moon, stars, and planets in position finding at sea; actual sextant observations of the sun/moon (weather permitting).

937-B20-0 Naval Ship Systems II (Naval Weapons Systems) Theory and concepts of naval weapon systems. Ballistics of both powered and free-flight modes in single or multiple environments; theory of target acquisition, identification and tracking; command and control systems. Development of ability to analyze, synthesize, and critically evaluate representative naval weapons systems.

937-C31-0 Naval Operations Consists of several distinct segments. Students examine or practice rules of the nautical road, use of the maneuvering board, deck seamanship, basic shiphandling theory, and weather systems.

937-C36-0 Evolution of Warfare (Marine option only) Evolution of warfare from the Alexandrian period to the present; broad coverage of history of warfare. Actions and decisions of opposing commanders evaluated in terms of classic theoretical principles of war.

937-C41-0 Naval Leadership and Management Final development of students’ managerial, professional, and ethical competencies. Preparation for personal and professional responsibilities in human resources management, personnel management, material management, division discipline, and administrative responsibilities of the junior officer.

937-C45-0 Naval Ship Systems I (Naval Engineering) Introduction to thermodynamics and basic power cycles used in naval propulsion and nonpropulsion auxiliary systems. Basics of electrical theory and shipboard electrical systems. Elements of ship design to achieve safe operations and ship stability characteristics.

937-C46-0 History of Amphibious Warfare (Marine option only) Evolution of amphibious warfare; development of amphibious concepts and principles. Major amphibious operations from Gallipoli to present.

937-C50-0 Naval Science Laboratory One two-hour lab weekly, required each quarter for all midshipmen. Emphasizes professional development and skills as well as drill and physical fitness.

Aerospace Studies
Northwestern students may participate in the programs of the Air Force Reserve Officers Training Corps through a cross-enrollment agreement with the Illinois Institute of Technology (IIT). Within the limits of the Northwestern school in which the student is registered, credits earned in approved aerospace studies courses at IIT may be counted toward the degree requirements at Northwestern. Further information can be obtained from Air Force ROTC Detachment 195, Illinois Institute of Technology, 10 West 31st Street, Chicago, Illinois 60616, phone 312/567-3525.

Military Science
Northwestern students may participate in the programs of the Army Reserve Officers Training Corps through a cross-enrollment agreement with the University of Illinois at Chicago (UIC). Within the limits of the Northwestern school in which the student is registered, credits earned in approved military science courses at UIC may be counted toward the degree requirements at Northwestern. Further information can be obtained from the Department of Military Science, University of Illinois at Chicago, 115 South Sangamon Street, Chicago, Illinois 60607, phone 312/996-3451.
Music Theatre Program
The Certificate in Music Theatre provides the opportunity for School of Music students majoring in voice and School of Speech students majoring in theater to create a second area of specialization that is important to their development as musical theater artists. For voice majors, the program provides training in acting and other theater courses. Theater majors have weekly voice classes and exposure to other music offerings.

The prescribed sequence of courses is only open to students accepted into the program through audition. The auditions are held annually in the spring quarter and are limited to freshman and sophomore theater and voice majors. Auditioners are required to perform a vocal selection and a monologue and to participate in a dance audition.

Certificate Requirements for Voice Majors
Voice majors must take seven units of credit and four noncredit courses:
• Theatre B43-1,2,3 Acting I: Principles of Characterization (3 units)
• Theatre C52-1,2 Music Theatre Techniques (2 units)
• Theatre C67 History of the Lyric Theatre (1 unit)
• Design or dance elective (1 unit)
• Theatre A19 Production Laboratory (one quarter, no credit)
• Dance (3 classes, no credit)

Certificate Requirements for Theatre Majors
Theatre majors must take seven units of credit and six noncredit courses:
• Music 570-A02 Beginning Voice (1.5 units)
• Music 510-A27 Keyboard Skills (1 unit)
• Music 570-B02 Voice Performance: Musical Theatre (1.5 units)
• Theatre C52-1,2 Music Theatre Techniques (2 units)
• Theatre C67 History of the Lyric Theatre (1 unit)
• Dance (minimum of 6 classes, no credit)

Undergraduate Leadership Program
The Undergraduate Leadership Program is an interschool certificate program open to all Northwestern undergraduates. The program helps students understand the nature of leadership and prepares them to become leaders on campus, in the community, and in their professions. Through course work, small group activities, seminar discussions, lectures, off-campus retreats, and involvement in campus and community organizations, participants learn the theories of leadership, experience the challenge of leading others, and create a sense of community with each other and members of participating organizations.

Certificate Requirements
The program combines theoretical, historical, practical, and experiential knowledge into a two-phase course of study. In the first phase, freshmen and sophomores begin the program by first attending an experiential leadership retreat and then taking two required courses on leadership. After successfully completing both courses, students apply to enter the second phase. The activities in the second phase are primarily extracurricular and include a community connections retreat, seminars, lectures, mentoring, and externships.

The Office of the Provost awards a certificate to each student who successfully completes both phases of the Undergraduate Leadership Program, usually by the end of the junior year. Beyond the formal program, certificate holders may draw on their course work and experiences to enrich community life at Northwestern and in the surrounding community, fulfilling the program's goal of engaging constructively in civic and professional leadership activities.

Courses
The following courses are required for the first phase of the Undergraduate Leadership Program. Speech B04 offers conceptual models of leadership and experience in leading group analyses of case studies, which are videotaped and reviewed by group members. History B95 begins with the view that leaders and leadership are uniquely related to their constituency and their historical context. The course illustrates the consequences of the success or failure of leadership.

601-B04-0 Paradigms and Strategies of Leadership
See Introductory and Related Courses in the School of Speech.

427-B95-0 Leaders in History
See History in the College of Arts and Sciences.

Writing Arts, Center for the
The Center for the Writing Arts was established in 1994 to highlight Northwestern’s strengths in the teaching of writing and to provide a focal point for continuing efforts to fulfill the University’s commitment to excellence in writing. The center sponsors a number of programs, including courses for advanced creative writers taught by distinguished visiting writers-in-residence, innovative writing-intensive courses for freshmen, and a variety of colloquia for the entire campus community on topics related to writing.

Courses
Writing arts courses C01, C02, and C03 are taught by a visiting writer-in-residence. For more information about writing arts courses and admission requirements, consult with a member of the Center for the Writing Arts.
486-A10-1,2 Modes of Writing: Social Order and the Right to Dissent. Moral problem of dissent in society from classical to modern times; writing skills developed through discussion, analysis, and extensive writing assignments. Must take A10-2 in the quarter following A10-1; P/N not allowed. Prerequisite for A10-1: freshman standing; prerequisite for A10-2: A10-1.

486-A11-1,2 Modes of Writing: Self-Sacrifice: The Martyr in History and Fiction. Moral problem of self-sacrifice, ranging from true altruism to that which is a camouflage for self-service and pride. Writing skills developed through discussion, analysis, and extensive writing assignments. Must take A11-2 in the quarter following A11-1; P/N not allowed. Prerequisite for A11-1: freshman standing; prerequisite for A11-2: A11-1.

486-C01-0 The Art of Fiction. Fundamental skills of narrative in the creation of fictional works. Extensive writing exercises. Prerequisites: background in writing, a writing-intensive course, and submission of a manuscript of 5–15 pages.

486-C02-0 The Art of Poetry. Writing of poetry in the light of the poetic, linguistic, and historical tradition. Extensive writing exercises. Prerequisites: serious interest in poetry, a writing-intensive course, and submission of sample poems.

486-C03-0 The Art of Expository Prose. Writing as a fundamental skill in a particular field such as science, law, journalism, literature, or political commentary. Extensive writing exercises. Prerequisites: background in writing, a writing-intensive course, and submission of a manuscript of 5–15 pages.

Alan K. Cubbage, MS, M SJ, Vice President for University Relations
C. William Kern, PhD, Vice President for Research and Graduate Studies
Marilyn McCoy, MPP, Vice President for Administration and Planning
Morteza A. Rahimi, PhD, Vice President for Information Technology
Ronald D. Vanden Dorpel, AM, Vice President for University Development and Alumni Relations
Michael C. Weston, JD, Vice President and General Counsel
Rebecca R. Dixon, MEd, Associate Provost of University Enrollment
Eugene Y. Lowe, PhD, Associate Provost for Faculty Affairs
John D. Margolis, PhD, Associate Provost
Jeremy R. Wilson, PhD, Associate Provost

Office of the Vice President for Student Affairs
William J. Banis, PhD, Director, University Career Services
Margaret C. Brown, MS, Assistant to the Vice President for Student Affairs
Mary K. Desler, PhD, Assistant Vice President for Student Affairs
Mark R. Gardner, MD, Director, Student Health Service
J. William Johnston, MEd, Director, Norris University Center
Gregg A. Kindle, MA, Director, Undergraduate Residential Life

George S. McClellan, BS, Director, Graduate and Off-Campus Housing
G. Garth Miller, BA, Director, Dormitories and Commons Services and Special Events
Karla Spurlock-Evans, MA, Associate Dean and Director, African American Student Affairs
Timothy S. Stevens, PhD, University Chaplain
William C. Tempelmeyer, MS, Director, University Housing

Office of the Associate Provost of University Enrollment
Alan Wolff, BA, Manager, Information Systems Office

Registrar’s Office
Donald G. Gwinn, PhD, University Registrar
Margaret B. Hughes, BA, Associate Registrar
Steve D. Acuña, BA, Assistant Registrar for Records Management
David Klopfenstein, BA, Assistant Registrar for Scheduling and Registration

Financial Aid Office
Carolyn V. Lindley, M A, Director, Financial Aid
Patsy M. Emery, MS, Senior Associate Director
Adina Andrews, MS, Senior Assistant Director
Jessica Shisler, BA, Assistant Director
Judy H. Lefferdink, BA, Assistant Director
Virginia George, BA, Assistant Director
Sandy Jackson, BA, Financial Aid Counselor
Peggy Bryant, Financial Aid Counselor

Undergraduate Admission Office
Carol A. Lunkenheimer, MA, Director, Undergraduate Admission
F. Sheppard Shanley, MA, Senior Associate Director
Jeanne Lockridge, PhD, Senior Associate Director
Allen V. Lentino, PhD, Associate Director of Admission and Financial Aid
Allison Gaines Jefferson, MS, Associate Director
Kurt Ahlm, BS, Assistant Director
Angela Ball, MS, Assistant Director
Charles Cogan, M A, Assistant Director
Worth Gowell, M A, Assistant Director
Elaine Kuuo, BS, Assistant Director
Margaret Miranda, MS, Assistant Director

University Library
David F. Bishop, M SLS, University Librarian
Adele W. Combs, M A, Assistant University Librarian for General Services
Laurel M Inott, AM LS, Assistant University Librarian for Public Services
Diane Perushek, M A, Assistant University Librarian for Collection Management
Harry E. Samuels, M S, Acting Assistant University Librarian for Information Technology
Roxanne J. Sellberg, M LS, Assistant University Librarian for Technical Services

Undergraduate Schools
Each faculty listing that follows shows the highest academic or professional degree and the institution granting the degree. University and College are usually omitted; familiar abbreviations and short forms are used when appropriate. Faculty rank within the department is given. The word also indicates a joint appointment at the same rank in another department. An asterisk (*) before a name indicates a part-time faculty member.

