

Double-counting rule for non-WCAS students with a second major and/or minor in WCAS

* As a general rule, your school's **distribution courses** and electives courses may double-count as department/program courses or "related courses" for a WCAS second major and as courses used to fulfill the requirements of a minor in WCAS (minors pursued by Medill students are an exception.)

* Different rules apply to **dual bachelor's degree** students (i.e., students earning degrees from two undergraduate schools.)

*Students pursuing more than one major/minor in WCAS are also subject to WCAS double-counting rules.

* In general, **McCormick students** may double-count courses used to fulfill the requirements of their engineering degree as department/program courses or "related courses" for a WCAS major or WCAS minor but some restrictions may apply. McCormick students must check with the Undergraduate Engineering Office (TECH L269) on possible double-counting restrictions with their WCAS major/minor.