College of Arts and Sciences

Administration
Eric J. Sundquist, PhD
Dean of the College of Arts and Sciences and Professor of English and African American Studies
Michael Dacey, PhD
Senior Associate Dean and Professor of Anthropology and Geological Sciences
Steven L. Bates, PhD
Associate Dean and Lecturer in English

African and Asian Languages Program

Richard Lofquist, PhD
Assistant Dean and Senior Lecturer in Chemistry
Gerald L. Mead, PhD
Assistant Dean and Associate Professor of French and Italian
Michael Sherry, PhD
Assistant Dean for Freshmen and Professor of History
Richard P. Weimer, MA
Assistant Dean

African American Studies
Charles M. Payne (PhD Northwestern)
Associate Professor and Chair; also Sociology, Education and Social Policy
Leon Forrest (Chicago)
Professor; also English
Michael Hanchard (PhD Princeton)
Associate Professor; also Political Science
Aldon D. Morris (PhD SUNY Stony Brook)
Professor; also Sociology, Institute for Policy Research
Sandra L. Richards (PhD Stanford)
Associate Professor; also Performance Studies, Theatre
Fannie T. Rushing (PhD Chicago)
Lecturer
Diana T. Slaughter-Defoe (PhD Chicago)
Professor; also Education and Social Policy, Institute for Policy Research
Eric J. Sundquist (PhD Johns Hopkins)
Professor; also English; Dean, College of Arts and Sciences

African and Asian Languages Program
Richard Lofquist (PhD Wisconsin)
Lecturer and Director
Muhammad S. Eissa (PhD Al-Azhar)
College Lecturer
Edna G. Grad (PhD Texas)
College Lecturer
Li-Cheng Gu (PhD Oregon)
Lecturer
Wen-hsiung Hsu (PhD Chicago)
College Lecturer
Hong Jiang (M Ed Cincinnati)
Lecturer
Kiyomi Kagawa (M A Illinois)
Lecturer
Eunmi Lee (BA Konkuk)
Lecturer
Phyllis I. Lyons (PhD Chicago)
Associate Professor
Junko Sato (M Ed Massachusetts)  
Lecturer  
Yumi Shiojima (M Ed Pennsylvania)  
Lecturer  
Noriko Taira (BA Massachusetts)  
Lecturer  

**Anthropology**  
Timothy Earle (PhD Michigan)  
Professor and Chair  
Caroline H. Bledsoe (PhD Stanford)  
Professor  
James A. Brown (PhD Chicago)  
Professor  
Michael F. Dacey (PhD Washington)  
Professor; also Geological Sciences; Senior Associate Dean, College of Arts and Sciences  
Micaela diLeonardo (PhD Calif Berkeley)  
Associate Professor; also Women’s Studies  
Malc Dacey (PhD Washington)  
Professor; also Geological Sciences; Senior Associate Dean, College of Arts and Sciences  
Micaela diLeonardo (PhD Calif Berkeley)  
Associate Professor; also Women’s Studies  
Michael F. Dacey (PhD Washington)  
Professor; also Geological Sciences; Senior Associate Dean, College of Arts and Sciences  

**Art History**  
Sandra Hindman (PhD Cornell)  
Professor and Chair  
S. Hollis Clayson (PhD UCLA)  
Associate Professor; Associate Dean, Graduate School  
Whitney Davis (PhD Harvard)  
Arthur Andersen Teaching and Research Professor; Director, Alice Berline Kaplan Center for the Humanities  

Diane Dillon (PhD Yale)  
Assistant Professor  
Sarah Fraser (PhD Calif Berkeley)  
Assistant Professor  
David Mickenberg (M A Wisconsin Milwaukee)  
Lecturer; Director, Mary and Leigh Block Gallery  
Ikem S. Okoye (M Sc London)  
Assistant Professor  
Larry Silver (PhD Harvard)  
Professor  
Michael Stone-Richards (PhD London)  
Assistant Professor  
David T. Van Zanten (PhD Harvard)  
Professor  
Otto K. Werckmeister (PhD Berlin)  
Mary Jane Crowe Distinguished Professor of Art History  

**Art Theory and Practice**  
William Conger (MFA Art Institute Chicago)  
Professor and Chair  
Daniel J. Devening (MFA Illinois)  
Lecturer  
Judy Ledgerwood (MFA Art Institute Chicago)  
Assistant Professor  
Ed Paschke (MFA Art Institute Chicago)  
Professor  
James R. Valerio (MFA Art Institute Chicago)  
Professor  
James Yood (MFA Chicago)  
Lecturer  

**Biochemistry, Molecular Biology, and Cell Biology**  
Richard I. Morimoto (PhD Chicago)  
Professor and Chair  
Amy Bejsovec (PhD Wisconsin)  
Assistant Professor  
Lawrence B. Dumas (PhD Wisconsin)  
Professor; Provost, Northwestern University  
J. Douglas Engel (PhD Oregon)  
Owen L. Coon Professor of Molecular Biology  
Richard F. Gaber (PhD Wisconsin)  
Associate Professor  
Erwin Goldberg (PhD Iowa)  
Professor  
Linda Hicke (PhD Calif Berkeley)  
Assistant Professor  
Brian M. Hoffman (PhD Caltech)  
Professor; also Chemistry
Biological Sciences, Undergraduate Program in

Robert A. Holmgren (PhD Harvard)
Associate Professor and Director; also Biochemistry, Molecular Biology, and Cell Biology, Neurobiology and Physiology

John S. Bjerke (PhD Wisconsin)
Senior Lecturer

Robert W. Ellington (BA Barat)
Lecturer

Gary J. Galbreath (PhD Chicago)
College Lecturer and Associate Director

Neil E. Welker (PhD Case Western Reserve)
Professor; also Biochemistry, Molecular Biology, and Cell Biology, Chemistry

Chemistry

James A. Ibers (PhD Caltech)
Charles E. and Emma H. Morrison Professor of Chemistry and Chair

Joyce C. Brockwell (PhD Indiana)
Senior Lecturer

Barry Coddens (PhD Wayne State)
Lecturer and Director of Undergraduate Studies

Donald E. Ellis (PhD MIT)
Professor; also Physics and Astronomy

Hilary Arnold Godwin (PhD Stanford)
Assistant Professor

Brian M. Hoffman (PhD Caltech)
Professor; also Biochemistry, Molecular Biology, and Cell Biology

Joseph T. Hupp (PhD Michiigan State)
Professor

Martin F. Jarrold (PhD Warwick)
Professor

C. William Kern (PhD Minnesota)
Professor; Vice President for Research and Graduate Studies, Northwestern University

Harold J. Kung (PhD Northwestern)
Professor; also Chemical Engineering

Joseph B. Lambert (PhD Caltech)
Clare Hamilton Hall Professor of Chemistry

Frederick D. Lewis (PhD Rochester)
Professor

Scott A. Ness (PhD UCLA)
Assistant Professor

Francis C. Neuhaus (PhD Duke)
Professor

Thomas V. O’Halloran (PhD Columbia)
Professor; also Chemistry

Susan K. Pierce (PhD Pennsylvania)
Professor

Amy Rosenzweig (PhD MIT)
Assistant Professor

Richard B. Silverman (PhD Harvard)
Professor; also Chemistry

Angela U. Wandinger-Ness (PhD UCLA)
Assistant Professor

Neil E. Welker (PhD Case Western Reserve)
Professor; also Biological Sciences, Chemistry

*Edwin M. Westbrook (M D, PhD Chicago)
Associate Professor (Argonne National Laboratory)

Jonathan Wodin (PhD Stanford)
Associate Professor; also Chemistry

Tai Te Wu (PhD Harvard)
Professor; also Biomedical Engineering

Administration and Faculty • Arts and Sciences
Robert J. Loyd (MS Oklahoma State)
Lecturer and Manager, Research Instrumentation

Tobin J. Marks (PhD MIT)
Charles E. and Emma H. Morrison Professor of Chemistry; also Materials Science and Engineering

Frank E. Mcdonald (PhD Stanford)
Assistant Professor

Chad A. Mirkin (PhD Penn State)
Associate Professor

SonBinh Nguyen (PhD Caltech)
Assistant Professor

Frederick J. Northrup (PhD Toronto)
Lecturer

Thomas V. O’Halloran (PhD Columbia)
Assistant Professor; also Biochemistry, Molecular Biology, and Cell Biology

Kenneth R. Poeppelmeier (PhD Iowa State)
Professor

*John A. Pople (PhD Cambridge)
Board of Trustees Professor of Chemistry

Mark A. Ratner (PhD Northwestern)
Professor

George C. Schatz (PhD Caltech)
Professor

Robert Scott (PhD Northwestern)
Lecturer and Executive Director

Duward F. Shriver (PhD Michigan)
Charles E. and Emma H. Morrison Professor of Chemistry

Richard B. Silverman (PhD Harvard)
Professor; also Biochemistry, Molecular Biology, and Cell Biology

Kenneth G. Spears (PhD Chicago)
Professor; also Biomedical Engineering

Peter C. Stair (PhD Calif Berkeley)
Professor

Richard P. Van Duyne (PhD North Carolina)
Charles E. and Emma H. Morrison Professor of Chemistry

*Michael R. Wasielewski (PhD Chicago)
Professor (Argonne National Laboratory)

Thomas R. Weaver (PhD Northwestern)
Senior Lecturer

Eddie Dekel (PhD Harvard)
Professor

Tim Conley (MA Chicago)
Assistant Professor

Ivan Domowitz (PhD Calif San Diego)
Associate Professor; also Institute for Policy Research

Classics

John Wright (PhD Indiana)
John Evans Professor of the Latin Language and Literature and Chair

Reginald Allen (PhD Yale)
Professor; also Philosophy

Daniel H. Garrison (PhD Calif Berkeley)
Associate Professor

Ahuvia Kahane (PhD Calif Berkeley)
Assistant Professor

Richard Kraut (PhD Princeton)
Professor; also Philosophy

S. Sara M onoson (PhD Princeton)
Assistant Professor; also Political Science

Martin Mueller (PhD Indiana)
Professor; also English

James E. Packer (PhD Calif Berkeley)
Professor

Jeanne Ravid (MA Northwestern)
Lecturer

Robert W. Wallace (PhD Harvard)
Associate Professor

Economics

William P. Rogerson (PhD Caltech)
Professor and Chair

Marcus Alexis (PhD Minnesota)
Board of Trustees Professor of Economics; also Management and Strategy, Institute for Policy Research

Joseph G. Altonji (PhD Princeton)
Professor; also Institute for Policy Research

Ronald R. Braeutigam (PhD Stanford)
Harvey Kapnick Professor of Business Institutions and Charles Deering McCormick Professor of Teaching Excellence; also Transportation Center

Lawrence J. Christiano (PhD Columbia)
Professor

Robert M. Coen (PhD Northwestern)
Professor; also Institute for Policy Research

Rebecca M. Blank (PhD MIT)
Professor; also Institute for Policy Research
Ian P. Savage (PhD Leeds)
Senior Lecturer; also Transportation Center
Christopher Taber (MA Chicago)
Assistant Professor; also Institute for Policy Research
Alan M. Taylor (PhD Harvard)
Assistant Professor
Alberto J. Trejos (PhD Harvard)
Assistant Professor
Christopher Udry (PhD Yale)
Associate Professor
Juuso Valimaki (MBA Helsinki School of Economics)
Assistant Professor
Burton Weisbrod (PhD Northwestern)
John Evans Professor of Economics; Director, Institute for Policy Research
Asher Wolinsky (PhD Stanford)
Professor

English
Betsy Erkkila (PhD Calif Berkeley)
Professor and Chair
Sharon Achinstein (PhD Princeton)
Associate Professor and Charles Deering McCormick Professor of Teaching Excellence
Alfred Appel Jr. (PhD Columbia)
Professor
Steven L. Bates (PhD Princeton)
Lecturer; Associate Dean, College of Arts and Sciences
Paul Breslin (PhD Virginia)
Associate Professor
Pheng Cheah (MA Cornell)
Visiting Instructor
Albert R. Cirillo (PhD Johns Hopkins)
Associate Professor
Douglas Cole (PhD Princeton)
Professor
Tracy Davis (PhD Warwick)
Associate Professor; also Performance Studies, Theatre
M adhu Dubey (PhD Illinois)
Assistant Professor
Joseph Epstein (BA Chicago)
Lecturer
Lawrence G. Evans (PhD Harvard)
Associate Professor
Leon Forrest (Chicago)
Professor; also African American Studies
Christine Froula (PhD Chicago)
Professor
Reginald Gibbons (PhD Stanford)
Professor
Christopher C. Herbert (PhD Yale)  
Professor; Associate Dean, College of Arts and Sciences

Mary Kinzie (PhD Johns Hopkins)  
Professor

Jules David Law (PhD Johns Hopkins)  
Associate Professor

Joanna Lipking (PhD Columbia)  
Lecturer

Lawrence Lipking (PhD Cornell)  
Chester D. Tripp Professor of the Humanities

Susan A. Manning (PhD Columbia)  
Associate Professor; also Theatre

John D. Margolis (PhD Princeton)  
Professor; Associate Provost, Northwestern University

Martín Müller (PhD Indiana)  
Professor; also Classics

Terence Mulcaire (PhD Calif Berkeley)  
Assistant Professor

Barbara J. Newman (PhD Yale)  
Professor; also Religion

Johnny Payne (PhD Stanford)  
Assistant Professor

Catharine Regan (PhD Illinois)  
Associate Professor

Regina Schwartz (PhD Virginia)  
Associate Professor

Carl S. Smith (PhD Yale)  
Charles Deering McCormick Professor of Teaching Excellence; also Institute for Policy Research

Julia Stern (PhD Columbia)  
Assistant Professor

Eric J. Sundquist (PhD Johns Hopkins)  
Professor, also African American Studies; Dean, College of Arts and Sciences

Wendy Wall (PhD Pennsylvania)  
Assistant Professor

**French and Italian**

Michel Ginsburg (PhD Yale)  
Professor and Chair; also German

Albert Ascoli (PhD Cornell)  
Associate Professor

Marie-Thérèse Cunningham (MA Grenoble III)  
Lecturer

Scott Durham (PhD Yale)  
Assistant Professor

Bernadette Fort (Doctorat du Troisième Cycle Paris)  
Professor; also German

Phyllis Horn-Lipparini (MA Northwestern)  
Lecturer

Anne Landau (PhD Northwestern)  
Lecturer

Françoise Lionnet (PhD Michigan)  
Associate Professor

Gerald L. Read (PhD Yale)  
Associate Professor; Assistant Dean, College of Arts and Sciences

William D. Paden (PhD Yale)  
Professor

Concettina Pizzuti (PhD Harvard)  
Senior Lecturer

Christiane Rey (Licence en Droit, Liège)  
Lecturer

Alessia Ricciardi (PhD Yale)  
Assistant Professor

Sylvie Romanowski (PhD Yale)  
Associate Professor

Tilde A. Sankovitch (PhD Northwestern)  
Harold and Virginia Anderson Professor

Jane W. Spencer (PhD Northwestern)  
Senior Lecturer

Claude Tournier (PhD Northwestern)  
Senior Lecturer

Jane Bradley Winston (PhD Duke)  
Assistant Professor

Michael Wyatt (STB Gregorian University)  
Lecturer

**Geological Sciences**

Abraham Lerman (PhD Harvard)  
Professor and Chair

Craig R. Bina (PhD Northwestern)  
Assistant Professor

Finley C. Bishop (PhD Chicago)  
Associate Professor

Michel F. Dacey (PhD Washington)  
Professor; also Anthropology; Senior Associate Dean, College of Arts and Sciences

David Hollander (PhD Swiss Federal Tech)  
Assistant Professor

Donna M. Jurdy (PhD M ichigan)  
Professor

Emile André Okal (PhD Caltech)  
Professor

John W. Rudnicki (PhD Brown)  
Professor; also Civil Engineering, Mechanical Engineering
Raymond Russo (PhD Northwestern)  
Assistant Professor
Bradley B. Sageman (PhD Colorado)  
Assistant Professor
Robert C. Speed (PhD Stanford)  
William Deering Professor of Geological Sciences
Seth A. Stein (PhD Caltech)  
Professor
Johannes Wernert (ScD Carnegie)  
Professor; also Walter P. Murphy Professor of Materials Science and Engineering

German  
Géza von Moinár (PhD Stanford)  
Professor and Chair
William Anthony (PhD Johns Hopkins)  
Senior Lecturer
Kerstin Behnke (M A Illinois)  
Assistant Professor
Volker O. Durr (PhD Princeton)  
Associate Professor
Peter D. Fenves (PhD Johns Hopkins)  
Associate Professor
Bernadette Fort (Doctorat du Troisième Cycle Paris)  
Professor; also French and Italian
Jeffrey B. Garrett (PhD Calif Berkeley)  
Lecturer; also University Library
Michal Ginsburg (PhD Yale)  
Professor; also French and Italian
Peter F. Hayes (PhD Yale)  
Professor; also History
Franziska B. Lys (PhD Northwestern)  
Senior Lecturer and Charles Deering McCormick Distinguished Lecturer
John A. M. Cumber (PhD Toronto)  
Professor; also Philosophy
Helmut Müller-Sievers (PhD Stanford)  
Assistant Professor
Rainer Rumold (PhD Stanford)  
Associate Professor

Hispanic Studies  
Gonzalo Díaz-Migoyo (PhD NYU)  
Professor and Chair
Stewart I. M. Adams (PhD St. Andrews)  
Lecturer
Priscilla Archibald (PhD Stanford)  
Assistant Professor
Patricia Fahey (PhD Wisconsin)  
Lecturer
Dario Fernández-Morera (PhD Harvard)  
Associate Professor
E. Inman Fox (PhD Princeton)  
Professor
Sonia E. Garcia (PhD Texas)  
Senior Lecturer
Elisa Martín López (PhD New York)  
Associate Professor
Humberto E. Robles (PhD Northwestern)  
Professor
Sheri Ann Sanford (PhD Wisconsin)  
Lecturer
Vera R. Teixeira (MPh Yale)  
Lecturer

History  
John R. McLane (PhD London)  
Professor and Chair
Kenneth Alder (PhD Harvard)  
Assistant Professor
Kenneth R. Bain (PhD Texas)  
Senior Lecturer; Director, Searle Center for Teaching Excellence
Josef J. Barton (PhD Michigan)  
Associate Professor
Henry C. Binford (PhD Harvard)  
Associate Professor; also Institute for Policy Research
Timothy H. Breen (PhD Yale)  
William Smith Mason Professor of American History
John S. Bushnell (PhD Indiana)  
Professor
Bruce Cumings (PhD Columbia)  
John Evans Professor of International History and Politics; also Political Science; Director, Center for Comparative and International Studies
Jonathon P. Glassman (PhD Wisconsin)  
Assistant Professor
Adam Green (BA Chicago)  
Instructor
Peter F. Hayes (PhD Yale)  
Professor; also German
Laura E. Heim (PhD Wisconsin)  
Associate Professor
T. William Heyck (PhD Texas)  
Charles Deering McCormick Professor of Teaching Excellence
John O. Hunwick (PhD London)  
Professor; also Religion
David Joravsky (PhD Columbia)  
Professor
Richard Kieckhefer (PhD Texas)  
Professor; also Religion  
Jacob Lassner (PhD Yale)  
Philip M. and Ethel Klutznick Professor of Jewish Civilization; also Religion  
Robert E. Lerner (PhD Princeton)  
Professor  
Tessie P. Liu (PhD Michigan)  
Assistant Professor  
Melissa Macauley (PhD Calif Berkeley)  
Assistant Professor  
Nancy M acLean (PhD Wisconsin)  
Associate Professor and Charles Deering McCormick Professor of Teaching Excellence  
Sarah C. M aza (PhD Princeton)  
Professor  
Joel M okyr (PhD Yale)  
Professor; also Economics  
E. William Monter Jr. (PhD Princeton)  
Professor  
Edward W. M ur (PhD Rutgers)  
Professor  
James Oakes (PhD Calif Berkeley)  
Professor  
Alexandra O wen (PhD Sussex)  
Associate Professor  
Carl F. Petry (PhD Michigan)  
Professor  
John A. Rowe (PhD Michigan)  
Associate Professor  
Frank Safford (PhD Columbia)  
Professor; Associate Dean, College of Arts and Sciences  
M ichael S. Sherry (PhD Yale)  
Professor; Assistant Dean for Freshmen, College of Arts and Sciences  
Garry Wills (PhD Yale)  
Adjunct Professor  

Linguistics  
Beth C. Levin (PhD MIT)  
Professor and Chair  
M ichael Broe (PhD Edinburgh)  
Assistant Professor  
Robert A. Gundlach (PhD Northwestern)  
Professor; Director, Writing Program  
Christopher Kennedy (PhD Calif Santa Cruz)  
Assistant Professor  
Gilbert K. Krulie (PhD MIT)  
Professor; also Psychology, Electrical and Computer Engineering, Industrial Engineering and Management Sciences  
Judith N. Levi (PhD Chicago)  
Associate Professor  
Rae A. M oses (PhD Texas)  
Associate Professor  
Janet Pierrehumbert (PhD MIT)  
Professor  
Beatrice Santorini (PhD Pennsylvania)  
Assistant Professor  
Gregory L. Ward (PhD Pennsylvania)  
Associate Professor  

Mathematics  
R. Clark Robinson (PhD Calif Berkeley)  
Professor and Chair  
M ichael G. Barratt (DPhil Oxford)  
Professor  
Keith H. Burns (PhD Warwick)  
Associate Professor  
Gui-Qiang Chen (PhD Academia Sinica)  
Associate Professor  
Emanuele Di Benedetto (PhD Texas)  
Professor  
Leonard Evens (PhD Harvard)  
Professor  
Stephen D. Fisher (PhD Wisconsin)  
Professor  
John M. Franks (PhD Calif Berkeley)  
Professor  
Eric M. Friedlander (PhD MIT)  
Professor; Associate Dean, College of Arts and Sciences  
George Gasper (PhD Wayne State)  
Professor  
Ezra Getzler (PhD Harvard)  
Associate Professor  
Lawrence J. Henschen (PhD Illinois)  
Professor; also Electrical and Computer Engineering  
Elton P ei Hsu (PhD Stanford)  
Associate Professor  
Tom Ilmanen (PhD Berkeley)  
Assistant Professor  
Joseph W. Jerome (PhD Purdue)  
Professor  
Daniel S. Kahn (PhD MIT)  
Professor  
Ehud Kalai (PhD Cornell)  
Professor; also Management  
Mikhail Kapranov (PhD Steklov)  
Associate Professor  
Chun-nip Lee (PhD Princeton)  
Assistant Professor
Kenneth R. Mount (PhD Calif Berkeley)  
Professor

W. Edward Olmstead (PhD Northwestern)  
Professor; also Engineering Sciences and Applied Mathematics

Mark A. Pinsky (PhD MIT)  
Professor

Stewart B. Priddy (PhD MIT)  
Professor

Stanley Reiter (PhD Chicago)  
Professor; Associate Dean for Undergraduate Studies, College of Arts and Sciences

Andrei A. Suslin (PhD Leningrad)  
Board of Trustees Professor of Mathematics

Daniel Ioan Tataru (PhD Virginia)  
Associate Professor

Vladimir Voevodsky (PhD Harvard)  
Associate Professor

Robert R. Welland (PhD Purdue)  
Associate Professor

Sijue Wu (PhD Yale)  
Assistant Professor

Zhizhong Xia (PhD Northwestern)  
Professor

Sandy L. Zabell (PhD Harvard)  
Professor; also Statistics

**Neurobiology and Physiology**

Fred W. Turek (PhD Stanford)  
Charles E. and Emma H. Morrison Professor of Biology and Chair

Peter Dallos (PhD Northwestern)  
John Evans Professor of Neuroscience; also Audiology and Hearing Sciences, Biomedical Engineering, Otolaryngology

Albert I. Farbman (DM D Harvard, PhD NYU)  
Professor

David L. Ferster (PhD Harvard)  
Professor

Robert A. Holmgren (PhD Harvard)  
Associate Professor; also Biochemistry, Molecular Biology, and Cell Biology; Director, Undergraduate Program in Biological Sciences

David Johnson (PhD London)  
Lecturer and Assistant Chair

William L. Klein (PhD UCLA)  
Professor

Nina Kraus (PhD Northwestern)  
Associate Professor; also Audiology and Hearing Sciences, Otolaryngology

Charles R. Larson (PhD Washington)  
Professor; also Speech and Language Pathology

Jon E. Levine (PhD Illinois)  
Associate Professor

Robert A. Linsenmeier (PhD Northwestern)  
Professor; also Biomedical Engineering

Lawrence H. Pinto (PhD Northwestern)  
Professor

Neena B. Schwartz (PhD Northwestern)  
William Deering Professor of Biological Sciences

Mark A. Segraves (PhD Pennsylvania)  
Associate Professor

Nelson Spruston (PhD Baylor)  
Assistant Professor

Joseph S. Takahashi (PhD Oregon)  
Professor

John B. Troy (PhD Sussex)  
Associate Professor; also Biomedical Engineering

Phyllis Zee (PhD Chicago Medical)  
Assistant Professor; also Neurology

**Philosophy**

Kenneth Seeskin (PhD Yale)  
Charles Deering McCormick Professor of Teaching Excellence and Chair

Reginald Allen (PhD Yale)  
Professor; also Classics

Derrick Darby (MA Pittsburgh)  
Assistant Professor

John Deigh (PhD UCLA)  
Associate Professor

Arthur Fine (PhD Chicago)  
Professor

John Evans Professor of Moral and Intellectual Philosophy

Randolph K. Hill (PhD Illinois)  
Assistant Professor

David L. Hull (PhD Indiana)  
Bertha and Max Dressler Professor of the Humanities

Richard Kraut (PhD Princeton)  
Professor; also Classics

Cristina Lafont (PhD Frankfurt)  
Assistant Professor

David Michael Levin (PhD Columbia)  
Professor
Thomas A. McCarthy (PhD Notre Dame)  
John C. Shaffer Professor of the Humanities; also Communication Studies  

John A. McCumber (PhD Toronto)  
Professor; also German  

Thomas A. Ryckman (PhD Columbia)  
Assistant Professor  

Meredith Williams (PhD NYU)  
Associate Professor  

Michael J. Williams (PhD Princeton)  
Professor  

Physics and Astronomy  
Ronald E. Taam (PhD Columbia)  
Professor and Chair  

Paul R. Auvil (PhD Stanford)  
Associate Professor  

Martin H. Bailyn (PhD Harvard)  
Professor  

David A. Buchholz (PhD Pennsylvania)  
Professor  

Venkat Chandrasekhar (PhD Yale)  
Assistant Professor  

Predrag Cvitanovic (PhD Cornell)  
Professor  

Diane Dutkevitch (M A Rochester)  
Lecturer  

Pulak Dutta (PhD Chicago)  
Professor  

Donald E. Ellis (PhD MIT)  
Professor; also Chemistry  

Lee S. Finn (PhD Caltech)  
Associate Professor  

Arthur J. Freeman (PhD MIT)  
Professor  

Charles E. and Emma H. Morrison Professor of Physics  

Anupam Garg (PhD Cornell)  
Associate Professor  

Bruno Gobbi (PhD Swiss Federal Tech)  
Professor  

William P. Halperin (PhD Cornell)  
Professor  

John B. Ketterson (PhD Chicago)  
Fayerweather Professor of Physics; also Electrical and Computer Engineering  

Liu Liu (PhD Chicago)  
Professor  

David M. Meyer (PhD UCLA)  
Assistant Professor  

Guy Scott Miller (PhD Cornell)  
Assistant Professor  

Robert J. Oakes (PhD Minnesota)  
Professor  

John Peoples (PhD Columbia)  
Professor  

Jerome L. Rosen (PhD Columbia)  
Professor  

James A. Sauls (PhD SUNY Stony Brook)  
Professor  

Heidi Schellman (PhD Calif Berkeley)  
Associate Professor  

Arthur G. Schmidt (PhD Notre Dame)  
Senior Lecturer  

Ralph E. Segel (PhD Johns Hopkins)  
Professor  

Kamal K. Seth (PhD Pittsburgh)  
Professor  

Sara Solla (PhD)  
Professor; also Physiology  

David E. Taylor (PhD Maryland)  
Lecturer and Assistant Chair  

Melville P. Ulmer (PhD Wisconsin)  
Professor  

Farhad Yusef-Zadeh (PhD Columbia)  
Associate Professor  

Political Science  
Jonathan D. Casper (PhD Yale)  
Professor and Chair; also Institute for Policy Research  

Lee F. Anderson (PhD Illinois)  
Professor; also Education and Social Policy  

David Austen-Smith (PhD Cambridge)  
Professor  

Henry S. Bienen (PhD Chicago)  
Professor; President, Northwestern University  

Dennis Chong (PhD Calif Berkeley)  
Associate Professor; also Institute for Policy Research  

Patricia D. Conley (PhD Chicago)  
Assistant Professor  

Bruce Cumings (PhD Columbia)  
Professor; also Institute for Policy Research  

John Evans Professor of International History and Politics; also History; Director, Center for Comparative and International Studies  

H. Paul Friesema (PhD Iowa)  
Professor; also Institute for Policy Research  

Edward L. Gibson (PhD Columbia)  
Assistant Professor  

Jerry Goldman (PhD Johns Hopkins)  
Professor  

Michael J. Hanchard (PhD Princeton)  
Associate Professor; also African American Studies
Kenneth Janda (PhD Indiana)  
Payson S. Wild Professor of Political Science  
  
Marie Thourson Jones (PhD Princeton)  
Lecturer; Associate Dean, College of Arts and Sciences  
  
Michael Loriaux (PhD Princeton)  
Associate Professor  
  
Albert Erlebacher (PhD Wisconsin)  
Associate Professor and Associate Chair  
  
Peter W. Frey (PhD Wisconsin)  
Professor  
  
Wendi Gardner (PhD Ohio State)  
Assistant Professor  
  
Kenneth L. Howard (PhD Chicago)  
Professor; also Psychiatry  
  
Andrew E. Kertesz (PhD Northwestern)  
Professor; also Biomedical Engineering, Electrical and Computer Engineering  
  
Gilbert K. Krulee (PhD MIT)  
Professor; also Linguistics, Electrical and Computer Engineering  
  
Gail McKoon (PhD Colorado)  
Professor  
  
Roger Ratcliff (PhD Auckland)  
Professor  
  
William Revelle (PhD Michigan)  
Professor  
  
Lance J. Rips (PhD Stanford)  
Professor  
  
Jeffrey A. Winters (PhD Yale)  
Associate Professor  
  
Michael Wallerstein (PhD Chicago)  
Professor; also Institute for Policy Research  
  
Aryeh Routtenberg (PhD Michigan)  
Professor  
  
Douglas L. Medin (PhD South Dakota)  
Professor and Chair  
  
J. Michael Bailey (PhD Texas)  
Associate Professor  
  
Max H. Bazerman (PhD Carnegie Mellon)  
J. Jay Gerber Distinguished Professor of Dispute Resolution and Organizations; also Organization Behavior  
  
Galen Bodenhausen (PhD Illinois)  
Associate Professor  
  
Alice H. Eagly (PhD Michigan)  
Professor  
  
Roger C. Schank (PhD Texas)  
John Evans Professor of Computer Science, Psychology, and Education and Social Policy; also Education and Social Policy, Computer Science; Director, Institute for the Learning Sciences
Administration and Faculty • Arts and Sciences

Jeffrey W. Sherman (PhD Calif Santa Barbara)
Assistant Professor
Satoru Suzuki (PhD Harvard)
Assistant Professor
David H. Uttal (PhD Michigan)
Assistant Professor
Sandra R. Waxman (PhD Pennsylvania)
Wender-Lewis Research and Teaching Professor; also Education and Social Policy
Edward J. Wisniewski (PhD Brown)
Assistant Professor

Religion
Richard Kieckhefer (PhD Texas)
Professor and Chair; also History
George D. Bond (PhD Northwestern)
Charles Derling McCormick Professor of Teaching Excellence
John O. Hunwick (PhD London)
Professor; also History
Jacob Lassner (PhD Yale)
Philip M. and Ethel Klutznick Professor of Jewish Civilization; also History
Eugene Y. Lowe (PhD Union Theological)
Senior Lecturer; Associate Provost for Faculty Affairs, Northwestern University
Barbara J. Newman (PhD Yale)
Professor; also English
Benjamin D. Sommer (PhD Chicago)
Assistant Professor
Cristina Traina (PhD Chicago)
Assistant Professor
Manfred H. Vogel (PhD Columbia)
Professor

Slavic Languages and Literatures
Marvin Kantor (PhD Michigan)
Professor and Chair
Carol Avins (PhD Yale)
Associate Professor
Irina Dolgova (PhD Leningrad)
Senior Lecturer
Ilya Kutik (PhD Stockholm)
Assistant Professor
Gary Saul Morson (PhD Yale)
Frances Hooper Professor of the Arts and Humanities
Andrew Wachtel (PhD Calif Berkeley)
Associate Professor
Irwin Wiel (PhD Harvard)
Professor

Sociology
Aldon D. Morris (PhD SUNY Stony Brook)
Professor and Chair; also African American Studies, Institute for Policy Research
Vilna Bashi (PhD Wisconsin)
Visiting Instructor
Bernard Beck (PhD Princeton)
Associate Professor and Assistant Chair
Nicola Beisel (PhD Michigan)
Associate Professor
Bruce G. Carruthers (PhD Chicago)
Associate Professor
Thomas D. Cook (PhD Stanford)
Professor; also Education and Social Policy, Institute for Policy Research
Kenneth W. Dauber (PhD Arizona)
Assistant Professor; also Institute for Policy Research
Georgi Derlugian (PhD New York)
Assistant Professor
Wendy N. Espeland (PhD Chicago)
Assistant Professor; also Institute for Policy Research
Gary Fine (PhD Chicago)
Professor
Ranjay Gulati (PhD Harvard)
Assistant Professor; also Organization Behavior
Gunhild Hagestad (PhD Minnesota)
Associate Professor; also Education and Social Policy
Carol A. Heimer (PhD Chicago)
Associate Professor
John P. Heinz (LLB Yale)
Professor; also Law, Institute for Policy Research
Paul M. Hirsch (PhD Michigan)
Professor; also James L. Allen Distinguished Professor of Strategy and Organizations; also Communication Studies, Newspaper Management Center
Albert Hunter (PhD Chicago)
Professor; also Institute for Policy Research
Orville Lee (MA Calif Berkeley)
Assistant Professor
Charles C. Moskos Jr. (PhD UCLA)
Professor; also Institute for Policy Research
Robert L. Nelson (JD, PhD Northwestern)
Associate Professor; also Institute for Policy Research
Charles M. Payne (PhD Northwestern)
Associate Professor; also African American Studies, Education and Social Policy
Charles C. Ragin (PhD North Carolina)
Professor; also Institute for Policy Research
James E. Rosenbaum (PhD Harvard)
Professor; also Education and Social Policy, Institute for Policy Research
Allan Schnaiberg (PhD Michigan)
Professor; also Institute for Policy Research

Stephen Shortell (PhD Chicago)
Professor; also Health Services Management

Arthur L. Stinchcombe (PhD Calif Berkeley)
John Evans Professor of Sociology

Linda A. Teplin (PhD Northwestern)
Associate Professor; also Psychiatry

Brian Uzzi (PhD New York)
Associate Professor; also Organization Behavior

Marc Ventresca (PhD Stanford)
Associate Professor; also Organization Behavior

James C. Witte (PhD Harvard)
Assistant Professor; also Institute for Policy Research

Edward J. Zajac (PhD Pennsylvania)
Assistant Professor; also Organization Behavior

Statistics
Bruce D. Spencer (PhD Yale)
Professor and Chair; also Education and Social Policy

Shelby Haberman (PhD Chicago)
Professor

Wenxin Jiang (PhD Cornell)
Assistant Professor

Thomas Severini (PhD Chicago)
Associate Professor

Ajitkumar C. Tamhane (PhD Cornell)
Professor; also Industrial Engineering and Management Sciences

Martin A. Tanner (PhD Chicago)
Professor

Sandy L. Zabell (PhD Harvard)
Professor; also Mathematics

Writing Program
Robert A. Gundlach (PhD Northwestern)
Professor and Director; also Linguistics

Marcia B. Gealy (PhD Ohio State)
Senior Lecturer

Penny Hirsch (PhD Northwestern)
Senior Lecturer

Phyllis Lassner (PhD Wayne State)
Lecturer

Frances F. Paden (PhD Northwestern)
Lecturer

Barbara Shwom (PhD Northwestern)
Senior Lecturer

Edith Skom (PhD Northwestern)
Senior Lecturer

Jean R. Smith (MA Northwestern)
Senior Lecturer

Ellen F. Wright (PhD Indiana)
Senior Lecturer

Charles Yarnoff (PhD Northwestern)
Senior Lecturer

School of Education and Social Policy

Administration
Solomon Cytrynbaum, PhD
Acting Dean and Professor

Coleen T. Coleman, M S
Assistant Dean, Finance and Planning

Jean M. Egmon, M A
Assistant Dean

Louis M. Gomez, PhD
Associate Dean for Research and Development

Dan A. Lewis, PhD
Director of Undergraduate Education and Professor

Frances Birndorf, BS
Dean of Undergraduate Students

Faculty
Pamela K. Adelmann (PhD Michigan)
Assistant Professor; also Institute for Policy Research

Lee F. Anderson (PhD Illinois)
Professor; also Political Science

Amy Anson, (PhD Northwestern)
Senior Lecturer

Mary J. Barr (PhD Texas)
Associate Professor; also Institute for the Learning Sciences

Margaret J. Barr (PhD Texas)
Associate Professor; also Institute for the Learning Sciences

Ray Baressi (PhD Texas)
Associate Professor; also Institute for the Learning Sciences

Robert Boyle (PhD NYU)
Lecturer; Director, Field Experience
Douglas Breunlin (MS Case Western Reserve)  
Associate Professor; also Family Institute  
Ava Carn-Watkins (PhD Northwestern)  
Lecturer  
Allan M. Collins (PhD Michigan)  
Professor; also Institute for the Learning Sciences  
Donald E. Collins (M A Hofstra)  
Professor; Dean, University College  
Gregg C. Collins (PhD Yale)  
Assistant Professor  
Betty Contrer (PhD Northwestern)  
Clinical Associate in Counseling Psychology  
Fay Lomax Cook (PhD Chicago)  
Professor; also Institute for Policy Research  
Thomas D. Cook (PhD Stanford)  
Professor; also Sociology, Institute for Policy Research  
Solomon Cytrynbaum (PhD Michigan)  
Professor; also Psychiatry; Acting Dean, Education and Social Policy  
Gregory Duncan (PhD Michigan)  
Professor; also Institute for Policy Research  
Robert B. Duncan (PhD Yale)  
Professor; also Organization Behavior  
Daniel C. Edelson (PhD Northwestern)  
Assistant Professor; also Computer Science  
Eric U. Edstrom Jr. (MA Northwestern)  
Clinical Associate in Teacher Education  
William Filstead (PhD Northwestern)  
Associate Adjunct Professor  
Pam Foley (PhD Northwestern)  
Clinical Associate in Counseling Psychology  
Kenneth D. Forbus (PhD MIT)  
Professor; also Computer Science  
Norman Frey (MS Northwestern)  
Clinical Associate in Teacher Education  
Janice Friedman (PhD IIT)  
Senior Lecturer  
Karen C. Fuson (PhD Chicago)  
Professor  
Kathleen M. Galvin (PhD Northwestern)  
Professor; also Communication Studies; Associate Dean, School of Speech  
Geraldine O. Garner (EdD Virginia Tech)  
Associate Professor; also Cooperative Engineering Education; Director, Murphy Cooperative Engineering Education Program; Assistant Dean, McCormick School  
Dedre Gentner (PhD Calif San Diego)  
Professor; also Psychology  
Robert Goldberg (MS Illinois)  
Clinical Associate in Teacher Education  
Louis M. Gomez (PhD Calif Berkeley)  
Associate Professor; also Computer Science; Associate Dean for Research and Development, Education and Social Policy  
David J. Greenberg (PhD Illinois)  
Associate Adjunct Professor  
Barry S. Greenwald (PhD Michigan)  
Associate Adjunct Professor  
David L. Gutmann (PhD Chicago)  
Professor; also Psychiatry  
Gunhild Hagestad (PhD Minnesota)  
Associate Professor; also Sociology  
Louis M. Gomez (PhD California)  
Associate Professor; also Computer Science; Associate Dean for Research and Development, Education and Social Policy  
David J. Greenberg (PhD Illinois)  
Associate Adjunct Professor  
Barry S. Greenwald (PhD Michigan)  
Associate Adjunct Professor  
David L. Gutmann (PhD Chicago)  
Professor; also Psychiatry  
Gunhild Hagestad (PhD Minnesota)  
Associate Professor; also Sociology  
Douglas A. Halsted (PhD Northwestern)  
Clinical Associate in Teacher Education  
Sophie Haroutunian-Gordon (PhD Chicago)  
Associate Professor; Director, M S Program  
William R. Hazard (JD Kent, PhD Northwestern)  
Professor  
Lail Herman, (PhD Northwestern)  
Senior Lecturer  
Barton J. Hirsch (PhD Oregon)  
Professor; also Institute for Policy Research  
Jordan Jacobowitz (PhD Hebrew)  
Senior Lecturer  
Julie Johnson (M S Stanford)  
Clinical Associate in Teacher Education  
Alex Kass (PhD Yale)  
Assistant Professor; also Institute for the Learning Sciences  
Richard Koerner (M A Ohio U)  
Clinical Associate in Teacher Education  
Carol D. Lee (PhD Chicago)  
Assistant Professor  
Susan A. Lee (PhD Northwestern)  
Professor; also Theatre  
Dan A. Lewis (PhD Calif Santa Cruz)  
Professor; also Institute for Policy Research; Director of Undergraduate Education, Education and Social Policy  
James W. Lindsay (M A Wesleyan)  
Clinical Associate in Teacher Education  
Ved P. McAdams (PhD Harvard)  
Charles Deering McCormick Professor of Teaching Excellence  
John L. McKnight (BS Northwestern)  
Professor; also Communication Studies; Associate Director, Institute for Policy Research  
Robert J. Menge (EdD Columbia)  
Professor
Janice M. Uh (PhD Northwestern)  
Senior Lecturer

Paul G. Nilsen (MA Northwestern)  
Clinical Associate in Teacher Education

Paula M. Olszewski-Kubilius (PhD Northwestern)  
Research Associate Professor; Director, Center for Talent Development

Andrew Ortony (PhD London)  
Professor; also Institute for the Learning Sciences

William Parker (MA Chicago)  
Clinical Associate in Counseling Psychology

Elizabeth C. Parkinson (MS Northwestern)  
Clinical Associate in Teacher Education

Charles M. Payne (PhD Northwestern)  
Associate Professor; also African American Studies, Sociology

William M. Pinsof (PhD York)  
Professor; also Family Institute

David Renz (MA Northwestern)  
Clinical Associate in Teacher Education

James E. Rosenbaum (PhD Harvard)  
Professor; also Sociology, Institute for Policy Research

Linda Rubinowitz (PhD Northwestern)  
Clinical Associate in Counseling Psychology

Roger C. Schank (PhD Texas)  
John Evans Professor of Computer Science, Psychology, and Education and Social Policy; also Computer Science, Psychology; Director, Institute for the Learning Sciences

Vicki Seglin (PhD Northwestern)  
Senior Lecturer

Joan Sextro (MA Northwestern)  
Clinical Associate in Teacher Education

Lynn Simon (PhD New School)  
Senior Lecturer

Diana T. Slaughter-Defoe (PhD Chicago)  
Professor; also African American Studies, Institute for Policy Research

Bruce D. Spencer (PhD Yale)  
Professor; also Statistics

Sandra R. Waxman (PhD Pennsylvania)  
Wender-Lewis Research and Teaching Professor; also Psychology

Anne T. Wells (PhD Chicago)  
Senior Lecturer

Catherine Weigel-Foy (MSW Chicago)  
Lecturer

Oswald Werner (PhD Indiana)  
Professor; also Anthropology

John W. Wick (PhD Iowa)  
Professor

David E. Wiley (PhD Wisconsin)  
Professor

Carol Wilk (PhD Northwestern)  
Senior Lecturer

Jeremy R. Wilson (PhD Northwestern)  
Professor; Associate Provost, Northwestern University

Janice Witzel (PhD Northwestern)  
Clinical Associate in Counseling Psychology

Robert R. McCormick School of Engineering and Applied Science

Administration

Jerome B. Cohen, ScD  
Dean of the McCormick School, McCormick School Professor, and Frank C. Engelhart Professor of Materials Science

Stephen H. Carr, PhD  
Associate Dean for Undergraduate Engineering and Professor of Biomedical Engineering, Chemical Engineering, and Materials Science and Engineering

Marla Dwyer, MS  
Assistant Dean for Undergraduate Engineering

Geraldine O. Garner, EdD  
Associate Dean; Director, Murphy Cooperative Engineering Education Program; Associate Professor of Cooperative Engineering Education

Joseph Holtgreive, EdM  
Assistant Dean for Undergraduate Engineering

Joan S. Mete  
Assistant Dean for Administration

Joel D. Meyer, MS  
Senior Assistant Dean for Administration

John M. Torkelson, PhD  
Associate Dean for Graduate Studies and Research, Bette and Neison Harris Professor of Teaching Excellence, Professor of Chemical Engineering and Materials Science and Engineering

Biomedical Engineering

Robert A. Linsenmeier (PhD Northwestern)  
Professor and Chair; also Neurobiology and Physiology

Ernest Byrom (PhD Northwestern)  
Adjunct Assistant Professor

Stephen H. Carr (PhD Case Western Reserve)  
Professor; also Chemical Engineering, Materials Science and Engineering; Associate Dean for Undergraduate Engineering, McCormick School

Dudley S. Childress (PhD Northwestern)  
Professor; also Orthopaedic Surgery
Peter Dallos (PhD Northwestern)
Professor; also Audiology, Neurobiology and Physiology, Otolaryngology; John Evans Professor of Neuroscience
Scott L. Delp (PhD Stanford)
Associate Professor; also Physical Medicine and Rehabilitation
Jerome M. Garden (MD Northwestern)
Professor; also Dermatology
Jeremy L. Gilbert (PhD Carnegie Mellon)
Associate Professor; also Biological Materials
Matthew R. Glucksberg (PhD Columbia)
Professor
Thomas K. Goldstick (PhD Calif Berkeley)
Professor; also Chemical Engineering
James B. Grothberg (PhD Johns Hopkins, MD Chicago)
Professor; also Anesthesia
Kevin E. Healy (PhD Pennsylvania)
Assistant Professor; also Biological Materials
James C. Houk (PhD Harvard)
Professor; also Physiology
Roger Judd (PhD SUNY Buffalo)
Associate Professor
David M. Kelso (PhD Northwestern)
Associate Professor
Andrew E. Kertesz (PhD Northwestern)
Professor; also Electrical and Computer Engineering, Psychology
Francis J. Klocke (MD SUNY Buffalo)
Professor; also Cardiovascular Institute
Shu Q. Liu (PhD Calif San Diego)
Associate Professor
Lyle F. Muckros (PhD Calif Berkeley)
Professor; also Chemical Engineering
David J. Mogul (PhD Northwestern)
Associate Professor
Barry W. Peterson (PhD Rockefeller)
Professor; also Physical Medicine and Rehabilitation, Physiology
William Z. Rymer (PhD Monash, MD Melbourne)
Professor; also Physical Medicine and Rehabilitation, Physiology
Alan V. Sahakian (PhD Wisconsin)
Associate Professor; also Electrical and Computer Engineering
Kenneth G. Spears (PhD Chicago)
Professor; also Chemistry
John B. Troy (DPhil Sussex)
Associate Professor; also Neurobiology and Physiology

Jeffery Vender (MD Northwestern)
Professor; also Anesthesia
Joseph T. Walsh (PhD MIT)
Associate Professor
Christopher M. Waters (PhD Vanderbilt)
Assistant Professor
Hans U. Wessl (MD Albert Ludwigs, Germany)
Professor; also Pediatrics
Harvey Wigdor (DDS Illinois)
Adjunct Associate Professor
Tai Te Wu (PhD Harvard)
Professor; also Biochemistry, Molecular Biology, and Cell Biology

Chemical Engineering
Julio M. Ottino (PhD Minnesota)
Walter P. Murphy Professor and Chair
Annelise Barron (PhD Calif Berkeley)
Assistant Professor
Linda J. Broadbelt (PhD Delaware)
Donald and June Brewer Assistant Professor
Wesley R. Burghardt (PhD Stanford)
Associate Professor
Stephen H. Carr (PhD Case Western Reserve)
Professor; also Biomedical Engineering, Materials Science and Engineering; Associate Dean for Undergraduate Engineering, McCormick School
William C. Cohen (PhD Princeton)
Professor
Buckley Crist Jr. (PhD Duke)
Professor; also Materials Science and Engineering
Joshua S. Dranoff (PhD Princeton)
Professor
Thomas K. Goldstick (PhD Calif Berkeley)
Professor; also Biomedical Engineering
Harold H. Kung (PhD Northwestern)
Professor; also Chemistry
Michael L. Mavrovouniotis (PhD MIT)
Associate Professor
William M. Miller (PhD Calif Berkeley)
Associate Professor
Lyle F. Muckros (PhD Calif Berkeley)
Professor; also Biomedical Engineering
E. Terry Papoutsakis (PhD Purdue)
Professor
Gregory Ryskin (PhD Caltech)
Associate Professor
Randall Q. Snurr (PhD Berkeley)
Assistant Professor
John M. Torkelson (PhD Minnesota)
Bette and Nelson Harris Professor of Teaching Excellence; also Materials Science and Engineering; Associate Dean for Graduate Studies and Research, McCormick School

Civil Engineering
Joseph L. Schofer (PhD Northwestern)
Professor and Chair; also Transportation Center, Institute for Policy Research
Jan D. Achenbach (PhD Stanford)
Walter P. Murphy Professor of Civil Engineering; McCormick School Professor; also Engineering Sciences and Applied Mathematics, Mechanical Engineering; Director, Center for Quality Engineering and Failure Prevention
Zdenek P. Bazant (PhD Czech Acad of Sciences)
Walter P. Murphy Professor of Civil Engineering; also Materials Science and Engineering
Ted B. Belytschko (PhD IIT)
Walter P. Murphy Professor of Civil and Mechanical Engineering; also Mechanical Engineering
Isaac M. Daniel (PhD IIT)
Professor; also Mechanical Engineering
Mark S. Daskin (PhD MIT)
Professor; also Industrial Engineering and Management Sciences, Transportation Center
Charles H. Dowding (PhD Illinois)
Professor
Richard J. Finno (PhD Stanford)
James N. and Margie M. Krebs Professor
Joseph A. FitzPatrick (PhD Harvard)
Associate Professor
Jean-François Gaillard (DSc Paris)
Assistant Professor
Robert S. Gemmill (PhD Harvard)
Professor
Kimberley A. Gray (PhD Johns Hopkins)
Associate Professor
Takeru Igusa (PhD Calif Berkeley)
Professor
Hamlin M. Jennings (PhD Brown)
Professor; also Materials Science and Engineering
Leon M. Keer (PhD Minnesota)
Walter P. Murphy Professor; also Mechanical Engineering
Frank S. Koppelman (PhD MIT)
Professor; also Transportation Center
Raymond J. Krizek (PhD Northwestern)
Stanley F. Pepper Professor of Engineering; Director, Master of Project Management Program
Barbara-Ann Gamboa Lewis (PhD Calif Berkeley)
Associate Professor
Wing Kam Liu (PhD Caltech)
Professor; also Mechanical Engineering
Marvin L. Manheim (PhD MIT)
Professor; also Policy and Environment, Transportation Center
Brian Moran (PhD Brown)
Associate Professor; also Mechanical Engineering
Howard W. Reeves (PhD Michigan)
Assistant Professor
Bruce E. Rittmann (PhD Stanford)
John Evans Professor of Environmental Engineering
Edwin C. Rossow (PhD MIT)
Professor
John W. Rudnicki (PhD Brown)
Professor; also Mechanical Engineering, Geological Sciences
Surendra P. Shah (PhD Cornell)
Walter P. Murphy Professor of Civil Engineering; Director, NSF Science and Technology Center for Advanced Cement-Based Materials
David A. Stahl (PhD Illinois Urbana)
Professor
Athanasios Ziliaskopoulos (PhD Texas Austin)
Louis Berger Junior Professor of Civil Engineering

Computer Science
Roger C. Schank (PhD Texas)
John Evans Professor of Computer Science, Psychology, and Education and Social Policy and Chair; also Education and Social Policy, Psychology; Director, Institute for the Learning Sciences
Bradley Adelberg (PhD Stanford)
Assistant Professor
Lawrence A. Birnbaum (PhD Yale)
Associate Professor; also Education and Social Policy, Institute for the Learning Sciences
Eric Domeshk (PhD Yale)
Assistant Professor
Daniel C. Edelson (PhD Northwestern)
Assistant Professor; also Education and Social Policy
Kenneth D. Forbus (PhD MIT)
Professor; also Education and Social Policy
Louis M. Gomez (PhD Calif Berkeley)
Associate Professor; also Education and Social Policy
Ian D. Horswill (PhD MIT)
Assistant Professor
Christopher K. Riesbeck (PhD Stanford)
Associate Professor; Associate Director, Institute for the Learning Sciences
Electrical and Computer Engineering
Abraham H. Haddad (PhD Princeton)
Henry and Isabelle Dever Professor of Electrical and Computer Engineering and Chair
Prithviraj Banerjee (PhD Illinois Urbana)
Walter P. Murphy Professor of Electrical and Computer Engineering
Alvin Bayliss (PhD NYU)
Charles Deering McCormick Professor of Teaching Excellence; also Engineering Sciences and Applied Mathematics
Arthur R. Butz (PhD Minnesota)
Associate Professor
Robert P. H. Chang (PhD Princeton)
Professor; also Materials Science; Director, Materials Research Center
Alok Choudhary (PhD Illinois Urbana)
Associate Professor
Randy A. Freeman (PhD Calif Santa Barbara)
Assistant Professor
Scott Hauck (PhD Washington)
Assistant Professor
Lisa Hellerstein (PhD Calif Berkeley)
Assistant Professor
Lawrence J. Henschen (PhD Illinois)
Professor; also Mathematics
Seng-Tiong Ho (PhD MIT)
Associate Professor
Bruce K. Holmer (PhD Calif Berkeley)
Assistant Professor
Michael L. Honig (PhD Calif Berkeley)
Ameritech Professor of Information Technology
Carlo R. Kannwurf (PhD Northwestern)
Professor
Aggelos K. Katsaggelos (PhD Georgia Tech)
Associate Professor
Andrew E. Kertesz (PhD Northwestern)
Professor; also Biomedical Engineering, Psychology
John B. Ketterson (PhD Chicago)
Professor; also Fayerweather Professor of Physics, Physics and Astronomy
Gilbert K. Krulee (PhD MIT)
Professor; also Industrial Engineering and Management Sciences, Linguistics, Psychology
Prem Kumar (PhD SUNY Buffalo)
Professor
Srikanta P. R. Kumar (PhD Yale)
Associate Professor
Chung-Chieh Lee (PhD Princeton)
Professor
Der-Tsai Lee (PhD Illinois)
Professor
Wei-Chung Lin (PhD Purdue)
Associate Professor
Michel E. Machic (PhD UCLA)
Professor
Nathan Newman (PhD Stanford)
Associate Professor
Jorge Nocedal (PhD Rice)
Professor
Martin A. Plonus (PhD Michigan)
Professor
Morteza A. Rahimi (PhD Iowa)
Professor; Vice President for Information Technology, Northwestern University
Manijeh Razeghi (PhD Paris)
Walter P. Murphy Professor of Electrical and Computer Engineering; Director, Center for Quantum Devices
Ali V. Sahakian (PhD Wisconsin)
Associate Professor; also Biomedical Engineering
Majid Sarrafzadeh (PhD Illinois)
Professor
Peter I. Scheuermann (PhD SUNY)
Professor
Eric J. Schwabe (PhD MIT)
Assistant Professor
Allen Tafove (PhD Northwestern)
Professor
Valerie E. Taylor (PhD Calif Berkeley)
Associate Professor
Bruce W. Wessels (PhD MIT)
Professor; also Materials Science and Engineering
Chi-Haur Wu (PhD Purdue)
Associate Professor
Horace P. Yuen (ScD MIT)
Professor

Engineering Sciences and Applied Mathematics
Bernard J. Matkowsky (PhD NYU)
John Evans Professor of Applied Mathematics and Chair; also Mechanical Engineering
Jan D. Achenbach (PhD Stanford)
McCormick School Professor; also Walter P. Murphy Professor of Civil Engineering, Mechanical Engineering; Director, Center for Quality Engineering and Failure Prevention
Alvin Bayliss (PhD NYU)
Charles Deering McCormick Professor of Teaching Excellence; also Electrical and Computer Engineering
David L. Chopp (PhD Calif Berkeley)
Assistant Professor

Stephen H. Davis (PhD Rensselaer)

Walter P. M urphy Professor; also M echanical Engineering

William L. Kath (PhD Caltech)
Associate Professor

Moshe Matalon (PhD Cornell)
Professor; also M echanical Engineering

Micha l J. Miksis (PhD NYU)
Professor

W. Edward Olmstead (PhD Northwestern)
Professor of Applied M athematics; also M athematics

Hermann Riecke (PhD Bayreuth)
Associate Professor

Mary Silber (PhD Berkeley)
Assistant Professor

Vladimir A. Volpert (PhD Chernogolovka)
Assistant Professor

Michael J. Miksis (PhD NYU)
Professor

Barry Nelson (PhD Purdue)
Associate Professor

David Simchi-Levi (PhD Tel Aviv)
Professor

Ajitkumar C. Tamhane (PhD Cornell)
Professor; also Statistics

Charles W. N. Thompson (PhD Northwestern, LLB Harvard)
Professor

Mark P. Van Oyen (PhD Michigan)
Assistant Professor

Materials Science and Engineering
Yip-Wah Chung (PhD Calif Berkeley)
Professor and Chair

Scott A. Barnett (PhD Illinois)
Professor

Zdenek P. Bazant (PhD Czech Academy of Science)
Professor; also Walter P. Murphy Professor of Civil Engineering

Micha l Bedzyk (PhD SUNY Albany)
Associate Professor

Stephen H. Carr (PhD Case Western Reserve)
Professor; also Biomedical Engineering, Chemical Engineering; A ssociate Dean for Undergraduate Engineering, McCormick School

Robert P. H. Chang (PhD Princeton)
Professor; also Electrical and Computer Engineering; D irector, Materials Research Center

Jerome B. Cohen (ScD MIT)
Frank C. Engelhart Professor of Materials Science; T echnological Institute Professor; D ean, McCormick School

Buckley Crist Jr. (PhD Duke)
Professor; also Chemical Engineering

Vinayak P. Dravid (PhD Lehigh)
Associate Professor

David C. Dunand (PhD MIT)
Associate Professor

Katharine T. Faber (PhD Calif Berkeley)
Professor

H. M. Jennings (PhD Brown)
Professor; also Civil Engineering

D. Lynn Johnson (PhD Utah)
Walter P. Murphy Professor

Laurence D. Marks (PhD Cambridge)
Professor

Mark S. Daskin (PhD MIT)
Professor and Chair; also Civil Engineering, Transportation Center

Bruce Ankenman (PhD Wisconsin)

Morris E. Fine Junior Professor of M aterials and M anufacturing

Collette R. Couillard (PhD Northwestern)
Associate Professor and Charles D eering McCormick Professor of T eaching Excellence

Robert H. Fourer (PhD Stanford)
Professor

Donald N. Frey (PhD Michigan)
Professor

Aaron J. Gellman (PhD MIT)
Professor; D irector, Transportation Center

Gordon B. Hazen (PhD Purdue)
Associate Professor

Wallace J. Hopp (PhD Michigan)
Professor

Arthur P. Hurter Jr. (PhD Northwestern)
Professor; also Finance, Transportation Center

Gilbert K. Kruee (PhD MIT)
Professor; also Electrical and Computer Engineering, Linguistics, Psychology

Sanjay Mehrotra (PhD Columbia)
Associate Professor
Thomas O. Mason (PhD MIT)
James N. and Margie M. Krebs Professor
Masahiro M. Meshii (PhD Northwestern)
John Evans Professor of Materials Science
Gregory B. Olson (ScD MIT)
Professor and Associate Chair
Monica O'Vera de la Cruz (PhD Cambridge)
Associate Professor
David N. Seidman (PhD Illinois)
John Evans Professor of Materials Science
Morrise E. Fine Junior Professor of Materials and Manufacturing
Kenneth R. Shull (PhD Cornell)
Professor
Peter W. Voorhees (PhD Rensselaer)
Professor
Johannes Weertman (ScD Carnegie)
Morrise E. Fine Junior Professor of Materials Science and Engineering; also Geological Sciences
Julia R. Weertman (ScD Carnegie)
Professor
Bruce W. Wessels (PhD MIT)
Professor; also Electrical and Computer Engineering

Mechanical Engineering
Ted B. Belytschko (PhD IIT)
Walter P. Murphy Professor of Civil and Mechanical Engineering and Chair; also Civil Engineering
Jan D. Achenbach (PhD Stanford)
McMurry School Professor; also Walter P. Murphy Professor of Civil Engineering, Engineering Sciences and Applied Mathematics; Director, Center for Quality Engineering and Failure Prevention
L. Catherine Brinson (PhD Caltech)
Assistant Professor
Jian Cao (PhD MIT)
Assistant Professor
Herbert S. Cheng (PhD Pennsylvania)
Walter P. Murphy Professor
James E. Colgate (PhD MIT)
Associate Professor
James G. Conley (PhD Northwestern)
Pentair–Eugene and Bonnie L. Nugent Associate Professor

Isaac M. Daniel (PhD IIT)
Professor; also Civil Engineering
Stephen H. Davis (PhD Rensselaer)
Walter P. Murphy Professor; also Engineering Sciences and Applied Mathematics
Kornel H. Ehmann (PhD Wisconsin)
Professor
Leon M. Keer (PhD Minnesota)
Professor; also Walter P. Murphy Professor of Civil Engineering
Alan L. Kister (PhD Johns Hopkins)
Professor
Arthur A. Kovitz (PhD Princeton)
Professor
Sridhar Krishnaswamy (PhD Caltech)
Associate Professor
Elmer E. Lewis (PhD Illinois)
Professor
Seth Lichter (PhD MIT)
Professor
Wing Kam Liu (PhD Caltech)
Professor; also Civil Engineering
Richard M. Lueptow (PhD Michigan State)
Associate Professor
Moshe Matalon (PhD Cornell)
Professor; also Engineering Sciences and Applied Mathematics
Bernard J. Matkowsky (PhD NYU)
John Evans Professor of Applied Mathematics
Brian Moran (PhD Brown)
Professor; also Civil Engineering
Michael A. Peshkin (PhD Carnegie Mellon)
Associate Professor
John W. Rudnicki (PhD Brown)
Professor; also Civil Engineering, Geological Sciences
Siavash H. Sohrab (PhD Calif San Diego)
Associate Professor
Henry W. Stoll (PhD Illinois)
Professor
Richard S. Tankin (PhD Harvard)
Professor
John A. Walker (PhD Texas)
Professor
William R. D. Wilson (PhD Belfast)
James N. and Nancy J. Farley Professor of Manufacturing and Entrepreneurship
Man-C. Yuen (PhD Harvard)
Professor
McCormick School At Large
Geraldine O. Garner (EdD Virginia Tech)
Associate Professor of Cooperative Engineering
Education; Associate Dean and Director of Cooperative
Engineering Education

Medill School of Journalism

Administration
Mary L. Dedinsky, MSJ
Associate Dean, Director of Teaching Media Program,
and Associate Professor of Journalism
Jack C. Doppelt, JD
Associate Dean and Associate Professor of Journalism
Roger C. Boye, MSJ
Assistant Dean, Director of Undergraduate Studies,
and Associate Professor of Journalism
Clarke L. Caywood, PhD
Chair of Integrated Marketing Communications Program
and Associate Professor
Jonathan Ziomek, MSJ
Assistant Dean, Director of Graduate Editorial
Programs, and Associate Professor of Journalism
Jean E. Shedd, MM
Assistant Dean, Finance and Planning

Editorial
David Abrahamson (PhD NYU)
Associate Professor
Roger C. Boye (MSJ Northwestern)
Associate Professor; Director of Undergraduate Studies;
Assistant Dean, Medill School of Journalism
Neil Chase (BA Michigan)
Assistant Professor
Mary B. Coffman (MA Bowling Green)
Associate Professor; Codirector of Washington, D.C.,
Program
Susan Mango Curtis (BFA Virginia Commonwealth)
Assistant Professor
Patricia K. Dean (MSc Northwestern)
Associate Professor; Chair of Broadcast News Program
Mary L. Dedinsky (MSJ Northwestern)
Associate Professor; Director of Teaching Media
Program; Associate Dean, Medill School of Journalism
Jack C. Doppelt (JD Chicago)
Associate Professor; Associate Dean, Medill School of
Journalism
Sharon Downey (BA Cleveland State)
Senior Lecturer

Marda Dunsky (MA University of Chicago)
Assistant Professor
Ava Greenwell (MSJ Northwestern)
Assistant Professor; Director of Teaching Television
Program
George H. Harm (MBA Loyola)
Associate Professor; Chair of Newspaper Program
Lee W. Huebner (PhD Harvard)
Professor
Carolyn Kitch (MA Penn State)
Assistant Professor
John Kupetz (MSJ Northwestern)
Assistant Professor; Director of Placement
Craig Lamay (MA North Carolina Chapel Hill)
Assistant Professor; Director of Project on Curricular
and Program Development
John M. Lavine (BA Carleton)
Professor; Director of Newspaper Management Center
Donna M. Leff (PhD Cali Berkeley)
Professor
Robert J. McClory (MSJ Northwestern)
Associate Professor
David L. Nelson (MSJ Northwestern)
Associate Professor
Abe Peck (BA NYU)
Professor; Chair of Magazine Program
David Protess (PhD Chicago)
Professor; also Institute for Policy Research;
Director, Gannett Urban Journalism Center
John Reque (MA Minnesota)
Senior Lecturer; Director of Teaching Newspaper
Program
Rick Rockwell (MA USC)
Assistant Professor
Richard A. Schwarzlose (PhD Illinois)
Professor
Ellen Shearer (BA Wisconsin)
Associate Professor; Codirector of Washington, D.C.,
Program
Frank Starr (BA Indiana)
Assistant Professor
Mindy S. Trossman (JD Loyola)
Senior Lecturer
Mary Ann Damme Weston (MSJ Northwestern)
Associate Professor
Charles Whitaker (MSJ Northwestern)
Assistant Professor; Director of Teaching Magazine
Program
James Ylisela (BA DePaul)
Lecturer
Jonathan Ziomek (MSJ Illinois)
Associate Professor; Director of Graduate Editorial Programs; Assistant Dean, Medill School of Journalism

Integrated Marketing Communications
Martin P. Block (PhD Michigan State)
Professor
Clarke L. Caywood (PhD Wisconsin)
Associate Professor; Chair of Integrated Marketing Communications Program
Lisa Fortini-Campbell (PhD Washington)
Associate Professor
Edward Malthouse (PhD Northwestern)
Assistant Professor
Francis J. Mulhern (PhD Texas Austin)
Assistant Professor
Don E. Schultz (PhD Michigan State)
Professor
Edward J. Spiegel (MBA Dartmouth)
Associate Professor
Stanley I. Tannenbaum (BA Temple)
Associate Professor

Associate Professor

School of Music

Administration
Bernard J. Dobroski, PhD
Dean of the School of Music and Professor of Music
Richard D. Green, PhD
Associate Dean and Associate Professor of Musicology
Frederick L. Hemke, AMusD
Associate Dean and Professor of Saxophone
Brennetta Simpson, ED
Assistant Dean, Director of Undergraduate Studies, and Assistant Professor of Music Education
Robert Barris, MMus
Cochair of Music Performance Studies and Associate Professor of Bassoon
John S. Bucchieri, PhD
Chair of Academic Studies and Composition and Associate Professor of Music Theory
Heather A. Landes, MMus
Director of Music Admissions and Financial Aid
Marcia Bosits Norrman, DMus
Assistant Dean, Director of Undergraduate Studies, and Associate Professor of Piano

Thomas L. Willis, PhD
Executive Assistant to the Dean and Associate Professor of Musicology
Sara M. Martin Rosheger, MA
Assistant to the Dean and Lecturer in Music

Academic Studies and Composition

Music Composition Program
M. William Karlins (PhD Iowa)
Professor
Michael Pisaro (DMus Northwestern)
Senior Lecturer
Stephen L. Syverud (PhD Iowa)
Associate Professor; Coordinator of Music Composition Program; also Music Technology
Amnon Wolman (DMus Stanford)
Associate Professor; also Music Technology
Jay Alan Yim (PhD Harvard)
Associate Professor

Music Education Program
Paul A. Aliapoulios (MusEd Boston)
Professor
James Kjelland (PhD Texas)
Associate Professor; also String Instruments
Margaret W. Mistak (BMusEd Northwestern)
Lecturer in Guitar
Stephen Peterson (DMus Northwestern)
Associate Professor; Coordinator of Conducting and Ensembles Program; Associate Director of Bands
Brennetta Simpson (EdD Columbia)
Assistant Professor; Assistant Dean and Director of Undergraduate Studies, School of Music
Peter R. Webster (PhD Eastman)
Associate Professor; Coordinator of Music Education Program; also Music Technology
Nancy Whitaker (EdD Illinois)
Assistant Professor

Musicology Program
Thomas Bauman (PhD Calif Berkeley)
Professor
Paul F. Berliner (PhD Wesleyan)
Professor of Ethnomusicology
Richard D. Green (PhD Illinois)
Associate Professor; Associate Dean, School of Music
William V. Porter (PhD Yale)
Professor
Administration and Faculty • Music

Stephen Peterson (DMus Northwestern)
Associate Professor; Coordinator of Conducting and Ensembles Program; Associate Director of Bands; also Music Education

Mariusz Smolij (DMusA Eastman)
Assistant Professor; Assistant Director of Orchestras

Mallory Thompson (DMusA Eastman)
Professor; Director of Band Organizations

Victor Yampolsky (Dipl Moscow Conservatory)
Carol R. and Arthur L. Rice University Professor of Music Performance; Director of Orchestras

Piano, Organ, and Church Music Program

Stephen Alltop (MMus Eastman)
Senior Lecturer in Organ and Church Music; Director of Music, Alice Millar Chapel; also Conducting and Ensembles

David Craighead (MMus Westminster College)
Adjunct Professor of Organ and Church Music

Laurence Davis (Conservatorium of Sydney)
Professor of Piano; Coordinator of Piano Program

David Kaiserman (DMusA Iowa)
Professor of Piano

*Richard Webster (MMus Northwestern)
Lecturer in Organ and Church Music

Sylvia Wang (DMusA Eastman)
Associate Professor of Piano

String Instruments Program

*Catherine Brubaker (BA Juilliard)
Lecturer in Strings

*Li-Kuo Chang
Lecturer in Viola
Elizabeth Cifani (MMus Northwestern)  
Lecturer in Harp

*Michael Hovnanian (BFA Calif Inst Arts)  
Lecturer in Double Bass

Hans Jorgen Jensen (Dipl Royal Academy of Music, Denmark)  
Professor of Cello; Coordinator of String Instruments Program

Myron Kartman (MusAD Boston)  
Professor of Violin

James Kjelland (PhD Texas)  
Associate Professor; also Music Education

*Blair Milton (MMus Indiana)  
Assistant Professor of Violin

*Jonathan Pegis  
Lecturer in Cello

Gerardo Ribeiro (Opporto Music Conservatory)  
Professor of Violin

Peter Slowik (M M us Eastman)  
Associate Professor of Viola

*A Gary Stucka (M M us Chicago Musical College)  
Lecturer in Strings

*Anne Waller (MMus Southern M ethodist)  
Lecturer in Guitar

**Voice and Opera Program**

Richard M. Alderson (DM us Northwestern)  
Professor

Karen Brunssen (BM us Luther)  
Associate Professor; Coordinator of Voice Program

M ignon Dunn  
Professor

Michael Ehrman (M SSNorthwestern)  
Associate Professor; Resident Director of Opera; Coordinator of Opera Program

Elizabeth Fischer (M M us Pius XII Institute, Florence)  
Professor

Bruce Hall (M M us Michigan)  
Senior Lecturer

*Kurt R. Hansen (M M us Northwestern)  
Lecturer

*Sunny Joy Langton (BM us Indiana)  
Assistant Professor

Rhoda Levine  
Professor; Director of Opera Studies

*Carmen M eda (Dipl Vienna State Academy)  
Lecturer

Frederick Ockwell (M A Washington)  
Associate Professor; Opera Conductor; also Conducting and Ensembles

William Warfield (BA Eastman)  
Professor

**Wind and Percussion Instruments Program**

Robert Barris (M M us Michigan)  
Associate Professor of Bassoon; Cochair of Music Performance Studies

*J. Lawrie Bloom (M M us Arizona State)  
Assistant Professor of Clarinet

*Clark Brody (BM us Eastman)  
Lecturer in Clarinet

Mike Burritt (MMus Eastman)  
Associate Professor of Percussion

*Frank Crisafulli  
Professor of Trombone

*Russell Dagon (M M us Northwestern)  
Professor of Clarinet

*Luther Didrickson (M M us Northwestern)  
Assistant Professor of Trumpet

*Richard Graef (M M us Indiana)  
Lecturer in Flute

*David Griffin (M M us Northwestern)  
Lecturer in Horn

*Leslie Grimm (M M us Northwestern)  
Lecturer in Clarinet

*Jonathan Helton (DM us Northwestern)  
Lecturer in Saxophone; Coordinator of Wind and Percussion Instruments Program

Frederick L. Hemke (AM usd Wisconsin)  
Professor of Saxophone; Associate Dean, School of M usic

*John Henes (Cert Soc Teachers of Alexander M ethod)  
Lecturer

*Alex Klein (Artist’s Dipl Oberlin)  
Associate Professor of Oboe

*Michael Kocour (BS Illinois)  
Lecturer in Jazz Studies

*Walfrid Kuja (M M us Eastman)  
Professor of Flute

*Arthur Linsner (M M us Northwestern)  
Lecturer in Trombone and Chamber Music

Rex Martin (M M us Northwestern)  
Associate Professor of Tuba and Euphonium

*Everett M cCurdy (M M us Northwestern)  
Lecturer in Trumpet

*Norman Schweikert (BM us Eastman)  
Associate Professor of Horn
Administration and Faculty • Speech

Diane Hill (MA Northwestern)
Senior Lecturer in Speech and Language Pathology

Doris J. Johnson (PhD Northwestern)
Professor of Learning Disabilities

Mead C. Killion (PhD Northwestern)
Adjunct Professor of Audiology and Hearing Sciences

Dawn Koch (PhD Northwestern)
Research Associate Professor of Audiology and Hearing Sciences

Nina Kraus (PhD Northwestern)
Professor of Audiology and Hearing Sciences; also Neurobiology and Physiology, Otolaryngology

Charles R. Larson (PhD Washington)
Professor of Speech and Language Pathology; also Neurobiology and Physiology

Jerilyn Logemann (PhD Northwestern)
Ralph and Jean Sundin Professor of Communication Sciences and Disorders; Professor of Speech and Language Pathology; also Neurology, Otolaryngology

Monica Maso (MA Wisconsin)
Lecturer in Audiology and Hearing Sciences

Rana Matteson (PhD UCLA)
Assistant Professor of Learning Disabilities

Karla McGregor (PhD Purdue)
Assistant Professor of Speech and Language Pathology

Sara Meyers (MA Washington University)
Lecturer in Audiology and Hearing Sciences

Jane Rosenberg (PhD Northwestern)
Lecturer in Learning Disabilities

Maria Secaras (MA Northwestern)
Lecturer in Percussion

Gail Williams (M M us Northwestern)
Associate Professor of Horn

Melinda Rice (MA Northwestern)
Lecturer in Learning Disabilities

Ann Oehring (MA Northwestern)
Lecturer in Speech and Language Pathology

M ario A. Ruggiero (PhD Chicago)
Hugh Knowles Professor of Hearing Sciences; Head, Audiology and Hearing Sciences Program

David Rutherford (PhD Northwestern)
Professor of Speech and Language Pathology

M aria Secaras (MA Northwestern)
Lecturer in Audiology

Jonathan Siegel (PhD Washington)
Associate Professor of Audiology and Hearing Sciences

Bruce Smith (PhD Texas)
Professor of Speech and Language Pathology; Head, Speech and Language Pathology Program

School of Speech

Administration
David Zarefsky, PhD
Dean of the School of Speech and Professor of Communication Studies

Kathleen M. Galvin, PhD
Associate Dean and Professor of Communication Studies

Cathy S. Martin, M A
Associate Dean and Lecturer in Speech

James G. Webster, PhD
Associate Dean and Professor of Radio/Television/Film and Communication Studies

Communication Sciences and Disorders
Dean C. Garstecki (PhD Illinois)
Professor of Audiology and Hearing Sciences and Chair; also Otolaryngology

Margaret Aylsworth (MA Northwestern)
Assistant Professor of Speech and Language Pathology

Frances K. Block (MA Northwestern)
Senior Lecturer in Speech and Language Pathology

Joanne F. Carlisle (PhD Connecticut)
Associate Professor of Learning Disabilities

Mary Ann Cheatham (PhD Northwestern)
Research Associate Professor of Audiology and Hearing Sciences

Peter Dallos (PhD Northwestern)
Hugh Knowles Professor of Audiology; Professor of Audiology and Hearing Sciences; John Evans Professor of Neuroscience; also Biomedical Engineering, Neurobiology and Physiology, Otolaryngology

Burt Evans (PhD Texas)
Research Associate Professor of Audiology and Hearing Sciences

Pamela Fiebig (MA Northwestern)
Senior Lecturer in Audiology and Hearing Sciences

Kim Fisher (PhD Oklahoma)
Assistant Professor of Speech and Language Pathology
Amy Soifer (MA Northwestern)  
Lecturer in Speech and Language Pathology

Laszlo Stein (PhD Northwestern)  
Professor of Audiology and Hearing Sciences

Addison Stone (PhD Chicago)  
Professor of Learning Disabilities; Head, Learning Disabilities Program

Cynthia Thompson (PhD Kansas)  
Associate Professor of Speech and Language Pathology

Sharon L. Veis (MA Northwestern)  
Senior Lecturer in Speech and Language Pathology

Donna S. Whilton (PhD Wisconsin)  
Research Associate Professor of Audiology and Hearing Sciences

Laura A. Wilber (PhD Northwestern)  
Professor of Audiology and Hearing Sciences

Beverly A. Wright (PhD Texas)  
Assistant Professor of Audiology and Hearing Sciences

Yi Xu (PhD Connecticut)  
Assistant Professor of Speech and Language Pathology

J. Scott Yaruss (PhD Syracuse)  
Assistant Professor of Speech and Language Pathology

Steven G. Zecker (PhD Wayne State)  
Associate Professor of Learning Disabilities

Communication Studies

James S. Ettema (PhD Michigan)  
Professor and Chair; also Institute for Policy Research

Paul H. Arntson (PhD Wisconsin)  
Professor; also Institute for Policy Research

Dwight Conquergood (PhD Northwestern)  
Associate Professor and Charles Deering McCormick Professor of Teaching Excellence; also Performance Studies

Pamela J. Cooper (PhD Purdue)  
Professor

L. Scott Deatherage (PhD Northwestern)  
Senior Lecturer and Director of Forensics

Thomas B. Farrell (PhD Wisconsin)  
Professor

Kathleen M. Galvin (PhD Northwestern)  
Professor; also Education and Social Policy; Associate Dean, School of Speech

G. Thomas Goodnight (PhD Kansas)  
Professor

Jean Goodwin (PhD Wisconsin)  
Assistant Professor

Susan Herbst (PhD USC)  
Associate Professor

Paul M. Hirsch (PhD Michigan)  
Professor; James L. Allen Distinguished Professor of Strategy and Organization; also Sociology, Newspaper Management Center

Michael C. Leff (PhD UCLA)  
Professor

Gregory T. Makoul (PhD Northwestern)  
Assistant Professor; also Medicine

Thomas A. McCarthy (PhD Notre Dame)  
Professor; also John C. Shaffer Professor of the Humanities, Philosophy

John L. McKnight (BS Northwestern)  
Professor; also Education and Social Policy; Associate Director, Institute for Policy Research

Peter V. Miller (PhD Michigan)  
Associate Professor; also Institute for Policy Research

Newton N. Minow (JD Northwestern)  
Annenberg University Professor; also Radio/Television/Film, Law, Management

Benjamin Page (PhD Stanford)  
Professor; Gordon Scott Fulcher Professor of Decision Making; also Political Science

Randall S. Peterson (PhD California Berkeley)  
Assistant Professor

Irving J. Rein (PhD Pittsburgh)  
Professor

Michael E. Roloff (PhD Michigan State)  
Professor

Joseph B. Walther (PhD Arizona)  
Assistant Professor

James G. Webster (PhD Indiana)  
Professor; also Radio/Television/Film; Associate Dean, School of Speech
